Report of Independent Auditors

To the General Partner of Bain Capital Venture Coinvestment Fund IV, L.P.

Opinion

We have audited the accompanying financial statements of Bain Capital Venture Coinvestment Fund IV, L.P. (the "Partnership"), which comprise the statement of assets, liabilities and partners' capital, including the schedule of investments, as of December 31, 2024, and the related statements of operations, of changes in partners' capital and of cash flows, including the related notes for the year then ended (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2024, and the results of its operations, changes in its partners' capital and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (US GAAS). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Partnership and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for one year after the date the financial statements are available to be issued.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with US GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with US GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Other Information

Management is responsible for the other information included in the annual report. The other information comprises the Investor Letter, but does not include the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information, and we do not express an opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and consider whether a material inconsistency exists between the other information and the financial statements or the other information otherwise appears to be materially misstated. If, based on the work performed, we conclude that an uncorrected material misstatement of the other information exists, we are required to describe it in our report.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

December 31, 2024

1. The Partnership

Bain Capital Venture Coinvestment Fund IV, L.P. (the "Partnership") is a limited partnership organized under the laws of the State of Delaware pursuant to the Agreement of Limited Partnership, as last amended on September 30, 2024 (the "Partnership Agreement"). The Partnership's business activity is to invest the funds of the Partnership, in certain growth transactions concurrently with Bain Capital Venture Fund 2022, L.P. and any successor funds thereto, with the principal objective of achieving appreciation of capital invested. Services are performed for the Partnership by its management company, Bain Capital Ventures, L.P. (the "Manager") for a management fee (Note 5). The general partner of the Partnership is BCV Coinvestment IV General Partner, LLC (the "General Partner"). The Partnership shall continue until December 31, 2032, unless sooner dissolved or extended to a date no later than December 31, 2036, as specified in the Partnership Agreement.

The General Partner has established a separate class of limited partnership interest to be held by Bain Capital Venture Partners SLP, L.P. (the "Special Limited Partner"). The Special Limited Partner's capital commitment to the partnership entitles it to receive Carried Interest as specified in the Partnership Agreement (Note 6).

2. Capital Commitments and Contributions

The Partnership has \$422,376,126 of partners' capital commitments of which \$85,146,066 or 21.75% of the Institutional Limited Partners', General Partner's, and Special Limited Partner's committed capital was contributed, and \$6,720,750 or 21.75% of the Other Limited Partners' committed capital was contributed at December 31, 2024.

Total uncalled capital as of December 31, 2024 was \$306,330,060 or 78.25%, for Institutional Limited Partners and the General Partner and Special Limited Partner, and \$24,179,250 or 78.25% for Other Limited Partners. Partners are not able to withdraw from the Partnership.

At December 31, 2024, one limited partner held over 10% of partners' capital of the Partnership.

3. Significant Accounting Policies

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America ("GAAP") requires the General Partner to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The General Partner has determined the Partnership is an investment company in conformity with GAAP. Accordingly, the Partnership follows the accounting and reporting guidance for investment companies. Events or transactions occurring after period end through the date that the financial statements were issued, March 13, 2025, have been evaluated in the preparation of the financial statements.

Cash Equivalents

The Partnership considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents. The Partnership has established guidelines relative to diversification and maturities that it believes maintain safety and liquidity. The guidelines are periodically reviewed and modified to take advantage of trends in yields and interest rates.

Included in cash equivalents at December 31, 2024 are overnight time deposits with commercial banks in the amount of \$3,007,062 bearing interest at 3.44%, which matured on January 2, 2025 and are classified within level 1 of the fair value hierarchy.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

December 31, 2024

Investment Valuation

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the Partnership discloses the fair value of its investments in a hierarchy that prioritizes the inputs to valuation techniques used to measure the fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements).

The guidance establishes three levels of the fair value hierarchy as follows:

- Level 1 - Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date;
- Level 2 - Inputs other than quoted prices that are observable for the asset either directly or indirectly, including inputs in markets that are not considered to be active;
- Level 3 - Inputs that are unobservable.

Inputs are used in applying the valuation techniques discussed below and broadly refer to the assumptions that the General Partner uses to make valuation decisions, including assumptions about risk. Inputs may include recent transactions, earnings forecasts, market multiples, future cash flows, discount rates and other factors. An investment's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The categorization of an investment within the hierarchy is based upon the pricing transparency of the investment and does not necessarily correspond to the General Partner's perceived risk of that investment.

