SECOND-QUARTER REPORT

For the Quarter Ending June 30, 2025

Table of Contents

Important Information

This quarterly report is for informational purposes only and is not intended to recommend any investment discussed in this report. This quarterly report is not an offer to sell nor the solicitation of an offer to purchase an interest in any investment vehicle managed or sponsored by Sentinel Capital Partners, L.L.C. or its affiliates (collectively, "Sentinel").

Statements in this quarterly report are made as of the dates specified in this report, and Sentinel has no obligation to update the information in this quarterly report.

All information with respect to industry data has been obtained from sources believed to be reliable and current; however, none of Sentinel or its respective affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of any information contained herein (including, but not limited to, economic, market, or other information) obtained from third parties, and each expressly disclaims any responsibility or liability therefor. The delivery of this information shall not, under any circumstances, create any implication that the information contained herein is correct in all respects, including as of any time subsequent to the date of this report. Further, Sentinel does not undertake an obligation to update such information at any time after such date. Unless otherwise stated herein, information is current through June 30, 2025.

Any investment in any private fund managed or sponsored by Sentinel is subject to various risks, none of which is outlined herein. A description of certain risks involved with an investment in any private fund managed or sponsored by Sentinel can be found in the offering memorandum of such private fund; such risks should be carefully considered by prospective investors before they make any investment decision.

This quarterly report contains certain performance information for existing Sentinel private funds and selected portfolio companies of such funds. The portfolio company case studies are intended to illustrate the various types of portfolio company investments that Sentinel has made. Performance information for all portfolio companies is available from Sentinel upon request.

The benchmark statistics for 2019-vintage private equity funds reflect the investment performance of a collection of U.S. private equity buyout funds selected by Cambridge Associates LLC, including fully liquidated funds, formed in 2019 (the "CA 2019 Benchmark"). The returns of the funds included in the CA 2019 Benchmark are net of all applicable fees, expenses and carried interest. The Standard & Poor's 500 Index (the "S&P 500") sets forth the performance of a well-known broad-based stock market index, assuming reinvestment of dividends. The S&P 500 contains only seasoned equity securities. The Dow Jones Industrial Average (the "DJIA") sets forth the price-weighted average performance of 30 actively traded "blue chip" stocks of primarily industrial issuers.

Investors generally cannot invest directly in the CA 2019 Benchmark, the S&P 500, or the DJIA, which are presented for reference purposes only. The statistical data regarding the CA 2019 Benchmark, the S&P 500, and the DJIA have been obtained from sources believed to be reliable. Sentinel intends for the Sentinel funds to pursue, and they have previously pursued, a private equity strategy, although the Sentinel funds may also make, and they have previously made, investments outside of this strategy from time to time and may not pursue other strategies followed by some or all of the funds included in the CA 2019 Benchmark, nor will the Sentinel funds invest, and nor did they previously invest, in the funds comprising the CA 2019 Benchmark. The S&P 500 and the DJIA are commonly used, broad-based benchmarks for various markets and are provided only for general comparison against those markets. Investors generally are not able to invest in these indices. The criteria for including particular securities in these indices are different than Sentinel's criteria for choosing investments for its funds. Specifically, the Sentinel funds do not invest in the securities comprising these indices. Rather, the Sentinel funds generally invest in portfolios of control investments in lower middle market businesses in the United States and Canada in specific industry sectors (as set forth in the funds' offering materials and governing documents). In addition, an investment in any Sentinel fund generally will be subject to expenses, management fees, and carried interest charged or payable by the fund, none of which are reflected in these indices. For the foregoing and other reasons, the returns achieved by the Sentinel funds and the returns of the CA 2019 Benchmark, the S&P 500, and the DJIA should not be considered comparable.

The historical returns achieved by any prior funds or individual investments are not a prediction of future performance or a guarantee of future results, and there can be no assurance that these or comparable returns will be achieved by investments, individually or in the aggregate, made by any existing or future Sentinel private fund.

As used herein, "gross IRR" represents the gross compound annual rate of return based on realized and unrealized proceeds using quarterly cash flows and incorporates valuing the remaining debt positions at accreted cost and valuing the remaining equity positions based on EBITDA multiples at the date of investment. Gross IRR is calculated before the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "gross multiple of cost" and "gross multiple of investment" are reflected on a gross basis and do not reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "levered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses. An individual limited partner's levered net IRR may vary based on the timing of capital contributions and distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Levered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of June 30, 2025 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the Partnership's Agreement of Limited Partnership (the "LPA"). Calculations of levered net IRRs in respect of investment and performance data included and/or referred to herein are based on the payment date of capital contributions received from limited partners, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

As used herein, “unlevered net IRR” represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses (but excluding interest expense on any subscription-based credit facility). An individual limited partner’s unlevered net IRR may vary based on the timing of distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Unlevered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of June 30, 2025 and proceeds are distributed through the Partnership’s waterfall in accordance with the terms and conditions of the LPA. Calculations of unlevered net IRRs in respect of investment and performance data included and/or referred to herein are based on the closing/funding date of each applicable investment, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

Note that a feature in the LPA provides for an increase in the carried interest payable to the Partnership’s general partner, from 20% to 25%, if certain return thresholds are met, provided that the distributions in respect of such increased carried interest may not be distributed to the Partnership’s general partner until the investment period of the Partnership terminates. The calculation of the Partnership’s unlevered and levered net IRRs presented herein assumes that the Partnership’s investment period has not terminated (as was true at the time of issuance hereof). However, if the calculation were to assume, alternatively, that the investment period had terminated and the relevant return thresholds had been met, then the carried interest rate applied in respect of distributions in excess of the limited partners’ aggregate capital contributions and a 9% preferred return thereon would be 25%, and the unlevered and levered net IRRs of the Partnership would be reduced accordingly.

