Important Information

This annual report is for informational purposes only and is not intended to recommend any investment discussed in this report. This annual report is not an offer to sell nor the solicitation of an offer to purchase an interest in any investment vehicle managed or sponsored by Sentinel Capital Partners, L.L.C. or its affiliates (collectively, “Sentinel”).

Statements in this annual report are made as of the dates specified in this report, and Sentinel has no obligation to update the information in this annual report.

All information with respect to industry data has been obtained from sources believed to be reliable and current; however, none of Sentinel or its respective affiliates makes any representation or warranty, express or implied, with respect to the fairness, correctness, accuracy, reasonableness, or completeness of any information contained herein (including, but not limited to, economic, market, or other information) obtained from third parties, and each expressly disclaims any responsibility or liability therefor. The delivery of this information shall not, under any circumstances, create any implication that the information contained herein is correct in all respects, including as of any time subsequent to the date of this report. Further, Sentinel does not undertake an obligation to update such information at any time after such date. Unless otherwise stated herein, information is current through December 31, 2024.

Any investment in any private fund managed or sponsored by Sentinel is subject to various risks, none of which is outlined herein. A description of certain risks involved with an investment in any private fund managed or sponsored by Sentinel can be found in the offering memorandum of such private fund; such risks should be carefully considered by prospective investors before they make any investment decision.

This annual report contains certain performance information for existing Sentinel private funds and selected portfolio companies of such funds. The portfolio company case studies are intended to illustrate the various types of portfolio company investments that Sentinel has made. Performance information for all portfolio companies is available from Sentinel upon request.

The benchmark statistics for 2019-vintage private equity funds reflect the investment performance of a collection of U.S. private equity buyout funds selected by Cambridge Associates LLC, including fully liquidated funds, formed in 2019 (the “CA 2019 Benchmark”). The returns of the funds included in the CA 2019 Benchmark are net of all applicable fees, expenses and carried interest. The Standard & Poor’s 500 Index (the “S&P 500”) sets forth the performance of a well-known broad-based stock market index, assuming reinvestment of dividends. The S&P 500 contains only seasoned equity securities. The Dow Jones Industrial Average (the “DJIA”) sets forth the price-weighted average performance of 30 actively traded “blue chip” stocks of primarily industrial issuers.

Investors generally cannot invest directly in the CA 2019 Benchmark, the S&P 500, or the DJIA, which are presented for reference purposes only. The statistical data regarding the CA 2019 Benchmark, the S&P 500, and the DJIA have been obtained from sources believed to be reliable. Sentinel intends for the Sentinel funds to pursue, and they have previously pursued, a private equity strategy, although the Sentinel funds may also make, and they have previously made, investments outside of this strategy from time to time and may not pursue other strategies followed by some or all of the funds included in the CA 2019 Benchmark, nor will the Sentinel funds invest, and nor did they previously invest, in the funds comprising the CA 2019 Benchmark. The S&P 500 and the DJIA are commonly used, broad-based benchmarks for various markets and are provided only for general comparison against those markets. Investors generally are not able to invest in these indices. The criteria for including particular securities in these indices are different than Sentinel’s criteria for choosing investments for its funds. Specifically, the Sentinel funds do not invest in the securities comprising these indices. Rather, the Sentinel funds generally invest in portfolios of control investments in lower middle market businesses in the United States and Canada in specific industry sectors (as set forth in the funds’ offering materials and governing documents). In addition, an investment in any Sentinel fund generally will be subject to expenses, management fees, and carried interest charged or payable by the fund, none of which are reflected in these indices. For the foregoing and other reasons, the returns achieved by the Sentinel funds and the returns of the CA 2019 Benchmark, the S&P 500, and the DJIA should not be considered comparable.

The historical returns achieved by any prior funds or individual investments are not a prediction of future performance or a guarantee of future results, and there can be no assurance that these or comparable returns will be achieved by investments, individually or in the aggregate, made by any existing or future Sentinel private fund.

As used herein, “gross IRR” represents the gross compound annual rate of return based on realized and unrealized proceeds using quarterly cash flows and incorporates valuing the remaining debt positions at accreted cost and

valuing the remaining equity positions based on EBITDA multiples at the date of investment. Gross IRR is calculated before the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, “gross multiple of cost” and “gross multiple of investment” are reflected on a gross basis and do not reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by investors.

