INDEPENDENT AUDITOR'S REPORT

To GSP Credit Opportunities Fund 2.0-A, L.P.:

Opinion

We have audited the financial statements of GSP Credit Opportunities Fund 2.0-A, L.P. (the "Partnership"), which comprise the statement of assets, liabilities and partners' capital, including the schedule of investments, as of December 31, 2024, and the related statements of operations, changes in partners' capital and cash flows for the year then ended, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2024, and the results of its operations, changes in its partners' capital and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Partnership and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

1. Organization and Business

GSP Credit Opportunities Fund 2.0-A, L.P. (the “Partnership”) is organized as a Delaware limited partnership and commenced operations on September 26, 2023. The initial closing date of the Partnership was September 29, 2023 (the “Initial Closing Date”). The final closing date of the Partnership is the six-month anniversary of the Initial Closing Date, or such later date approved by the General Partner (the “Final Closing Date”). The Partnership elected to proceed with its Final Closing Date on March 26, 2024, prior to the Final Closing Date of September 29, 2024.

The General Partner has organized GSP Credit Opportunities Fund 2.0 B, L.P. (the “Blocker Fund”), a Delaware limited partnership (together with the Partnership, the “Fund”). The Blocker Fund will participate proportionally in all investments of the Fund on substantially the same terms and conditions as the Partnership, except as necessary or advisable to address tax, legal, regulatory, or other considerations.

GSP Credit Opportunities Fund 2.0 GP, L.P. (the “General Partner”), a Delaware limited partnership, serves as general partner of the Fund. The General Partner will control the business and affairs of the Fund. The General Partner may, on behalf of the Fund, appoint the Management Company to manage the affairs of the Fund. Garnett Station Partners, LLC (the “Management Company”), a Delaware limited liability company, serves as the management company with respect to the Fund.

The Partnership, General Partner, and GSP COF 2.0 Blocker, L.P. formed GSP COF 2.0 Aggregator, L.P. (the “Aggregator”), as a Delaware limited partnership, on October 18, 2023. The Fund, General Partner, and Aggregator formed GSP COF 2.0 Splitter, L.P. (the “Splitter”), as a Delaware limited partnership on October 18, 2023. Through the Splitter, the Fund will seek to acquire a portfolio primarily consisting of senior debt, junior debt, debt-like investments and other instruments. Through the Aggregator, the Fund will aggregate partner commitments with the purpose of obtaining a line of credit. The Aggregator invests solely into the Splitter. The Fund invests through both the Splitter and Aggregator.

SEI Global Services, Inc. (the “Administrator”) serves as the administrator to the Fund.

The term of the Fund will terminate on the seventh anniversary of the Final Closing Date, but may be extended for up to two one-year periods at the discretion of the General Partner.

Capitalized terms not defined herein shall have the same meaning as described in the Amended and Restated Agreement of Limited Partnership (the “LPA”).

2. Summary of Significant Accounting Policies

Basis of Presentation

The Partnership prepares its financial statements in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”).

The Partnership qualifies as an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 946, Financial Services - Investment Companies (“ASC Topic 946”), and therefore is applying the specialized accounting and reporting guidance in ASC Topic 946.

Use of Estimates

The preparation of the financial statements in conformity with U.S. GAAP requires the General Partner to make estimates and assumptions that affect the reported amounts of assets and liabilities, including the fair value of investments, and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in partners’ capital from operations during the reporting period. Actual results could differ from these estimates.

Cash and cash equivalents

Cash and cash equivalents represents cash on deposit, which may at times exceed federally insured limits and this potentially subjects the Partnership to a concentration of credit risk. Cash and cash equivalents may also include money market funds that are readily convertible to known amounts of cash and are subject to

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

an insignificant risk of changes in value. The Partnership has not experienced any losses on these accounts.

