**FIRST-QUARTER REPORT**

**For the Quarter Ending March 31, 2025**

## Table of Contents

## Important Information

This quarterly report is for informational purposes only and is not intended to recommend any investment discussed in this report. This quarterly report is not an offer to sell nor the solicitation of an offer to purchase an interest in any investment vehicle managed or sponsored by Sentinel Capital Partners, L.L.C. or its affiliates (collectively, “Sentinel”).

Statements in this quarterly report are made as of the dates specified in this report, and Sentinel has no obligation to update the information in this quarterly report.

All information with respect to industry data has been obtained from sources believed to be reliable and current; however, none of Sentinel or its respective affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of any information contained herein (including, but not limited to, economic, market, or other information) obtained from third parties, and each expressly disclaims any responsibility or liability therefor. The delivery of this information shall not, under any circumstances, create any implication that the information contained herein is correct in all respects, including as of any time subsequent to the date of this report. Further, Sentinel does not undertake an obligation to update such information at any time after such date. Unless otherwise stated herein, information is current through March 31, 2025.

Any investment in any private fund managed or sponsored by Sentinel is subject to various risks, none of which is outlined herein. A description of certain risks involved with an investment in any private fund managed or sponsored by Sentinel can be found in the offering memorandum of such private fund; such risks should be carefully considered by prospective investors before they make any investment decision.

This quarterly report contains certain performance information for existing Sentinel private funds and selected portfolio companies of such funds. The portfolio company case studies are intended to illustrate the various types of portfolio company investments that Sentinel has made. Performance information for all portfolio companies is available from Sentinel upon request.

The benchmark statistics for 2019-vintage private equity funds reflect the investment performance of a collection of U.S. private equity buyout funds selected by Cambridge Associates LLC, including fully liquidated funds, formed in 2019 (the "CA 2019 Benchmark"). The returns of the funds included in the CA 2019 Benchmark are net of all applicable fees, expenses and carried interest. The Standard & Poor's 500 Index (the "S&P 500") sets forth the performance of a well-known broad-based stock market index, assuming reinvestment of dividends. The S&P 500 contains only seasoned equity securities. The Dow Jones Industrial Average (the "DJIA") sets forth the price-weighted average performance of 30 actively traded "blue chip" stocks of primarily industrial issuers.

Investors generally cannot invest directly in the CA 2019 Benchmark, the S&P 500, or the DJIA, which are presented for reference purposes only. The statistical data regarding the CA 2019 Benchmark, the S&P 500, and the DJIA have been obtained from sources believed to be reliable. Sentinel intends for the Sentinel funds to pursue, and they have previously pursued, a private equity strategy, although the Sentinel funds may also make, and they have previously made, investments outside of this strategy from time to time and may not pursue other strategies followed by some or all of the funds included in the CA 2019 Benchmark, nor will the Sentinel funds invest, and nor did they previously invest, in the funds comprising the CA 2019 Benchmark. The S&P 500 and the DJIA are commonly used, broad-based benchmarks for various markets and are provided only for general comparison against those markets. Investors generally are not able to invest in these indices. The criteria for including particular securities in these indices are different than Sentinel's criteria for choosing investments for its funds. Specifically, the Sentinel funds do not invest in the securities comprising these indices. Rather, the Sentinel funds generally invest in portfolios of control investments in lower middle market businesses in the United States and Canada in specific industry sectors (as set forth in the funds' offering materials and governing documents). In addition, an investment in any Sentinel fund generally will be subject to expenses, management fees, and carried interest charged or payable by the fund, none of which are reflected in these indices. For the foregoing and other reasons, the returns achieved by the Sentinel funds and the returns of the CA 2019 Benchmark, the S&P 500, and the DJIA should not be considered comparable.

The historical returns achieved by any prior funds or individual investments are not a prediction of future performance or a guarantee of future results, and there can be no assurance that these or comparable returns will be achieved by investments, individually or in the aggregate, made by any existing or future Sentinel private fund.

As used herein, "gross IRR" represents the gross compound annual rate of return based on realized and unrealized proceeds using quarterly cash flows and incorporates valuing the remaining debt positions at accreted cost and valuing the remaining equity positions based on EBITDA multiples at the date of investment. Gross IRR is calculated before the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "gross multiple of cost" and "gross multiple of investment" are reflected on a gross basis and do not reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "levered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses. An individual limited partner's levered net IRR may vary based on the timing of capital contributions and distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Levered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of March 31, 2025 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the Partnership's Agreement of Limited Partnership (the "LPA"). Calculations of levered net IRRs in respect of investment and performance data included and/or referred to herein are based on the payment date of capital contributions received from limited partners, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

As used herein, "unlevered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses (but excluding interest expense on any subscription-based credit facility). An individual limited partner's unlevered net IRR may vary based on the timing of distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Unlevered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of March 31, 2025 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the LPA. Calculations of unlevered net IRRs in respect of investment and performance data included and/or referred to herein are based on the closing/funding date of each applicable investment, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

Note that a feature in the LPA provides for an increase in the carried interest payable to the Partnership's general partner, from 20% to 25%, if certain return thresholds are met, provided that the distributions in respect of such increased carried interest may not be distributed to the Partnership's general partner until the investment period of the Partnership terminates. The calculation of the Partnership's unlevered and levered net IRRs presented herein assumes that the Partnership's investment period has not terminated (as was true at the time of issuance hereof). However, if the calculation were to assume, alternatively, that the investment period had terminated and the relevant return thresholds had been met, then the carried interest rate applied in respect of distributions in excess of the limited partners' aggregate capital contributions and a 9% preferred return thereon would be 25%, and the unlevered and levered net IRRs of the Partnership would be reduced accordingly.