As used herein, “levered net IRR” represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses. An individual limited partner’s levered net IRR may vary based on the timing of capital contributions and distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Levered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of December 31, 2024 and proceeds are distributed through the Partnership’s waterfall in accordance with the terms and conditions of the Partnership’s Agreement of Limited Partnership (the “LPA”). Calculations of levered net IRRs in respect of investment and performance data included and/or referred to herein are based on the payment date of capital contributions received from limited partners, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

As used herein, “unlevered net IRR” represents the compound annual rate of return, calculated after payment of applicable management fees, partnership expenses, carried interest, and other applicable expenses (but excluding interest expense on any subscription-based credit facility). An individual limited partner’s unlevered net IRR may vary based on the timing of distributions, as well as other factors such as excuse rights, different terms, or limited partner characteristics. Unlevered net IRR for the Partnership or groups of unrealized investments as a whole assumes unrealized investments are sold as of December 31, 2024 and proceeds are distributed through the Partnership’s waterfall in accordance with the terms and conditions of the LPA. Calculations of unlevered net IRRs in respect of investment and performance data included and/or referred to herein are based on the closing/funding date of each applicable investment, irrespective of whether a subscription-based credit facility was used to initially fund such investment.

Note that a feature in the LPA provides for an increase in the carried interest payable to the Partnership’s general partner, from 20% to 25%, if certain return thresholds are met, provided that the distributions in respect of such increased carried interest may not be distributed to the Partnership’s general partner until the investment period of the Partnership terminates. The calculation of the Partnership’s unlevered and levered net IRRs presented herein assumes that the Partnership’s investment period has not terminated (as was true at the time of issuance hereof). However, if the calculation were to assume, alternatively, that the investment period had terminated and the relevant return thresholds had been met, then the carried interest rate applied in respect of distributions in excess of the limited partners’ aggregate capital contributions and a 9% preferred return thereon would be 25%, and the unlevered and levered net IRRs of the Partnership would be reduced accordingly.

Investment-level unlevered net IRRs are calculated as follows unless otherwise noted: (i) calculate a fund-level expense ratio (which reflects the fund’s management fees, carry, and other expenses, but excludes interest expense on any subscription-based credit facility) and (ii) apply such expense ratio across individual investments. Investment-level levered net IRRs are calculated as follows unless otherwise noted: (i) calculate a fund-level expense ratio (which reflects the Fund’s management fees, carry, and other expenses) and a fund-level spread between unlevered net IRR and levered net IRR and (ii) apply such expense ratio and such spread across individual investments. Sentinel believes this provides a reasonable method of estimating net IRR performance with respect to individual investments, notwithstanding that the net performance of the Partnership is ultimately based on the performance of the Partnership taken as a whole. This method may understate or overstate the effect of operating expenses, profits interests, and/or management fees, as applicable, to individual investments and is presented for informational purposes only. No such returns have actually been or will actually be generated by any individual investment, and no investor has achieved or will achieve any such net returns on any such basis.

As used herein, “DPI” or “distributed/paid-in” means distributions received by limited partners relative to contributed capital. DPI is reflected on a net basis and reflects the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

As used herein, “TVPI” or “total value/paid-in” or “net multiple of cost” means distributions received by limited partners and the unrealized value relative to contributed capital. TVPI and net multiple of cost are reflected on a net basis and reflect the deduction of management fees, partnership expenses, carried interest, and other expenses borne by limited partners.

Presentation of net performance information for subsets (realized and unrealized) of the Partnership is a hypothetical estimate of net performance because actual net returns cannot be calculated for a subset of portfolio investments due to the collective nature of fund fees and expenses. Net performance figures for this subset of the Partnership are estimated and do not represent actual performance experienced by investors. Sentinel has used the gross-net spread at the fund level to calculate such net performance. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the fund level.

No representation or warranty is made with respect to the reasonableness of any estimates, forecasts, illustrations, prospects or returns, which should be regarded as illustrative only, or that any profits will be realized. This report contains certain “forward-looking statements,” which may be identified by the use of forward-looking terminology such as “believe,” “expect,” “anticipate,” “should,” “planned,” “estimated,” “potential,” “outlook,” “forecast,” “plan,” or the negatives thereof or other variations thereon or comparable terminology. Examples of forward-looking statements include, but are not limited to, estimates with respect to financial condition, results of operations, success or lack of success of Sentinel’s investment strategies, and statements regarding Sentinel’s investment thesis. Any forward-looking statements (including, without limitation, projections of future earnings or value) contained in this annual report are only estimates by Sentinel of future results that are based on assumptions made by Sentinel at the time this report was prepared. Each forward-looking statement contained in this annual report is subject to known and unknown risks, uncertainties, and other factors that may cause actual results to be materially different from those contemplated in such forward-looking statement. Accordingly, there can be no assurance that the results described by any such forward-looking statement will be attained, and actual results may be significantly different from such forward-looking statement. Sentinel does not undertake any obligation to update or revise the forward-looking statements contained in this annual report to reflect events or circumstances occurring after the date this report was prepared or to reflect the occurrence of unanticipated events.