Investment Transactions and Related Income and Expense

Investment transactions are recorded upon closing of the transaction. Realized gains and losses on investment transactions are determined using the specific identification method. Income and expenses are recognized on an accrual basis. Distributions that represent returns of capital in excess of cumulative profits and losses are credited to investment cost rather than investment income. Discounts and premiums to the face amount of debt investments are accreted and amortized using the straight-line method over the life of the respective debt investments. Premiums to the face amount of callable debt securities that have noncontingent call features that are callable at fixed prices and on preset dates are amortized using the effective interest rate method to the next call date when a call option at a specified price becomes exercisable. If there is no remaining premium or if there are no further call dates, the Partnership resets the effective yield using the payment terms of the debt security. All costs related to consummated investment transactions not reimbursed by the portfolio companies are capitalized as part of the cost basis of the investment.

Interest income from investments in debt instruments is accrued according to contractual terms, provided that management believes collection of such amounts is reasonably assured. Interest income is no longer accrued, and interest receivable is written off when deemed uncollectible.

Interest income received on distressed debt is treated as a return on capital and is recorded as a reduction of the cost of the investment. Interest income earned on non-distressed debt is considered income to the Partnership.

Discounts to the face amount of debt securities are not accreted and amortized to the extent that interest income is not expected to be realized.

The Partnership may invest in securities that contain payment-in-kind ("PIK") provisions. The PIK interest is added to the principal balance of the loans and recorded as interest income when collection is probable and realizable.

The Partnership may enter into total return swap agreements ("swaps") to gain or mitigate exposure to the underlying reference. Swaps involve commitments where single or multiple cash flows are exchanged based on the price of an underlying reference asset and on a fixed or variable interest rate. Swaps may involve commitments to pay interest in exchange for a market-linked return. One counterparty pays out the total return of a specific reference asset, which may include an underlying equity, index, or bond, and in return receives a fixed or variable rate. At the maturity date, a net cash flow is exchanged where the total return is equivalent to the return of the underlying reference asset less a financing rate, if any. As a receiver, the Partnership would receive payments based on any positive total return and would owe payments in the event of a negative total return. As the payer, the Partnership would owe payments on any net positive total return, and would receive payment in the event of a negative total return.

Investment Valuation

The Management Company will utilize various valuation techniques as appropriate in each circumstance and for which sufficient data are available in measuring fair value of the investments made by the Partnership. In some cases, a single valuation technique will be appropriate; in other cases multiple valuation techniques will be necessary. The Management Company will determine fair value as the point in the range of acceptable valuations that is most representative of fair value given specific facts and circumstances. Such valuation techniques will be consistent with, but not limited to, the following approaches:

- Market Approach – using prices, earnings multiples, industry valuation benchmarks and other relevant information generated by market transactions involving comparable assets or liabilities.
- Income Approach – using valuation techniques to convert estimated future cash flows into a single (discounted) present value amount.
- Cost Approach – a valuation technique based on the amount that currently would be required to replace the service capacity of an asset.

The Management Company generally fair values each investment using a discounted cash flow method by calculating the net present value of the projected cash flows from the investment over the period the investment is expected to be held. The discount rate applied is based on a risk-adjusted premium which the

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

Management Company reasonably believes reflects the risk of not achieving a return of capital on the investment within the stated term of the investment. Inherent also in this analysis is the General Partner's assessment of the probability of a payment default. In determining the appropriate discount rate for each investment, the portfolio company's current and future financial prospects as well as inherent uncertainties in the timing of underlying cash flows and other information deemed pertinent are considered.

Investments and derivatives held by the Partnership that are listed on a securities exchange or in comparable over-the-counter quotation systems are valued based on the last reported sale price as of the date of determination. If no sales of such investments or derivatives are reported on such date, and in the case of over-the-counter positions for which the last sales price is not available, valuations are based on independent market quotations obtained from market participants, recognized pricing services, or other sources deemed relevant when available. Market quotations are generally based on valuation pricing models or market transactions of similar investments adjusted for investment-specific factors, such as relative capital structure priority and interest and yield risks, among other factors.