As used herein, “DPI” or “distributed/paid-in” means distributions received by limited partners relative to contributed capital. DPI is reflected on a net basis and reflects the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

As used herein, “TVPI” or “total value/paid-in” or “net multiple of cost” means distributions received by limited partners and the unrealized value relative to contributed capital. TVPI and net multiple of cost are reflected on a net basis and reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

Presentation of net performance information for subsets (realized and unrealized) of the Partnership is a hypothetical estimate of net performance because actual net returns cannot be calculated for a subset of portfolio investments due to the collective nature of fund fees and expenses. Net performance figures for this subset of the Partnership are estimated and do not represent actual performance experienced by investors. Sentinel has used the gross-net spread at the fund level to calculate such net performance. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the fund level. The cumulative and hypothetical composite investment performance data presented herein does not necessarily represent performance achieved by any investor, and reflects investments that were made across multiple Sentinel funds during different economic cycles. Such stated performance reflects neither a specific Sentinel fund nor a group of investments managed as a single portfolio. The actual return realized by any investor in an individual Sentinel fund may differ materially from those reflected or contemplated in the data presented herein. Net performance for individual investments also cannot be calculated without making arbitrary assumptions, and for that reason, the performance of individual investments herein is presented on a gross basis. See the “Fund Performance” Section for total fund gross and net performance metrics.

No representation or warranty is made with respect to the reasonableness of any estimates, forecasts, illustrations, prospects or returns, which should be regarded as illustrative only, or that any profits will be realized. This report contains certain “forward-looking statements,” which may be identified by the use of forward-looking terminology such as “believe,” “expect,” “anticipate,” “should,” “planned,” “estimated,” “potential,” “outlook,” “forecast,” “plan,” or the negatives thereof or other variations thereon or comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, success or lack of success of Sentinel’s investment strategies, and statements regarding Sentinel’s investment thesis. Any forward-looking statements (including, without limitation, projections of future earnings or value) contained in this quarterly report are only estimates by Sentinel of future results that are based on assumptions made by Sentinel at the time this report was prepared. Each forward-looking statement contained in this quarterly report is subject to known and unknown risks, uncertainties, and other factors that may cause actual results to be materially different from those contemplated in such forward-looking statement. Accordingly, there can be no assurance that the results described by any such forward-looking statement will be attained, and actual results may be significantly different from such forward-looking statement. Sentinel does not undertake any obligation to update or revise the forward-looking statements contained in this quarterly report to reflect events or circumstances occurring after the date this report was prepared or to reflect the occurrence of unanticipated events.

Sentinel seeks to integrate certain sustainability and responsibility ("S&R") factors into its investment process in accordance with its policy and subject to its fiduciary duty and any applicable legal, regulatory, or contractual requirements. There is no guarantee that Sentinel will be able to successfully implement its S&R policy or make investments in companies that create a positive S&R impact while achieving its investment strategy. In addition, applying S&R factors to investment decisions is qualitative and subjective by nature, and there is no guarantee that the criteria used by Sentinel or any judgment exercised by Sentinel will reflect the beliefs or values of any particular investor. There are also significant differences in interpretations of what positive S&R characteristics mean by region, industry and topic. Sentinel's interpretations and decisions may differ from others' views and could evolve over time. In addition, in evaluating an investment, Sentinel expects to depend upon information and data provided by a number of sources, including the relevant investments and/or various reporting sources which could be incomplete, inaccurate or unavailable, and which could cause Sentinel to incorrectly assess a company's S&R practices and/or related risks and opportunities. Sentinel does not intend to independently verify all S&R information reported by investments or third parties.

Further, considering S&R qualities when evaluating an investment could result in the selection or exclusion of certain investments based on Sentinel's view of certain S&R related and other factors and could cause the relevant funds not to make an investment that they would have made or to make a management decision with respect to an investment differently than they would have made in the absence of the S&R Policies, which could negatively impact the Partnership's performance. For the avoidance of doubt, however, Sentinel does not expect to subordinate a Partnership's investment returns or increase the Partnership's investment risks as a result of (or in connection with) the consideration of any S&R factors. Further, S&R practices are evolving rapidly and there are different principles, frameworks, methodologies, and tracking tools being implemented by other asset managers, and Sentinel's adoption and adherence to various such principles, frameworks, methodologies, and tools are expected to vary over time. There is also a growing regulatory interest across jurisdictions in improving transparency regarding the definition, measurement, and disclosure of S&R factors. Sentinel's S&R policies could become subject to additional regulation in the future, and Sentinel cannot guarantee that its current approach will meet future regulatory requirements.

This quarterly report is intended for authorized recipients only and must be held strictly confidential. This quarterly report includes confidential, proprietary, and trade secret information of Sentinel. By accepting this information, each recipient agrees that (i) no portion of this quarterly report may be reproduced or distributed in any format without the prior express written consent of Sentinel, (ii) it will not copy, reproduce, or distribute this quarterly report, in whole or in part, to any person or party, and (iii) it will keep confidential all information contained herein that is not already public.

SENTINEL CAPITAL PARTNERS VI, L.P.
SENTINEL CAPITAL PARTNERS VI-A, L.P.
SENTINEL CAPITAL INVESTORS VI, L.P.