As used herein, "DPI" or "distributed/paid-in" means distributions received by limited partners relative to contributed capital. DPI is reflected on a net basis and reflects the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

As used herein, "TVPI" or "total value/paid-in" or "net multiple of cost" means distributions received by limited partners and the unrealized value relative to contributed capital. TVPI and net multiple of cost are reflected on a net basis and reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

Presentation of net performance information for subsets (realized and unrealized) of the Partnership is a hypothetical estimate of net performance because actual net returns cannot be calculated for a subset of portfolio investments due to the collective nature of fund fees and expenses. Net performance figures for this subset of the Partnership are estimated and do not represent actual performance experienced by investors. Sentinel has used the gross-net spread at the fund level to calculate such net performance. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the fund level. The cumulative and hypothetical composite investment performance data presented herein does not necessarily represent performance achieved by any investor, and reflects investments that were made across multiple Sentinel funds during different economic cycles. Such stated performance reflects neither a specific Sentinel fund nor a group of investments managed as a single portfolio. The actual return realized by any investor in an individual Sentinel fund may differ materially from those reflected or contemplated in the data presented herein. Net performance for individual investments also cannot be calculated without making arbitrary assumptions, and for that reason, the performance of individual investments herein is presented on a gross basis. See the "Fund Performance" Section for total fund gross and net performance metrics.

No representation or warranty is made with respect to the reasonableness of any estimates, forecasts, illustrations, prospects or returns, which should be regarded as illustrative only, or that any profits will be realized. This report contains certain "forward-looking statements," which may be identified by the use of forward-looking terminology such as "believe," "expect," "anticipate," "should," "planned," "estimated," "potential," "outlook," "forecast," "plan," or the negatives thereof or other variations thereon or comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, success or lack of success of Sentinel's investment strategies, and statements regarding Sentinel's investment thesis. Any forward-looking statements (including, without limitation, projections of future earnings or value) contained in this quarterly report are only estimates by Sentinel of future results that are based on assumptions made by Sentinel at the time this report was prepared. Each forward-looking statement contained in this quarterly report is subject to known and unknown risks, uncertainties, and other factors that may cause actual results to be materially different from those contemplated in such forward-looking statement. Accordingly, there can be no assurance that the results described by any such forward-looking statement will be attained, and actual results may be significantly different from such forward-looking statement. Sentinel does not undertake any obligation to update or revise the forward-looking statements contained in this quarterly report to reflect events or circumstances occurring after the date this report was prepared or to reflect the occurrence of unanticipated events.

Sentinel seeks to integrate certain sustainability and responsibility ("S&R") factors into its investment process in accordance with its policy and subject to its fiduciary duty and any applicable legal, regulatory, or contractual requirements. There is no guarantee that Sentinel will be able to successfully implement its S&R policy or make investments in companies that create a positive S&R impact while achieving its investment strategy. In addition, applying S&R factors to investment decisions is qualitative and subjective by nature, and there is no guarantee that the criteria used by Sentinel or any judgment exercised by Sentinel will reflect the beliefs or values of any particular investor. There are also significant differences in interpretations of what positive S&R characteristics mean by region, industry and topic. Sentinel's interpretations and decisions may differ from others' views and could evolve over time. In addition, in evaluating an investment, Sentinel expects to depend upon information and data provided by a number of sources, including the relevant investments and/or various reporting sources which could be incomplete, inaccurate or unavailable, and which could cause Sentinel to incorrectly assess a company's S&R practices and/or related risks and opportunities. Sentinel does not intend to independently verify all S&R information reported by investments or third parties.

Further, considering S&R qualities when evaluating an investment could result in the selection or exclusion of certain investments based on Sentinel's view of certain S&R related and other factors and could cause the relevant funds not to make an investment that they would have made or to make a management decision with respect to an investment differently than they would have made in the absence of the S&R Policies, which could negatively impact the Partnership's performance. For the avoidance of doubt, however, Sentinel does not expect to subordinate a Partnership's investment returns or increase the Partnership's investment risks as a result of (or in connection with) the consideration of any S&R factors. Further, S&R practices are evolving rapidly and there are different principles, frameworks, methodologies, and tracking tools being implemented by other asset managers, and Sentinel's adoption and adherence to various such principles, frameworks, methodologies, and tools are expected to vary over time. There is also a growing regulatory interest across jurisdictions in improving transparency regarding the definition, measurement, and disclosure of S&R factors. Sentinel's S&R policies could become subject to additional regulation in the future, and Sentinel cannot guarantee that its current approach will meet future regulatory requirements.