Fair values of investments and derivatives that are quoted in established dealer or other similar markets are determined by the Investment Manager as of the date of determination (or the nearest date to such date if quotations are not available) from a reputable third-party market maker or financial institution regularly engaged in the practice of trading in or pricing such instruments.

Where the Partnership has access to price data for other securities or other investments or interest from multiple sources, a relative weighting is given to all such data (based on management's assessment of the relevance and reliability of such data) as well as to the results of the discounted cash flow method described above in order to arrive at a valuation for the investment.

Where the date of acquisition of an investment is in close proximity to the fair market value measurement date, the price at which such investment is closed is used as the primary determinant of fair market value.

Due to the inherent uncertainty of the valuation methodology, the valuations do not necessarily represent amounts that might ultimately be realized from an investment, and the differences could be material to the financial statements.

Income Taxes

The Partnership is classified as a partnership for U.S. federal income tax purposes. As a result, the Partnership itself is not subject to U.S. federal income taxes; instead each partner is individually liable for income taxes, if any, on its share of the Partnership's net taxable income.

Authoritative guidance on accounting for and disclosure of uncertainty in tax positions requires the General Partner to determine whether a tax position of the Partnership is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. For those tax positions subject to the more likely than not threshold, the tax amount recognized in the financial statements is estimated based upon the likelihood of being realized upon ultimate settlement with the relevant taxing authority.

The Partnership will file tax returns as prescribed by the tax laws of the jurisdictions in which it operates. In the normal course of business, the Partnership is subject to examination by various taxing authorities in the countries in which the Management Company operates and, in certain circumstances, countries in which investments are made. The Partnership is not currently under audit by any taxing authorities.

The Partnership is subject to U.S. federal, state and local or non-U.S. income tax audits from commencement of operations through December 31, 2024. Although the outcome of tax audits is always uncertain, the General Partner believes that any material amounts relating to tax claims have been accrued. As of December 31, 2024, no tax liability or expense has been accrued.

3. Investments

Fair Value Measurements

The Partnership follows ASC Topic 820, *Fair Value Measurement* ("ASC Topic 820"), which establishes a framework for measuring fair value and requires disclosures regarding fair value measurements. ASC Topic 820 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

orderly transaction between market participants at the measurement date.

The Partnership uses a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The fair value hierarchy is categorized into three levels based on the inputs as follows:

- Level 1 Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Partnership has the ability to access at the measurement date.
- Level 2 Quoted prices for similar assets or liabilities in active markets, and inputs other than quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires significant judgment by the Management Company. The Management Company considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorization of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Management Company's perceived risk, or liquidity, of that instrument.

When observable prices are not available for these securities, the Management Company may use multiple valuation techniques. Refer to Note 2 - Summary of Significant Accounting Policies for more information related to the multiple valuation techniques used by the Partnership.

The following table presents the financial instruments carried on the Statement of Assets, Liabilities and Partners' Capital by caption and by level within the valuation hierarchy as of December 31, 2024:

	Level 1	Level 2	Level 3	Total
Assets				
Corporate Bond	\$ -	\$ 1,173,662	\$ -	\$ 1,173,662

Liabilities				
Swaps	\$ -	-	\$ (454,093)	\$ (454,093)
Total Liabilities	\$ -	-	\$ (454,093)	\$ (454,093)

For the year ended December 31, 2024, purchases of investments classified as Level 3 totaled \$7.0 million. Transfers of investments in or out of Level 3, if any, are recorded as of the end of the reporting period. Assets and liabilities are transferred from Level 2 to Level 3 or from Level 3 to Level 2 as a result of changes in levels of liquid market observability when subject to various criteria, as discussed above. For the year ended December 31, 2024, there were no transfers into or out of Level 3.

GSP Credit Opportunities Fund 2.0-A L.P.