Generally, the majority of the Partnership's private equity investments are valued utilizing unobservable inputs, and are therefore classified within level 3. The General Partner's determination of fair value is based upon the best information available for a given circumstance and may incorporate assumptions that are management's best estimates after consideration of a variety of internal and external factors. In establishing the fair value of an investment the General Partner will first consider recent transactions in the same or similar securities including the initial purchase transaction of the security being valued or any recent financing round. Otherwise, the General Partner generally employs two valuation methodologies when determining the fair value of a private equity investment. The first methodology is a market multiples approach that considers a specified financial measure (such as EBITDA), recent public market and private transactions and other available measures for valuing comparable companies (i.e. "Market Approach"). The second methodology determines a valuation by discounting future cash flows (i.e. "Income Approach"). The ultimate fair value recorded for a particular investment will generally be determined based on the General Partner's judgment of the appropriate valuation methodology.

If the General Partner determines that either the volume and/or level of activity for an investment has significantly decreased (from normal conditions for that investment) or price quotations or observable inputs are not associated with orderly transactions, increased analysis and management judgment will be required to estimate fair value. Under those circumstances, the Income Approach might be more appropriate than the Market Approach in estimating fair value. Regardless, however, of the valuation technique and inputs used, the objective for the fair value measurement in those circumstances is unchanged from what it would be if markets were operating at normal activity levels and/or transactions were orderly; that is, to determine the current exit price.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

December 31, 2024

The valuation process for investments categorized in level 3 of the fair value hierarchy is completed on a quarterly basis and is designed to subject the valuation of level 3 investments to an appropriate level of consistency, oversight and review. This process includes, but is not limited to, preparing comparable company analyses, discounted cash flow analyses, and other analytics as deemed necessary. These analyses utilize public and private company data obtained through third party service providers, as well as portfolio company financial and qualitative information. The investment professionals and finance team synthesize the above information to provide a recommended fair value to the Partners responsible for each investment.

Using the above analyses and other qualitative factors, the Partners, working with the investment professionals and finance team, determine the estimated fair value of each investment. An internal valuation committee comprised of the Chief Financial Officer, Chief Operating Officer and Business Unit Co-Heads then meets to approve the valuations. The valuation committee may also meet or discuss valuations subsequent to the meeting in finalizing valuations for a given quarter. On an annual basis, the Advisory Board approves all valuation methodologies, including level 3 investment methodologies. The members of the Advisory Board will be selected by the General Partner and will consist of representatives of Limited Partners.

Because of the inherent uncertainty of valuations, the estimated fair value may differ significantly from the value that would have been used had a ready market for each security existed, and the difference could be material.

Investments whose values are based on quoted market prices in active markets, and are therefore classified within level 1, generally include active listed equities. The General Partner does not adjust the quoted price for such instruments, even in situations where the Partnership holds a large position and a sale could reasonably impact the quoted price.

Investments may be classified as level 2 when market information becomes available, yet the investment is not traded in an active market and/or the investment is subject to transfer restrictions, or the valuation is adjusted to reflect illiquidity and/or non-transferability.

Recent Accounting Pronouncements

In June 2022, the FASB issued Accounting Standards Update (“ASU”) 2022-3, Fair Value Measurements (Topic 820): Fair Value Measurement of Equity Securities Subject to Contractual Restrictions (“ASU 2022-3”). ASU 2022-3 eliminates the ability to recognize and measure a contractual sale restriction on the sale of an equity security as part of the fair value of the security. The restriction on the sale of the security will not be considered a part of the unit of account. The guidance is effective for financial statements with fiscal years beginning on or after December 15, 2024 for nonpublic entities. A nonpublic entity is permitted to early adopt the update upon issuance of ASU 2022-3. The Partnership has determined not to early adopt ASU 2022-3 within these financial statements.

Bain Capital Venture Coinvestment Fund IV, L.P.
Notes to Financial Statements
December 31, 2024

Investment Transactions, Income and Expenses

Investment transactions are accounted for on the closing date. Realized gains and losses on investment transactions are determined using the specific identification method. Interest income and expenses are recorded on the accrual basis. Interest income is increased by the accretion of a discount. Accretion is calculated using the effective interest method. Dividend income is recorded on the ex-dividend date, net of applicable withholding tax. The General Partner analyzes dividends received from portfolio companies to determine whether they have been accretive to the Partnership's investment based on an analysis of enterprise value and information provided by investment banks, third party valuation experts or other parties. The financial statements reflect the character of such dividends as required under GAAP and the General Partner determines the character of such dividends based on an earnings and profits analysis.

In some cases, the Partnership invests in portfolio companies directly and in some cases invests in portfolio companies indirectly through one or more holding companies or other entities in which other parties affiliated with the Partnership and/or the Manager may also be investors. In cases where the Partnership invests indirectly through such an entity, the Schedule of Investments reflects the Partnership's proportionate share of the underlying investment.

