INDEPENDENT AUDITOR'S REPORT

To GSP Credit Opportunities Fund 2.0-A, L.P.:

Opinion

We have audited the financial statements of GSP Credit Opportunities Fund 2.0-A, L.P. (the "Partnership"), which comprise the statement of assets, liabilities and partners' capital, including the schedule of investment, as of December 31, 2025, and the related statements of operations, changes in partners' capital, and cash flows for the year then ended, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2025, and the results of its operations, changes in its partners' capital, and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Partnership and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Cash and cash equivalents, beginning of year		30,502
Cash and cash equivalents, end of year	$	903,199

The accompanying notes are an integral part of these financial statements.

1. Organization and Business

GSP Credit Opportunities Fund 2.0-A, L.P. (the "Partnership"), formed on April 19, 2023, is organized as a Delaware limited partnership and commenced operations on September 26, 2023. The initial closing date of the Partnership was September 29, 2023 (the "Initial Closing Date"). The final closing date of the Partnership is the six-month anniversary of the Initial Closing Date, or such later date approved by the General Partner (the "Final Closing Date"). The Partnership elected to proceed with its Final Closing Date on March 26, 2024, prior to the Final Closing Date of September 29, 2024.

The General Partner has organized GSP Credit Opportunities Fund 2.0-B, L.P. (the "Blocker Fund"), a Delaware limited partnership (together with the Partnership, the "Fund"). The Blocker Fund will participate proportionally in all investments of the Fund on substantially the same terms and conditions as the Partnership, except as necessary or advisable to address tax, legal, regulatory, or other considerations.

GSP Credit Opportunities Fund 2.0 GP, L.P. (the "General Partner"), a Delaware limited partnership, serves as general partner of the Fund. The General Partner will control the business and affairs of the Fund. The General Partner may, on behalf of the Fund, appoint the Management Company to manage the affairs of the Fund. Garnett Station Partners, LLC (the "Management Company"), a Delaware limited liability company, serves as the management company with respect to the Fund.

The Partnership, General Partner, and GSP COF 2.0 Blocker, L.P. formed GSP COF 2.0 Aggregator, L.P. (the "Aggregator"), as a Delaware limited partnership, on October 18, 2023. The Fund, General Partner, and Aggregator formed GSP COF 2.0 Splitter, L.P. (the "Splitter"), as a Delaware limited partnership on October 18, 2023. Through the Splitter, the Fund will seek to acquire a portfolio primarily consisting of senior debt, junior debt, debt-like investments and other instruments. Through the Aggregator, the Fund will aggregate partner commitments with the purpose of obtaining a line of credit. The Aggregator invests solely into the Splitter.

SEI Global Services, Inc. (the "Administrator") serves as the administrator to the Fund.

The term of the Fund will terminate on the seventh anniversary of the Final Closing Date, but may be extended for up to two one-year periods at the discretion of the General Partner.

Capitalized terms not defined herein shall have the same meaning as described in the Amended and Restated Agreement of Limited Partnership (the "LPA").

2. Summary of Significant Accounting Policies

Basis of Presentation

The Partnership prepares its financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S. GAAP").

The Partnership qualifies as an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 946, Financial Services - Investment Companies ("ASC 946"), and therefore is applying the specialized accounting and reporting guidance in ASC 946.

Effective in the current year, the Partnership changed the presentation of its investment in the Aggregator to reflect the investment as an interest in an investee fund rather than as direct interests in the underlying investments. This change does not represent a change in the measurement of income, but rather a reclassification among components of investment income (loss) and gain (loss) presentation, with no impact on partners' capital or results of operations.

Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities, including the fair value of investments, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in partners' capital from operations during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents
Cash and cash equivalents represents cash on deposit, which may at times exceed federally insured limits and this potentially subjects the Partnership to a concentration of credit risk. Cash and cash equivalents may also include money market funds that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value. The Partnership has not experienced any losses on these accounts.

Investment Transactions and Related Income and Expense
Investment transactions are recorded upon closing of the transaction. Unsettled purchases and sales as of the reporting date are reflected in payable for investments purchased and receivable for investments sold, respectively, in the accompanying Statement of Assets, Liabilities and Partners' Capital. Realized gains and losses on investment transactions are determined using the specific identification method. Income and expenses are recognized on an accrual basis. Discounts and premiums to the face amount of debt investments are accreted and amortized using the straight-line method over the life of the respective debt investments. Premiums to the face amount of callable debt securities that have noncontingent call features that are callable at fixed prices and on preset dates are amortized using the effective interest rate method to the next call date when a call option at a specified price becomes exercisable. If there is no remaining premium or if there are no further call dates, the Partnership resets the effective yield using the payment terms of the debt security. All costs related to consummated investment transactions not reimbursed by the portfolio companies are capitalized as part of the cost basis of the investment.