**SENTINEL CAPITAL PARTNERS VI, L.P.**
**SENTINEL CAPITAL PARTNERS VI-A, L.P.**
**SENTINEL CAPITAL INVESTORS VI, L.P.**

**Quarterly Report for the Period Ended March 31, 2025**

Dear Limited Partner:

This letter accompanies the unaudited financial statements for Sentinel Capital Partners VI, L.P. ("Sentinel VI") and its parallel funds—Sentinel Capital Partners VI-A, L.P. ("Sentinel VI-A") and Sentinel Capital Investors VI, L.P. ("Sentinel Investors VI," and together, "the Partnership")—covering the three-month period ended March 31, 2025. In the first quarter, Sentinel VI's net loss from investment operations was $76.6 million, and its net asset value on March 31, 2025 was $1.2 billion; Sentinel VI-A's net loss from investment operations was $6.0 million, and its net asset value was $95.3 million; and Sentinel Investors VI's net loss from investment operations was $1.6 million, and its net asset value was $24.9 million. The losses resulted from unrealized writedowns in the values of seven unrealized portfolio companies—Bandon, Bridgeview, Empire Auto, New You Bariatric, Recreational Group, SmartSign, and SPL. These losses were partly offset by unrealized writeups of four portfolio companies—Catalyst, NSI, RefrigiWear, and TriMech. Our investment in Spectrum is being valued at cost.

At the end of the first quarter, the Partnership had taken down or committed $2.2 billion, or 102.9% of its committed capital, and had invested in 18 companies. Cumulative distributions from inception through March 31, 2025 have been $1.6 billion, or 0.7x contributed capital. Including cumulative distributions, the Partnership's net asset value on March 31, 2025 was $2.9 billion, or 1.3x contributed capital.

The Partnership's 18-company portfolio represents an aggregate purchased enterprise value of $5.6 billion. These companies conform to Sentinel's investment strategy—(i) each is a midmarket business operating in one of our core sectors; (ii) the average EBITDA purchase multiple is 10.1x, reflecting our relative-value strategy; and (iii) each is a leader in a market niche. As of March 31, 2025, the 18-company portfolio had a value including realizations of $2.9 billion, or a 1.4x gross multiple of cost, for a 15.1% gross IRR. Net of fees and expenses, the net levered/unlevered IRR to limited partners is 10.3%/9.8%, the DPI is 0.6x, and the TVPI is 1.2x.[1] The Partnership's portfolio companies are valued in accordance with the provisions of the Financial Accounting Standards Board Accounting Standards Codification Topic 820, Fair Value Measurement.

Highlights of this letter include (i) our response to recent tariffs, (ii) an overview of the Partnership's performance since inception, (iii) brief comments on the completion of the Partnership's primary

[1] *Past performance is not necessarily indicative of future results.* The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics**.** Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

investment phase, (iv) a summary of the fund's lines of credit, (v) a description of liquidity events and an associated distribution to limited partners, (vi) a review of portfolio company valuations, (vii) portfolio company operating metrics, (viii) an organizational update, and (ix) a summary of progress across our other funds.

## Response to Tariffs

Since April, when we wrote to LPs about our response to the recently announced tariffs, we've remained laser-focused on helping our portfolio companies keep their footing amid extreme and ongoing tariff volatility. In a high-profile legal back-and-forth, a federal appeals court temporarily revived one of administration's contested tariffs just hours after a lower court struck it down. While another ruling still blocks most tariffs, the White House has two weeks to appeal—and may take the fight to the Supreme Court, leaving global markets in limbo. Our outlook remains cautious as this chaotic and unpredictable situation unfolds.

Across Sentinel's portfolio, businesses are already experiencing financial repercussions, ranging from subtle to dramatic. For our portfolio companies sourcing from China, even the adjusted 30% tariff is punitive. If the raft of proposed tariffs go into effect, levies targeting countries such as Vietnam and Pakistan would sharply increase cost of goods sold for certain of our companies.

Working closely with their Sentinel deal teams, each portfolio company is executing a tailored strategy to analyze, anticipate, and mitigate both direct and second-order impacts of existing and proposed tariffs. In assessing the direct exposure of Sentinel's 21 active portfolio companies across our platform to the new tariffs, our rough estimates of revenue and EBITDA impacts are as follows:

- High impact (>20%): 9 companies or 45.5% of invested capital
- Medium impact (10–20%): 1 company or 3.1%
- Low impact (<10%): 6 companies or 34.9%
- No material impact: 5 companies or 16.5%

Price increases remain a key lever to offset tariff-related pressure. Our directly affected portfolio companies have the pricing power and customer relationships needed to pass through cost increases when market conditions permit. We are also actively exploring strategies such as direct negotiations with suppliers, alternative sourcing and supply chain diversification, and tariff exclusions with the help of legal and trade advisors.

Beyond higher input costs, we're also observing softer demand, as customers turn skittish in response to the broader macro uncertainty. For example, after the initial tariff announcement on February 1—targeting only Canada and Mexico and preceding the broader March tariffs affecting China, Europe, and many other countries—a Sentinel portfolio company saw a sudden sales drop as distributors anticipated end-buyers delaying purchases. The company, which reported an unexpected 29% decline in first-quarter EBITDA, is now proactively exploring cost-reduction strategies, including state-funded workshare programs, to avoid layoffs while weathering the tariff-driven disruption.