Income Taxes

The Partnership reports income and expenses on an accrual basis for income tax reporting purposes.

The General Partner evaluates tax positions of the Partnership to determine whether any tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For tax positions meeting the more likely than not threshold, the tax amount recognized in the financial statements would be reduced by the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement with the relevant taxing authority.

No provision is made for federal or state income taxes in the financial statements of the Partnership, as these taxes are the responsibility of the partners.

The Partnership files tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Partnership is subject to examination by federal, state, local and foreign jurisdictions, where applicable. As of December 31, 2024, the tax years that remain subject to examination by the relevant tax authorities under the statute of limitations is the initial year filing 2023 forward.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

4. Investments

Investment Fair Value Hierarchy

The following table presents the investments carried on the Statement of Assets, Liabilities and Partners' Capital by level within the valuation hierarchy as of December 31, 2024.

	Assets at Fair Value as of December 31, 2024				Total fair value as a percentage of partners' capital
	Level 1	Level 2	Level 3	Total	
Investments:					
Securities:					
Application Software	\$ -	\$ -	\$ 52,757,076	\$ 52,757,076	48%
Infrastructure Software	-	-	54,353,055	54,353,055	49%
Total:	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 107,110,131</u>	<u>\$ 107,110,131</u>	<u>97%</u>

The following table includes the purchases for the year ended December 31, 2024 for investments classified within level 3. There were no transfers in or out of level 3 for the year ended December 31, 2024.

Purchases of Level 3 Assets	
	Purchases
Investments:	
Securities:	
Application Software	\$ 41,872,426
Infrastructure Software	9,041,580
Total:	<u>\$ 50,914,006</u>

The following table summarizes the quantitative inputs and assumptions used for items categorized in level 3 of the fair value hierarchy as of December 31, 2024.

Investment	Fair Value at December 31, 2024	Valuation Technique	Unobservable Inputs ⁽¹⁾	Range
Securities:				
Application Software	\$ 22,251,631	Market comparables	LTM Revenue Multiple NTM Revenue Multiple LTM Gross Profit Multiple NTM Gross Profit Multiple Discount for lack of Marketability	2.8x - 25.0x 2.7x - 21.3x 14.8x 15.2x 30%
Infrastructure Software	\$ 32,345,522	Market comparables	LTM Revenue Multiple NTM Revenue Multiple Discount for lack of Marketability	10.3x 9.8x 30%

(1) In determining certain of these inputs, the General Partner evaluates a variety of factors including economic conditions, industry and market developments, market valuations of comparable companies and company specific developments including exit strategies and realization opportunities. LTM means Last Twelve Months, NTM means Next Twelve Months.

The table above excludes \$52,512,978 of investments where the fair value is determined by the investment's latest round of financing.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

December 31, 2024

Geographical and Industry Risks

The Partnership may have risks associated with concentration in one industry or geographical area. Health crises, as well as other catastrophes and geopolitical developments that interrupt the expected course of events, and the public response to such events, have and may in the future result in a significant impact on the economy, which in turn could adversely affect the Partnership's investments.

At December 31, 2024, all of the Partnership's investments are domiciled in the United States of America.

Market and Credit Risks

General fluctuations in the market prices of investments may affect the value of investments held by the Partnership. Instability in the securities markets may also increase the risk inherent in the investments. The ability of the portfolio companies to refinance debt may depend on their ability to sell new securities in the public high yield debt market or otherwise.

The Partnership may be invested in leveraged companies which offer the opportunity for capital appreciation. Such investments also involve a higher degree of risk. In instances where the Partnership's investment involves leverage, the effects of recessions, operating problems and other general business and economic risks may have a more pronounced effect on the profitability or survival of the investments.

5. Management Fees

The Partnership is a party to an investment and advisory agreement (the "Investment and Advisory Agreement") with the Manager. In consideration for a management fee, the Manager provides administrative and operational services to the Partnership. The annual management fee is 0.75% of the aggregate contributed capital of the Partnership which is subject to certain reductions as defined in the Investment and Advisory Agreement. The General Partner has reduced the management fee with respect to interests in the Partnership held by certain affiliates. The management fee is payable in advance on the first business day of each quarter.

For the year ended December 31, 2024, the Partnership reimbursed \$0 to the Manager for its pro-rata share of deal expenses previously borne by the Manager group. Pursuant to the Investment and Advisory Agreement, the Partnership's pro rata share of any future transaction-related financial advisory fees received by the Manager group shall be applied to reduce future management fees to the extent of deal expenses previously paid by the Partnership, which as of December 31, 2024 is \$0.