Notes to Financial Statements
December 31, 2024

The following table summarizes the quantitative inputs and assumptions used for items categorized in Level 3 of the fair value hierarchy as of December 31, 2024:

	Fair Value at December 31, 2024	Valuation Techniques	Significant Unobservable Inputs	Range (Weighted Avg) / Inputs
Senior Secured Note	\$ 629,000	Discounted Cash Flows	Discount Rate	9.33%
Term Loans	21,109,278	Discounted Cash Flows	Discount Rate	6.33% - 8.26%
	614,472	Transactional Value	Cost	N/A
Swaps	331,768	Discounted Cash Flows	Discount Rate	5.37% - 7.44%
	(454,093)	Discounted Cash Flows	Discount Rate	7.34% - 7.42%
	-	Transactional Value	Cost	N/A
Total	\$ 22,230,425			

There have been no material changes to the valuation approaches utilized during the year ended December 31, 2024.

4. Commitments and Contingencies

As of December 31, 2024, the Partnership had unfunded commitments to its investments of \$2.2 million.

In the normal course of its operations, the Partnership may direct or indirectly enter into contracts that contain a variety of representations and warranties and provide general indemnifications. The Partnership's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Partnership. However, based on experience, the General Partner expects the risk of loss to be remote and has not had prior claims or losses pursuant to these contracts.

5. Partners' Capital, Commitments and Distributions

Limitation of Limited Partners Liability

Generally, except as provided under applicable law or under the LPA a limited partner shall not be liable for the Partnership's debts, obligations and liabilities in any amount in excess of the unused capital commitment of such limited partner.

Capital Accounts Allocation

The Partnership shall maintain a separate capital account for each partner. Items of Partnership income, gain, loss, expense or deduction for any fiscal period shall be allocated among the partners in such manner that, the capital account of each partner shall be equal to the respective net amount that would be distributed to such partner from the Partnership or for which such partner would be liable to the Partnership.

Committed Capital

The Partnership has total commitments of \$103.7 million.

At December 31, 2024, the capital commitments of the Partnership consisted of \$100.7 million committed by the limited partners (97.11% of commitment) and \$3.0 million committed by the General Partner (2.89% of commitment). The maximum amount of remaining capital commitments that could have been called for investment by the limited partners and General Partner is \$66.9 million and \$2.0 million, respectively. No limited partner may sell, assign, pledge, or otherwise transfer their interest without the consent of the General Partner. Additionally, no limited partner can redeem their interest in the Partnership.

From inception through December 31, 2024, net capital contributions to the Partnership total \$34.8 million (33.5% of commitment).

Distributions and Carried Interest

The General Partner shall use its commercially reasonable efforts to cause the Partnership to distribute (i) cash current income and short-term investment income at least annually and (ii) the full net cash proceeds from the disposition of investments promptly, but in no event later than 90 days after receipt thereof, in each case, subject to the availability of cash after paying Partnership expenses and after setting aside appropriate reserves for anticipated expenses, liabilities, obligations and commitments of the Partnership.

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

Investment Proceeds from any Investment shall be apportioned preliminarily among the Partners in proportion to their Sharing Percentages with respect to the applicable Investment. The amount so apportioned to any Affiliated Partner shall be distributed to such Person, and the amount so apportioned to each other Partner shall be distributed between the General Partner and such Partner as follows:

- (a) first, 100% to such Partner until such Partner has received cumulative distributions equal to such Partner's aggregate Investment Contributions made with respect to Realized Investments;
- (b) second, 100% to such Partner until such Partner has received cumulative distributions equal to such Partner's Allocable Share of such Partner's Cost Contributions;
- (c) third, 100% to such Partner until the Unpaid Preferred Return of such Partner is reduced to zero;
- (d) fourth, 100% to the General Partner until the General Partner has received cumulative distributions with respect to such Partner equal to 20% of the cumulative amount of distributions made to such Partner and made or being made to the General Partner with respect to such Partner; and
- (e) fifth, thereafter, (i) 20% to the General Partner and (ii) 80% to such Partner.

