THIRD-QUARTER REPORT

For the Quarter Ending September 30, 2025

Table of Contents

Important Information

This quarterly report is for informational purposes only and is not intended to recommend any investment discussed in this report. This quarterly report is not an offer to sell nor the solicitation of an offer to purchase an interest in any investment vehicle managed or sponsored by Sentinel Capital Partners, L.L.C. or its affiliates (collectively, "Sentinel").

Statements in this quarterly report are made as of the dates specified in this report, and Sentinel has no obligation to update the information in this quarterly report.

All information with respect to industry data has been obtained from sources believed to be reliable and current; however, none of Sentinel or its respective affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of any information contained herein (including, but not limited to, economic, market, or other information) obtained from third parties, and each expressly disclaims any responsibility or liability therefor. The delivery of this information shall not, under any circumstances, create any implication that the information contained herein is correct in all respects, including as of any time subsequent to the date of this report. Further, Sentinel does not undertake an obligation to update such information at any time after such date. Unless otherwise stated herein, information is current through September 30, 2025.

Any investment in any private fund managed or sponsored by Sentinel is subject to various risks, none of which is outlined herein. A description of certain risks involved with an investment in any private fund managed or sponsored by Sentinel can be found in the offering memorandum of such private fund; such risks should be carefully considered by prospective investors before they make any investment decision.

This quarterly report contains certain performance information for existing Sentinel private funds and selected portfolio companies of such funds. The portfolio company case studies are intended to illustrate the various types of portfolio company investments that Sentinel has made. Performance information for all portfolio companies is available from Sentinel upon request.

The benchmark statistics for 2019-vintage private equity funds reflect the investment performance of a collection of U.S. private equity buyout funds selected by Cambridge Associates LLC, including fully liquidated funds, formed in 2019 (the “CA 2019 Benchmark”). The returns of the funds included in the CA 2019 Benchmark are net of all applicable fees, expenses and carried interest. The Standard & Poor’s 500 Index (the “S&P 500”) sets forth the performance of a well-known broad-based stock market index, assuming reinvestment of dividends. The S&P 500 contains only seasoned equity securities. The Dow Jones Industrial Average (the “DJIA”) sets forth the price-weighted average performance of 30 actively traded “blue chip” stocks of primarily industrial issuers.

Investors generally cannot invest directly in the CA 2019 Benchmark, the S&P 500, or the DJIA, which are presented for reference purposes only. The statistical data regarding the CA 2019 Benchmark, the S&P 500, and the DJIA have been obtained from sources believed to be reliable. Sentinel intends for the Sentinel funds to pursue, and they have previously pursued, a private equity strategy, although the Sentinel funds may also make, and they have previously made, investments outside of this strategy from time to time and may not pursue other strategies followed by some or all of the funds included in the CA 2019 Benchmark, nor will the Sentinel funds invest, and nor did they previously invest, in the funds comprising the CA 2019 Benchmark. The S&P 500 and the DJIA are commonly used, broad-based benchmarks for various markets and are provided only for general comparison against those markets. Investors generally are not able to invest in these indices. The criteria for including particular securities in these indices are different than Sentinel’s criteria for choosing investments for its funds. Specifically, the Sentinel funds do not invest in the securities comprising these indices. Rather, the Sentinel funds generally invest in portfolios of control investments in lower middle market businesses in the United States and Canada in specific industry sectors (as set forth in the funds’ offering materials and governing documents). In addition, an investment in any Sentinel fund generally will be subject to expenses, management fees, and carried interest charged or payable by the fund, none of which are reflected in these indices. For the foregoing and other reasons, the returns achieved by the Sentinel funds and the returns of the CA 2019 Benchmark, the S&P 500, and the DJIA should not be considered comparable.

The historical returns achieved by any prior funds or individual investments are not a prediction of future performance or a guarantee of future results, and there can be no assurance that these or comparable returns will be achieved by investments, individually or in the aggregate, made by any existing or future Sentinel private fund.

As used herein, “gross IRR” represents the gross compound annual rate of return based on realized and unrealized proceeds using quarterly cash flows and incorporates valuing the remaining debt positions at accreted cost and valuing the remaining equity positions based on EBITDA multiples at the date of investment. Gross IRR is calculated before the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, “gross multiple of cost” and “gross multiple of investment” are reflected on a gross basis and do not reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, “levered net IRR” represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses. An individual limited partner’s levered net IRR may vary based on the timing of capital contributions and distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Levered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of September 30, 2025 and proceeds are distributed through the Partnership’s waterfall in accordance with the terms and conditions of the Partnership’s Agreement of Limited Partnership (the “LPA”). Calculations of levered net IRRs in respect of investment and performance data included and/or referred to herein are based on the payment date of capital contributions received from limited partners, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

As used herein, "unlevered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses (but excluding interest expense on any subscription-based credit facility). An individual limited partner's unlevered net IRR may vary based on the timing of distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Unlevered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of September 30, 2025 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the LPA. Calculations of unlevered net IRRs in respect of investment and performance data included and/or referred to herein are based on the closing/funding date of each applicable investment, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

