FIRST-QUARTER REPORT

For the Quarter Ending March 31, 2026

Table of Contents

Important Information

This quarterly report is for informational purposes only and is not intended to recommend any investment discussed in this report. This quarterly report is not an offer to sell nor the solicitation of an offer to purchase an interest in any investment vehicle managed or sponsored by Sentinel Capital Partners, L.L.C. or its affiliates (collectively, "Sentinel").

Statements in this quarterly report are made as of the dates specified in this report, and Sentinel has no obligation to update the information in this quarterly report.

All information with respect to industry data has been obtained from sources believed to be reliable and current; however, none of Sentinel or its respective affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of any information contained herein (including, but not limited to, economic, market, or other information) obtained from third parties, and each expressly disclaims any responsibility or liability therefor. The delivery of this information shall not, under any circumstances, create any implication that the information contained herein is correct in all respects, including as of any time subsequent to the date of this report. Further, Sentinel does not undertake an obligation to update such information at any time after such date. Unless otherwise stated herein, information is current through March 31, 2026.

Any investment in any private fund managed or sponsored by Sentinel is subject to various risks, none of which is outlined herein. A description of certain risks involved with an investment in any private fund managed or sponsored by Sentinel can be found in the offering memorandum of such private fund; such risks should be carefully considered by prospective investors before they make any investment decision.

This quarterly report contains certain performance information for existing Sentinel private funds and selected portfolio companies of such funds. The portfolio company case studies are intended to illustrate the various types of portfolio company investments that Sentinel has made. Performance information for all portfolio companies is available from Sentinel upon request.

The benchmark statistics for 2019-vintage private equity funds reflect the investment performance of a collection of U.S. private equity buyout funds selected by Cambridge Associates LLC, including fully liquidated funds, formed in 2019 (the "CA 2019 Benchmark"). The returns of the funds included in the CA 2019 Benchmark are net of all applicable fees, expenses and carried interest. The Standard & Poor's 500 Index (the "S&P 500") sets forth the performance of a well-known broad-based stock market index, assuming reinvestment of dividends. The S&P 500 contains only seasoned equity securities. The Dow Jones Industrial Average (the "DJIA") sets forth the price-weighted average performance of 30 actively traded "blue chip" stocks of primarily industrial issuers.

Investors generally cannot invest directly in the CA 2019 Benchmark, the S&P 500, or the DJIA, which are presented for reference purposes only. The statistical data regarding the CA 2019 Benchmark, the S&P 500, and the DJIA have been obtained from sources believed to be reliable. Sentinel intends for the Sentinel funds to pursue, and they have previously pursued, a private equity strategy, although the Sentinel funds may also make, and they have previously made, investments outside of this strategy from time to time and may not pursue other strategies followed by some or all of the funds included in the CA 2019 Benchmark, nor will the Sentinel funds invest, and nor did they previously invest, in the funds comprising the CA 2019 Benchmark. The S&P 500 and the DJIA are commonly used, broad-based benchmarks for various markets and are provided only for general comparison against those markets. Investors generally are not able to invest in these indices. The criteria for including particular securities in these indices are different than Sentinel's criteria for choosing investments for its funds. Specifically, the Sentinel funds do not invest in the securities comprising these indices. Rather, the Sentinel funds generally invest in portfolios of control investments in lower middle market businesses in the United States and Canada in specific industry sectors (as set forth in the funds' offering materials and governing documents). In addition, an investment in any Sentinel fund generally will be subject to expenses, management fees, and carried interest charged or payable by the fund, none of which are reflected in these indices. For the foregoing and other reasons, the returns achieved by the Sentinel funds and the returns of the CA 2019 Benchmark, the S&P 500, and the DJIA should not be considered comparable.

The historical returns achieved by any prior funds or individual investments are not a prediction of future performance or a guarantee of future results, and there can be no assurance that these or comparable returns will be achieved by investments, individually or in the aggregate, made by any existing or future Sentinel private fund.

As used herein, "gross IRR" represents the gross compound annual rate of return based on realized and unrealized proceeds using quarterly cash flows and incorporates valuing the remaining debt positions at accreted cost and valuing the remaining equity positions based on EBITDA multiples at the date of investment. Gross IRR is calculated before the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "gross multiple of cost" and "gross multiple of investment" are reflected on a gross basis and do not reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, "levered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses. An individual limited partner's levered net IRR may vary based on the timing of capital contributions and distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Levered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of March 31, 2026 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the Partnership's Agreement of Limited Partnership (the "LPA"). Calculations of levered net IRRs in respect of investment and performance data included and/or referred to herein are based on the payment date of capital contributions received from limited partners, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

As used herein, "unlevered net IRR" represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses (but excluding interest expense on any subscription-based credit facility). An individual limited partner's unlevered net IRR may vary based on the timing of distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Unlevered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of March 31, 2026 and proceeds are distributed through the Partnership's waterfall in accordance with the terms and conditions of the LPA. Calculations of unlevered net IRRs in respect of investment and performance data included and/or referred to herein are based on the closing/funding date of each applicable investment, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

Note that a feature in the LPA provides for an increase in the carried interest payable to the Partnership's general partner, from 20% to 25%, if certain return thresholds are met, provided that the distributions in respect of such increased carried interest may not be distributed to the Partnership's general partner until the investment period of the Partnership terminates. The calculation of the Partnership's unlevered and levered net IRRs presented herein assumes that the Partnership's investment period has not terminated (as was true at the time of issuance hereof). However, if the calculation were to assume, alternatively, that the investment period had terminated and the relevant return thresholds had been met, then the carried interest rate applied in respect of distributions in excess of the limited partners' aggregate capital contributions and a 9% preferred return thereon would be 25%, and the unlevered and levered net IRRs of the Partnership would be reduced accordingly.