The Partnership records its transactions in investment funds on an effective date basis, which is the date a capital call notice or distribution notice is due. Distributions received, whether in the form of cash or securities, are applied as either a reduction of the investment's cost, income distributions from investment funds, or net realized gain (loss) from investments in investment funds depending upon the circumstances of the distribution.

Investment, at fair value
The Management Company will utilize various valuation techniques as appropriate in each circumstance and for which sufficient data are available in measuring fair value of the investments made by the Partnership. In some cases, a single valuation technique will be appropriate; in other cases multiple valuation techniques will be necessary. The Management Company will determine fair value as the point in the range of acceptable valuations that is most representative of fair value given specific facts and circumstances. Such valuation techniques will be consistent with, but not limited to, the following approaches:

- Market Approach – using prices, earnings multiples, industry valuation benchmarks and other relevant information generated by market transactions involving market comparable companies as well as multiples for publicly traded companies.
- Income Approach – using valuation techniques to convert estimated future cash flows into a single (discounted) present value amount.
- Cost / Recent Transaction Approach – Cost or recent transaction price may represent fair value for a limited period following an acquisition or investment provided no material changes have occurred that would affect valuation.

The Partnership is, for U.S. GAAP purposes, considered an investment company and therefore applies specialized accounting principles, and reflect its investment on the Statement of Assets, Liabilities and Partners' Capital at their estimated fair value, with unrealized gains and losses resulting from changes in fair value reflected in net change in unrealized gain/(loss) from investment in the Statement of Operations. Fair value is the amount that would be received to sell an asset and foreign currency, or paid to transfer a liability, in an orderly transaction between market participants at the measurement date (i.e. the exit price).

The Partnership is permitted, as a practical expedient, to estimate the fair value of investments in certain entities based on net asset value ("NAV") per share or its equivalent if the NAV of such investments is calculated in a manner consistent with the measurement principles of ASC 946.

The Partnership holds investments in affiliated investment vehicles managed by the Management Company. Because these vehicles are not publicly traded and quoted market prices are not readily available, the Partnership measures these investments at fair value using the investee vehicles' reported NAV as a practical expedient as of the reporting date. The Partnership's pro rata share of each vehicle's NAV is recorded as an investment in the accompanying Statement of Assets, Liabilities and Partners' Capital. Changes in the fair value of these investments are recognized in net change in unrealized gain (loss) on investment in the accompanying Statement of Operations.

Due to the inherent uncertainty of the valuation methodology, the valuations do not necessarily represent amounts that might ultimately be realized from an investment, and the differences could be material to the financial statements.

Income Taxes
The Partnership is classified as a partnership for U.S. federal income tax purposes. As a result, the Partnership itself is not subject to U.S. federal income taxes; instead each partner is individually liable for income taxes, if any, on its share of the Partnership's net taxable income.

Authoritative guidance on accounting for and disclosure of uncertainty in tax positions requires the General Partner to determine whether a tax position of the Partnership is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For those tax positions subject to the more likely than not threshold, the tax amount recognized in the financial statements is estimated based upon the likelihood of being realized upon ultimate settlement with the relevant taxing authority.

The Partnership will file tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Partnership is subject to examination by various taxing authorities in the countries in which the Management Company operates and, in certain circumstances, countries in which investments are made. The Partnership is not currently under audit by any taxing authorities.

The Partnership is subject to U.S. federal, state and local or non-U.S. income tax audits from commencement of operations through December 31, 2025. Although the outcome of tax audits is always uncertain, the General Partner believes that any material amounts relating to tax claims have been accrued. As of December 31, 2025, no tax liability or expense has been accrued.

Professional Fees and Other Expenses
Included in professional fees are audit, legal, tax preparation, and tax compliance fees. Other expenses include, but are not limited to, custody fees, transfer agent expenses, bank charges, brokerage commissions and other investment costs, costs of preparing reports to the Limited Partners, consultants and other outside advisors (e.g., consultants for special projects relating to the operation of the Partnership, operating partners for specific deal related work including out of pocket expenses) including financial and tax accounting reporting services and fund administrative services, costs or expenses incurred with respect to any market information systems, pricing and valuation services including expenses of any appraiser in connection with the valuation of investments or other property of the Partnership, costs associated with the establishment and maintenance of any credit facility, costs of maintaining compliance with all federal, state, and local rules or regulations or any other regulatory agency, insurance, taxes, and costs of litigation relating to the business of the Partnership.

