March 31, 2026

To the Limited Partners of Matrix Partners VII, L.P., Matrix Partners VIII, L.P., Matrix Partners IX, L.P., Matrix Partners X, L.P., Matrix Partners XI, L.P., and Matrix Partners XII, L.P.:

At the end of 2025, public markets demonstrated resilience despite a year marked by policy volatility and increasingly concentrated market leadership. US GDP grew 2.1%, supported by robust consumer spending, strong corporate earnings, and a surge in capital expenditures tied to AI infrastructure. These tailwinds helped offset headwinds from tariffs, reduced immigration, and the longest federal government shutdown in US history. Fourth quarter market activity was relatively subdued, with each of the major indices posting gains of less than 5%, though all three finished the year strongly, with the Nasdaq leading annual gains at 20%. The S&P 500 and Dow posted more moderate gains at 16% and 13%, respectively, as returns remained concentrated among a small group of large-cap innovators. Since year-end, there has been a broad sell-off in the public markets due to the Iran conflict and increasing geopolitical uncertainty. All three indices are in negative territory, with the Nasdaq down 7% year to date, and the S&P and Dow down 5% and 4%, respectively.

Venture activity during 2025 remained constrained by limited liquidity, even as headline investment figures suggested renewed momentum. Much of the capital deployed was concentrated in a relatively small number of outsized financings, particularly in artificial intelligence, which has created a misleading picture of overall market health. During the year, $339.4 billion was invested across 14,716 deals, representing a 59% increase in deal value even as deal count declined by 4%. Fourth quarter activity followed a similar pattern with $91.6 billion deployed across 3,379 deals, exceeding the prior two quarters' investment totals, though deal count declined 8% from the third quarter. While these figures indicate improving capital deployment, the underlying activity remains uneven across the ecosystem. A key driver of this imbalance has been the continued acceleration of AI-related investment. In 2025, AI companies accounted for 65% of total venture deal value and 39% of deal count, underscoring the level of investor conviction surrounding the sector's long-term potential. The largest financings were highly concentrated in AI, with eleven rounds of $1 billion or more and the eight largest deals all in the sector; in Q4 alone, the top eleven transactions totaled $37.4 billion and represented roughly 41% of quarterly deal value. As a result, while total capital invested across the venture market remains elevated, a disproportionate share of that activity has been directed toward a relatively small number of high-profile companies. This concentration has created a bifurcated funding environment. Companies operating in AI and adjacent infrastructure markets continue to attract significant capital - often at the earliest stages and with elevated valuations - while startups operating outside these sectors are encountering longer fundraising timelines, increased investor scrutiny, and tighter financing conditions.

Exit activity showed modest improvement during the year but remains selective and well below the levels required to fully normalize liquidity conditions. In 2025, the venture market generated $297.6 billion in exit value across 1,410 transactions, representing the fourth-highest annual exit value of the past decade. Fourth quarter activity strengthened, with exit value increasing 25% from the third quarter to $93.6 billion across 310 transactions; however, exit count declined 13% quarter-over-quarter, underscoring the continued concentration of outcomes among a smaller number of larger transactions. Despite the improvement in aggregate exit value, the market continues to face a significant backlog of mature private companies seeking liquidity, particularly as unicorn valuations have expanded substantially in recent years while the number of large-scale exits has remained limited. The public markets showed early signs of reopening, with 66 venture-backed companies going public in 2025 and generating approximately $119.6 billion in exit value during the year. While these developments represent a meaningful improvement from recent lows, the pace of new listings remains modest relative to historical venture cycles, as market volatility, regulatory uncertainty, and shifting policy dynamics continue to complicate timing decisions for companies considering public offerings.

Fundraising activity reflected these ongoing liquidity constraints. A total of $66.1 billion was raised in 2025 across 537 funds, representing a 35% decline in capital raised and a 44% reduction in fund count compared to 2024, marking the lowest level of fundraising in a decade and extending the downward trend of recent years. Fourth quarter activity showed some stabilization, with 161 funds raising $20.4 billion, an increase of 6% in capital raised and 17% in fund count quarter-over-quarter. While distributions have remained below historical levels, investor engagement has begun to show signs of stabilization, with capital continuing to be directed toward established managers with differentiated strategies.