Note that a feature in the LPA provides for an increase in the carried interest payable to the Partnership's general partner, from 20% to 25%, if certain return thresholds are met, provided that the distributions in respect of such increased carried interest may not be distributed to the Partnership's general partner until the investment period of the Partnership terminates. The calculation of the Partnership's unlevered and levered net IRRs presented herein assumes that the Partnership's investment period has not terminated (as was true at the time of issuance hereof). However, if the calculation were to assume, alternatively, that the investment period had terminated and the relevant return thresholds had been met, then the carried interest rate applied in respect of distributions in excess of the limited partners' aggregate capital contributions and a 9% preferred return thereon would be 25%, and the unlevered and levered net IRRs of the Partnership would be reduced accordingly.

As used herein, "DPI" or "distributed/paid-in" means distributions received by limited partners relative to contributed capital. DPI is reflected on a net basis and reflects the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

As used herein, "TVPI" or "total value/paid-in" or "net multiple of cost" means distributions received by limited partners and the unrealized value relative to contributed capital. TVPI and net multiple of cost are reflected on a net basis and reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

Presentation of net performance information for subsets (realized and unrealized) of the Partnership is a hypothetical estimate of net performance because actual net returns cannot be calculated for a subset of portfolio investments due to the collective nature of fund fees and expenses. Net performance figures for this subset of the Partnership are estimated and do not represent actual performance experienced by investors. Sentinel has used the gross-net spread at the fund level to calculate such net performance. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the fund level. The cumulative and hypothetical composite investment performance data presented herein does not necessarily represent performance achieved by any investor, and reflects investments that were made across multiple Sentinel funds during different economic cycles. Such stated performance reflects neither a specific Sentinel fund nor a group of investments managed as a single portfolio. The actual return realized by any investor in an individual Sentinel fund may differ materially from those reflected or contemplated in the data presented herein. Net performance for individual investments also cannot be calculated without making arbitrary assumptions, and for that reason, the performance of individual investments herein is presented on a gross basis. See the "Fund Performance" Section for total fund gross and net performance metrics.

No representation or warranty is made with respect to the reasonableness of any estimates, forecasts, illustrations, prospects or returns, which should be regarded as illustrative only, or that any profits will be realized. This report contains certain "forward-looking statements," which may be identified by the use of forward-looking terminology such as "believe," "expect," "anticipate," "should," "planned," "estimated," "potential," "outlook," "forecast," "plan," or the negatives thereof or other variations thereon or comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, success or lack of success of Sentinel's investment strategies, and statements regarding Sentinel's investment thesis. Any forward-looking statements (including, without limitation, projections of future earnings or value) contained in this quarterly report are only estimates by Sentinel of future results that are based on assumptions made by Sentinel at the time this report was prepared. Each forward-looking statement contained in this quarterly report is subject to known and unknown risks, uncertainties, and other factors that may cause actual results to be materially different from those contemplated in such forward-looking statement. Accordingly, there can be no assurance that the results described by any such forward-looking statement will be attained, and actual results may be significantly different from such forward-looking statement. Sentinel does not undertake any obligation to update or revise the forward-looking statements contained in this quarterly report to reflect events or circumstances occurring after the date this report was prepared or to reflect the occurrence of unanticipated events.

Sentinel seeks to integrate certain sustainability and responsibility ("S&R") factors into its investment process in accordance with its policy and subject to its fiduciary duty and any applicable legal, regulatory, or contractual requirements. There is no guarantee that Sentinel will be able to successfully implement its S&R policy or make investments in companies that create a positive S&R impact while achieving its investment strategy. In addition, applying S&R factors to investment decisions is qualitative and subjective by nature, and there is no guarantee that the criteria used by Sentinel or any judgment exercised by Sentinel will reflect the beliefs or values of any particular investor. There are also significant differences in interpretations of what positive S&R characteristics mean by region, industry and topic. Sentinel's interpretations and decisions may differ from others' views and could evolve over time. In addition, in evaluating an investment, Sentinel expects to depend upon information and data provided by a number of sources, including the relevant investments and/or various reporting sources which could be incomplete, inaccurate or unavailable, and which could cause Sentinel to incorrectly assess a company's S&R practices and/or related risks and opportunities. Sentinel does not intend to independently verify all S&R information reported by investments or third parties.