Quarterly Report for the Period Ended June 30, 2025

Dear Limited Partner:

This letter accompanies the unaudited financial statements for Sentinel Capital Partners VI, L.P. (“Sentinel VI”) and its parallel funds—Sentinel Capital Partners VI-A, L.P. (“Sentinel VI-A”) and Sentinel Capital Investors VI, L.P. (“Sentinel Investors VI,” and together, “the Partnership”)—that cover the three- and six-month periods ended June 30, 2025. In the second quarter, Sentinel VI’s net loss from investment operations was $23.8 million, and its net asset value on June 30, 2025 was $1.2 billion; Sentinel VI-A’s net loss from investment operations was $1.8 million, and its net asset value was $93.4 million; and Sentinel Investors VI’s net loss from investment operations was $0.5 million, and its net asset value was $24.4 million. The losses resulted from unrealized writedowns of six unrealized portfolio companies—Bandon, Catalyst MedTech, Empire Auto, New You Bariatric, RefrigiWear, and SPL—partly offset by unrealized writeups of six other companies—Bridgeview Eye, NSI, Recreational Group, SmartSign, Spectrum Safety Solutions, and TriMech.

At the end of the second quarter, the Partnership had taken down or committed $2.2 billion, or 103.0% of its committed capital, and had invested in 18 companies. Cumulative distributions from inception through June 30, 2025 have been $1.6 billion, or 0.7x contributed capital. Including cumulative distributions, the Partnership’s net asset value on June 30, 2025 was $2.9 billion, or 1.3x contributed capital.

The Partnership’s 18-company portfolio represents an aggregate purchased enterprise value of $5.6 billion. These companies conform to Sentinel’s investment strategy—(i) each is a midmarket business operating in one of our core sectors; (ii) the average EBITDA purchase multiple is 10.1x, reflecting our relative-value strategy; and (iii) each is a leader in a market niche. As of June 30, 2025, the 18-company portfolio had a value including realizations of $2.9 billion, or a 1.4x gross multiple of cost, for a 14.2% gross IRR. Net of fees and expenses, the net levered/unlevered IRR to limited partners is 9.4%/9.0%, the DPI 0.6x, and the TVPI 1.2x.[1] The Partnership’s portfolio companies are valued in accordance with the provisions of the Financial Accounting Standards Board Accounting Standards Codification Topic 820, Fair Value Measurement.

Highlights of this letter include (i) an update on our response to recent tariffs, (ii) an overview of the Partnership’s performance since inception, (iii) a summary of the fund’s lines of credit, (iv) a review of portfolio company valuations, (v) portfolio company operating metrics, (vi) a midyear report on

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see “Important Information” at the front of this report for more information on calculation methodologies for net returns.

sustainability and responsibility, (vii) an organizational update, and (viii) a summary of progress across our other funds.

Tariff Update

For Sentinel's portfolio companies, the financial repercussions of higher tariffs have ranged from negligible to significant. Some sectors have experienced only minor disruptions, while others—particularly those with substantial imported inputs—have faced meaningful margin pressure. As the broader economy continues to adapt, considerable uncertainty remains regarding the ultimate impact of current and potential tariffs—one reason the Federal Reserve has maintained a wait-and-see stance.

Our deal teams remain focused on helping our portfolio management teams deploy tailored playbooks that address both direct and second-order effects of tariffs. Key initiatives include:

- **Pricing actions**: Implementing strategic price increases to preserve margins while monitoring customer elasticity.
- **Supplier negotiations**: Leveraging scale to renegotiate pricing and payment terms.
- **Alternative sourcing**: Identifying and onboarding suppliers outside affected jurisdictions to diversify supply risk.
- **Tariff exclusions**: Actively pursuing exclusion petitions with support from legal and trade advisors.
- **Domestic advantage**: For companies with U.S.-based manufacturing or sourcing, capitalizing on the ability to market "tariff-free" products and, in some cases, pursue opportunistic acquisitions of competitors more severely impacted.

We have also modeled best-, base-, and worst-case tariff scenarios for each affected company, and our investment and operations teams are closely tracking regulatory developments and maintaining flexibility to pivot strategies quickly.

Fund Performance

The Partnership began its investment operations on April 1, 2019 and has invested $2.1 billion in 18 portfolio companies, 13 of which were active as of June 30, 2025. With the Partnership having taken down or committed 103.0% of its $2.2 billion of committed capital, we have completed the fund's primary investment phase.

As of June 30, 2025, five investments have been fully realized and generated $1.4 billion of cash proceeds, a 2.9x gross multiple of cost, and a 47.6% gross IRR. The Partnership's $2.1 billion aggregate investment in its 18 portfolio companies has generated $2.9 billion of total value, or a 1.4x gross multiple of cost, for a 14.2% gross IRR, a 9.4%/9.0% net levered/unlevered IRR, a 0.6x DPI, and a 1.2x TVPI, as shown in the table on the next page.[1]

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

Partnership Investment Performance Since Inception[1]
As of June 30, 2025
($000s)

Fund VI (2019 Vintage)	Number of Investments	Amount Invested	Cash Realized	Unrealized Value	Total Value	Gross Multiple of Cost	Gross IRR
Realized Investments	5	$493,486	$1,434,718	$1,534	$1,436,252	2.9x	47.6%
Unrealized Investments	13	1,636,524	136,494	1,323,228	1,459,721	0.9x	(3.9%)
Total Fund VI	**18**	**$2,130,010**	**$1,571,211**	**$1,324,762**	**$2,895,973**	**1.4x**	**14.2%**
Net Levered / Unlevered IRR = 9.4% / 9.0%			**|**	**DPI = 0.6x**	**| TVPI = 1.2x**		

The Partnership's 0.6x DPI places Sentinel VI in the upper quartile of 2019-vintage private equity funds for this metric. According to Cambridge Associates, through March 31, 2025, the benchmark upper-quartile DPI for U.S. buyout funds established in 2019 was 0.6x, for TVPI 1.7x, and for net IRR 19.3%.[2]

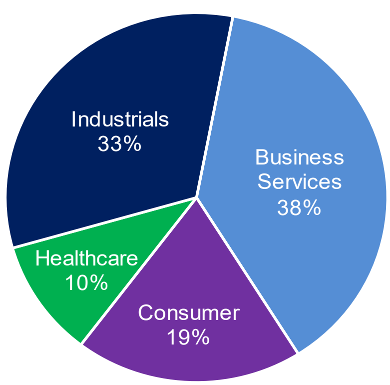
Lines of Credit

The Partnership has access to a $96.3 million warehouse credit facility with BMO Harris Bank and an additional $100.0 million line of credit. As of June 30, 2025, the facilities had zero balances outstanding. Amounts borrowed under the line in the second quarter bore interest at the prime rate minus 0.375%, or SOFR plus 2.775%. As of June 30, 2025, the Partnership was in compliance with all the terms of the loan agreement.