We're also scouring this complex, shifting landscape for opportunities. Our portfolio companies with domestic suppliers or production facilities may be able to gain a competitive edge on a suddenly uneven playing field—whether through price initiatives or acquiring more vulnerable competitors.

We're closely monitoring the rapidly evolving tariff dynamics and will continue providing timely updates on the portfolio's performance.

## Fund Performance

The Partnership began its investment operations on April 1, 2019 and has invested $2.1 billion in 18 portfolio companies. As of March 31, 2025, four investments have been fully realized and generated $1.4 billion of cash proceeds, a 3.4x gross multiple of cost, and a 51.2% gross IRR.[1] The Partnership's $2.1 billion aggregate investment in its 18 portfolio companies has generated $2.9 billion of total value, or a 1.4x gross multiple of cost, for a 15.1% gross IRR, a net levered/unlevered IRR of 10.3%/9.8%, a 0.6x DPI, and a 1.2x TVPI, as shown in the table below.

**Partnership Investment Performance Since Inception[1]**
**As of March 31, 2025**
**($000s)**

| Fund VI (2019 Vintage) | Number of Investments | Amount Invested | Cash Realized | Unrealized Value | Total Value | Gross Multiple of Cost | Gross IRR |
|---|---|---|---|---|---|---|---|
| Realized Investments | 4 | $417,986 | $1,434,718 | $1,534 | $1,436,252 | 3.4x | 51.2% |
| Unrealized Investments | 14 | 1,712,024 | 136,494 | 1,344,203 | 1,480,696 | 0.9x | (5.4%) |
| **Total Fund VI** | **18** | **$2,130,010** | **$1,571,211** | **$1,345,737** | **$2,916,948** | **1.4x** | **15.1%** |
| **Net Levered / Unlevered IRR = 10.3% / 9.8% \| DPI = 0.6x \| TVPI = 1.2x** | | | | | | | |

The Partnership's 0.6x DPI places Sentinel VI in the upper quartile of 2019-vintage private equity funds for this metric. According to Cambridge Associates, through December 31, 2024, the benchmark upper-quartile DPI for U.S. buyout funds established in 2019 was 0.5x, the TVPI 1.8x, and the net IRR 20.9%.[2]

## End of Primary Investment Phase

With the closings of the Spectrum and NSI investments in 2024, the Partnership completed its primary investment phase. Since its inception in 2019, the Partnership has completed 18 platform investments, of which 14 remain active. To build this portfolio, we took down or committed 102.9% of the Partnership's $2.1 billion of committed capital.

## Lines of Credit

The Partnership has access to a $155.0 million warehouse credit facility with BMO Harris Bank and an additional $100.0 million line of credit. As of March 31, 2025, the facilities had zero balances outstanding. Amounts borrowed under the line in the first quarter bore interest at the prime rate minus 0.375%, or SOFR plus 2.775%. As of March 31, 2025, the Partnership was in compliance with all the terms of the loan agreement.

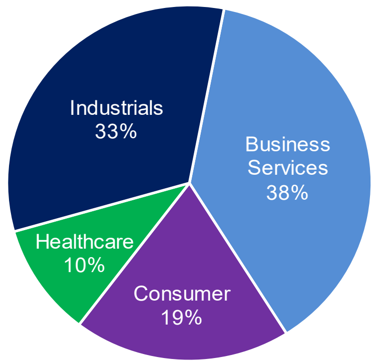
[1] *Past performance is not necessarily indicative of future results.* The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

[2] Please see "Important Information" at the front of this report for more information on the Cambridge Associates benchmark indices and the limitations of comparability.

## Portfolio Construction

The capital invested in the 18-company portfolio is well diversified across our four core industry sectors, as shown in the chart below.

**Sentinel VI[1]**
**($2.2 billion | 102.9% invested | 18 portfolio companies)**



## Liquidity Events and Distributions

In the first quarter, the Partnership received $2.3 million of cash proceeds, or 0.1% of committed capital, from two companies, as shown in the table below.

**Liquidity Events[1]**
**($000s)**

| Company | Date | Proceeds | Description / % Committed Capital |
|---|---|---|---|
| TranSystems | 3/7/2025 | $1,735 | Additional sale proceeds |
| ECM Industries | 3/12/2025 | 557 | Additional sale proceeds |
| **Total 2025 Proceeds** | | **$2,293** | **0.1% Committed Capital** |

Highlights of the liquidity events follow.

**TranSystems**. In March 2025, the Partnership received $1.7 million of escrowed proceeds related to the August 2024 sale. Including all proceeds received through the first quarter and valuing the seller holdback at 50% of face value, TranSystems has returned $278.5 million, or 3.0x gross multiple of cost, for a gross IRR of 39.3%.

**ECM Industries**. In March 2025, the Partnership received $557,352 representing additional proceeds from the 2023 sale. Including all proceeds received through the first quarter and valuing the remaining escrow at 50% of face value, ECM has returned $532.0 million, or a 3.8x gross multiple of cost, for a gross IRR of 57.3%.