Further, considering S&R qualities when evaluating an investment could result in the selection or exclusion of certain investments based on Sentinel's view of certain S&R related and other factors and could cause the relevant funds not to make an investment that they would have made or to make a management decision with respect to an investment differently than they would have made in the absence of the S&R Policies, which could negatively impact the Partnership's performance. For the avoidance of doubt, however, Sentinel does not expect to subordinate a Partnership's investment returns or increase the Partnership's investment risks as a result of (or in connection with) the consideration of any S&R factors. Further, S&R practices are evolving rapidly and there are different principles, frameworks, methodologies, and tracking tools being implemented by other asset managers, and Sentinel's adoption and adherence to various such principles, frameworks, methodologies, and tools are expected to vary over time. There is also a growing regulatory interest across jurisdictions in improving transparency regarding the definition, measurement, and disclosure of S&R factors. Sentinel's S&R policies could become subject to additional regulation in the future, and Sentinel cannot guarantee that its current approach will meet future regulatory requirements.

This quarterly report is intended for authorized recipients only and must be held strictly confidential. This quarterly report includes confidential, proprietary, and trade secret information of Sentinel. By accepting this information, each recipient agrees that (i) no portion of this quarterly report may be reproduced or distributed in any format without the prior express written consent of Sentinel, (ii) it will not copy, reproduce, or distribute this quarterly report, in whole or in part, to any person or party, and (iii) it will keep confidential all information contained herein that is not already public.

SENTINEL CAPITAL PARTNERS VI, L.P.
SENTINEL CAPITAL PARTNERS VI-A, L.P.
SENTINEL CAPITAL INVESTORS VI, L.P.

Quarterly Report for the Period Ended September 30, 2025

Dear Limited Partner:

This letter accompanies the unaudited financial statements for Sentinel Capital Partners VI, L.P. ("Sentinel VI") and its parallel funds—Sentinel Capital Partners VI-A, L.P. ("Sentinel VI-A") and Sentinel Capital Investors VI, L.P. ("Sentinel Investors VI," and together, "the Partnership")—that cover the three- and nine-month periods ended September 30, 2025. In the third quarter, Sentinel VI generated net income from investment operations of $7.2 million, resulting in a net asset value ("NAV") of $1.2 billion on September 30, 2025. Sentinel VI-A reported net income of $0.5 million and a NAV of $94.0 million, and Sentinel Investors VI reported net income of $0.1 million and a NAV of $24.5 million. These gains resulted from unrealized writeups in seven portfolio companies, partly offset by unrealized writedowns in five.

At the end of the third quarter, the Partnership had taken down or committed $2.2 billion, or 103.0% of its committed capital, and had invested in 18 companies. Cumulative distributions from inception through September 30, 2025 have been $1.6 billion, or 0.7x contributed capital. Including cumulative distributions, the Partnership's NAV on September 30, 2025 was $2.9 billion, or 1.3x contributed capital.

The Partnership's 18-company portfolio represents an aggregate purchased enterprise value of $5.6 billion. All 18 companies conform to Sentinel's investment strategy—(i) all are midmarket businesses in our four core sectors; (ii) the average EBITDA purchase multiple is 10.1x, underscoring our relative-value approach; and (iii) each is a leader in its market niche. As of September 30, 2025, the portfolio—counting both realized and unrealized investments—had a value of $2.9 billion, representing a 1.4x gross multiple of cost and a gross IRR of 13.8%. After fees and expenses, the net levered/unlevered IRR to limited partners is 9.0%/8.7%, with a DPI of 0.6x and a TVPI of 1.2x.[1] All investments are valued in accordance with FASB ASC 820 standards.

Highlights of this letter include (i) market commentary, (ii) an overview of the Partnership's performance since inception, (iii) an update on the fund's lines of credit, (iv) portfolio construction details, (v) a review of a fourth-quarter liquidity event and limited partner distribution, (vi) an update on portfolio company valuations, (vii) portfolio company operating metrics, (viii) an organizational update, and (ix) a summary of progress across our other funds.

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

Steady Performance Amid Elevated Market Uncertainty

Aggregate third-quarter portfolio-company revenue and EBITDA for five of Sentinel's six active funds rose year-over-year, despite the continued impact of tariffs on many of our portfolio companies. Importantly, unrealized portfolio valuations were up across all six funds. Through a mix of pricing actions, austerity measures, supplier negotiations, and alternative sourcing, many of our portfolio companies have largely absorbed the impact of tariffs.

A handful of portfolio companies continue to be affected, though some may see relief if the U.S. Supreme Court rules against the Administration's tariff actions. Steep duties on steel, auto parts, and heavy trucks remain a drag on performance for several portfolio companies.

Sentinel's deal teams continue to work closely with portfolio management, deploying tailored playbooks to mitigate tariff exposure and sustain operating momentum.

Fortunately, across nearly all our funds, the historic 43-day government shutdown that began October 1 and ended November 12 has had minimal effect, reflecting little exposure of most of our companies to the federal government. Only one company—Sentinel V's Total Military Management, which manages household moves for military servicemembers—experienced a temporary slowdown in revenue and cash receipts. TMM weathered the disruption and has since begun to rebound.

In the fourth quarter, NSI Industries—a one-year-old investment held by Sentinel VI, Sentinel VII, and Sentinel Capital Solutions II—sold a noncore division to a strategic buyer, a key element of our original investment thesis. This transaction marked the first significant realization for two-year-old Sentinel VII and a meaningful liquidity event for the two other funds. The divestiture leaves NSI nimble, focused, and well positioned for growth and value creation.