Taken together, these dynamics highlight a market where a significant amount of capital is being deployed—particularly into AI—at elevated valuations, while liquidity remains constrained. This is particularly evident in the earliest stages, where seed rounds over $10 million increased by 17% in 2025 despite an 11% decline in overall deal count at this stage. In parallel, early-stage pricing has moved higher at the seed and Series A levels, often ahead of fully established fundamentals. Our response is to stay focused on what has defined our approach: identifying founders with a differentiated view of the world, often outside of consensus, building conviction early, and working closely with them as they build their companies. We operate as a deliberately low-volume, high-conviction team, allowing us to concentrate ownership and engage closely with founders over the long term. We are structured to find opportunities before they become widely recognized, which has been a consistent driver of our strongest investments.

Lastly, we look forward to seeing many of you at our annual meeting on May 12, 2026, at the Four Seasons in Boston.

Details on portfolio activity during the quarter can be found in the fund-specific letters that follow.

Sincerely,

Matrix Partners

March 31, 2026

To the Limited Partners of Matrix Partners IX, L.P.:

Full Year 2025

- Through December 31, 2025, the Partnership's cumulative distributions to Limited Partners were $802.8 million, or 198% of contributed capital.

- Cumulative portfolio value (investment portfolio plus cumulative realized value) increased $398.8 million during the year to a total of $3.2 billion (6.5x cost). The increase is the result of $398.8 million of net appreciation in the portfolio. The net appreciation consists of $405.7 million of net markups in the private portfolio, a $6.6 million increase from the sale of a public company, and a $0.7 million increase from the receipt of escrow and earnout proceeds from prior period sales, offset by a $0.1 million decrease from the sale of one private portfolio company, and a $14.1 million decrease from write-offs of one private portfolio company and one seed investment.

- During 2025, cumulative value to Limited Partners (equity plus distributions) increased $273.4 million to a total of $2.1 billion (5.3x contributed capital). The increase is the result of the portfolio appreciation discussed above, offset by operating activity.

- From the first capital call in October 2010, the Partnership has invested $487.4 million (108% of committed capital). As of December 31, 2025, the Partnership held securities in eight private companies with a fair value of $1.8 billion and a cost of $148.5 million.

There were no incremental investments and no capital was called during 2025. Cumulative capital contributions remained at $409.5 million (91% of committed capital). The Partnership held cash of $58.4 million on December 31, 2025, and the net loss for the year was $3.0 million.

Fourth Quarter 2025

- Cumulative portfolio value (investment portfolio plus cumulative realized value) remained unchanged during the quarter at $3.2 billion (6.5x cost).

- Cumulative value to Limited Partners (equity plus distributions) remained unchanged during the quarter at $2.1 billion (5.3x contributed capital) due to minimal net loss from operations.

The net loss from operations for the quarter was $0.7 million.

Please be aware that both this letter and the enclosed materials are subject to the confidentiality provision of the Partnership Agreement. If for any reason you believe you may be unable to maintain the confidentiality of these documents, please review them and then return them to us, without retaining copies in your files. If you have any questions about any aspect of the Partnership, please feel free to contact us.

Sincerely,
MATRIX IX MANAGEMENT CO., L.L.C.

Report of Independent Auditors

To the General Partner of
Matrix Partners IX, L.P.

Opinion

We have audited the financial statements of Matrix Partners IX, L.P. (the "Partnership"), which comprise the statement of assets, liabilities, and partners' capital, including the schedule of investments, as of December 31, 2025, and the related statements of operations, changes in partners' capital and cash flows for the year then ended, and the related notes (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Partnership at December 31, 2025, and the results of its operations, changes in its partners' capital and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Partnership and to meet our other ethical responsibilities in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free of material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free of material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve

Shape the future with confidence

collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.

- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Matrix Partners IX, L.P.

Notes to Financial Statements

December 31, 2025

1. Description of Business

Matrix Partners IX, L.P. (the Partnership or the Fund) is a Delaware limited partnership which was formed on July 14, 2009. The partnership agreement provides that the Partnership will terminate on October 15, 2020. The General Partner may extend the Partnership for up to three consecutive one-year periods with written notice to the Limited Partners. Thereafter, the Partnership could be extended further with the written consent of a majority in interest of the Limited Partners, as per the partnership agreement. On July 1, 2020, the General Partner notified the Limited Partners of the election to extend the term of the Partnership by two additional one-year periods through October 15, 2022. On August 31, 2022, the General Partner notified the Limited Partners of the election to extend the term of the Partnership by one additional one-year period through October 15, 2023. On August 10, 2023, the General Partner, with written consent of the General Partner and a Majority in Interest of the Limited Partners, amended the Partnership Agreement to permit the General Partner to extend the Partnership Term by an additional three consecutive one-year periods through October 15, 2026. On August 8, 2025, the General Partner notified the Limited Partners of the election to extend the term of the Partnership by one additional one-year period through October 15, 2026.