The General Partner may, in its sole discretion, designate certain partners as "affiliated partners" that may be exempted from all or some portion of the carried interest and/or the Management Fee. There was \$1.4 million of carried interest allocation to General Partner as of December 31, 2024.

6. Management Fee, Reduction and Other Fees

Management Fee

The Partnership shall pay the Management Company in advance on a semi-annual basis, commencing on the Initial Closing Date, an annual fee (the "Management Fee"), as compensation for managing the affairs of the Partnership equal to 1.5% of an amount equal to the Non-Affiliated Partners' Percentage (a percentage (i) the numerator of which is the aggregate commitments of all partners, other than affiliated partners and (ii) the denominator of which is the aggregate commitment of all partners) of the aggregate commitments. The Management Fee shall be reduced to 1.0% of the Non-Affiliated Partners' Percentage of an amount equal to (x) the aggregate amount of Investment Contributions made with respect to Investments that have not been disposed of minus (y) the aggregate amount of any permanent write-downs of Investments that have not been disposed of after the Investment Period expires, or other such earlier event occurs, as defined in the LPA.

Other Fees

The Management Fee payable in any semi-annual period shall be reduced by an amount equal to the Non-Affiliated Partners' Percentage of 100% of the Partnership's portion of any other fees received by the General Partner or the Management Company during the immediately preceding semi-annual period. In addition, the Management Fee payable in any semi-annual period shall be reduced by an amount equal to the aggregate amount of all Placement Fees (defined below) and Excess Organizational Expenses (defined below) paid or reimbursed by the Partnership during the immediately preceding semi-annual period. In the event that the amount of fee reduction referred to in the two preceding sentences exceeds the Management Fee for such semi-annual period, such excess shall be carried forward to reduce the Management Fee payable in following semi-annual periods. Please refer to Note 7 for details of other fees paid to related parties.

"Placement Fees" means any private placement or finders' fees paid by the Partnership to placement agents, finders or other third-parties performing similar services in connection with the organization or funding of the Partnership (but not including any out-of-pocket costs and expenses incurred by such persons that are paid or reimbursed by the Partnership).

For the year ended December 31, 2024, Management Fee totaled \$1.5 million.

Organizational Expenses

The Partnership shall pay or reimburse the General Partner for the Partnership's pro rata share of all organizational expenses. The Partnership's pro rata share of organizational expenses in excess of the Partnership's pro rata share of \$1.5 million ("Excess Organizational Expenses") shall reduce the Management Fee as set forth in the Management Fee above.

For the year ended December 31, 2024, there were \$3.8 thousand of organizational expenses, which are included within Other expenses on the Statement of Operations.

GSP Credit Opportunities Fund 2.0-A, L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

7. Related Party Transactions

Shared expenses and contributions to the Splitter incurred by the Fund can be paid using available cash from both the Partnership and the Blocker Fund. For the year ended December 31, 2024, amounts due from affiliated entities include \$20.2 thousand due from the Blocker Fund for expense payments and \$10.5 thousand due from the Blocker Fund for contributions to the Splitter.

As of December 31, 2024, partners affiliated with the Investment Manager had capital balances of \$2.6 million, representing 6.1% of partners' capital.

8. Line of Credit

On November 29, 2023, the Partnership, together with the Aggregator, entered into a \$50.0 million line of credit for the purpose of providing bridge financing and funding for costs and expenses permitted under the LPA. The Partnership is subject to loan interest charges of the greater of the Prime Rate minus 0.50% or 5.50% on outstanding line of credit payable. For any amounts of unused line of credit, the Partnership is charged 0.35%. The line of credit is due to mature on November 29, 2025. At December 31, 2024, the Partnership had \$8.9 million outstanding line of credit payable. Interest payable for the year ended December 31, 2024 was \$74.9 thousand and is included within Accrued expenses on the Statement of Assets, Liabilities and Partners' Capital. Interest expense for the year ended December 31, 2024 was \$1.2 million and is presented on the Statement of Operations. Interest expense paid for the year ended December 31, 2024 was \$1.3 million and is presented on the Statement of Cash Flows.