The Partnership retained $2.3 million of the proceeds of the distributions received in the first quarter to fund partnership expenses. Because the Partnership Agreement requires the distribution of net proceeds from portfolio investments to the limited partners, a dollar-for-dollar distribution to and capital contribution by the limited partners will be deemed to have occurred. The result will be to

[1] Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein.

reduce future capital commitments of the limited partners by the amount of the deemed capital contribution, the impact of which is reflected in our first-quarter financial statements.

## Portfolio Company Progress and Valuations

Under generally accepted accounting principles, the Partnership is required to value its portfolio companies at fair market value. In the first quarter, seven of the 14 portfolio companies declined in value and four appreciated. In total, the value of the portfolio as of March 31, 2025 decreased $78.5 million. The EBITDA multiples used to value each unrealized portfolio company and the resulting changes in valuation by company and for the Partnership overall are shown in the table below.

**Unrealized Portfolio Valuations[1,2]**
**First-Quarter Performance Comparison**
**($000s)**

| Company | Total Investment Cost | Value at 12/31/2024 | 3/31/2025 Debt / EBITDA[2] | EBITDA Multiples Entry | EBITDA Multiples 12/31/2024 | EBITDA Multiples 3/31/2025 | Value at 3/31/2025 | Changes vs. Prior Quarter In Value | Changes vs. Prior Quarter % |
|---|---|---|---|---|---|---|---|---|---|
| **Unrealized Portfolio** | | | | | | | | | |
| AmWest | $75,500 | $0 | | 6.1x | 6.1x | 6.1x | $0 | $0 | 0.0% |
| Bandon Holdings | 127,000 | 124,894 | 5.2x | 8.6x | 8.6x | 8.6x | 96,586 | (28,308) | (22.7%) |
| Bridgeview Eye | 101,244 | 101,279 | 6.0x | 11.7x | 11.7x | 11.7x | 97,634 | (3,644) | (3.6%) |
| Catalyst MedTech | 101,000 | 8,563 | 10.2x | 11.9x | 11.9x | 11.9x | 9,325 | 762 | 8.9% |
| Empire Auto Parts | 150,000 | 243,364 | 6.1x | 11.2x | 11.2x | 11.2x | 207,427 | (35,937) | (14.8%) |

| SPL | 85,000 | 101,753 | 6.1x | 8.6x | 8.6x | 8.6x | 70,601 | (31,153) | (30.6%) |
| TriMech | 167,123 | 177,946 | 6.1x | 12.4x | 11.2x | 11.2x | 194,489 | 16,543 | 9.3% |
| **Total** | **$1,712,024** | **$1,422,713** | **5.8x** | **10.4x** | **10.3x** | **10.2x** | **$1,344,203** | **($78,510)** | **(5.5%)** |

The average EBITDA multiple for the unrealized portfolio at March 31, 2025 was 10.2x, down 0.1 turns from the prior quarter and down 0.2 turns from the average entry multiple paid for the entire unrealized portfolio.

[1] Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein.

[2] The debt/EBITDA ratio at 3/31/2025 excludes AmWest, New Era, and New You Bariatric, which are expected to transition to lender control in 2025, as reported in our 2024 annual report and/or discussed on pages 6–7 of this letter.

In these quarterly reports, we discuss companies whose value changed by more than 10% or that experienced material developments since the prior quarter. Five unrealized portfolio companies experienced such developments, as summarized in the following paragraphs.[1]

**Bandon Holdings**. In the first quarter, Bandon's performance was sharply down but in line with expectations. Lower membership counts were the primary cause. Revenue for the first quarter was $27.2 million, down 9.3% year over year, and EBITDA was $4.6 million, down 43.9%. The steeper EBITDA decline reflects the impact of fixed expenses. For the 12 months ending March 31, 2025, revenue was $118.2 million, down 4.0% over the comparable prior-year period, and EBITDA was $31.9 million, down 13.9%. Net debt to EBITDA increased to 5.2x as of March 31, 2025 from 4.7x the prior quarter due to the lower EBITDA.

Bandon's lower starting membership base in 2025 will continue to weigh on performance in the near to mid-term. However, we are cautiously optimistic that revitalized growth initiatives—such as targeted marketing to attract new members, improved membership retention through enhanced club operations, and a focus on high-margin personal training packages—will help stabilize the business later this year. As of March 31, 2025, Sentinel continues to value Bandon at the 8.6x EBITDA entry multiple, unchanged from the prior quarter. After adjusting for net debt outstanding and minority interest, this valuation equals $96.6 million, for a 0.8x gross multiple of cost, down 22.7% from the prior quarter.

**Empire Auto Parts**. Empire's performance in the first quarter was disappointing. Revenue for the three months ended March 31, 2025 was down 3.8% from the prior-year first quarter to $68.6 million, and EBITDA declined 24.4% to $12.4 million. The revenue decline was caused by market conditions and fewer repairable claims due to rising repair costs and higher insurance premiums. EBITDA contracted more sharply than revenue because the revenue decline was concentrated in Empire's highly profitable legacy regions. For the 12 months ended March 31, 2025, revenue was $259.0 million, up 9.4% from the prior-year same period, and EBITDA was $51.3 million, down 12.5%. On a pro forma basis, after adjusting for the expected mature performance of recently opened locations, revenue for the 12 months ended December 31, 2024 was $337.1 million with adjusted EBITDA of $83.9 million. As of March 31, 2025, Empire's net debt to EBITDA rose to 6.1x, up from 5.6x the previous quarter due to lower EBITDA.