The first three quarters of 2025 were characterized by light deal flow, modest capital deployment, and sharply lower exit activity. Entering the fourth quarter, the volume and quality of investment opportunities we're seeing has improved markedly, fueled by recent back-to-back interest rate cuts and growing optimism that the worst of the tariff disruption is behind us. We expect buy- and sellside activity to accelerate and anticipate a busy 2026.

Fund Performance

The Partnership commenced investing on April 1, 2019 and has invested $2.1 billion in 18 portfolio companies, 12 of which were active as of September 30, 2025. With the Partnership having taken down or committed 103.0% of its $2.2 billion of committed capital, we have completed the fund's primary investment phase.

As of September 30, 2025, six investments have been fully realized and generated $1.4 billion of cash proceeds, a 2.2x gross multiple of cost, and a 47.6% gross IRR. The Partnership's $2.1 billion aggregate investment in its 18 portfolio companies has produced $2.9 billion of total value, representing a 1.4x gross multiple of cost, a 13.8% gross IRR, a 9.0%/8.7% net levered/unlevered IRR, a 0.6x DPI, and a 1.2x TVPI, as shown in the table on the next page.[1]

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

Partnership Investment Performance Since Inception[1]
As of September 30, 2025
($000s)

Fund VI (2019 Vintage)	Number of Investments	Amount Invested	Cash Realized	Unrealized Value	Total Value	Gross Multiple of Cost	Gross IRR
Realized Investments	6	$647,262	$1,434,718	$1,534	$1,436,252	2.2x	47.6%
Unrealized Investments	12	1,483,974	136,494	1,337,420	1,473,914	1.0x	(3.3%)
Total Fund VI	**18**	**$2,131,236**	**$1,571,211**	**$1,338,954**	**$2,910,166**	**1.4x**	**13.8%**
Net Levered / Unlevered IRR = 9.0% / 8.7%			**DPI = 0.6x**		**TVPI = 1.2x**		

The Partnership's 0.6x DPI places Sentinel VI in the upper quartile of 2019-vintage private equity funds for this metric. According to Cambridge Associates, as of June 30, 2025, the upper-quartile benchmarks for 2019-vintage buyout funds were 0.6x for DPI, 1.9x for TVPI, and 19.9% for net IRR.[2]

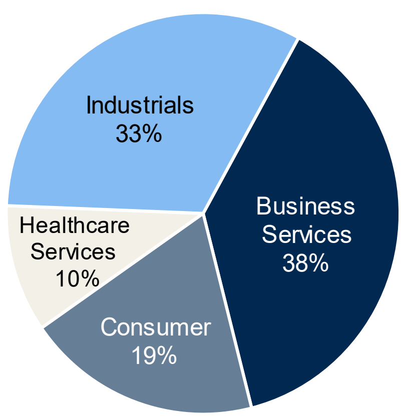
Lines of Credit

As of September 30, 2025, the Partnership maintained a $96.3 million warehouse credit facility with BMO Harris Bank and an additional $100.0 million line of credit, both of which had zero balances outstanding. Amounts borrowed bear interest at the prime rate minus 0.375%, or SOFR plus 2.775%. As of September 30, 2025, the Partnership was in compliance with all terms of the loan agreement.

Portfolio Construction

The capital invested in the 18-company portfolio is well diversified across our four core industry sectors, as shown in the chart below.

Sentinel VI
($2.2 billion | 103.0% invested | 18 portfolio companies)



[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

[2] Please see "Important Information" at the front of this report for more information on the Cambridge Associates benchmark indices and the limitations of comparability.

Liquidity Event and Distribution

In the fourth quarter, the Partnership received $25.8 million of cash proceeds from a portfolio company, as summarized below.

> **NSI Industries**. On October 15, 2025, NSI sold its HVAC division to strategic buyer Lennox International Inc. (NYSE: LII) for $550.0 million in cash, or 10.0x trailing 12-month EBITDA. In the less than one year we have owned NSI, its HVAC business, including the market-leading brands Duro Dyne and Supco, has performed well. The divestiture—integral to our original investment thesis—refocuses NSI as a pure-play manufacturer of branded electrical products, with revenue of $475.1 million for the trailing 12 months ended September 30, 2025, and EBITDA of $129.4 million. The sale resulted in a $182.9 million shareholder distribution, of which the Partnership's share is $25.8 million, or 0.3x cost.[1]

From the cash proceeds described above, the Partnership is distributing $25.8 million to limited partners, or 1.2% of committed capital. Of this amount, $7.1 million will be distributed in cash and $18.6 million will be retained by the Partnership to fund expenses. Pursuant to the Partnership Agreement, all net proceeds from portfolio investments must be distributed to the limited partners. Accordingly, a deemed distribution and simultaneous deemed contribution of $18.6 million will be recorded. This treatment reduces each limited partner's remaining capital commitment by the amount of the deemed capital contribution, as reflected in the Partnership's financial statements.