The Partnership's investment objective is to maximize returns on partners' capital contributions through investments in securities, generally with equity features, of publicly or privately owned corporations.

The Partnership includes one General Partner, Matrix IX Management Co., L.L.C., and 46 Limited Partners. The General Partner has the sole and exclusive right to manage, control, and conduct the affairs of the Partnership, and to do any and all acts on behalf of the Partnership that are necessary, advisable, or convenient to the discharge of its duties under the Partnership Agreement and the management of the affairs of the Partnership.

The General Partner and Limited Partners, whose capital commitments are $4,500,000 and $445,500,000 respectively, had contributed capital including deemed contributions (as noted below in Note 4) of $4,095,000 (91%) and $405,405,000 (91%) at December 31, 2025.

Capitalized terms used but not defined herein shall have the respective meanings given to them in the partnership agreement.

2. Significant Accounting Policies

Basis of Presentation and Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Management has determined that the Partnership qualifies as an investment company as defined in Accounting Standards Codification (ASC) Topic 946, *Financial Services – Investment*

2. Significant Accounting Policies (continued)

Companies and, accordingly, the Partnership applies this specialized reporting guidance for the purposes of financial reporting.

Valuation of Investments

The Partnership's investments are carried at fair value in accordance with ASC Topic 820, *Fair Value Measurement* (ASC 820), and are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The three levels of the fair value hierarchy under ASC 820, and its applicability to the Partnership's investments, are described below:

Level 1 – Unadjusted quoted prices in active markets that are accessible at the measurement date of identical, unrestricted assets. Equity securities are valued at the most recent sale price or official closing price reported on the exchange (U.S. or foreign) on which they trade.

Level 2 – Quoted prices for similar assets, or inputs that are observable, either directly or indirectly, for substantially the full term through corroboration with observable market data.

Level 3 – Pricing inputs are unobservable for the asset, that is, inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset. Level 3 includes private investments that are supported by little or no market activity. Factors used in determining value may include, but are not limited to, the type of the security, the size of the holding, the initial cost of the security, the existence of any contractual restrictions on the security's disposition, the price and extent of public trading in similar securities of comparable companies, information obtained from the issuer, an analysis of the company's or issuer's financial statements and with respect to debt securities, the maturity, coupon rate and creditworthiness. The value determined under these procedures may differ from published values for the same securities. The fair values of Level 3 investments are determined by reference to projected net earnings, earnings before interest, taxes, depreciation, and amortization ("EBITDA"), the public market or private transactions, valuations for comparable companies and other measures which, in many cases, are unaudited at the time received. Valuations may be derived by reference to observable valuation measures for comparable companies or transactions (e.g., multiplying a key performance metric of the investee company such as EBITDA by a relevant valuation multiple observed in the range of comparable companies or transactions), adjusted by management for differences between the investment and the referenced comparable companies. Level 3 investments may also be valued at cost for a period of time after an acquisition as the best indication of fair value.

Cost of Investments

Cost of investments represents the actual purchase price of the securities acquired.

2. Significant Accounting Policies (continued)

Net Realized and Unrealized Gain (Loss) from Investments

When investments are sold, distributed, or written off, the gain or loss is classified as realized. The gain or loss is determined by deducting the cost of investments from the sales proceeds or, for investments distributed, their fair value at the distribution date. When the difference between the cost and fair value of portfolio investments increases or decreases, the appreciation or depreciation is classified as unrealized. When investments are sold, distributed, or written off, the unrealized appreciation or depreciation is reversed upon the recognition of the realized gain or loss.

Income Taxes

The Partnership is not a taxable entity, and the results of its operations are included in the tax returns of the partners. Accordingly, no income tax provision is reflected in the accompanying financial statements. The Partnership reports on the accrual method for both financial reporting and income tax purposes.