As used herein, "DPI" or "distributed/paid-in" means distributions received by limited partners relative to contributed capital. DPI is reflected on a net basis and reflects the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

As used herein, "TVPI" or "total value/paid-in" or "net multiple of cost" means distributions received by limited partners and the unrealized value relative to contributed capital. TVPI and net multiple of cost are reflected on a net basis and reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

Presentation of net performance information for subsets (realized and unrealized) of the Partnership is a hypothetical estimate of net performance because actual net returns cannot be calculated for a subset of portfolio investments due to the collective nature of fund fees and expenses. Net performance figures for this subset of the Partnership are estimated and do not represent actual performance experienced by investors. Sentinel has used the gross-net spread at the fund level to calculate such net performance. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the fund level. The cumulative and hypothetical composite investment performance data presented herein does not necessarily represent performance achieved by any investor, and reflects investments that were made across multiple Sentinel funds during different economic cycles. Such stated performance reflects neither a specific Sentinel fund nor a group of investments managed as a single portfolio. The actual return realized by any investor in an individual Sentinel fund may differ materially from those reflected or contemplated in the data presented herein. Net performance for individual investments also cannot be calculated without making arbitrary assumptions, and for that reason, the performance of individual investments herein is presented on a gross basis. See the "Fund Performance" Section for total fund gross and net performance metrics.

No representation or warranty is made with respect to the reasonableness of any estimates, forecasts, illustrations, prospects or returns, which should be regarded as illustrative only, or that any profits will be realized. This report contains certain "forward-looking statements," which may be identified by the use of forward-looking terminology such as "believe," "expect," "anticipate," "should," "planned," "estimated," “potential,” “outlook,” “forecast,” “plan,” or the negatives thereof or other variations thereon or comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, success or lack of success of Sentinel’s investment strategies, and statements regarding Sentinel’s investment thesis. Any forward-looking statements (including, without limitation, projections of future earnings or value) contained in this quarterly report are only estimates by Sentinel of future results that are based on assumptions made by Sentinel at the time this report was prepared. Each forward-looking statement contained in this quarterly report is subject to known and unknown risks, uncertainties, and other factors that may cause actual results to be materially different from those contemplated in such forward-looking statement. Accordingly, there can be no assurance that the results described by any such forward-looking statement will be attained, and actual results may be significantly different from such forward-looking statement. Sentinel does not undertake any obligation to update or revise the forward-looking statements contained in this quarterly report to reflect events or circumstances occurring after the date this report was prepared or to reflect the occurrence of unanticipated events.

Sentinel seeks to integrate certain sustainability and responsibility (“S&R”) factors into its investment process in accordance with its policy and subject to its fiduciary duty and any applicable legal, regulatory, or contractual requirements. There is no guarantee that Sentinel will be able to successfully implement its S&R policy or make investments in companies that create a positive S&R impact while achieving its investment strategy. In addition, applying S&R factors to investment decisions is qualitative and subjective by nature, and there is no guarantee that the criteria used by Sentinel or any judgment exercised by Sentinel will reflect the beliefs or values of any particular investor. There are also significant differences in interpretations of what positive S&R characteristics mean by region, industry and topic. Sentinel’s interpretations and decisions may differ from others’ views and could evolve over time. In addition, in evaluating an investment, Sentinel expects to depend upon information and data provided by a number of sources, including the relevant investments and/or various reporting sources which could be incomplete, inaccurate or unavailable, and which could cause Sentinel to incorrectly assess a company’s S&R practices and/or related risks and opportunities. Sentinel does not intend to independently verify all S&R information reported by investments or third parties.

Further, considering S&R qualities when evaluating an investment could result in the selection or exclusion of certain investments based on Sentinel’s view of certain S&R related and other factors and could cause the relevant funds not to make an investment that they would have made or to make a management decision with respect to an investment differently than they would have made in the absence of the S&R Policies, which could negatively impact the Partnership’s performance. For the avoidance of doubt, however, Sentinel does not expect to subordinate a Partnership’s investment returns or increase the Partnership’s investment risks as a result of (or in connection with) the consideration of any S&R factors. Further, S&R practices are evolving rapidly and there are different principles, frameworks, methodologies, and tracking tools being implemented by other asset managers, and Sentinel’s adoption and adherence to various such principles, frameworks, methodologies, and tools are expected to vary over time. There is also a growing regulatory interest across jurisdictions in improving transparency regarding the definition, measurement, and disclosure of S&R factors. Sentinel’s S&R policies could become subject to additional regulation in the future, and Sentinel cannot guarantee that its current approach will meet future regulatory requirements.

This quarterly report is intended for authorized recipients only and must be held strictly confidential. This quarterly report includes confidential, proprietary, and trade secret information of Sentinel. By accepting this information, each recipient agrees that (i) no portion of this quarterly report may be reproduced or distributed in any format without the prior express written consent of Sentinel, (ii) it will not copy, reproduce, or distribute this quarterly report, in whole or in part, to any person or party, and (iii) it will keep confidential all information contained herein that is not already public.

SENTINEL CAPITAL PARTNERS VI, L.P.
SENTINEL CAPITAL PARTNERS VI-A, L.P.
SENTINEL CAPITAL INVESTORS VI, L.P.

Quarterly Report for the Period Ended March 31, 2026

Dear Limited Partner:

This letter accompanies the unaudited financial statements for Sentinel Capital Partners VI, L.P. ("Sentinel VI") and its parallel funds—Sentinel Capital Partners VI-A, L.P. ("Sentinel VI-A") and Sentinel Capital Investors VI, L.P. ("Sentinel Investors VI," and together, "the Partnership")—that cover the three-month period ended March 31, 2026. In the first quarter, Sentinel VI generated net income from investment operations of $149.8 million, resulting in a net asset value ("NAV") of $1.4 billion on March 31, 2026. Sentinel VI-A reported net income of $11.7 million and a NAV of $106.7 million, and Sentinel Investors VI reported net income of $3.1 million and a NAV of $27.9 million. These gains resulted from unrealized appreciation in seven portfolio companies, partly offset by unrealized writedowns in four.