3. Fair Value Measurements

The Partnership follows ASC Topic 820, *Fair Value Measurement* ("ASC 820"), which establishes a framework for measuring fair value and requires disclosures regarding fair value measurements. ASC 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The Partnership uses a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy is categorized into three levels based on the inputs as follows:

Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date.

Level 2 Quoted prices for similar assets or liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Management Company. The Management Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Management Company's perceived risk, or liquidity, of that instrument.

Investments for which fair value is measured using NAV per share as a practical expedient are not categorized within the fair value hierarchy. As of December 31, 2025, the Partnership's investment in the Splitter through the Aggregator has a fair market value of $92.4 million measured on this basis.

For the year ended December 31, 2025, there were no purchases of investments classified as Level 3. Transfers of investments in or out of Level 3, if any, are recorded as of the end of the reporting period. Assets and liabilities are transferred from Level 2 to Level 3 or from Level 3 to Level 2 as a result of changes in levels of liquid market observability when subject to various criteria, as discussed above. For the year ended December 31, 2025, there were $22.2 million of transfers out of Level 3.

As of December 31, 2025, the Partnership held an investment in the Splitter through the Aggregator in the amount of $92.4 million, representing 98.6% of partners' capital, which is included in the accompanying Statement of Assets, Liabilities and Partners' Capital. The investment objective of the Splitter is to invest in absolute-value investment opportunities, whose industry and geography are noted in the accompanying Schedule of Investment. The Splitter does not currently allow for redemptions. The Partnership may receive income and capital gains distributions from the Splitter, the timing of which is uncertain. The Partnership is not required to commit capital beyond its unfunded capital commitments, and the Partnership did not have unfunded capital commitments to the Splitter as of December 31, 2025. The fair value of the Partnership's pro rata ownership of investments within the Splitter, presented in the table below, exceeded 5% of the Partnership's partners' capital as of December 31, 2025:

Country / Industry	Security Type	Description	Principal	Fair Value	% of Partners' Capital
Singapore / Consumer Discretionary	Term Loan	OYO Hotels (Oravel Stays) TL 1st Lien	$ 5,029,798	$ 5,247,116	5.60%

The Splitter had posted cash collateral, of which the Partnership's attributable share through the Aggregator was approximately $32.1 million as of December 31, 2025. The cash was posted pursuant to the applicable collateral arrangement with Wells Fargo & Co. in connection with the Splitter's derivative agreement.

4. Commitments and Contingencies

As of December 31, 2025, the Partnership had unfunded commitments to its investment of $8.6 million through the Splitter.

In the normal course of its operations, the Partnership may directly or indirectly enter into contracts that contain a variety of representations and warranties and provide general indemnifications. The Partnership's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Partnership. However, based on experience, the General Partner expects the risk of loss to be remote and has not had prior claims or losses pursuant to these contracts.

5. Partners' Capital, Commitments and Distributions

Limitation of Limited Partners Liability

Generally, except as provided under applicable law or under the LPA, a Limited Partner shall not be liable for the Partnership's debts, obligations and liabilities in any amount in excess of the unused capital commitment of such Limited Partner.

Capital Accounts Allocation

The Partnership shall maintain a separate capital account for each partner. Items of Partnership income, gain, loss, expense or deduction for any fiscal period shall be allocated among the partners in such manner that the capital account of each partner shall be equal to the respective net amount that would be distributed to such partner from the Partnership or for which such partner would be liable to the Partnership.

Committed Capital

The Partnership has total commitments of $103.7 million.

As of December 31, 2025, the capital commitments of the Partnership consisted of $100.7 million committed by the Limited Partners (97.11% of commitment) and $3.0 million committed by the General Partner (2.89% of commitment). The maximum amount of remaining capital commitments that could have been called for investment by the Limited Partners and General Partner is $27.1 million and $0.9 million, respectively. No Limited Partner may sell, assign, pledge, or otherwise transfer their interest without the consent of the General Partner. Additionally, no Limited Partner can redeem their interest in the Partnership.