Sentinel seeks to integrate certain sustainability and responsibility (“S&R”) factors into its investment process in accordance with its policy and subject to its fiduciary duty and any applicable legal, regulatory, or contractual requirements. There is no guarantee that Sentinel will be able to successfully implement its S&R policy or make investments in companies that create a positive S&R impact while achieving its investment strategy. In addition, applying S&R factors to investment decisions is qualitative and subjective by nature, and there is no guarantee that the criteria used by Sentinel or any judgment exercised by Sentinel will reflect the beliefs or values of any particular investor. There are also significant differences in interpretations of what positive S&R characteristics mean by region, industry and topic. Sentinel’s interpretations and decisions may differ from others’ views and could evolve over time. In addition, in evaluating an investment, Sentinel expects to depend upon information and data provided by a number of sources, including the relevant investments and/or various reporting sources which could be incomplete, inaccurate or unavailable, and which could cause Sentinel to incorrectly assess a company’s S&R practices and/or related risks and opportunities. Sentinel does not intend to independently verify all S&R information reported by investments or third parties.

Further, considering S&R qualities when evaluating an investment could result in the selection or exclusion of certain investments based on Sentinel’s view of certain S&R related and other factors and could cause the relevant funds not to make an investment that they would have made or to make a management decision with respect to an investment differently than they would have made in the absence of the S&R Policies, which could negatively impact the Partnership’s performance. For the avoidance of doubt, however, Sentinel does not expect to subordinate a Partnership’s investment returns or increase the Partnership’s investment risks as a result of (or in connection with) the consideration of any S&R factors. Further, S&R practices are evolving rapidly and there are different principles, frameworks, methodologies, and tracking tools being implemented by other asset managers, and Sentinel’s adoption and adherence to various such principles, frameworks, methodologies, and tools are expected to vary over time. There is also a growing regulatory interest across jurisdictions in improving

transparency regarding the definition, measurement, and disclosure of S&R factors. Sentinel's S&R policies could become subject to additional regulation in the future, and Sentinel cannot guarantee that its current approach will meet future regulatory requirements.

This annual report is intended for authorized recipients only and must be held strictly confidential. This annual report includes confidential, proprietary, and trade secret information of Sentinel. By accepting this information, each recipient agrees that (i) no portion of this annual report may be reproduced or distributed in any format without the prior express written consent of Sentinel, (ii) it will not copy, reproduce, or distribute this annual report, in whole or in part, to any person or party, and (iii) it will keep confidential all information contained herein that is not already public.

March 31, 2025

SENTINEL CAPITAL PARTNERS VI, L.P.
SENTINEL CAPITAL PARTNERS VI-A, L.P.
SENTINEL CAPITAL INVESTORS VI, L.P.

Annual Report for the Period Ended December 31, 2024

Dear Limited Partner:

Sentinel Capital Partners VI, L.P. (“Sentinel VI”) and its parallel funds—Sentinel Capital Partners VI-A, L.P. (“Sentinel VI-A”) and Sentinel Capital Investors VI, L.P. (“Sentinel Investors VI,” and together, “the Partnership”)—completed their fifth year of operations on December 31, 2024. The Partnership began its investment operations on April 1, 2019, which marked the Partnership’s official start date. This report covers the year ending December 31, 2024 for Sentinel VI, Sentinel VI-A, and Sentinel Investors VI. The audited financial statements for 2024 are now available.

For the year ended December 31, 2024, Sentinel VI’s net loss from investment operations was \$261.6 million, and its net asset value on December 31, 2024 was \$1.2 billion; Sentinel VI-A’s net loss from investment operations was \$20.5 million, and its net asset value was \$95.4 million; and Sentinel Investors VI’s net loss from investment operations was \$5.5 million, and its net asset value was \$24.9 million. The losses resulted from writedowns in the values of 11 unrealized portfolio companies, partly offset by a realized gain from the sale of TranSystems and unrealized writeups in the values of Empire Auto and NSI Industries.