At the end of the first quarter, the Partnership had taken down or committed $2.2 billion, or 103.9% of its committed capital, and had invested in 18 companies. Cumulative distributions from inception through March 31, 2026 have been $1.6 billion, or 0.7x contributed capital. Including cumulative distributions, the Partnership's NAV on March 31, 2026 was $3.1 billion, or 1.5x contributed capital.

The Partnership's 18-company portfolio represents an aggregate purchased enterprise value of $7.0 billion. All 18 companies conform to Sentinel's investment strategy—all are midmarket businesses in our four core sectors; the average EBITDA purchase multiple is 10.1x, underscoring our relative-value approach; and each is a leader in its market niche. As of March 31, 2026, the portfolio—counting both realized and unrealized investments—had a value of $3.1 billion, representing a 1.5x gross multiple of cost and a gross IRR of 15.0%. After fees and expenses, the net levered/unlevered IRR to limited partners is 9.7%/9.4%, with a DPI of 0.6x and a TVPI of 1.3x.[1] All investments are valued in accordance with FASB ASC 820 standards.

This letter's updates include (i) fund performance since inception, (ii) lines of credit, (iii) follow-on investments, (iv) portfolio construction details, (v) liquidity events and limited partner distributions, (vi) portfolio company valuations, (vii) portfolio company operating metrics, (viii) AI initiatives, (ix) organizational developments, and (x) progress across our other funds.

The first quarter and second quarter to date have unfolded against a challenging economic backdrop shaped by the war in Iran, elevated fuel prices, and an uptick in inflation, compounded by investor uncertainty surrounding AI disruption and an unsettled tariff environment. In these conditions, which

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

have made selling and buying businesses exceedingly difficult, Sentinel has been extraordinarily productive across its platform. Jointly, Sentinel VI, Sentinel VII, and Sentinel Capital Solutions II signed agreements to sell one portfolio company and complete a material liquidity event for another. Sentinel VII and Sentinel Capital Solutions II also entered into an agreement to acquire a new platform, and Sentinel Continuation Fund committed to a new investment.

Fund Performance

The Partnership commenced investing on April 1, 2019 and has invested $2.1 billion in 18 portfolio companies, 11 of which were active as of March 31, 2026. With the Partnership having taken down or committed 103.9% of its committed capital, we have completed the fund's primary investment phase.

As of March 31, 2026, seven investments have been fully realized and generated $1.5 billion of cash proceeds, a 2.1x gross multiple of cost, and a 30.1% gross IRR. The Partnership's $2.1 billion aggregate investment in its 18 portfolio companies has produced $3.1 billion of total value, representing a 1.5x gross multiple of cost, a 15.0% gross IRR, a 9.7%/9.4% net levered/unlevered IRR, a 0.6x DPI, and a 1.3x TVPI, as shown in the table below.[1]

Partnership Investment Performance Since Inception[1]
As of March 31, 2026
($000s)

Fund VI (2019 Vintage)	Number of Investments	Amount Invested	Cash Realized	Unrealized Value	Total Value	Gross Multiple of Cost	Gross IRR
Realized Investments	7	$714,793	$1,495,380	$3,039	$1,498,419	2.1x	30.1%
Unrealized Investments	11	1,424,224	102,991	1,513,735	1,616,726	1.1x	3.8%
Total Fund VI	**18**	**$2,139,017**	**$1,598,371**	**$1,516,774**	**$3,115,146**	**1.5x**	**15.0%**
Net Levered / Unlevered IRR = 9.7% / 9.4%			**DPI = 0.6x**		**TVPI = 1.3x**		

Lines of Credit

As of March 31, 2026, the Partnership maintained a $96.3 million warehouse credit facility and a $100.0 million line of credit with BMO Harris Bank, which together had $7.5 million outstanding. In the second quarter, the Partnership drew an additional $25.0 million under the line of credit to fund three follow-on investments, bringing the total outstanding to $32.5 million. We anticipate applying proceeds from the pending sale of NSI (see page 7) to repay the outstanding facility balance.

As of March 31, 2026, amounts borrowed under the warehouse credit facility bear interest at either the prime rate minus 0.375% or SOFR plus 2.775%. The Partnership was in compliance with all terms of the loan agreement as of that date.

Follow-on Investments

In the first quarter and second quarter to date, the Partnership invested $32.5 million to support three portfolio companies, as shown in the table on the next page.

[1] *Past performance is not necessarily indicative of future results.* Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

2026 New Investments

Company	Investment Type	Closing Date	Investment ($000)	Business Description
Catalyst MedTech	Follow-On	3/27/2026	$7,500	Nuclear medicine and molecular imaging solutions
Q1-2026 Investments			**$7,500**	**0.3% of Committed Capital**
Empire Auto Parts	Follow-On	4/2/2026	$10,000	Aftermarket automotive parts for collision centers
SPL	Follow-On	5/7/2026	15,000	Testing, inspection, and certification services
Q2-2026 Investments to Date			**$25,000**	**1.2% of Committed Capital**
Total 2026 Investments to Date			**$32,500**	**1.5% of Committed Capital**

Below is additional information on the follow-on investments.

Catalyst MedTech. In March 2026, the Partnership invested an additional $7.5 million in a last-out senior term loan to support Catalyst's $12.5 million acquisition of X3D, a Danish manufacturer of branded SPECT medical imaging equipment. The purchase price represents a highly accretive 6.5x multiple of X3D's $1.9 million of EBITDA. In connection with the follow-on investment, we negotiated debt amendments that provide Catalyst with more time and flexibility to execute its turnaround. Covenants were reset, pricing was improved, and debt maturities were extended to December 2029. The follow-on brought the Partnership's total investment in Catalyst to $108.5 million.