From inception through December 31, 2025, capital contributions net of recallable capital distributions to the Partnership total $75.7 million (73.0% of commitment). From inception through December 31, 2025, capital contributions and recallable capital distributions to the Partnership total $216.9 million and $141.2 million, respectively.

Distributions, Carried Interest and Give Back

The General Partner shall use its commercially reasonable efforts to cause the Partnership to distribute (i) cash current income and short-term investment income at least annually and (ii) the full net cash proceeds from the disposition of investments promptly, but in no event later than 90 days after receipt thereof, in each case, subject to the availability of cash after paying Partnership expenses and after setting aside appropriate reserves for anticipated expenses, liabilities, obligations and commitments of the Partnership.

Investment Proceeds from any Investment shall be apportioned preliminarily among the Partners in proportion to their Sharing Percentages with respect to the applicable Investment. The amount so apportioned to any Affiliated Partner shall be distributed to such Person, and the amount so apportioned to each other Partner shall be distributed between the General Partner and such Partner as follows:

(a) first, 100% to such Partner until such Partner has received cumulative distributions equal to such Partner's aggregate Investment Contributions made with respect to Realized Investments;

(b) second, 100% to such Partner until such Partner has received cumulative distributions equal to such Partner's Allocable Share of such Partner's Cost Contributions;
(c) third, 100% to such Partner until the Unpaid Preferred Return of such Partner is reduced to zero;
(d) fourth, 100% to the General Partner until the General Partner has received cumulative distributions with respect to such Partner equal to 20% of the cumulative amount of distributions made to such Partner and made or being made to the General Partner with respect to such Partner; and
(e) fifth, thereafter, (i) 20% to the General Partner and (ii) 80% to such Partner.

The General Partner may, in its sole discretion, designate certain partners as "affiliated partners" that may be exempted from all or some portion of the carried interest and/or the Management Fee. There was carried interest allocated to the General Partner of $1.9 million for the year ended December 31, 2025 and $3.2 million from inception through December 31, 2025. There were carried interest distributions to the General Parter of $3.5 million for the year ended December 31, 2025 and $3.5 million from inception through December 31, 2025.

The General Partner is entitled to receive carried interest distributions in accordance with the distribution provisions. Such carried interest distributions are subject to a contractual giveback obligation.

In accordance with the terms of the LPA, upon the liquidation of the Partnership, the General Partner is required to determine, on a partner-by-partner basis, whether the aggregate distributions received by each Limited Partner are less than the amounts to which such Limited Partner is entitled pursuant to the LPA. To the extent such deficiency exists, the General Partner shall be obligated to contribute to the Partnership an amount equal to such deficiency, and the Partnership shall, promptly following receipt thereof, distribute such amounts to the applicable Limited Partners.

The General Partner's obligation to make such contributions is subject to specified limitations, including, but not limited to, a cap equal to the aggregate amount of carried interest distributions previously received by the General Partner with respect to the applicable Limited Partner that have not been returned to the Partnership, net of applicable taxes.

The LPA further provides that such giveback obligations shall be allocated among the General Partner and other persons entitled to receive carried interest distributions on a several (and not joint) basis, generally in proportion to the aggregate amount of unreturned carried interest distributions received by each such person.

The LPA also provides for interim giveback determinations at specified intervals during the term of the Partnership. At each such determination date, the General Partner is required to calculate whether a giveback obligation would exist assuming a hypothetical liquidation of the Partnership's assets at fair value as of such date. To the extent such interim giveback obligation is determined to exist, the General Partner shall be required to contribute to the Partnership the applicable amount, which shall be distributed to the relevant Limited Partners.

Any such interim contributions shall be subject to limitations consistent with those applicable to the final giveback obligation and shall be treated in accordance with the LPA, including as adjustments or advances with respect to future distributions.

The LPA further provides that, under certain circumstances, the Partnership may require Partners to return previously distributed amounts in order to satisfy liabilities or obligations of the Partnership. Any such returned amounts shall be taken into account in the determination of the General Partner's giveback obligation. There was $0.2 million of unrealized giveback allocation to General Partner as of December 31, 2025.