As of December 31, 2024, the Partnership had taken down or committed \$2.1 billion, or 102.7% of its committed capital, and had invested in 18 companies. Cumulative distributions from inception through December 31, 2023 have been \$1.6 billion, or 0.7x contributed capital. Including cumulative distributions, the Partnership’s net asset value on December 31, 2024 was \$3.7 billion, or 1.7x contributed capital.

The Partnership’s 18-company portfolio represents an aggregate purchased enterprise value of \$5.6 billion. These companies conform to Sentinel’s investment strategy—(i) each operates in one of our core industry segments and is a midmarket business; (ii) the average EBITDA purchase multiple is 10.1x, reflecting our value orientation; and (iii) each is a leader in a market niche. As of December 31, 2024, the 18-company portfolio had a value including realizations of \$3.0 billion, or a 1.4x gross multiple of cost, for a gross IRR of 17.0%. Net of fees and expenses, the net levered/unlevered IRR to the limited partners is 12.3%/11.6%, the DPI is 0.6x, and the TVPI is 1.3x. The Partnership’s portfolio companies are valued in accordance with the provisions of the Financial Accounting Standards Board Accounting Standards Codification Topic 820, Fair Value Measurement.

Today, we manage three active private equity funds—Sentinel V, Sentinel VI, and Sentinel VII—and three affiliated fund strategies—Sentinel Junior Capital I, Sentinel Junior Capital II, and Sentinel Continuation Fund I. For the six funds overall in 2024 and early 2025, we invested in four new platforms, made two debt investments, closed 36 add-ons, and exited three portfolio companies. We acquired the 36 add-

ons at a highly accretive blended 7.3x EBITDA multiple. For this period, we invested a total of \$1.8 billion, of which \$1.6 billion was in equity and \$123.5 million in debt securities. We ended 2024 with 31 investments across our six funds.

Highlights of this letter include (i) our recently announced succession plan, (ii) reflections on the state of the private equity industry, (iii) an overview of the Partnership's performance since inception, (iv) a summary of new investments, (v) a discussion of the end of the Partnership's primary investment phase and new line of credit, (vi) portfolio construction data, (vii) a summary of a liquidity event and distribution to limited partners, (viii) a review of portfolio company valuations, (ix) a high-level overview of portfolio company operating metrics, (x) a discussion of deal flow activity, (xi) sustainability and responsibility initiatives underway, (xii) a look at how we're approaching AI, (xiii) an organizational update, and (xiv) a summary of our other funds' progress.

Succession Plan

As part of our leadership succession plan announced in March, Eric Bommer has joined David Lobel as a managing partner, positioning Eric as David's eventual successor. John McCormack and David hired Eric 28 years ago as Sentinel's first professional hire; since then, Eric has played an important part in shaping Sentinel's success.

A highly regarded investor and dealmaker in private equity, Eric will continue to be actively engaged in our investments. Over time, his Sentinel responsibilities will expand, but for now, there are no changes to the day-to-day management of our firm. A distinguishing feature of our firm is the depth of our leadership team. Eric, John, and David—along with our seven tenured partners, Owen Basham, Jim Coady, Michael Fabian, Paul Murphy, Scott Perry, Garrett Schires, and John Van Sickle—have worked together for many years. This well-oiled team is the engine that will drive Sentinel forward as we hunt for new investments, support our management partners in running their businesses, position our portfolio companies for successful exits, and oversee our 96-member firm and \$8.7 billion of capital under management.

Rising through our ranks is a group of talented deal professionals, all of whom have built their careers at Sentinel. These NextGen leaders power our organization and will be the mentors and decision-makers of the future. And our 10-member squad of operating partners brings additional expertise and firepower to our capabilities.

Private Equity 2025: Still on Pause but Ready to Run

Private equity's two-year downturn, triggered by inflation and soaring interest rates, has dragged on because of underperforming portfolio companies and the unhappy prospect of exit multiple compression. For private equity sponsors, still-high interest rates have eroded the benefits of leverage, and tax caps on interest deductibility have made debt less attractive. These inhospitable conditions have buyers on edge, making exits tough. DPIs have plunged, liquidity is scarce, and fundraising difficult. Traditional industries, where we operate, have been sluggish, making it harder to create sustainable value and sell businesses. And with default rates creeping up and more debt being paid in kind, private debt markets are feeling some strain.