Empire Auto. As discussed in our annual report, Empire was under pressure for much of 2025 due to industrywide challenges, including tariffs on imported auto parts, elevated insurance premiums, and moderating used-car values. In the fourth quarter, however, Empire secured several significant new programs with large-scale customers and implemented more dynamic pricing, both of which contributed to meaningful performance improvement and are expected to fuel sustainable growth. First-quarter revenue grew 34.7% year-over-year, while adjusted EBITDA rose 3.0%. EBITDA growth was moderated by higher tariffs, which have not yet been mitigated through pricing actions. Improved operating performance reduced net debt to EBITDA to 7.3x from 7.6x the prior quarter.

To support the additional working capital needed to fund Empire's accelerating growth, the Partnership made a $10.0 million follow-on investment on April 2, 2026, bringing the Partnership's net exposure to Empire to $82.8 million.[1] In connection with this investment, Sentinel secured an 18-month extension of Empire's debt maturity to May 2029, which provides additional runway to execute management's growth initiatives.

SPL. On May 7, 2026, the Partnership invested $15.0 million to support SPL's acquisition of NWDLS, an environmental lab testing business in Texas, where SPL currently operates three environmental labs. The purchase price represents an accretive 7.9x NWDLS's $2.0 million of EBITDA. The add-on advances SPL's strategy of scaling its environmental testing lab platform, a higher-margin business that has generated strong growth in recent years. NWDLS also presents an opportunity to realize up to $4.5 million in cost savings through facility consolidation in Texas. To date, SPL has completed seven acquisitions under Sentinel's hold. Sentinel Capital Solutions I also participated in the follow-

[1] In 2023, Empire completed a return of capital and leveraged recapitalization that together resulted in $77.2 million of proceeds to the Partnership on its original $150.0 million investment.

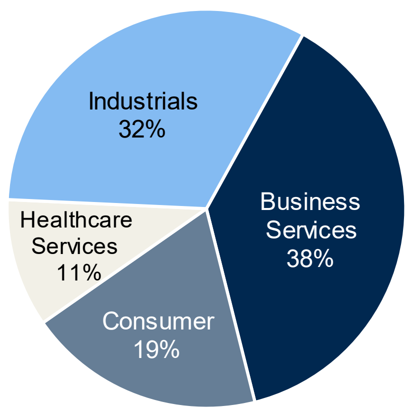
on financing with a $0.5 million commitment. The follow-on brings the Partnership's total investment in SPL to $100.0 million.

The NWDLS transaction reduced SPL's net debt to EBITDA to 6.6x from 7.6x at the end of the first quarter. In connection with the follow-on investment, we negotiated amendments to SPL's credit agreement that provide additional time and flexibility to execute the company's commercial and operational objectives. The amendments reset covenants, establish carveouts permitting EBITDA adjustments for profit-improvement initiatives, and provide flexibility to incur integration-related costs through January 2028.

Portfolio Construction

The capital invested in the 18-company portfolio is well diversified across our four core industry sectors, as shown in the chart below.

Sentinel VI
($2.2 billion | 103.9% invested | 18 portfolio companies)



Liquidity Event and Distribution

In the first quarter, the Partnership received $1.4 million of additional proceeds from the 2024 sale of TranSystems, which was retained to fund partnership expenses. Through March 31, 2026, TranSystems has returned $279.7 million, or 3.0x cost.[1]

Because the Partnership Agreement requires the distribution of net proceeds from portfolio investments to the limited partners, a dollar-for-dollar distribution to and capital contribution by the limited partners will be deemed to have occurred. The result will be to reduce future capital commitments of the limited partners by the amount of the deemed capital contribution.

Portfolio Company Progress and Valuations[2]

In the first quarter, seven of the Partnership's 11 active portfolio companies appreciated in value from the prior quarter, and four declined. In total, the portfolio's value as of March 31, 2026 increased $169.6 million, or 12.6%. The EBITDA multiples used to value each unrealized portfolio company, along

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost and gross IRR metrics set forth herein are presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Please see "Important Information" at the front of this report for more information.

[2] Under GAAP, the Partnership is required to value its portfolio companies at fair market value. This requirement introduces inherent volatility into quarter-to-quarter and year-to-year private equity fund valuations, and the Partnership is no exception.

with the resulting changes in valuation by company and for the Partnership overall, are shown in the table below.

Unrealized Portfolio Valuations
First-Quarter Performance Comparison
($000s)

Company	Total Investment Cost	Value at 12/31/2025	New First Quarter Investment	3/31/2026 Debt / EBITDA	EBITDA Multiples Entry	EBITDA Multiples 12/31/2025	EBITDA Multiples 3/31/2026	Value at 3/31/2026	Changes vs. Prior Quarter In Value	Changes vs. Prior Quarter %

Spectrum Safety Solutions	190,000	221,036		5.6x	11.1x	11.1x	11.1x	263,043	42,007	19.0%
SPL	85,000	42,857		7.2x	8.6x	8.6x	8.6x	26,490	(16,367)	(38.2%)
TriMech	167,123	232,905		5.6x	12.4x	11.2x	11.2x	240,848	7,943	3.4%
Subtotal	**$1,424,224**	**$1,338,015**	**$7,500**	**5.7x**	**11.1x**	**10.8x**	**11.4x**	**$1,513,735**	**$168,220**	**12.5%**
Total	**$1,724,960**	**$1,341,054**	**$7,500**	**5.7x**	**10.8x**	**10.4x**	**11.0x**	**$1,518,160**	**$169,606**	**12.6%**

The average EBITDA multiple for the unrealized portfolio at March 31, 2026 was 11.4x, up from 10.8x the prior quarter and the 11.1x entry multiple paid for the entire unrealized portfolio, primarily as a result of the elevated multiple secured from the pending NSI sale discussed on page 7.

In our quarterly reports, we discuss companies whose value changed by more than 10% or that experienced other material developments since the prior quarter. Six unrealized portfolio companies experienced such developments, as summarized in the following paragraphs.