6. Management Fees

The Partnership shall pay the Management Company in advance on a semi-annual basis, commencing on the Initial Closing Date, an annual fee (the "Management Fee"), as compensation for managing the affairs of the Partnership equal to 1.5% of an amount equal to the Non-Affiliated Partners' Percentage (a percentage (i) the numerator of which is the aggregate commitments of all partners, other than affiliated partners and (ii) the denominator of which is the aggregate commitment of all partners) of the aggregate commitments. The Management Fee shall be reduced to 1.0% of the Non-Affiliated Partners' Percentage of an amount equal to (x) the aggregate amount of Investment Contributions made with respect to Investments that have not been disposed of minus (y) the aggregate amount of any permanent write-downs of Investments that have not been disposed of after the Investment Period expires, or other such earlier event occurs, as defined in the LPA.

The Management Fee payable in any semi-annual period shall be reduced by an amount equal to the Non-Affiliated Partners' Percentage of 100% of the Partnership's portion of any other fees received by the General Partner or the Management Company during the immediately preceding semi-annual period. In addition, the Management Fee payable in any semi-annual period shall be reduced by an amount equal to the aggregate amount of all Placement Fees (defined below) and Excess Organizational Expenses (defined below) paid or reimbursed by the Partnership during the immediately preceding semi-annual period. In the event that the amount of fee reduction referred to in the two preceding sentences exceeds the Management Fee for such semi-annual period, such excess shall be carried forward to reduce the Management Fee payable in following semi-annual periods. Please refer to Note 7 for details of other fees paid to related parties.

"Placement Fees" means any private placement or finders' fees paid by the Partnership to placement agents, finders or other third-parties performing similar services in connection with the organization or funding of the Partnership (but not including any out-of-pocket costs and expenses incurred by such persons that are paid or reimbursed by the Partnership).

For the year ended December 31, 2025, Management Fee totaled $1.5 million.

Organizational Expenses

The Partnership is responsible for all costs and expenses incurred in connection with the Partnership's operations ("Organizational Expenses") as defined in the LPA. To the extent such Organizational Expenses are paid by the Investment Company or the General Partner, those entities shall be reimbursed by the Partnership. The Partnership shall pay or reimburse the General Partner for the Partnership's pro rata share of all organizational expenses. The Partnership's pro rata share of organizational expenses in excess of the Partnership's pro rata share of $1.5 million ("Excess Organizational Expenses") shall reduce the Management Fee as set forth in the Management Fee above. For the year ended December 31, 2025, there were no organizational expenses.

7. Related Party Transactions

In connection with its investment activities, the Partnership may, from time to time, engage in certain transactions including purchases and sales from or with other Management Company managed entities, which are executed in accordance with the Management Company's policies and procedures. For the year ended December 31, 2025, the Partnership through the Aggregator deployed $9.8 million in purchase payments with other Management Company managed entities.

Shared expenses and contributions to the Splitter incurred by the Fund can be paid using available cash from both the Partnership and the Blocker Fund. For the year ended December 31, 2025, amounts due from affiliated entities include $22,373 due from the Blocker Fund for expense payments.

As of December 31, 2025, partners affiliated with the Investment Manager had capital balances of $2.5 million, representing 2.6% of partners' capital.

8. Line of Credit

On November 29, 2023, the Aggregator as borrower, together with the Partnership as a pledgor, entered into a $50.0 million line of credit for the purpose of providing bridge financing and funding for costs and expenses permitted under the LPA. The Aggregator is subject to loan interest charges of the greater of the Prime Rate minus 0.70% or 5.50% on outstanding line of credit payable. For any amounts of unused line of credit, the Aggregator is charged 0.35%. The line of credit is due to mature on November 27, 2026. The Partnership is not the legal borrower under the facility; however, as pledgor and through its ownership interest in the Aggregator, the amounts presented below represent the Partnership's attributable share of the Aggregator's outstanding borrowings and related financing costs. As of December 31, 2025, the Partnership's attributable share of outstanding borrowings under the line of credit was $4.0 million. As of

December 31, 2025, the Partnership's attributable share of interest payable was $0.1 million. For the year ended December 31, 2025, the Partnership's attributable share of interest expense was $0.4 million. Interest paid attributable to the Partnership for the year ended December 31, 2025 was $0.4 million.

As of December 31, 2025, the Partnership and Aggregator are in compliance with all financial covenants as set forth in the credit agreement.

9. Financial Instruments and Off-Balance Sheet Risks

Investments in Private Companies
The Partnership's investment portfolio is expected to consist primarily of securities issued by privately held companies, and operating results in a specified period will be difficult to predict. Such investments involve a high degree of business and financial risk that can result in substantial losses.