As of March 31, 2025, we continue to value Empire at the 11.2x EBITDA entry multiple, unchanged from the prior quarter. Adjusted for net debt and a normalized level of working capital, this valuation equals $207.4 million, down 14.8% from the prior quarter. Including proceeds received through March 31, 2025, the value of the Partnership's holdings totals $284.6 million, for a 1.9x gross multiple of cost, down 11.2% from the prior quarter.

**New Era Technology**. As previously reported, New Era's financial performance has steadily deteriorated since 2022 due to macroeconomic pressures and weak demand, compounded by former management's ill-advised cost-cutting measures that eroded operating efficiency and amplified revenue declines. First-quarter revenue fell 8.2% year over year to $195.8 million, and

[1] *Past performance is not necessarily indicative of future results.* The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

EBITDA declined 52.7% to $12.3 million. For the 12 months ending March 31, 2025, revenue was $815.9 million, down 10.5% from the comparable prior-year period, and EBITDA dropped 41.0% to $67.7 million. In the first quarter, New Era breached certain debt covenants and, with net debt to EBITDA of 14.8x as of March 31, 2025, is no longer able to support its current debt load. Discussions with lenders are ongoing to chart a viable path forward.

Importantly, well before the covenant breach, we recruited a new CEO and launched a turnaround plan that has begun yielding early results—performance stabilized in the first quarter and is on track for continued improvement in the second quarter. However, New Era needs a substantial equity infusion, which we cannot justify under the current debt burden. As a result, the lenders have indicated their intention to assume control of the company—a disappointing development that will result in a realized writeoff of our investment. We are now collaborating with the lenders to structure a change-of-control transaction, which we expect to close in the third quarter. We will provide full details of the transaction after the closing. As of March 31, 2025, we assigned zero value to the Partnership's equity, resulting in a gross multiple of cost of 0.0x, unchanged from the prior quarter.

**New You Bariatric Group**. As covered in prior reports, NYBG's core bariatric surgery market has contracted sharply because of the explosive popularity of prescription weight loss drugs. Although the long-term health implications of these drugs remain uncertain, their immediate effect on bariatric surgery volumes has been severe. With continued advances in these medications, we do not foresee a near- or medium-term recovery in demand for bariatric surgery. NYBG's first-quarter revenue was $24.8 million, down 3.3% from the prior-year first quarter, and EBITDA was $0.4 million, down 77.2%. For the 12 months ending March 31, 2025, revenue was $108.1 million, down 6.7% from the comparable prior-year period, and EBITDA was $10.2 million, down 43.1%. Given the significant deterioration in profitability, NYBG cannot meet its debt obligations. Lacking a viable investment thesis to provide more capital, we expect the business will soon transition to lender control, resulting in a realized writeoff of the Partnership's equity investment while preserving modest value in our debt holdings. We expect to provide full details of the pending transaction in our second-quarter report.

As of March 31, 2025, we assigned zero value to the Partnership's equity, unchanged from the prior quarter. For the Partnership's senior debt investment, we are using the same 8.4x EBITDA we paid for the business, unchanged from the prior year, which values our debt holdings at 42.6% of cost, or $2.1 million. Including $59.3 million of proceeds received through March 31, 2025, the value of the Partnership's holdings is therefore $61.4 million, for a 0.9x gross multiple of cost, down 0.8% from the prior quarter.

**SPL**. In the first quarter, SPL fell short of plan. Pro forma for acquisitions, revenue was $38.4 million, down 13.7% from the prior-year first quarter, and EBITDA was $6.9 million, down 37.8%. The revenue decline was caused by underperformance in the metrology and data services segments, partly offset by growth in energy and environmental lab testing. Wage inflation and loss of certain valuable customers after unexpected employee turnover were behind the EBITDA decline. For the 12 months ending March 31, 2025, pro forma for acquisitions, revenue was $138.2 million, down 12.6% over the comparable prior-year period, and EBITDA was $32.1 million, down 29.9%. As of March 31, 2025, SPL's net debt to EBITDA was 6.1x, up from 5.3x the prior quarter due to lower EBITDA.

At the outset of our investment, we planned a CEO succession. In light of the self-inflicted setbacks in 2024, we accelerated our timeline. In March 2025, SPL appointed Colin Duncan as new CEO. Colin brings nearly two decades of experience leading technical services companies, with a strong record in navigating market cycles, executing and integrating acquisitions, and managing private equity exits. With fresh, highly energized leadership in place, we are optimistic SPL can regain its footing and scale its promising environmental lab business. As of March 31, 2025, we continue to value SPL at the 8.6x EBITDA entry multiple, unchanged from the prior quarter. After an adjustment for net debt as of March 31, 2025, this valuation equals $70.6 million, for a 0.8x gross multiple of cost, down 30.6% from the prior quarter.