Bandon. In the first quarter, the initiatives Bandon has been pursuing to drive sales growth showed progress, although at a meaningful cost to profitability. Revenue rose 2.3% year-over-year to $28.1 million, driven by a 24.2% increase in lower-margin personal training revenue, while high-margin membership fees remained flat. EBITDA declined 19.9% to $3.9 million, reflecting heavy advertising investment to attract new members and rising rent. Management remains focused on stabilizing membership declines and implemented a price increase that we expect to cushion the pressure on EBITDA margins. For the 12 months ending March 31, 2026, revenue was $119.2 million, unchanged from the comparable prior-year period, while EBITDA declined 23.0% to $25.6 million. Due to lower EBITDA, net debt to EBITDA increased to 6.8x as of March 31, 2026 from 6.4x at year-

[1] Values as of 3/31/2026 include distributions received in the first quarter.

end. Bandon's lenders extended the forbearance agreement through May 2026, and discussions remain ongoing.

In light of Bandon's uncertain outlook, we have elected to value the Partnership's equity at option value, or 10% of cost, which implies a 7.4x EBITDA valuation multiple, down from 8.6x at entry. This results in a valuation of the Partnership's equity of $12.7 million, or 0.1x cost and down 74.6% from the prior quarter.[1]

Bridgeview Eye. The first quarter was highly productive for Bridgeview. Bridgeview acquired three practices during the quarter at an accretive 8.3x the add-ons' aggregate EBITDA of $0.6 million. The purchase was funded by senior debt from existing lenders and rollover equity from selling physicians.

Under the leadership of its new CEO, who joined September 2025, Bridgeview delivered excellent first-quarter results. Revenue increased 7.5% year-over-year to $47.1 million, and EBITDA rose 43.4% to $7.3 million. A favorable mix shift toward higher-margin surgical revenue combined with strong cost controls drove sustainable margin expansion. For the 12 months ended March 31, 2026, revenue increased 1.8% over the prior-year same period to $187.3 million, while EBITDA rose 18.3% to $33.5 million. Net debt to EBITDA improved to 5.4x as of March 31, 2026, down from 5.7x the prior quarter-end.

As of March 31, 2026, Sentinel is valuing Bridgeview at the same 11.7x EBITDA we paid for the business, unchanged from the prior quarter. Adjusted for quarter-end net debt outstanding, the Partnership's holdings are valued at $126.6 million, or 1.3x cost and up 13.7% from the prior quarter.[1]

Catalyst MedTech. In the first quarter, Catalyst acquired X3D with support from the follow-on investment discussed on page 3. Operational performance for the quarter, however, fell short of plan and represented a step back from the solid progress achieved in the prior quarter. Pro forma for the X3D add-on, revenue declined 7.1% from the prior-year first quarter to $25.4 million, and EBITDA fell 59.0% to $1.3 million. The declines resulted from equipment shipping delays and elevated labor costs. For the 12 months ended March 31, 2026, revenue increased 5.5% year-over-year to $119.4 million, and EBITDA rose 9.8% to $12.9 million. As of March 31, 2026, net debt to EBITDA improved modestly to 7.5x from 7.8x at the prior quarter.

As of March 31, 2026, Sentinel is valuing the Partnership's senior debt securities, including the new $7.5 million term loan described on page 3, at par and its equity at the same 11.9x EBITDA paid for the business, unchanged from the prior quarter. Adjusting for net debt outstanding as of March 31, 2026, the Partnership's equity is valued at $26.1 million, or 0.3x cost and down 14.2% from the prior quarter. The total value of the Partnership's combined holdings as of March 31, 2026 is $37.3 million, or 0.3x cost.[1]

NSI Industries. NSI delivered excellent results in its first full quarter as a pure-play electrical parts provider. Revenue for the quarter increased 21.7% year-over-year to $136.3 million, and EBITDA rose

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

75.4% to $41.4 million. Growth was driven by cross-selling across product lines, market share gains, pricing initiatives, and cost improvements. For the 12 months ended March 31, 2026, revenue increased 14.3% from the comparable prior-year period to $528.9 million, and EBITDA grew 40.6% to $152.4 million. Strong EBITDA growth improved net debt to EBITDA to 4.4x as of March 31, 2026 from 5.1x the prior quarter.

On May 4, 2026, we signed a definitive agreement to sell NSI to strategic buyer Hubbell Incorporated (NYSE: HUBB) in an all-cash transaction at an enterprise value of $3.0 billion, representing 19.7x NSI's trailing 12-month EBITDA. NSI's operating performance has been stellar since we acquired the business in November 2024. Our original investment thesis—that value could be unlocked by refocusing NSI on branded electrical parts—was validated by significant inbound interest after the October 2025 divestiture of NSI's HVAC business to Lennox International (NYSE: LII).

The sale to Hubbell is expected to close in the second quarter, subject to customary HSR approval. For purposes of valuing NSI as of March 31, 2026, we have applied a 10% discount to the estimated value implied by the sale price. Adjusted for net debt outstanding as of March 31, 2026, the Partnership's investment is valued at $245.9 million, or 3.3x cost and up 160.5% from the prior quarter. Including proceeds received from the HVAC divestiture, the Partnership's holdings as of March 31, 2026 are valued at $271.7 million, or 3.6x cost. We are pleased to be able to report this outstanding outcome and will provide additional detail when the transaction closes.[1]

Spectrum Safety Solutions. The first five months of 2026 were highly productive for Spectrum. The company executed agreements to divest two businesses—setting the stage for a significant early return of capital to the Partnership—and closed a strategic add-on.

On March 23, 2026, Spectrum signed a definitive agreement to sell Marioff to European private equity firm Inflexion at an enterprise value of $861.0 million, or 15.3x EBITDA. Then, on May 5, 2026, Spectrum signed a definitive agreement to sell Autronica to MSA Safety (NYSE: MSA) at an enterprise value of $555.0 million, or 17.1x EBITDA. Together, the two divestitures are valued at $1.4 billion, slightly above the $1.375 billion we originally paid for the entire four-business platform.