Portfolio Construction

The capital invested in the 18-company portfolio is well diversified across our four core industry sectors, as shown in the chart below.

Sentinel VI
($2.2 billion | 103.0% invested | 18 portfolio companies)



[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

[2] Please see "Important Information" at the front of this report for more information on the Cambridge Associates benchmark indices and the limitations of comparability.

Portfolio Company Progress and Valuations

Under generally accepted accounting principles, the Partnership is required to value its portfolio companies at fair market value. In the second quarter, six of the 13 portfolio companies declined in value, six appreciated, and one remained unchanged. In total, the value of the portfolio as of June 30, 2025 decreased by 1.6%, or $21.0 million. The EBITDA multiples used to value each unrealized portfolio company and the resulting changes in valuation by company and for the Partnership overall are shown in the table below.

Unrealized Portfolio Valuations
Second-Quarter Performance Comparison
($000s)

Company	Total Investment Cost	Value at 3/31/2025	6/30/2025 Debt / EBITDA[1]	EBITDA Multiples			Value at 6/30/2025	Changes vs. Prior Quarter	
				Entry	3/31/2025	6/30/2025		In Value	%
Realized Portfolio									
AmWest	$75,500	$0					$0	$0	0.0%
Unrealized Portfolio									
Bandon Holdings	$127,000	$96,586	5.8x	8.6x	8.6x	8.6x	$74,063	($22,523)	(23.3%)
Bridgeview Eye	101,244	97,634	5.9x	11.7x	11.7x	11.7x	101,253	3,618	3.7%
Catalyst MedTech	101,000	9,325	10.4x	11.9x	11.9x	11.9x	7,133	(2,193)	(23.5%)
Empire Auto Parts	150,000	207,427	7.1x	11.2x	11.2x	11.2x	175,040	(32,387)	(15.6%)
New Era Technology	153,000	0		9.7x	9.7x	9.7x	0	0	0.0%
New You Bariatric Group	66,800	2,128		8.4x	8.4x	8.4x	1,706	(422)	(19.8%)
NSI Industries	75,000	78,634	5.0x	9.9x	9.9x	9.9x	89,539	10,905	13.9%
Recreational Group, The	157,500	157,500	6.0x	11.5x	11.5x	11.5x	160,547	3,047	1.9%
RefrigiWear	100,000	114,629	6.0x	12.9x	11.5x	11.5x	104,338	(10,291)	(9.0%)
SmartSign	162,857	125,250	6.2x	11.9x	11.9x	11.9x	130,965	5,715	4.6%
Spectrum Safety Solutions	190,000	190,000	5.6x	11.1x	11.2x	11.1x	206,211	16,211	8.5%
SPL	85,000	70,601	6.5x	8.6x	8.6x	8.6x	56,836	(13,764)	(19.5%)
TriMech	167,123	194,489	5.8x	12.4x	11.2x	11.2x	215,598	21,109	10.9%
Subtotal	**$1,636,524**	**$1,344,203**	**5.8x**	**10.8x**	**10.6x**	**10.6x**	**$1,323,228**	**($20,975)**	**(1.6%)**
Total	**$1,712,024**	**$1,344,203**	**5.8x**	**10.8x**	**10.6x**	**10.6x**	**$1,323,228**	**($20,975)**	**(1.6%)**

The average EBITDA multiple for the unrealized portfolio at June 30, 2025 was 10.6x, unchanged from the prior quarter and down 0.2 turns from the average entry multiple paid for the entire unrealized portfolio.

[1] The debt/EBITDA ratio at 6/30/2025 excludes New Era and New You Bariatric, which transitioned or will transition to lender control in 2025, as discussed on pages 6–7.

In our quarterly reports, we discuss companies whose value changed by more than 10% or that experienced material developments since the prior quarter. Nine unrealized portfolio companies experienced such developments, as summarized in the following paragraphs.

American West Restaurant Group. As previously reported, AmWest has significantly underperformed due to persistent dysfunction at the franchisor, Pizza Hut's failure to develop new menu items and implement effective marketing initiatives, and the dramatically adverse impact of California's 25% minimum wage increase for fast food workers. For the period April 1–June 18, 2025, revenue was $50.8 million, down 12.3% from the prior-year same period, and EBITDA was $0.3 million, down 86.6%.

Despite management's heroic efforts to cut costs—switching to outsourced delivery and reducing G&A—AmWest has been unable to meet its debt and royalty obligations. With no viable investment thesis to justify additional capital for a deeply distressed business, we elected to relinquish control to AmWest's lender. The transfer took place on June 18, 2025, resulting in a realized loss. However, because the investment had previously been written down to zero, there is no impact on the Partnership's second-quarter net income.

The loss is especially disappointing given Sentinel's highly successful prior ownership of AmWest. We believed we could replicate that success, but the franchisor's mismanagement of the Pizza Hut brand and skyrocketing labor costs in California created insurmountable headwinds. We continue to hold AmWest's management team in high regard—their resourcefulness, dedication, and grit were exceptional in the face of challenges beyond their control.