For the 12 months ending March 31, 2025, the 14-company unrealized portfolio declined by 13.0%, as shown in the table below.

[1] *Past performance is not necessarily indicative of future results.* The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics**.** Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

During the Partnership's investment period to date, the average EBITDA purchase multiple for U.S. private equity has been 12.2x.[1] Consistent with our value-oriented strategy, the average EBITDA multiple we paid for the 18 portfolio companies was 10.1x.

## Portfolio Company Operating Metrics

In the first quarter, the Partnership's 11 unrealized portfolio companies saw modest revenue declines because of continued soft demand.[2] The combination of declining revenues and fixed costs compressed portfolio margins. Aggregate first-quarter revenue was $780.9 million, down 2.5% from the prior-year first quarter, and EBITDA declined 7.7% to $159.5 million. The EBITDA decline was largely driven by six companies—Bandon, Bridgeview, Catalyst, Empire Auto, SPL, and TriMech—whose combined EBITDA decreased $16.1 million, or 21.5%. The decline was partly offset by a combined $4.1 million EBITDA increase, or 5.7%, at NSI and Spectrum. The remaining three companies declined by a modest $1.4 million, or 5.5%. For the 12 months ending March 31, 2025, aggregate portfolio revenues climbed 0.4% from the comparable prior-year period to $3.2 billion, and EBITDA was $661.0 million, down 4.0%. In response to sluggish growth, our portfolio companies have prudently scaled back capital spending both during the quarter and over the past 12 months. The table below summarizes the financial performance of all 11 companies.

**11-Company Portfolio Income Statement**
**($ in millions)**

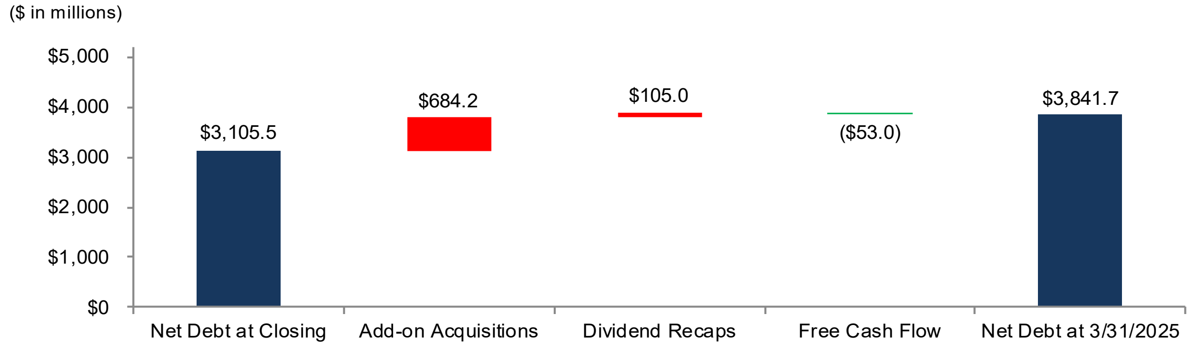
| | Quarter Ending March 31, | | | | 12 Months Ending March 31, | | | |
|---|---|---|---|---|---|---|---|---|
| | | | Change | | | | Change | |
| | 2024 | 2025 | $ | % | 2024 | 2025 | $ | % |
| Revenue | $801.1 | $780.9 | ($20.1) | (2.5%) | $3,187.2 | $3,198.9 | $11.7 | 0.4% |
| EBITDA | $172.9 | $159.5 | ($13.4) | (7.7%) | $688.7 | $661.0 | ($27.7) | (4.0%) |
| *EBITDA Margin* | *21.6%* | *20.4%* | | | *21.6%* | *20.7%* | | |
| Capital Expenditures | $13.7 | $9.7 | ($4.0) | (29.3%) | $50.9 | $55.5 | $4.6 | 9.0% |
| *CAPEX as % Revenue* | *1.7%* | *1.2%* | | | *1.6%* | *1.7%* | | |

The table above also illustrates a core element of our investment strategy—to target high-operating-margin, asset-light companies that produce strong returns on net tangible invested capital. Over the trailing 12 months, the portfolio delivered EBITDA margins of 20.7%, and capital expenditures equal to just 1.7% of sales. These metrics underscore the portfolio's relatively modest capital requirements and highly efficient EBITDA-to-cash conversion, which together produce significant free cash flow and provide flexibility to fund growth initiatives and repay debt.

In the average 2.7 years we have held the 11 companies, total debt is up $736.2 million, which results from (i) 64 add-on acquisitions that incurred $684.2 million of new debt, (ii) a dividend recap at Empire Auto that incurred $105.0 million of new debt, partly offset by (iii) $53.0 million of cash flow. The chart on the next page highlights the changes in debt since the closings of the 11 platform investments.

[1] Source: PitchBook, March 2025.
[2] Metrics exclude American West, New Era, and New You Bariatric, which are expected to transition to lender control in 2025, as reported in our 2024 annual report and/or discussed on pages 6–7 of this letter.