The divestitures represent the first steps in executing our original investment thesis of unlocking value through selling Spectrum's four businesses separately. The divestitures will enable Spectrum's management team to focus on creating additional value at Det-Tronics and Fireye, the two remaining businesses. Both transactions are subject to customary regulatory approvals and are expected to close in the third quarter.

Based on current estimates, the Marioff and Autronica divestitures are expected to generate a substantial liquidity event for the Partnership. After repayment of debt and transaction costs, we expect to return in excess of 1.0x cost to limited partners, or more than Sentinel VI's original $190.0 million investment in Spectrum. We will provide additional detail after the transactions close.

In January, Det-Tronics acquired Optronics, a Norway-based technology-centric developer and manufacturer of harsh-environment optical gas detection products, for consideration consisting of

[1] *Past performance is not necessarily indicative of future results*. The gross multiple of cost set forth herein is presented on a gross basis, which does not reflect fees, expenses, and carried interest. See "Fund Performance" for total fund gross and net performance metrics. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

$10.5 million of cash, $10.0 million of seller financing, $10.0 million of equity, and contingent earnouts of up to $20.0 million. The acquisition enables Det-Tronics to enter new markets, refresh its product portfolio, and add highly specialized, world-class engineering talent. Management also believes the transaction will significantly accelerate sales of Optronics' existing products and speed commercialization of its cutting-edge products in late-stage development. Although Optronics is not yet profitable, management believes it could contribute more than $15.0 million of EBITDA by 2030.

Spectrum's first-quarter performance was excellent. Pro forma for the two divestitures and the Optronics add-on, revenue increased 29.3% year-over-year to $77.4 million, and EBITDA rose 13.0% to $18.7 million. The strong performance was driven by improved operational execution and robust gas turbine demand at Det-Tronics. For the 12 months ended March 31, 2026, pro forma revenue grew 11.5% to $273.9 million from the prior-year comparable period, and EBITDA increased 2.7% to $60.1 million. As of March 31, 2026, net debt to EBITDA was 5.6x, compared to 5.3x the prior quarter.

For purposes of valuing Spectrum as of March 31, 2026, we are applying the same 11.1x EBITDA multiple we originally paid for Spectrum to the ongoing platform and discounting by 10% the estimated value of the two divestitures. After adjusting for net debt outstanding as of March 31, 2026, the Partnership's holdings are valued at $263.0 million, or 1.4x cost and up 19.0% from the prior quarter.[1]

SPL. SPL's first-quarter performance was disappointing and reflects continuing weakness in its energy measurement, or "metrology," division. SPL's first-quarter revenue declined 13.6% year-over-year to $30.5 million, while EBITDA decreased 37.8% to $5.6 million. The sharper EBITDA decline reflects SPL's fixed-cost structure as well as recent investments in key management hires. For the 12 months ended March 31, 2026, revenue declined 9.4% to $133.1 million from the comparable prior-year period, while EBITDA fell 25.6% to $29.0 million. As of March 31, 2026, net debt to EBITDA increased to 7.6x from 7.0x the prior quarter due to the EBITDA decline.

In response to the soft first quarter, management initiated headcount reductions and facility consolidations, the benefits of which are expected to flow through in the back half of the year. In another positive development, SPL hired a CFO in May whose energy industry background and operational mindset are well-suited to the business.

As of the end of the first quarter, we continue to value SPL at the same 8.6x EBITDA we paid for the business, unchanged from the prior quarter. Adjusted for net debt outstanding as of March 31, 2026, the Partnership's holdings are valued at $26.5 million, or 0.3x cost and down 38.2% from the prior quarter.[1]

For the 12 months ending March 31, 2026, the 11-company unrealized portfolio, including realizations during the period, increased 14.1%, as shown in the table on the next page.

The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information.

[2] Source: *PitchBook*, March 2026.

Portfolio Company Operating Metrics

In the first quarter, aggregate revenue for the Partnership's 11 unrealized portfolio companies increased 10.7% year-over-year to $692.4 million, while EBITDA rose 14.0% to $141.3 million. The growth was led by Bridgeview, Empire, NSI, RecGroup, SmartSign, Spectrum, and TriMech, whose combined EBITDA increased 25.1%, or $24.6 million. These gains were partly offset by declines at Bandon, Catalyst, RefrigiWear, and SPL, whose combined EBITDA decreased 28.1%, or $7.3 million. For the 12 months ending March 31, 2026, aggregate portfolio revenue increased 6.7% year-over-year to $2.8 billion, while EBITDA rose 8.9% to $589.1 million. The table below summarizes the financial performance of the 11 unrealized companies.

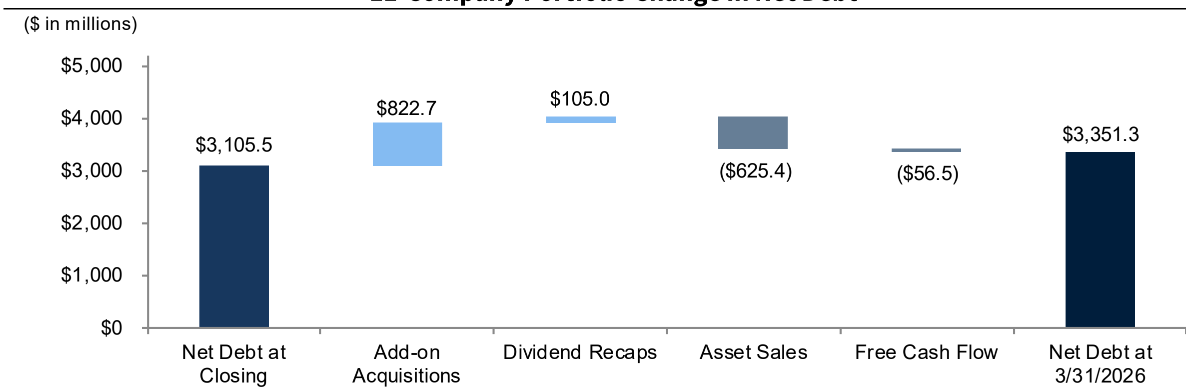
11-Company Portfolio Income Statement[1]
($ in millions)