Bandon Holdings. In the second quarter, Bandon's performance remained under pressure, as lower membership counts continued to weigh on results. Second-quarter revenue declined 3.5% year over year to $31.1 million, and EBITDA fell 26.2% to $8.5 million, driven by the impact of fixed expenses and rising rent costs. For the 12 months ending June 30, 2025, revenue was $116.7 million, down 5.3% over the comparable prior-year period, while EBITDA declined 22.6% to $29.0 million. As of June 30, 2025, net debt to EBITDA rose to 5.8x from 5.2x the prior quarter due to lower EBITDA. As of June 30, 2025, Bandon breached a debt covenant, and discussions with its lenders have already begun.

While early indicators from growth initiatives are encouraging—membership levels were stable in the first half of 2025 versus a 5% slide in the same period last year—the contraction in Bandon's member base over the past 12 months will continue to constrain performance in the near to mid term. As of June 30, 2025, Sentinel continues to value Bandon at the 8.6x EBITDA entry multiple, unchanged from the prior quarter. After adjusting for net debt outstanding and minority interest, this valuation equals $74.1 million, for a 0.6x gross multiple of cost, down 23.3% from the prior quarter.[1]

Catalyst MedTech. Catalyst underperformed in the second quarter. Revenue declined 4.4% from the prior-year second quarter to $27.9 million, and EBITDA was down 22.2% to $2.5 million. The steeper EBITDA decline resulted from elevated labor and parts costs across the business. Despite

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

healthy end-market demand, ongoing fulfillment delays have continued to constrain order-to-revenue conversion. For the 12 months ending June 30, 2025, revenue was $107.9 million, down 11.2% year over year, and EBITDA was $9.0 million, down 29.0%. Catalyst maintains a strong liquidity position, with $13.0 million of cash on its balance, providing time and flexibility to improve performance.

An unusually large backlog of deferred deliveries supports our expectation for a sales rebound in the second half of 2025. As of June 30, 2025, net debt to EBITDA was 10.4x, up from 10.1x the prior quarter due to lower EBITDA. We continue to value Catalyst at the 11.9x EBITDA entry multiple, unchanged from the prior quarter. As of June 30, 2025, after adjusting for net debt outstanding and including the Partnership's last-out term loan, this valuation equals $7.1 million, for a 0.1x gross multiple of cost, down 23.5% from the prior quarter.[1]

Empire Auto. Empire faced headwinds in the second quarter. For the three months ended June 30, 2025, revenue increased 9.4% from the prior-year second quarter to $65.4 million, driven primarily by market share gains in new regions. However, revenue declined in Empire's more profitable legacy regions as rising insurance rates nationwide and falling used-car values reduced the volume of repairable claims. As a result, overall EBITDA fell 28.4% to $9.6 million. We view this insurance-led dislocation as temporary. In response, management is pursuing targeted price increases and cost-saving initiatives to protect margins.

For the 12 months ended June 30, 2025, revenue was $264.6 million, up 8.6% from the prior-year same period, while EBITDA declined 17.5% to $47.5 million. Pro forma for the expected mature performance of recently opened locations, revenue for the 12 months ended June 30, 2025 was $341.0 million, and EBITDA $82.1 million—significantly higher than reported levels. As of June 30, 2025, net debt to EBITDA rose to 6.6x from 6.1x the previous quarter on lower EBITDA. Tariffs on imported parts have not yet had a material impact, but remain a potential source of cost pressure in the second half of the year.

As of June 30, 2025, we continue to value Empire at the 11.2x EBITDA entry multiple, unchanged from the prior quarter. Adjusted for net debt and a normalized level of working capital, this valuation equals $175.0 million, down 15.6% from the prior quarter. Including proceeds received through June 30, 2025, the value of the Partnership's holdings totals $252.3 million, for a 1.7x gross multiple of cost, down 11.4% from the prior quarter.[1]

New Era Technology. As previously reported, New Era's financial performance has steadily deteriorated since 2022. Macroeconomic pressures and weak demand have driven the downward trajectory, exacerbated by former management's overly aggressive cost cutting, which eroded operating efficiency and accelerated revenue declines. Second-quarter revenue fell 5.5% year over year to $208.7 million, and EBITDA declined 58.2% to $11.1 million. For the 12 months ending June 30, 2025, revenue was $802.2 million, down 10.0% from the comparable prior-year period, and EBITDA dropped 44.9% to $52.0 million. As a result, New Era breached certain debt covenants and

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

became unable to sustain its debt load. As of June 30, 2025, New Era's net debt to EBITDA stood at 19.7x.

In response to New Era's continued underperformance, we appointed a new CEO in July 2024 and implemented a turnaround plan that stabilized operations. Despite these efforts, EBITDA remained insufficient to support the capital structure. As a result, the company's lenders required a substantial equity infusion behind the existing debt—an investment we could not justify. The lenders then elected to assume ownership control.

In a smooth and cooperative process, ownership transferred to the lenders on August 21, 2025, with a full release for the Partnership. While this outcome—to be recorded as a realized loss in the third quarter—is deeply disappointing, the investment had already been written down to zero and therefore did not impact the Partnership's second-quarter net income.