Since inception, the Partnership has returned a total of $1.4 billion to limited partners. Net of fees, expenses, and carried interest, the DPI is 0.6x.[2]

Portfolio Company Progress and Valuations

Under GAAP, the Partnership is required to value its portfolio companies at fair market value. This requirement introduces inherent volatility into quarter-to-quarter and year-to-year private equity fund valuations, and the Partnership is no exception.

In the third quarter, seven of the Partnership's 12 portfolio companies appreciated in value from the prior quarter, and five declined. In total, the portfolio's value as of September 30, 2025 increased $14.2 million, or 1.1%. The EBITDA multiples used to value each unrealized portfolio company, along with the resulting changes in valuation by company and for the Partnership overall, are shown in the table on the next page.

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Please see "Important Information" at the front of this report for more information.

[2] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

TriMech	167,123	215,598	5.6x	12.4x	11.2x	11.2x	225,761	10,163	4.7%
Subtotal	**$1,483,974**	**$1,323,228**	**5.6x**	**10.8x**	**10.6x**	**10.4x**	**$1,337,420**	**$14,193**	**1.1%**
Total	**$1,560,250**	**$1,323,228**	**5.6x**	**10.8x**	**10.6x**	**10.4x**	**$1,337,420**	**$14,193**	**1.1%**

The average EBITDA multiple for the unrealized portfolio at September 30, 2025 was 10.4x, down from 10.6x the prior quarter and the 10.8x entry multiple paid for the entire unrealized portfolio.

In our quarterly reports, we discuss companies whose value changed by more than 10% or that experienced other material developments since the prior quarter. Five unrealized portfolio companies experienced such developments, as summarized in the following paragraphs.

Bandon Holdings. Lower membership counts resulted in another soft quarter for Bandon. Revenue for the three months ended September 30, 2025 declined 2.2% year-over-year to $27.8 million and EBITDA fell 33.5% to $4.8 million. The steep EBITDA drop reflected fixed expense levels, rising rent, and higher advertising to attract new members. Management's growth initiatives have begun to take hold—net member losses slowed meaningfully, with membership down just 1% in the first nine months of 2025 versus a 9% decline in the same period last year. Even so, the trailing 12-month

[1] The debt/EBITDA ratio at 9/30/2025 excludes New You Bariatric, which we substantially exited in October 2025, as discussed on page 7.

membership contraction will continue to weigh on results near term. For the 12 months ending September 30, 2025, revenue was $117.0 million, down 5.5% over the comparable prior-year period, while EBITDA declined 27.1% to $27.5 million. As of September 30, 2025, net debt to EBITDA rose to 6.2x from 5.8x the prior quarter due to lower EBITDA. Following its second-quarter debt covenant breach, Bandon finalized a forbearance agreement with its lenders on October 31, 2025.

As of September 30, 2025, Sentinel continues to value Bandon at the 8.6x EBITDA entry multiple, unchanged from the prior quarter. After adjusting for net debt outstanding and minority interest, this valuation equals $57.6 million, or 0.5x cost, down 22.2% from the prior quarter.[1]

Catalyst MedTech. In the third quarter, Catalyst saw good results from its turnaround initiatives, with revenue up 11.5% from the prior-year same quarter to $31.1 million and EBITDA increasing 50.8% to $3.7 million. The improvement was driven by stronger performance in the Equipment Solutions segment. Margin expansion reflected lower labor and parts costs, tighter SG&A control, and efficiency gains from ongoing service optimization. These positive factors position Catalyst for a strong finish to the year. For the 12 months ending September 30, 2025, revenue totaled $110.9 million, down 5.3% year-over-year, but EBITDA increased 10.1% to $10.3 million. Catalyst maintained a solid liquidity position with $10.4 million of cash on hand, which supports continued investment in growth initiatives and targeted M&A opportunities. Improved profitability reduced net debt to EBITDA to 9.0x as of September 30, 2025, down from 10.4x the prior quarter. In the fourth quarter, Catalyst executed another short-term forbearance agreement, with a longer-term solution expected by early 2026.

As of September 30, 2025, we are valuing Catalyst at 11.9x EBITDA, unchanged from both the prior quarter and entry multiple. After adjusting for net debt outstanding and including the Partnership's last-out term loan, this valuation equals $17.1 million, or a 0.2x gross multiple of cost, up 139.5% from the prior quarter.[1]

Empire Auto. In the third quarter, the collision repair industry continued to face pressure from elevated insurance rates, rising repair costs, moderating used-car values, and tariff-driven parts inflation, all of which hurt Empire's operating performance. For the three months ended September 30, 2025, revenue increased 3.7% from the prior-year third quarter to $66.2 million, driven primarily by market share gains in new regions. However, EBITDA declined 35.2% to $8.1 million. For the 12 months ended September 30, 2025, revenue rose 4.7% from the prior-year same period to $267.0 million, while EBITDA declined 23.6% to $44.1 million. The decline in EBITDA caused Empire's net debt to EBITDA to increase to 7.3x as of September 30, 2025, compared to 6.6x in the prior quarter.