	Quarter Ending March 31,				12 Months Ending March 31,			
			Change				Change	
	2025	2026	$	%	2025	2026	$	%
Revenue	$625.6	$692.4	$66.8	10.7%	$2,609.4	$2,783.4	$174.0	6.7%
EBITDA	$124.0	$141.3	$17.3	14.0%	$541.1	$589.1	$48.0	8.9%
EBITDA Margin	*19.8%*	*20.4%*			*20.7%*	*21.2%*		
Capital Expenditures	$9.4	$13.3	$3.9	41.3%	$48.2	$48.1	($0.1)	(0.3%)
CAPEX as % Revenue	*1.5%*	*1.9%*			*1.8%*	*1.7%*		

The table above also illustrates a core element of our investment strategy—to target high-operating-margin, asset-light companies that convert a substantial portion of EBITDA into cash and produce strong returns on net tangible invested capital. Over the trailing 12 months, the portfolio delivered EBITDA margins of 21.2%, while capital expenditures represented just 1.7% of sales. These characteristics generate significant free cash flow and provide flexibility to fund growth and reduce debt.

Over the average 4.0 years we have held the 11 companies, total debt is up $245.8 million, which results from (i) 79 add-ons that incurred $822.7 million of new debt and (ii) a dividend recap at Empire Auto that incurred $105.0 million of new debt, partly offset by (iii) $625.4 million of asset divestitures by NSI and Spectrum and (iv) $56.5 million of cash flow generation. The chart below highlights the changes in debt since the closings of the 11 platform investments.

11-Company Portfolio Change in Net Debt[1]



[1] All data is fully pro forma for the October 2025 divestiture of NSI's HVAC division and the anticipated debt paydown from the pending divestitures of Spectrum's Autronica and Marioff units.

Aggregate portfolio EBITDA has increased 35.0%, or $152.8 million, during our ownership. At the end of the first quarter, portfolio net debt to EBITDA stood at 5.7x, down from 5.9x at the time of the platform investments. The table below summarizes key portfolio-level EBITDA and leverage metrics.

Portfolio EBITDA and Leverage Trends[1]

	At Closing	At 3/31/2026	Change	
			$ / x	%
EBITDA ($ millions)	$436.2	$589.1	$152.8	35.0%
Net Debt to EBITDA	5.9x	5.7x	(0.2x)	(3.8%)

We consider the portfolio's 5.7x net-debt-to-EBITDA ratio manageable. Over the portfolio's average 4.0-year hold period, equity value has been created, driven by prudent capital structures, aggregate EBITDA well above levels at investment, lower overall leverage, and valuation multiples generally below the industry median for comparable companies.

AI Initiatives

Over the past two years, Sentinel has approached AI in an exploratory and highly practical way, with professionals across the firm independently experimenting with enterprise versions of ChatGPT and, more recently, Claude. Through this hands-on learning process, we have come to appreciate AI's potentially transformative implications—both as a tool to enhance Sentinel's internal capabilities and as a means to drive measurable value creation across our portfolio companies. In response, we made the decision in 2025 to invest meaningfully in institutionalizing AI across our platform, beginning with the hiring of two world-class full-time executives to lead this effort earlier this year, as described in more detail in our Organizational Update on page 13.

In parallel, Sentinel launched an internal champions network that meets weekly to share findings and accelerate adoption across the firm and rolled out Claude as a second firmwide AI platform. We also surveyed our portfolio companies to assess AI readiness and appetite. The results informed a tiered engagement model that allows us to focus resources where the opportunity appears most immediate and actionable.

The early results, both internally and across our portfolio companies, are encouraging. Within Sentinel, every functional area is now actively embracing AI. Productive use cases are being identified and shared rapidly across the firm and, where appropriate, are being scaled into firmwide skills, workflows, and agents to improve efficiency, consistency, and analytical capability.

Sentinel is now deeply engaged with several management teams in identifying practical applications where AI can drive measurable economic value, as highlighted below in select early use cases.

> At one portfolio company, more than 40 high-impact use cases have been identified, and we are currently helping management develop a cloud-based data lake focused on their ecommerce segment. A prototype connection between the company's AI platform and data warehouse is also under development, which will provide management with conversational access to clean, centralized data and replace the manual queries and spreadsheet workarounds that have

[1] All data is fully pro forma for the October 2025 divestiture of NSI's HVAC division and the anticipated debt paydown from the pending divestitures of Spectrum's Autronica and Marioff units.

historically constrained insight generation. To accelerate implementation, we helped recruit a new full-stack data leader in May to join the company and lead the effort.

At a second portfolio company, AI-powered SMS and voice technologies are being deployed to manage appointment scheduling and other inbound and outbound customer interactions, a direct initiative to improve labor efficiency in a service-intensive business.

A third portfolio company has independently accelerated its AI efforts, rolling out a firmwide productivity suite and establishing its own internal champions network. Sentinel is now helping management evaluate an AI-enabled application targeting a high-friction portion of the sales cycle that could materially accelerate revenue growth.

Several other portfolio companies are now entering formal scoping processes focused on both bottom-up AI adoption and top-down strategic use-case development. With a foundation now established across much of the portfolio, we expect the coming quarters to produce measurable outcomes that validate the investments we have made in AI.

Organizational Update

In the first quarter and second quarter to date, we built a senior AI team by hiring two executives with proven records in applied AI and data science. Notably, these two executives—Dr. Yoni Malchi, who leads Sentinel's AI initiative, and Tim Penna—have previously worked together. Their onboarding marks an important step in institutionalizing the AI capabilities we've been building since 2024 and materially enhances Sentinel's ability to deploy AI solutions across the firm and our portfolio companies.

Sentinel also welcomed two new operating partners, two finance professionals, and a senior associate. Associate Will Nicklaus and Fund Accounting Manager Evan Yulo have moved on—Will to launch an entrepreneurial venture and Evan to pursue another financial role. Profiles of our new team members follow.