As of December 31, 2024, the Partnership is in compliance with all financial covenants as set forth in the credit agreement.

9. Derivative Instruments

Swaps are carried at fair value in the Statement of Assets, Liabilities and Partners' Capital and changes in fair value are reflected in the Statement of Operations as net change in unrealized gain (loss) on derivative instruments. Fair value is determined using the policy described above. When the swaps mature, or when payments are settled, the Partnership records a realized gain or loss equal to the difference between the close-out price of the contracts and the original contract price in the Statement of Operations as a component of net realized gain (loss) on derivative instruments.

Primary Underlying Risk	Description	Statement of Assets, Liabilities and Partners' Capital	
		Derivative assets, at fair value	Derivative liabilities, at fair value
Credit Risk	Swaps	\$ 371,053	\$ (454,093)

The following table presents the gains (losses) recognized on derivatives, by contract type, included in the accompanying Consolidated Statement of Operations for the year ended December 31, 2024:

Primary Underlying Risk	Derivative	Average Notional	Net realized gain (loss) from derivative instruments for the year ended December 31, 2024	Net change in unrealized gain (loss) from derivative instruments for the year ended December 31, 2024
Credit Risk	Swaps	40,624,551	\$ 1,301,454	\$ (83,040)

Approximately \$19.8 million of collateral has been posted as of December 31, 2024, with counterparties related to derivative contracts, and no collateral has been received as of December 31, 2024 related to derivative contracts. The Partnership may be required to post additional collateral in subsequent periods due to unfavorable changes in the fair value of these contracts. The collateral posted balance is included within Investments, at fair value on the Statement of Assets, Liabilities and Partners' Capital.

The Partnership has elected not to offset assets and liabilities in the accompanying Statement of Assets, Liabilities and Partners' Capital that may be received or paid as part of collateral arrangements, even when an enforceable master netting arrangement or other agreement is in place that provides the Partnership, in the event of counterparty default, the right to liquidate collateral and the right to offset a counterparty's rights and

GSP Credit Opportunities Fund 2.0-A L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

obligations. The following tables present the offsetting of financial and derivative assets and liabilities as of December 31, 2024:

	Gross and Net Amounts Presented in the Statement of Assets, Liabilities and Partners' Capital	Gross Amounts Not Offset in the Statements of Assets, Liabilities and Partners' Capital		Net Amount
		Financial Instruments	Collateral Posted/Pledged	
Assets				
Derivative assets, at fair value	\$ 371,053	\$ (371,053)	\$ -	\$ -
Liabilities				
Derivative liabilities, at fair value	\$ (454,093)	\$ 371,053	\$ 83,040	\$ -

Amounts in the preceding table have been limited to the liability balance, and accordingly, do not include any excess collateral pledged.

10. Financial Instruments and Off-Balance Sheet Risks

Investments in Private Companies

The Partnership's investment portfolio, including those to which the Partnership has exposure through use of a total return swap, is expected to consist primarily of securities issued by privately held companies, and operating results in a specified period will be difficult to predict. Such investments involve a high degree of business and financial risk that can result in substantial losses.

Market Risk

Market risk is the potential loss the Partnership may incur as a result of changes in the fair value of a particular financial instrument. The Partnership's activities will be affected by general economic and market conditions, such as interest rates, availability of credit, inflation rates, economic uncertainty, public health crises, changes in laws, trade barriers, currency exchange controls, and national and international political circumstances.

Concentration Risk

The Partnership will participate in a limited number of investments and may seek to make several investments in one industry or one industry segment or within a short period of time. As a result, the Partnership's investment portfolio could become highly concentrated, and the performance of a few holdings or of a particular industry may substantially affect its aggregate return. Furthermore, to the extent that the capital raised is less than the targeted amount, the Partnership may invest in fewer portfolio companies and thus be less diversified.