As of September 30, 2025, we continue to value Empire at 11.2x EBITDA, unchanged from both the prior quarter and entry multiple. Adjusted for net debt and a normalized level of working capital, this valuation equals $129.1 million, down 26.2% from the prior quarter. Including the 0.5x cost

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

proceeds received through September 30, 2025, the total value of the Partnership's holdings is $206.3 million, or 1.4x cost, down 18.2% from the prior quarter.[1]

Seeking a leader better suited to navigate a pronounced industry downcycle, we replaced Empire's CEO in the fourth quarter with its CFO on an interim basis. Sentinel is actively supporting Empire with operational resources while conducting a search for a permanent CEO.

New You Bariatric. As previously reported, the bariatric surgery market has contracted sharply amid the rapid and unexpected adoption of a new generation of prescription weight-loss drugs. These market dynamics have driven NYBG's annual EBITDA down from a peak of $37.8 million in 2021 to $10.6 million for the 12 months ended September 30, 2025, with little prospect for a recovery in revenue or profit in the foreseeable future.

With no credible basis to support additional capital investment in NYBG, which has been unable to meet its debt obligations, we transitioned control of the company to its lenders on October 31, 2025. The result was a realized writeoff of our equity position and modest preservation of value in our debt holdings. The lender-led restructuring recapitalized NYBG through a debt-for-equity exchange at an enterprise value of $59.9 million, or 5.7x EBITDA, based on a third-party appraisal. The transaction left $48.1 million of the existing $204.6 million of net debt outstanding, with the remainder converted into equity valued at $11.8 million. The Partnership participated in the transaction with its $5.0 million senior debt position and received $1.2 million in new senior debt and a 1.7% equity stake valued at $0.2 million.

As of September 30, 2025, we are placing zero value on the Partnership's pre-restructuring equity stake, unchanged from the prior quarter, and $1.2 million on its senior debt to reflect the restructuring. Including the $0.2 million value associated with the post-restructuring debt-to-equity conversion places a $1.4 million value on the Partnership's senior debt position, down 19.6% from the prior quarter. Including $59.3 million of proceeds previously received, the total value of the Partnership's holdings is $60.6 million, or 0.9x cost.[1]

We commend NYBG's talented management team and physicians for their commitment and professionalism in navigating unprecedented industry headwinds, and for their cooperation and loyalty throughout the restructuring. While the outcome of this six-year investment is disappointing, we are encouraged that, through NYBG's stellar early performance, we were able to significantly de-risk our investment via a dividend recapitalization that returned most of the Partnership's original investment.

NSI Industries. NSI outperformed in the third quarter, driven by cross-selling across product lines, market share gains, price increases, and cost improvements. Revenue for the three months ended September 30, 2025 increased 10.6% to $192.4 million from the prior-year third quarter, while EBITDA rose 35.1% to $57.2 million. For the 12 months ending September 30, 2025, revenue grew 5.5% over the comparable prior-year period to $711.0 million, and EBITDA increased 24.9% to

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

$185.7 million. Net debt to EBITDA declined to 4.5x as of September 30, 2025 from 5.0x the prior quarter due to higher EBITDA and excess cash flow generation.

In the fourth quarter, NSI divested its noncore HVAC division in a profitable sale to a strategic buyer and distributed to shareholders 0.3x the cost of the investment, as discussed on page 4. With NSI now refocused as a pure-play electrical parts provider—a key element of our original investment thesis—NSI is well positioned to accelerate growth by concentrating its resources on organic initiatives and add-on acquisitions. As of September 30, 2025, Sentinel is valuing NSI at the same 9.9x EBITDA multiple paid for the business, unchanged from the prior quarter. After adjusting for net debt outstanding as of that date, this valuation equals $105.9 million, or 1.4x cost, up 18.2% from the prior quarter.[1]

For the 12 months ending September 30, 2025, the 12-company unrealized portfolio, including realizations, declined 13.2%, as shown in the table on the next page.

Portfolio Company Operating Metrics

In the third quarter, aggregate revenue for the Partnership's 11 unrealized portfolio companies increased despite the tariffs' impact on several companies.[1] Portfoliowide third-quarter revenue rose 4.9% year-over-year to $839.5 million, continuing the prior quarter's upward trend. EBITDA followed a similar trajectory, rising 6.4% to $172.9 million. The EBITDA increase was largely driven by Bridgeview, NSI, and Spectrum, whose combined EBITDA increased $20.3 million, or 25.7%. Five other companies delivered a modest $1.6 million EBITDA gain, or 3.3%, while Bandon, Empire Auto, and SPL collectively declined $11.6 million, or 34.3%. For the 12 months ending September 30, 2025, aggregate portfolio revenues rose by 1.1% year-over-year to $3.3 billion, with EBITDA up 0.8% to 698.9 million. The table below summarizes the financial performance of the 11 unrealized companies.