New You Bariatric Group. As covered in prior reports, NYBG's core bariatric surgery market has contracted significantly due to the explosive adoption of prescription weight loss drugs. While the long-term health implications of these drugs remain uncertain, their immediate impact on bariatric surgery volumes has been severe. Given continued advancements in these therapies, we do not foresee a recovery in bariatric surgery demand in the near- or medium-term. NYBG's second-quarter revenue was $27.5 million, down 3.9% from the prior-year second quarter, and EBITDA was $2.6 million, down 36.5%. EBITDA fell more sharply because fixed costs could not be reduced in step with revenue. For the 12 months ending June 30, 2025, revenue was $107.6 million, down 1.4% from the comparable prior-year period, and EBITDA was $8.4 million, down 30.8%.

As a result of this material deterioration in profitability, NYBG is unable to meet its debt obligations. With no credible investment thesis to support additional capital support for NYBG, we plan to transition control of the company to its lenders in the third quarter.

As of June 30, 2025, we have assigned zero value to the Partnership's equity, unchanged from the prior quarter. For the Partnership's small senior debt position, we continue to use the 8.4x EBITDA entry multiple, as we did in the prior quarter, resulting in a valuation of $1.7 million, or 34.1% of the senior debt cost, down 19.8% from the prior quarter. Including $59.3 million of proceeds received through June 30, 2025, the total value of the Partnership's holdings is $61.0 million, for a 0.9x gross multiple of cost, down 0.7% from the prior quarter.[1]

NSI Industries. NSI delivered strong second-quarter results—revenue was $189.7 million, up 5.8% from the prior-year second quarter, and EBITDA climbed 27.1% to $52.6 million. Outperformance was driven by cross-selling across product lines, market share gains, and targeted cost improvements. For the 12 months ending June 30, 2025, revenue rose 2.9% over the comparable prior-year period to $692.5 million, while EBITDA increased 15.9% to $171.2 million. Net debt to EBITDA declined to 5.0x as of June 30, 2025, down from 5.3x the prior quarter-end.

At the outset of our NSI investment, we planned to focus the business on its core electrical products segment, which generated $472.3 million of trailing 12-month revenue and $115.9 million of EBITDA

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

through the second quarter, and divest its two non-core HVAC and network infrastructure operations. We initially capitalized NSI with these divestitures in mind. On August 14, 2025, NSI signed a definitive agreement to sell its HVAC division to strategic buyer Lennox International Inc. (NYSE: LII) in an all-cash transaction valued at $550.0 million, or 10.0x trailing 12-month EBITDA. The sale will also right-size Sentinel VII's NSI investment to $325.0 million or less, as planned, down from $501.7 million; Sentinel VI's investment will be unchanged. The transaction is expected to close in the fourth quarter, subject to HSR approval. We are also actively exploring a sale of NSI's small network infrastructure business.

As of June 30, 2025, Sentinel is valuing NSI at the same 9.9x EBITDA multiple paid for the business, unchanged from the prior quarter. After adjusting for net debt outstanding as of June 30, 2025, this values the Partnership's holdings at $89.5 million, for a 1.2x gross multiple of cost, up 13.9% from the prior quarter.[1]

SPL. SPL's second-quarter performance was disappointing. Pro forma for acquisitions, revenue declined 12.4% from the prior-year second quarter to $32.7 million, and EBITDA fell 37.2% to $6.8 million. The revenue decline was driven by continued underperformance in the metrology and data services segments, partly offset by growth in energy and environmental lab testing. The EBITDA decline reflects wage inflation and the loss of certain valuable customers after leadership turnover. For the 12 months ending June 30, 2025, pro forma for acquisitions, revenue was $133.6 million, down 12.8% over the comparable prior-year period, and EBITDA was $30.5 million, down 30.9%. As of June 30, 2025, SPL's net debt to EBITDA increased to 6.5x from 6.1x the prior quarter due to lower EBITDA.

We continue to invest in rebuilding SPL's leadership team. In April 2025, we hired Dana Wobser—who previously worked alongside SPL's new CEO—as Chief Administrative Officer. Dana now leads SPL's human resources and safety functions. As of June 30, 2025, we continue to value SPL at the 8.6x EBITDA entry multiple, unchanged from the prior quarter. After adjusting for net debt as of June 30, 2025, this valuation equals $56.8 million, for a 0.7x gross multiple of cost, down 19.5% from the prior quarter.[1]

TriMech. TriMech delivered excellent second-quarter results. Revenue grew 9.5% from the prior-year second quarter to $117.6 million, while EBITDA increased 21.8% to $22.1 million. Growth was fueled by strong organic performance in TriMech's CAD software solutions and industrial automation applications. EBITDA growth outpaced revenue thanks to fixed-cost leverage. For the 12 months ending June 30, 2025, revenue was $436.0 million, a 3.7% year-over-year increase, and EBITDA was $78.6 million, up 3.4%. As of June 30, 2025, net debt to EBITDA improved to 5.8x, down from 6.1x the prior quarter, driven by EBITDA growth.

In June 2025, TriMech completed a long-planned leadership transition. Sebastien Bilodeau was appointed TriMech's Global CEO, replacing Alan Sampson, founder of TriMech's U.K. business, who has transitioned to a board-only role. Sebastien brings a strong record of leading high-performing technology organizations. He most recently served as President of Cerberus Technology Solutions,

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

where he led enterprise-wide digital transformation, advanced analytics, and AI initiatives. He previously spent two decades at Synapse Group, ultimately serving as CEO.

We are valuing TriMech at the same 11.2x EBITDA we paid for the U.S. and U.K. platforms, unchanged from the prior quarter. As of June 30, 2025, after adjusting for net debt outstanding, this valuation equals $215.6 million, for a 1.3x gross multiple of cost, up 10.9% from the prior quarter.[1]

For the 12 months ending June 30, 2025, the 13-company unrealized portfolio declined by 18.5%, as shown in the table below.