Bain Capital Venture Coinvestment Fund IV, L.P.

Notes to Financial Statements

December 31, 2024

6. Allocations and Distributions of Partnership Profits and Losses

Income and Expense Allocations

The Partnership Agreement provides for the allocation of operating income and operating expenses based upon the partners' contributed capital accounts. In order to recognize the advance contributions of certain partners, adjustments to allocations may be made at the sole discretion of the General Partner. Gains and losses are allocated in accordance with the Partnership Agreement. Generally, allocations of gains and losses are made as necessary to assure that first, Limited Partners shall be entitled to recoup capital contributions related to realized investments, unrealized losses on investments and contributions for fees and expenses ("Realized Base Amount"), as further defined in the Partnership Agreement, and second, 75% of cumulative realized capital gains and losses through the date of allocation are allocated to all partners on a pro rata basis, based on the partners' contributed capital accounts, and 25% are allocated to the Special Limited Partner ("Carried Interest"). Unrealized gains and losses are allocated in the same manner described above as if realized at December 31, 2024.

The following table includes the components of the net increase in partners' capital resulting from operations allocated to the General Partner and Special Limited Partner for the year ended December 31, 2024 pursuant to the Partnership Agreement:

	Net investment loss	Change in unrealized gain on investments	Net increase in partners' capital resulting from operations
General Partner and Special Limited Partner:			
General Partner, excluding Carried Interest	\$ (5)	\$ 110	\$ 105
Special Limited Partner, excluding Carried Interest	(211)	8,965	8,754
Special Limited Partner Carried Interest	-	2,126,911	2,126,911
Total General Partner and Special Limited Partner	<u>\$ (216)</u>	<u>\$ 2,135,986</u>	<u>\$ 2,135,770</u>

Distributions

Distributions may be made at the discretion of the General Partner. Cash distributions representing a return of capital are made in proportion to contributed capital. Generally, cash distributions representing profits are made in the same proportion as such profit is allocated to the capital accounts. Distributions of publicly traded securities are valued at the average of the last reported sales price of securities of such a class on the five most recent days on which such securities traded prior to the date of their distribution or, if unavailable, the average of the closing bid price on the five most recent days on which such securities traded prior to the date of their distribution.

7. Contingencies

In conjunction with the Partnership's investment activities, the Partnership is a party to agreements which contain certain representations and warranties. As such, the Partnership may, from time to time, be a party to suits and claims arising in the normal course of business. The General Partner believes that any losses resulting from the resolution of such claims would not have a material adverse effect on the Partnership's accompanying financial statements.

Bain Capital Venture Coinvestment Fund IV, L.P.
Notes to Financial Statements
December 31, 2024

8. Related Party Transactions

Affiliates of the Manager invested in the Partnership and are disclosed as Other Limited Partners on the Statement of Changes in Partners' Capital.

Related Parties to the General Partner and the Manager have 5.0% of the Partnership's total commitments as a portion of the GP Co-Investment Commitment to the Partnership (with the remaining portion of the GP Co-Investment Commitment to the Partnership being invested alongside the Partnership). The General Partner has reduced the management fee with respect to interests in the Partnership held by certain of these related parties.

9. Other Required Disclosure

The Institutional Limited Partners' net Internal Rate of Return ("net IRR") since the commencement of the operations of the Partnership through December 31, 2024 and December 31, 2023 is 23.7% and 481.8%, respectively. The net IRR is net of management fees, expenses, and Carried Interest. The calculation is based on the assumption that capital contributions and cash and stock distributions occurred on the last day of the fiscal quarter. The fair value of the limited partners' capital accounts is assumed to be the terminal cash flow. The net IRR has been calculated for Institutional Limited Partners, which does not materially differ from that of Other Limited Partners.

The ratio of operating expenses before and after Carried Interest to limited partners' average capital is 0.9% and 4.0%, respectively. The ratio of operating expenses before and after Carried Interest to limited partners' committed capital is 0.2% and 0.7%, respectively. The ratio of net investment loss before Carried Interest to limited partners' average capital is (0.6%). These financial highlights for the limited partners taken as a whole, exclusive of the General Partner and Special Limited Partner, for the year ended December 31, 2024. An individual limited partner's results may vary based on variety of factors including different fee arrangements and the timing of capital transactions.

The General Partner believes that the disclosure of net investment loss and operating expenses to limited partners' average capital and committed capital may be inconsistent with the basic concept that an investment in the Partnership is a long-term investment and therefore may not necessarily be appropriate measures for the Partnership.