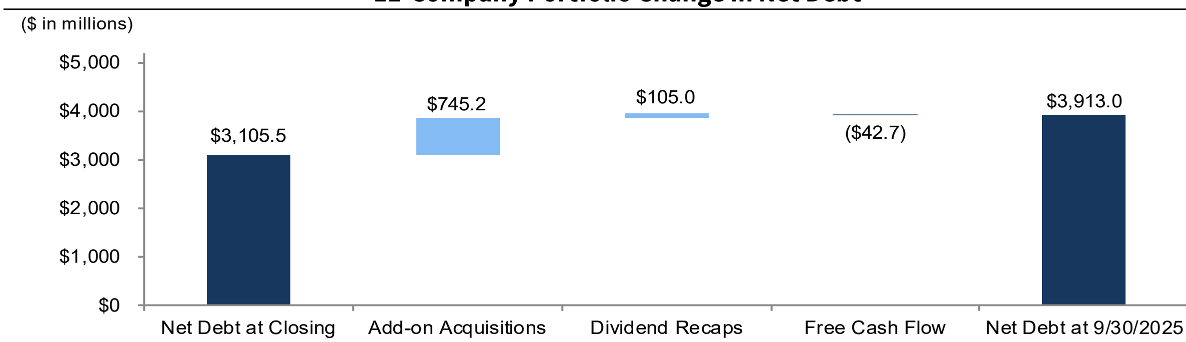
11-Company Portfolio Income Statement
($ in millions)

	Quarter Ending September 30,				12 Months Ending September 30,			
			Change				Change	
	2024	2025	$	%	2024	2025	$	%
Revenue	$799.9	$839.5	$39.6	4.9%	$3,276.0	$3,312.0	$36.0	1.1%
EBITDA	$162.6	$172.9	$10.4	6.4%	$693.1	$698.9	$5.8	0.8%
EBITDA Margin	*20.3%*	*20.6%*			*21.2%*	*21.1%*		
Capital Expenditures	$12.9	$13.6	$0.7	5.1%	$58.5	$44.9	($13.6)	(23.3%)
CAPEX as % Revenue	*1.6%*	*1.6%*			*1.8%*	*1.4%*		

The table above also illustrates a core element of our investment strategy—to target high-operating-margin, asset-light companies that produce strong returns on net tangible invested capital. Over the trailing 12 months, the portfolio delivered 21.1% EBITDA margins, with capital expenditures equal to just 1.4% of sales. These metrics underscore the portfolio's relatively modest capital requirements and highly efficient EBITDA-to-cash conversion, which together produce significant free cash flow and provide flexibility to fund growth and repay debt.

In the average 3.2 years we have held the 11 companies, total debt is up $807.5 million, which results from (i) 71 add-ons that incurred $745.2 million of new debt and (ii) a dividend recap at Empire Auto that incurred $105.0 million of new debt, partly offset by (iii) $42.7 million of cash flow generation. The chart below highlights the changes in debt since the closings of the 11 platform investments.

11-Company Portfolio Change in Net Debt



[1] Metrics exclude New You Bariatric, which we substantially exited in October 2025, as discussed on page 7 of this letter.

Aggregate portfolio EBITDA has increased by 32.5%, or $171.4 million, during our ownership. At the end of the third quarter, the portfolio's net debt to EBITDA was 5.6x, down from 5.9x at the closings of the platform investments. The table below shows key portfolio-level EBITDA and leverage metrics.

Portfolio EBITDA and Leverage Trends

	At Closing	At 9/30/2025	Change	
			$ / x	%
EBITDA ($ millions)	$527.5	$698.9	$171.4	32.5%
Net Debt to EBITDA	5.9x	5.6x	(0.3x)	(4.9%)

We consider the portfolio's 5.6x net-debt-to-EBITDA ratio manageable. Over the portfolio's average 3.2-year average hold period, equity value has been created, driven by a portfolio EBITDA level well above the average at the respective closings, lower aggregate leverage, and valuation multiples generally below the industry median for comparable companies.

Organizational Update

In the third quarter and fourth quarter to date, Sentinel welcomed an operating partner and five investment associates. We also promoted senior associates Trevor Anderson and Mike Griffin to vice president, and associates Kamryn Bloh, Sam Lettes, Lucy Pearce, and Josiah Wilson to senior associate. After completing their two-year associate programs, Claire Fletcher is now pursuing a PhD in economics, and Liam McCabe joined another private equity firm. Mike Gebicki, Managing Director, Credit Strategies, left for a senior position at Webster Financial, where we anticipate working with him on platform transaction financing—as we did for almost two decades before he joined Sentinel.