Dr. Yoni Malchi joined Sentinel as Managing Director, Head of AI, bringing more than a decade of experience in AI, data science, and digital transformation. Previously, he was a Managing Director at WorldWide Technology, where he led and built the firm's AI practice. Prior to that, Yoni was an Executive Director in JPMorgan Chase's Intelligent Solutions group, leading a cross-functional team of data scientists. Earlier in his career, he was a technology consultant to NASA and the United States Air Force. Yoni holds a B.S. from Union College and an M.S. and PhD from Penn State University.

Tim Penna joined Sentinel as an AI Operating Partner, focused on driving value creation through the deployment of AI, data, and digital capabilities across our portfolio. His experience leading AI-generated operational improvement has included roles at Cerberus Capital Management, where he was a Senior Vice President in the Cerberus Technology Solutions group, and JPMorgan Chase, where he was an Executive Director. Previously, Tim was a consultant at Bain & Company. He earned a BA in political science and an MBA, both from Yale University, where he captained the varsity football team.

Ellen Paton joined Sentinel as an Operating Partner. She has worked closely with Sentinel since 2023, when she served as Corporate Controller at Sentinel portfolio company Empire Auto Parts. Before Empire, Ellen held senior finance leadership positions, including Corporate Controller of SPI and CFO of Penguin Frozen Foods. She began her career at EY and brings more than 15 years of combined experience in public accounting and providing fractional CFO and controller services across multiple organizations. Ellen is a CPA and holds a B.S. in accounting with high honors from the University of Illinois.

Andy Rollo joined Sentinel as an Operating Partner. He has worked closely with Sentinel since 2023 through our investment in New You Bariatric, where he most recently served as CFO. Previously, Andy was Director of Finance for The Smilist Management and an M&A investment banking professional at Moelis. He holds a B.S. in business administration and B.S. in economics from the University of Oregon.

Jack Brewster joined Sentinel as a Senior Associate. Previously, he was an Associate at H.I.G. Capital. Before H.I.G., he spent two years in Harris Williams's Investment Banking Analyst program. Jack holds a BA in business administration and Chinese from Washington and Lee University.

Michael Dunne joined Sentinel as a Senior Tax Accountant. Previously, he spent three years at RSM as a Senior Tax Associate. Mike is a CPA and holds a BS in accounting from State University of New York at Oneonta.

James Fitzgerald joined Sentinel as Controller, General Partner. Previously, he was a Principal at Blue Owl Capital and controller of their carried interest profit-sharing plans. Before Blue Owl, James spent nine years at Blackstone, most recently as a Vice President, and earlier in his career held positions at CION Investment Group and Deloitte & Touche. He holds a B.S. in accounting from Rutgers University and is a CPA.

Today, our professional and administrative staff stands at 100. The table below highlights our team headcount by functional area.

News Highlights from Other Active Sentinel Funds[4,5]

Today, Sentinel manages six active funds and has fully realized four flagship equity funds—Sentinel I (1995 vintage), Sentinel II (1998 vintage), Sentinel III (2005 vintage), and Sentinel IV (2009 vintage). The

six active funds consist of three successor funds and three affiliated strategies. Highlights of these active funds follow.

Sentinel V (2014 vintage) is now in its advanced harvest phase and has positioned its four remaining investments for exit, with one currently exploring a sale. All four companies are performing well. Through the end of the first quarter, the fund has generated a 2.6x gross multiple of cost, a 25.8% gross IRR, a 20.6%/20.0% net levered/unlevered IRR, a 1.9x DPI, and a 2.1x TVPI.

Sentinel VII (2023 vintage) has been productive in early 2026, with one full and one sizable partial liquidity event pending. The fund is also expected to close on a ninth platform investment shortly, which will bring deployment up to 47.5%. Sentinel VII has produced a 1.6x gross multiple of cost, a 0.1x DPI, a 25.0% gross IRR, and a 17.7%/16.3% net levered/unlevered IRR.

Sentinel Capital Solutions I (2018 vintage) completed its primary investment phase and has fully or substantially realized 12 of its 23 investments. As of March 31, 2026, our inaugural structured capital solutions fund has delivered a 0.9x DPI, a 15.9% gross IRR, and a 13.4%/12.4% net levered/unlevered IRR.

Sentinel Capital Solutions II (2023 vintage) has deployed 50.0% of its capital across 14 investments and has benefitted from a series of early realizations, with another pending. Like its predecessor, the fund is outperforming expectations, with a 0.3x DPI, 1.3x TVPI, 18.5% gross IRR, and 17.6%/13.4% net levered/unlevered IRR.

Sentinel Continuation Fund I (2021 vintage) is expected to make a new continuation investment in the third quarter, increasing deployment to 26.3%. At this early stage of deployment, the fund's zero DPI, 5.4% gross IRR, and 4.5%/4.8% levered/unlevered IRR are not yet meaningful indicators of performance.

And as discussed in this letter, Sentinel VI (2019 vintage) has deployed 103.9% of its capital and completed its primary investment phase. The fund has exited seven of 18 platform investments, with an eighth exit pending. Realizations to date have generated a 2.1x gross multiple of cost and a 30.1% gross IRR. As of the end of the first quarter, Sentinel VI has produced a 1.5x gross multiple of cost, a 0.6x DPI, a 15.0% gross IRR, and a 9.7%/9.4% net levered/unlevered IRR.

Looking ahead, we believe the opportunity set will be compelling, and Sentinel is well positioned to pursue it. With Sentinel VII and Sentinel Capital Solutions II actively investing, a 100-member team, and $9.8 billion under management, we have the scale, experience, and resources to move with confidence. Across our portfolio, we are working closely with management teams to harness AI as a meaningful driver of operational performance and competitive advantage and, ultimately, to help position our companies for successful exits. We look forward to what we will continue to build—and realize—together.

Respectfully yours,

David S. Lobel