Credit Risks

Credit investments, including those to which the Partnership has exposure through use of a total return swap, are subject to credit risk, which is the likelihood that a company will default in the payment of principal and/or interest on its obligations, among other covenants and requirements. Financial strength and solvency of a company are key factors influencing credit risk. Companies may face intense competition, changing business and economic conditions or other developments that may adversely affect their performance and increase credit risk. In addition, subordination, lack or inadequacy of collateral or credit enhancement for a debt instrument may affect its credit risk. Credit risk may change over the life of the Partnership. In addition, companies may contest enforcement of foreclosure or other remedies, seek bankruptcy protection against such enforcement and/or bring claims for lender liability in response to actions to enforce mortgage obligations.

Interest Rate Risk

Credit investments are subject to interest rate risks; changes in the prevailing market interest rates could negatively affect the value of certain of the Partnership's investment. The ability of companies or businesses in which the Partnership may invest to refinance debt instruments or repay debt obligations may depend on their ability to obtain financing, including by selling new securities or instruments in the high yield debt or bank financing markets. Volatility and instability in the securities market may also increase the risks inherent in certain of the Partnership's investments. Interest rate changes may affect the value of a debt instrument indirectly and directly. In general, rising interest rates will negatively impact the price of a fixed rate credit instrument and falling interest rates will have a positive effect on price.

GSP Credit Opportunities Fund 2.0-A L.P.
(A Delaware Limited Partnership)
Notes to Financial Statements
December 31, 2024

Liquidity Risk

An investment in the Partnership should be viewed as an illiquid investment. It is uncertain as to when profits, if any, will be realized. Losses on unsuccessful investments may be realized before gains on successful investments are realized. The Partnership's ability to dispose of investments may be limited. Illiquidity may result from the absence of an established market for the investments, as well as legal, contractual or other restrictions on their resale by the Partnership. Dispositions of investments may be subject to contractual and other limitations on transfer or other restrictions that would interfere with subsequent sales of such investments or adversely affect the terms that could be obtained upon any disposition thereof.

Impact of Government Regulation, Reimbursement and Reform

Certain industry segments in which the Partnership may invest are (or may become) (i) highly regulated at both the federal and state levels in the U.S. and internationally and (ii) subject to frequent regulatory change. Certain segments may be highly dependent upon various government (or private) reimbursement programs. While the Partnership intends to invest in companies that seek to comply with applicable laws and regulations, the laws and regulations relating to certain industries are complex, may be ambiguous or may lack clear judicial or regulatory interpretive guidance.

11. Financial Highlights

The following represents the financial highlights for the year ended December 31, 2024:

IRR inception through December 31, 2023	<u>(5.16) %</u>
IRR inception through December 31, 2024	<u>13.18 %</u>
Ratios to average Limited Partners' capital	
Expenses	13.34 %
Carried interest	<u>3.29 %</u>
Total expenses and carried interest	<u>16.63 %</u>
Net investment income (loss)	<u>11.67 %</u>

The IRR of the limited partners since inception of the Partnership is net of all fees and carried interest to General Partner and computed based on the actual dates of cash inflows (capital contributions), cash outflows (capital distributions) and ending capital (residual value) of the limited partners. An individual Limited Partner's return may vary from the return above due to the timing of the Limited Partner's contribution and different fee arrangement, if any.

Average limited partners' capital for the year was calculated based on the simple average at the end of each quarter of the limited partners' capital reduced by carried interest allocation, if any, which includes any capital contributions or distributions during the year as well as the allocation of net increase (decrease) in limited partners' capital for the year.

The expense ratio is determined by dividing the operating expenses allocated to limited partners by the average limited partners' capital and are presented before and after any carried interest.

The net investment income ratio is determined by dividing the net investment income by the average limited partners' capital. The net investment income ratio does not reflect the carried interest to General Partner.

12. Subsequent Events

The Management Company has evaluated all subsequent events or transactions for potential recognition or disclosure through April 25, 2025, the date on which these financial statements were available to be issued and has determined that there were no subsequent events requiring adjustment to or disclosure in the financial statements.