Realized and Unrealized Portfolio Valuations
Trailing 12-Month Performance Comparison as of June 30, 2025
($000s)

Portfolio Company Operating Metrics

In the second quarter, the Partnership's 11 unrealized portfolio companies saw modest revenue gains as demand showed signs of strengthening.[1] These revenue gains flowed through to EBITDA. Aggregate second-quarter revenue was $875.2 million, up 4.3% from the prior-year second quarter, and EBITDA increased 4.6% to $191.9 million. The EBITDA increase was largely driven by three companies—NSI, Spectrum, and TriMech—whose combined EBITDA grew $20.3 million, or 21.6%. This increase was partly offset by a combined $10.0 million EBITDA decline, or 26.0%, at Bandon, Empire Auto, and SPL. The remaining five companies declined by a modest $1.9 million, or 3.7%. For the 12 months ending June 30, 2025, aggregate portfolio revenues inched up 0.4% from the comparable prior-year period to $3.2 billion, while EBITDA was $673.4 million, down 2.5%. The table below summarizes the financial performance of the 11 unrealized companies.

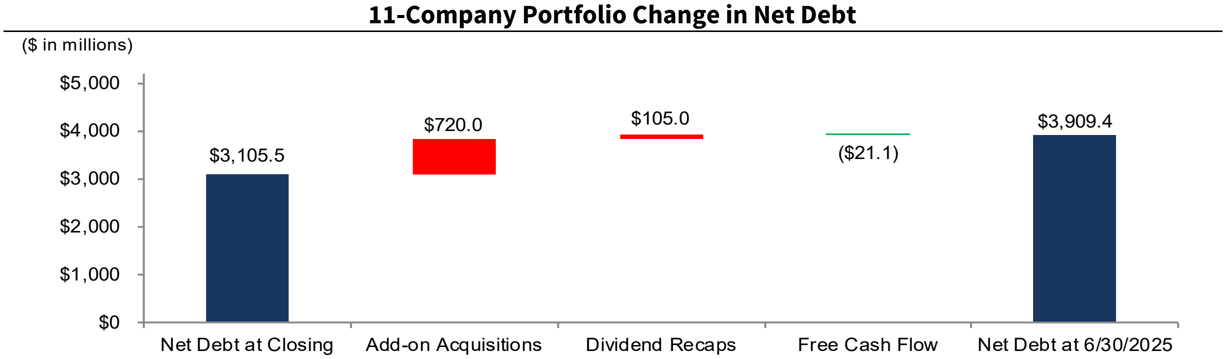
11-Company Portfolio Income Statement
($ in millions)

	Quarter Ending June 30,				12 Months Ending June 30,			
			Change				Change	
	2024	2025	$	%	2024	2025	$	%
Revenue	$839.1	$875.2	$36.2	4.3%	$3,234.0	$3,248.4	$14.4	0.4%
EBITDA	$183.5	$191.9	$8.4	4.6%	$690.8	$673.4	($17.4)	(2.5%)
EBITDA Margin	*21.9%*	*21.9%*			*21.4%*	*20.7%*		
Capital Expenditures	$14.9	$11.9	($3.1)	(20.7%)	$60.3	$60.1	($0.2)	(0.3%)
CAPEX as % Revenue	*1.8%*	*1.4%*			*1.9%*	*1.8%*		

The table above also illustrates a core element of our investment strategy—to target high-operating-margin, asset-light companies that produce strong returns on net tangible invested capital. Over the trailing 12 months, the portfolio delivered 20.7% EBITDA margins, and capital expenditures equal to just 1.8% of sales. These metrics underscore the portfolio's relatively modest capital requirements and highly efficient EBITDA-to-cash conversion, which together produce significant free cash flow and provide flexibility to fund growth initiatives and repay debt.

In the average 2.9 years we have held the 11 companies, total debt is up $803.9 million, which results from (i) 67 add-on acquisitions that incurred $720.0 million of new debt and (ii) a dividend recap at Empire Auto that incurred $105.0 million of new debt, partly offset by (iii) $21.1 million of cash flow generation. The chart below highlights the changes in debt since the closings of the 11 platform investments.

11-Company Portfolio Change in Net Debt



[1] Metrics exclude New Era and New You Bariatric, which transitioned or will transition to lender control in 2025, as discussed on pages 6–7, and are treated as realized for purposes of this analysis.

During our ownership, aggregate EBITDA for the portfolio has increased by $146.0 million, up 1.3x since the original closings. At the end of the second quarter, the portfolio's net debt to EBITDA was 5.8x, down from 5.9x at the closings of the platform investments. The table below summarizes key portfolio-level EBITDA and leverage metrics.

Portfolio EBITDA and Leverage Trends

	At Closing	At 6/30/2025	Change $ / x	Change %
EBITDA ($ millions)	$527.5	$673.4	$146.0	27.7%
Net Debt to EBITDA	5.9x	5.8x	(0.1x)	(1.4%)

We consider the portfolio's 5.8x net-debt-to-EBITDA ratio manageable. During our 2.9-year average hold for the portfolio, equity value has been created, driven by a portfolio EBITDA level well above the average at the respective closings, lower aggregate leverage, and valuation multiples for the Partnership's equity portfolio below the industry median.

Sustainability and Responsibility

We continue to make meaningful strides in embedding sustainability and responsibility principles and procedures across our platform. A key pillar of Sentinel's S&R strategy is fostering an inclusive culture to help attract top-tier talent and empower employees to reach their full potential. A detailed overview of recent S&R accomplishments and ongoing initiatives is provided in Appendix A.

Organizational Update

In the second quarter and early third quarter, Sentinel welcomed five investment associates. We also promoted senior associates Trevor Anderson and Mike Griffin to vice president, and associates Kamryn Bloh, Sam Lettes, Lucy Pearce, and Josiah Wilson to senior associate. Claire Fletcher and Liam McCabe completed their two-year associate programs. Claire will pursue a PhD in economics, and Liam has joined another private equity firm. Profiles of our new colleagues follow.