GAAP requires management to evaluate uncertain tax positions taken by the Partnership. The financial statement effects of a tax position are recognized when tax positions taken, or expected to be taken, in the course of preparing the Partnership's tax returns are "more likely than not" of being sustained by the applicable tax authority. Tax positions not deemed to meet a more-likely-than-not threshold would be recorded as a tax expense in the current period. The General Partner has concluded there are no significant uncertain tax positions that would require recognition in the financial statements. The Partnership is subject to routine audits by taxing jurisdictions; however, there are currently no audits for any tax periods in progress. Management believes it is no longer subject to income tax examinations for years prior to 2022.

Distribution to Partners

The partnership agreement provides for a distribution of all Net Operating Income, as defined, to the partners within 90 days after the end of the calendar year. A distribution may also be made during or within 90 days after the end of the calendar year equal to the aggregate amount of taxable income (excluding the GP Special Profit Allocation, as defined, to the affected partners) multiplied by the highest combined federal and Massachusetts tax rate applicable to individuals. The maximum combined tax rate shall be determined separately for each category of income for which different marginal tax rates apply (e.g., long-term capital gain and ordinary income), assuming that for purposes of computing federal tax, the Massachusetts tax could only be deducted against such income. Discretionary Distributions which may be made during the calendar year shall reduce the above distributions.

2. Significant Accounting Policies (continued)

Allocations of Profits and Losses

In accordance with the partnership agreement, for each Fiscal Year or Interim Period, as defined, when the aggregate cumulative Capital Transaction Gain exceeds the aggregate cumulative Capital Transaction Loss, as each are defined, such gain is allocated to the General Partner until such time as the amount of management fee reduction (as disclosed in Note 4) is met. Thereafter, the General Partner is allocated 30% of Capital Transaction Gain and Loss. The remaining 70% is allocated to all partners as a group. In all other circumstances, the Capital Transaction Gain and Loss shall be allocated to all partners in accordance with Partnership percentages. In addition, unrealized gains and losses are similarly allocated to the General Partner and partners.

The Net Income or Loss, as defined, has been allocated to the partners in accordance with the partnership agreement.

Cash

The Partnership considers money market funds and highly liquid investments with original maturities of three months or less to be cash equivalents. At December 31, 2025, approximately $57,943,092 of the balance in cash and cash equivalents was held in short-term accounts at two financial institutions. The remainder of the Partnership's cash balance was held in an account at one financial institution covered by the FDIC insured limit. None of the cash or cash equivalents balances were subject to withdrawal restrictions. There were no foreign currency balances.

Risks and Uncertainties

At December 31, 2025, the Partnership's portfolio investments are comprised of eight illiquid, non-publicly traded securities in the Cleantech, Consumer, Software applications, Software infrastructure, and related industries. Risks affecting these industries include, but are not limited to, increasing competition, rapid changes in technology, and changes in economic conditions. These risk factors could have a negative effect on the ultimate realizable value of the Partnership's investments.

It is the Partnership's primary investment objective to generate current income and capital appreciation by lending to or investing directly in privately held companies. During the year ended December 31, 2025, the Partnership invested in portfolio companies to support their growth objectives. None of this support was contractually obligated. Refer to Note 3 – Fair Value Measurements for additional disclosures about investing activities. In addition to providing funding to investee companies, from time to time the Partnership assists investee companies in securing financing from other sources by introducing such investee companies to sponsors or by leading a syndicate of lenders to provide the investee companies with financing.

Fair Value of Financial Instruments

The carrying amounts reported in the balance sheet for cash and cash equivalents, receivable for securities sold, other current assets and accounts payable and accrued expenses approximate fair value.

3. Fair Value Measurements

The following table summarizes the fair value measurement of investments owned at December 31, 2025, by the fair value hierarchy levels described in Note 2 above.

	Level 1	Level 2	Level 3	Total
Preferred equity	$ -	$ -	$ 1,112,871,083	$ 1,112,871,083
Common equity	-	-	701,686,005	701,686,005
Pending escrow	-	-	31,582	31,582
	$ -	$ -	$ 1,814,588,670	$ 1,814,588,670

There were no purchases of Level 3 during the year ended December 31, 2025.

The table below sets forth a summary of the valuation approaches and quantitative information utilized in determining the fair value of the Partnership's Level 3 investments as of December 31, 2025. The disclosure below excludes financial instruments for which fair value is based on prices from recent transactions without adjustment and amounted to $1,534,885,327.