**11-Company Portfolio Change in Net Debt**



During our ownership, aggregate EBITDA for the portfolio has increased by $133.5 million, up 1.3x since the original closings. At the end of the first quarter, the portfolio's net debt to EBITDA was 5.8x, down from 5.9x at the closings of the platform investments. The table below summarizes key portfolio-level EBITDA and leverage metrics.

**Portfolio EBITDA and Leverage Trends**

| | At Closing | At 3/31/2025 | Change $ / x | Change % |
|---|---|---|---|---|
| EBITDA ($ millions) | $527.5 | $661.0 | $133.5 | 25.3% |
| Net Debt to EBITDA | 5.9x | 5.8x | (0.1x) | (1.3%) |

We consider the portfolio's 5.8x net-debt-to-EBITDA ratio manageable. During our 2.7-year average hold for the portfolio, equity value has been created, driven by a portfolio EBITDA level well above the average at the respective closings, lower aggregate leverage, and valuation multiples for the Partnership's equity portfolio below the industry median.

## Organizational Update

As part of our leadership succession plan announced in March, Eric Bommer has joined David Lobel as a managing partner, positioning him as David's eventual successor. Hired 28 years ago by John McCormack and David as Sentinel's first professional, Eric has played an important part in shaping Sentinel's success ever since.

A highly regarded investor and dealmaker in private equity, Eric will continue to be actively engaged in our investments. Over time, his Sentinel responsibilities will expand, but for now, there are no changes to the day-to-day management of our firm. A distinguishing feature of our firm is the depth of our leadership team. Eric, John, and David—along with our seven tenured partners, Owen Basham, Jim Coady, Michael Fabian, Paul Murphy, Scott Perry, Garrett Schires, and John Van Sickle—have worked together for many years. This well-oiled team is the engine that will drive Sentinel forward as we pursue new investments, support our management partners in running their businesses, position our portfolio companies for successful exits, and oversee our 96-member firm and $8.7 billion of capital under management.

Rising through our ranks is a group of talented deal professionals, all of whom have built their careers at Sentinel. These NextGen leaders power our organization and will be the mentors and decision-makers of the future. And our 10-member squad of operating partners brings additional expertise and firepower to our capabilities.

Today, our professional and administrative staff stands at 96, as shown in the table below.

**Sentinel Team Headcount**

| | | | | | |
|---|---|---|---|---|---|
| Deal Partners | 9 | Business Development | 3 | Sustainability & Responsibility | 1 |

## News Highlights from Other Active Sentinel Funds[3,4]

Today, Sentinel has fully realized four flagship equity funds and actively manages three successor funds and three affiliated-fund strategies. The fully realized funds are Sentinel I (1995 vintage), Sentinel II (1998 vintage), Sentinel III (2005 vintage), and Sentinel IV (2009 vintage). Highlights of our six active funds include:

Sentinel V (2014 vintage) is in its advanced harvest phase, has exited 17 of its 21 investments that together have generated a 2.5x gross multiple of cost, a gross IRR of 25.8%, a net levered/unlevered IRR of 20.5%/20.0%, a DPI of 1.9x, and a TVPI of 2.0x.

Sentinel VII (2023 vintage), our newest equity fund, has made a productive start with eight platforms and approximately 45% of its capital invested. Deployment is somewhat ahead of schedule—but plenty of work remains.

Sentinel Junior Capital I (2018 vintage) has completed its primary investment phase and has realized or substantially realized 12 of its 23 investments. With a DPI of 0.9x, a gross IRR of 16.7%, and a net levered/unlevered IRR of 14.3%/13.1%, our inaugural structured capital solutions fund is exceeding expectations.

Sentinel Junior Capital II (2023 vintage), our sophomore structured capital solutions fund, is making good progress. With 14 investments under its belt, this fund has deployed 47.5% of its capital and is ideally situated to pursue investment opportunities for companies seeking flexible and creative mid-balance-sheet capital solutions.

Sentinel Continuation Fund I (2021 vintage) has deployed 19.2% of its capital in four investments. The Partnership's deployment pace has been much slower than anticipated because of the industrywide slowdown in private equity exits, which is holding a lid on investment opportunities.

[1] These individuals are not Sentinel employees.
[2] Five of the 10 operating partners are not Sentinel employees.
[3] *Past performance is not necessarily indicative of future results.* The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.
[4] Full records for the funds referenced in this section are available on request.

And as discussed in this letter, Sentinel VI (2019 vintage) completed its primary investment phase in 2024, having deployed 102.9% of its capital. To date, Sentinel VI has also exited four of 18 platform investments that together have produced a 3.4x gross multiple of cost and a gross IRR of 51.2%. As of the end of the first quarter, Sentinel VI has generated a 1.4x gross multiple of cost, a 0.6x DPI, a 15.1% gross IRR, and a 10.3%/9.8% net levered/unlevered IRR.

With significant capital available for investment and a deep, highly experienced team, Sentinel is strongly positioned to pursue new investment opportunities for Sentinel VII and Sentinel Junior Capital II, support our management partners in building great businesses, prepare our portfolio companies for successful exits, and oversee our 96-member firm and $8.6 billion of capital under management. You can also count on us to navigate today's market volatility with discipline and care.

Respectfully yours,

David S. Lobel
Managing Partner

Eric D. Bommer
Managing Partner