Scooter Harrington joined Sentinel as an Associate. He previously spent three years in William Blair's Investment Banking Analyst Program. Scooter holds a BS in management science and engineering and an MS in sustainability science and practice from Stanford University. At Stanford, he was a member of its NCAA Division I football team and, after graduating, signed as an undrafted free agent with the Chicago Bears.

Sarah Michel joined Sentinel as an Associate from Piper Sandler's Investment Banking Analyst Program, where she spent two years. Sarah holds a BBA in finance and economics from the University of Wisconsin-Madison.

Jushan Samra joined Sentinel as an Associate from Lincoln International's Investment Banking Analyst Program, where he spent three years. He previously was an analyst in Goldman Sachs' Personal Financial Management team. Jushan holds a BS in finance from Long Beach State University and an MS in finance from Vanderbilt University.

Donovan Sermons joined Sentinel as an Associate from William Blair's Investment Banking Analyst Program, where he spent three years. He holds a BS in communications and an MS in management from Northwestern University, where he was a member of its NCAA Division I football team.

Fulton Smith joined Sentinel as an Associate from Harris Williams' Investment Banking Analyst Program, where he spent two years. He holds a BS in finance, cum laude, from Wake Forest University, where he captained the men's golf team to an ACC championship.

Today, our professional and administrative staff stands at 97, as shown in the table below.

News Highlights from Other Active Sentinel Funds[3,4]

Today, Sentinel has fully realized four flagship equity funds and actively manages three successor funds and three affiliated-fund strategies. The fully realized funds are Sentinel I (1995 vintage), Sentinel II (1998 vintage), Sentinel III (2005 vintage), and Sentinel IV (2009 vintage). Highlights of our six active funds include:

Sentinel V (2014 vintage) is in its advanced harvest phase, has exited 17 of its 21 investments that together have generated a 2.5x gross multiple of cost, a 25.7% gross IRR, a 20.5%/19.9% net levered/unlevered IRR, a 1.9x DPI, and a 2.0x TVPI.

Sentinel VII (2023 vintage), our newest equity fund, has completed eight platform investments. With the recently executed agreement to sell a division of NSI, the two-year-old fund is now poised for its first material realization, leaving it approximately 40% drawn. Deployment is running somewhat ahead of schedule—though plenty of work remains.

Sentinel Junior Capital I (2018 vintage), renamed Sentinel Capital Solutions I, completed its primary investment phase and has fully or substantially realized 12 of its 23 investments. With a 0.9x DPI, a 16.4% gross IRR, and a 14.0%/12.9% net levered/unlevered IRR, our inaugural structured capital solutions fund is outperforming expectations.

Sentinel Junior Capital II (2023 vintage), now Sentinel Capital Solutions II, has made 14 investments and deployed 47.8% of its capital. The fund is well positioned to capitalize on opportunities with companies seeking flexible, creative mid-balance-sheet capital solutions.

[1] These individuals are not Sentinel employees.
[2] Five of the 10 operating partners are not Sentinel employees.
[3] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.
[4] Full records for the funds referenced in this section are available on request.

Sentinel Continuation Fund I (2021 vintage) has deployed 19.2% of its capital in four investments. Deployment has been slower than anticipated because of the industrywide slowdown in private equity exits, which has constrained new continuation investments.

And as discussed in this letter, Sentinel VI (2019 vintage) completed its primary investment phase in 2024, deploying 103.0% of its capital. To date, Sentinel VI has also exited six of 18 platform investments, generating a 2.2x gross multiple of cost and a 47.6% gross IRR. As of the end of the second quarter, Sentinel VI has produced a 1.4x gross multiple of cost, a 0.6x DPI, a 14.2% gross IRR, and a 9.4%/9.0% net levered/unlevered IRR.

With significant capital available for investment and a deep, highly experienced team, Sentinel is well positioned to pursue new investment opportunities for Sentinel VII and Sentinel Capital Solutions II, support our management partners in building great businesses, prepare portfolio companies for successful exits, and oversee our 97-member firm and $8.7 billion of capital under management. You can also count on us to keep navigating today's market volatility with discipline and care.

Respectfully yours,

David S. Lobel
Managing Partner

Managing Partner

Appendix A

Sentinel Sustainability and Responsibility Midyear Highlights

Sustainability

- S&R Tracking and Reporting – We kicked off our annual reporting process with our new partner, Malk, and onboarded our new portfolio companies to the S&R tracking program. 15 portfolio companies now track and report key S&R metrics (including Scope 1 and Scope 2 GHG emissions). All Sentinel VII portfolio companies and two-thirds of Sentinel VI portfolio companies participated in 2024 data collection.

- Carbon Footprint – Sentinel completed its fourth annual carbon footprint assessment, which included select Scope 3 emissions.

Responsibility

- Employee Engagement Survey – For the third year, Sentinel conducted a firmwide engagement survey; guided by the feedback, we are implementing improvements.

- Training and Mentorship – We will offer our augmented training and mentorship programs to our five-person incoming 2025 associate class.

- Continuous Inclusion Education and Support – We provided educational resources to promote belonging and discussed relevant topics quarterly in firmwide meetings.

- Broad-Based Equity Incentives – Sentinel partnered with Ownership Works to support our implementation of broad-based equity programs into the Partnership's portfolio companies. In January 2025, we launched our most wide-reaching equity plan to date at Spectrum Safety Solutions, giving all employees an ownership stake and a meaningful opportunity to build wealth.

- Affinity Group – We launched a women's affinity group at Sentinel to foster connection and support.