Also in the third quarter, we created a new role to oversee and coordinate Sentinel's portfolio value creation and AI initiatives and to manage our operating partner program—which has expanded significantly over the years in operational sophistication, resources, and scale. Partner Michael Fabian has assumed this position while continuing as an active senior partner on several deal teams.

Profiles of our new colleagues follow.

Christopher Lenoci joined Sentinel as an Operating Partner. He has worked closely with Sentinel since 2022, when he joined portfolio company New You Bariatric as CFO. Chris's deep experience in the multi-site healthcare segment includes roles as CFO of The Smilist Management, a private equity–backed DSO, and Vice President at investment bank Moelis. He holds a BS in accounting and finance from the University of Maryland and an MBA from Yale University's School of Management. Chris is also a CFA charterholder and CPA.

Scooter Harrington joined Sentinel as an Associate. He previously spent three years in William Blair's Investment Banking Analyst Program. Scooter holds a BS in management science and engineering and an MS in sustainability science and practice from Stanford University. At Stanford, he was a member of its NCAA Division I football team and, after graduating, signed as an undrafted free agent with the Chicago Bears.

Sarah Michel joined Sentinel as an Associate from Piper Sandler's Investment Banking Analyst Program, where she spent two years. Sarah holds a BBA in finance and economics from the University of Wisconsin-Madison.

Jushan Samra joined Sentinel as an Associate from Lincoln International's Investment Banking Analyst Program, where he spent three years. He previously was an analyst in Goldman Sachs' Personal Financial Management team. Jushan holds a BS in finance from Long Beach State University and an MS in finance from Vanderbilt University.

Donovan Sermons joined Sentinel as an Associate from William Blair's Investment Banking Analyst Program, where he spent three years. He holds a BS in communications and an MS in management from Northwestern University, where he was a member of its NCAA Division I football team.

Fulton Smith joined Sentinel as an Associate from Harris Williams' Investment Banking Analyst Program, where he spent two years. He holds a BS in finance, cum laude, from Wake Forest University, where he captained the men's golf team to an ACC championship.

Today, our professional and administrative staff stands at 99, as shown in the table below.

News Highlights from Other Active Sentinel Funds[3,4]

Today, Sentinel has fully realized four flagship equity funds and actively manages three successor funds and three affiliated-fund strategies. The fully realized funds are Sentinel I (1995 vintage), Sentinel II (1998 vintage), Sentinel III (2005 vintage), and Sentinel IV (2009 vintage). Highlights of our six active funds include:

Sentinel V (2014 vintage) is now in its advanced harvest phase, having exited 17 of its 21 investments. The 17 realizations have generated a 2.5x gross multiple of cost, a 25.7% gross IRR, a 20.5%/19.9% net levered/unlevered IRR, a 1.9x DPI, and a 2.1x TVPI.

Sentinel VII (2023 vintage) sold a portfolio company division—the fund's first material realization—in October 2025, which returned 0.3x the cost of the investment. With eight platform investments under its belt, Sentinel VII is 39.6% drawn. Deployment is on track for the two-year-old fund, though plenty of work remains.

Sentinel Capital Solutions I (2018 vintage) has completed its primary investment phase and fully or substantially realized 12 of its 23 investments. With a 0.9x DPI, a 16.3% gross IRR, and a 13.9%/12.8%

[1] These individuals are not Sentinel employees.

[3] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.
[4] Full records for the funds referenced in this section are available on request.

net levered/unlevered IRR, our inaugural structured capital solutions fund is outperforming expectations.

Sentinel Capital Solutions II (2023 vintage) has made 14 investments and deployed 48.8% of its capital. This young fund has enjoyed a strong year for liquidity, receiving $51.2 million of distributions, or 6.1% of invested capital, so far in 2025. The fund is well positioned to capitalize on opportunities with companies seeking flexible, creative mid-balance-sheet capital solutions.

Sentinel Continuation Fund I (2021 vintage) has deployed 19.2% of its capital in four investments. Deployment has been slower than anticipated because of the industrywide slowdown in private equity exits, which has constrained the opportunities for new continuation investments.

And as discussed in this letter, Sentinel VI (2019 vintage) has deployed 103.0% of its capital and completed its primary investment phase. To date, Sentinel VI has exited seven of 18 platform investments, generating a 2.1x gross multiple of cost and a 42.8% gross IRR. As of the end of the third quarter, Sentinel VI has produced a 1.4x gross multiple of cost, a 0.6x DPI, a 13.8% gross IRR, and a 9.0%/8.7% net levered/unlevered IRR.

With significant capital available for investment and a deep, highly experienced team, Sentinel is well positioned to pursue new investment opportunities for Sentinel VII and Sentinel Capital Solutions II, support our management partners in building great businesses, prepare portfolio companies for successful exits, and oversee our 99-member firm and $8.8 billion of capital under management. You can count on us to continue navigating today's market volatility with the discipline and care that have long defined our investment approach.

Respectfully yours,

David S. Lobel
Managing Partner

Eric D. Bommer
Managing Partner