Market Risk
Market risk is the potential loss the Partnership may incur as a result of changes in the fair value of a particular financial instrument. The Partnership's activities will be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, public health crises, changes in laws, trade barriers, currency exchange controls, and national and international political circumstances.

Concentration Risk
The Partnership will participate in a limited number of investments and may seek to make several investments in one industry or one industry segment or within a short period of time. As a result, the Partnership's investment portfolio could become highly concentrated, and the performance of a few holdings or of a particular industry may substantially affect its aggregate return. Furthermore, to the extent that the capital raised is less than the targeted amount, the Partnership may invest in fewer portfolio companies and thus be less diversified.

Credit Risks
Credit investments are subject to credit risk, which is the likelihood that a company will default in the payment of principal and/or interest on its obligations, among other covenants and requirements. Financial strength and solvency of a company are key factors influencing credit risk. Companies may face intense competition, changing business and economic conditions or other developments that may adversely affect their performance and increase credit risk. In addition, subordination, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of the Partnership. In addition, companies may contest enforcement of foreclosure or other remedies, seek bankruptcy protection against such enforcement and/or bring claims for lender liability in response to actions to enforce mortgage obligations.

Interest Rate Risk
Credit investments are subject to interest rate risks; changes in the prevailing market interest rates could negatively affect the value of certain of the Partnership's investment. The ability of companies or businesses in which the Partnership may invest to refinance debt instruments or repay debt obligations may depend on their ability to obtain financing, including by selling new securities or instruments in the high yield debt or bank financing markets. Volatility and instability in the securities market may also increase the risks inherent in certain of the Partnership's investments. Interest rate changes may affect the value of a debt instrument indirectly and directly. In general, rising interest rates will negatively impact the price of a fixed rate credit instrument and falling interest rates will have a positive effect on price.

Liquidity Risk
An investment in the Partnership should be viewed as an illiquid investment. It is uncertain as to when profits, if any, will be realized. Losses on unsuccessful investments may be realized before gains on successful investments are realized. The Partnership's ability to dispose of investments may be limited. Illiquidity may result from the absence of an established market for the investments, as well as legal, contractual or other restrictions on their resale by the Partnership. Dispositions of investments may be subject to contractual and other limitations on transfer or other restrictions that would interfere with subsequent sales of such investments or adversely affect the terms that could be obtained upon any disposition thereof.

Impact of Government Regulation, Reimbursement and Reform

Certain industry segments in which the Partnership may invest are (or may become) (i) highly regulated at both the federal and state levels in the U.S. and internationally and (ii) subject to frequent regulatory change. Certain segments may be highly dependent upon various government (or private) reimbursement programs. While the Partnership intends to invest in companies that seek to comply with applicable laws and regulations, the laws and regulations relating to certain industries are complex, may be ambiguous or may lack clear judicial or regulatory interpretive guidance.

10. Financial Highlights

The following represents the financial highlights for the year ended December 31, 2025:

	Limited Partners
IRR inception through December 31, 2024	13.18 %
IRR inception through December 31, 2025	11.84 %
Ratios to average Limited Partners' Capital	
Expenses	2.44 %
Carried interest allocation	2.41 %
Total expenses and carried interest allocation	4.85 %
Net investment income (loss)	(2.44) %

The IRR of the Limited Partners since inception of the Partnership is net of all fees and carried interest allocated to the General Partner and computed based on the actual dates of capital contributions, capital distributions and ending capital (residual value) of the Limited Partners as of the end of each year. An individual Limited Partner's return may vary from the return above due to the timing of the Limited Partner's contribution and different fee arrangement, if any.

Average Limited Partners' capital for the year was calculated based on the weighted average at the end of each quarter of the Limited Partners' capital reduced by carried interest allocation, if any, which includes any capital contributions or distributions during the year as well as the allocation of net increase (decrease) in Limited Partners' capital for the year.

The expense ratio is determined by dividing the operating expenses allocated to Limited Partners by the average Limited Partners' capital.

The net investment income (loss) ratio is determined by dividing the net investment income (loss) by the average Limited Partners' capital. The net investment income (loss) ratio does not reflect carried interest allocated to the General Partner.

The expense and net investment income (loss) ratios do not reflect the income and expense incurred by the Aggregator.

11. Subsequent Events

The Management Company has evaluated all subsequent events or transactions for potential recognition or disclosure through April 24, 2026, the date on which these financial statements were available to be issued and has determined that there were no subsequent events requiring adjustment to or disclosure in the accompanying financial statements.