Financial Assets	Fair value at December 31, 2025	Valuation Approach(es)	Significant Unobservable Inputs (1)	Range
Preferred equity	**$ 233,117,088**	Probability weighted expected return method	Time to liquidity	1 - 4 years
			Discount rate	30%
			Revenue growth rate	1% - 113%
			Revenue multiple	1.7x - 7.3x
Common equity	**$ 1,651,021**	Probability weighted expected return method	Time to liquidity	1 - 4 years
			Discount rate	30%
			Revenue growth rate	-9% - 9%
			Revenue multiple	1.4x - 5.2x
Preferred equity	**$ 44,903,652**	Guideline Public Company Method	Revenue growth rate	9%
			Revenue multiple	0.6x - 1.2x
Pending escrow	**$ 31,582**	Estimated Proceeds	Reserve Discount	10%

(1) In determining certain of these inputs, management evaluates a variety of factors including economic conditions, industry and market developments, market valuations of comparable companies and company specific developments including exit strategies and realization opportunities. Management has determined that market participants would take these inputs into account when valuing the investments.

4. Related Party

The General Partner provides the Partnership with investment counsel, and certain administrative and support services, under the terms of the partnership agreement. The Partnership compensates the General Partner for such services in the form of a management fee, payable quarterly in advance in amounts specified by the partnership agreement. In connection with the extension of the term of the partnership discussed in Note 1, the Partnership Agreement was amended to provide that, after the thirteenth anniversary of the Initial Contribution Date, the management fee is to be determined quarterly, based upon the lesser of 0.25% of committed capital or 0.25% of Net Asset Value. Net Asset Value shall be calculated by excluding the following assets: cash, money market investments and Marketable Securities that are not subject to an underwriter lock-up or similar trading restriction. Any Marketable Securities that are thinly traded, as determined by the General Partner, shall be treated as Nonmarketable Securities. For the year ended December 31, 2025, the management fee charged to the Partnership was $4,500,000.

5. Commitments and Contingencies

In the normal course of business, the Partnership may enter into contracts that contain a variety of representations and warranties and which provide for general indemnifications. The Partnership's maximum exposure under these arrangements is unknown, as this could involve future claims that may be made against the Partnership that have not yet occurred. Based on the prior experience of the General Partner, the Partnership expects the risk of loss under these indemnifications to be remote.

6. Required Financial Highlights

The following financial highlights have been computed in accordance with the AICPA *Audit and Accounting Guide – Investment Companies* for the year ended December 31, 2025. These calculations are not an indication of future performance of the Fund. For comparative purposes, statistics based on capital commitments have also been provided.

Internal rate of return since inception	
Beginning of year	21.0%
End of year	21.2%
Ratios to average limited partners' capital	
Expenses, before carried interest to General Partner	0.42%
Carried interest to General Partner	10.77%
Expenses, including carried interest to General Partner	11.19%
Net investment loss	-0.27%

The cumulative value to Limited Partners (partners' capital plus distributions) as a percentage of capital contributions to date for the life of the Partnership through December 31, 2025, is 525.4%.

6. Required Financial Highlights (continued)

The internal rate of return (IRR) since the commencement of operations is net of all fees and carried interest allocations to the General Partner and is computed based on the dates of the Limited Partners' capital contributions to the Partnership, distributions from the Partnership to the Limited Partners, and the ending net assets at the end of the period (residual value) of the Limited Partners' capital. Financial highlights are calculated for the limited partner class taken as a whole. An individual limited partner's return may vary.

The net investment loss ratio is the Limited Partners' investment income reduced by total expenses divided by the Limited Partners' average capital balance for the year presented. The net investment loss ratio does not reflect the effects of the carry allocation to the General Partner.

The expense ratios are calculated using total expenses allocated to the Limited Partners before and after the effect of the General Partner carried interest and recovery of management fee reductions, respectively, divided by the Limited Partners' average capital balance for the year presented. Total expenses primarily include management fees and other partnership expenses. During 2025, $119,649,963 of accrued carried interest was allocated to the General Partner.

7. Subsequent Events

Management evaluated subsequent events for the Partnership through March 12, 2026, the date the financial statements were available to be issued. There are no subsequent events that require recognition or disclosure in these financial statements.