Most of the hundreds of businesses we reviewed last year underperformed. When the rare strong performer comes up for sale, it typically commands a sky-high valuation because buyers pay large premiums for perceived safety. For everything else, buyers prefer the sidelines.

Looking ahead, the macroeconomic picture is fraught with uncertainties around tariffs, mass layoffs of government workers, inflation, and the Fed's next moves. Americans have been cautioned about the possibility of a short-term recession. Geopolitical risk is now a fixture of the landscape. Because of these factors, we do not expect 2025 to stage a major rebound from a lackluster 2024.

But there are encouraging signs. Labor shortages and supply chain disruptions have eased significantly. The private equity market has a large overhang of unsold businesses, and with debt financing widely available, M&A activity may be on the upswing, as we discuss further in this letter.

A 2024 BCG report predicted that private equity returns in the next five years will depend more on true value creation—alpha—than on multiple expansion and financial engineering. We believe that driving alpha requires the right strategy, the right culture, the right talent, and the right value-added capabilities. We further believe that Sentinel has all these elements in place, as we discussed at some length during our March investor conference.

Fund Performance

The Partnership began its investment operations on April 1, 2019 and had invested \$2.1 billion in 18 portfolio companies as of December 31, 2024. Four investments have been fully realized as of December 31, 2024 and generated \$1.4 billion of cash proceeds, a 3.4x/3.0x gross/net multiple of cost, a gross IRR of 51.2%, and a net levered/unlevered IRR of 37.2%/34.9%. The Partnership's \$2.1 billion aggregate investment in its 18 portfolio companies has generated \$3.0 billion of total value, or a 1.4x gross multiple of cost, for a gross IRR of 17.0%, a net levered/unlevered IRR of 12.3%/11.6%, a DPI of 0.6x, and a TVPI of 1.3x, as shown below.

Partnership Investment Performance Since Inception¹
As of December 31, 2024
(\$000s)

Fund VI (2019 Vintage)	Number of Investments	Amount Invested	Cash Realized	Unrealized Value	Total Value	Gross / Net Multiple of Cost	Gross IRR	Net IRR Levered/Unlevered
Realized Investments	4	\$417,986	\$1,432,425	\$3,827	\$1,436,252	3.4x / 3.0x	51.2%	37.2% / 34.9%
Unrealized Investments	14	1,712,024	136,494	1,422,713	1,559,207	0.9x / 0.8x	(3.8%)	(2.7%) / (2.6%)
Total Fund VI	18	\$2,130,010	\$1,568,919	\$1,426,540	\$2,995,459	1.4x / 1.3x	17.0%	12.3% / 11.6%
DPI = 0.6x TVPI = 1.3x								

The Partnership's 0.6x DPI places Sentinel VI in the upper quartile of 2019-vintage private equity funds for this metric. When it comes to private equity performance, Sentinel has always prioritized DPI over other performance metrics. The nice thing about DPI is that it cannot be manipulated the way IRR can—it's a pure measure of cash in and cash out. With heightened LP focus on capital returned, it now appears that this view has become more mainstream among institutional investors. According to Cambridge Associates, through September 30, 2024, the benchmark upper-quartile DPI for U.S. buyout funds established in 2019 was 0.5x, the TVPI was 1.7x, and the net IRR was 20.8%.

New Investments

In 2024, the Partnership invested in new platforms NSI Industries and Spectrum Safety Solutions and made follow-on investments in Catalyst MedTech (formerly TTG Imaging Solutions) and New You

¹ Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see the "Important Information" at the front of this report for more information on calculation methodologies for net returns.

Bariatric. Together, these four investments represent 12.7% of committed capital, as highlighted in the table below.

2024 New Investments ¹				
Company	Investment Type	Closing Date	Investment (\$000)	Business Description/ % Committed Capital
Catalyst MedTech	Follow-On	10/1/2024	\$3,000	Equipment, repair, and maintenance for the medical nuclear imaging market
New You Bariatric Group	Follow-On	4/10/2024	5,000	Support services to bariatric surgery practices
NSI Industries	Platform	11/15/2024	75,000	Provider of electrical and HVAC products
Spectrum Safety Solutions	Platform	7/1/2024	190,000	Manufacturer of fire detection, monitoring, and suppression products
Total Investments			\$273,000	12.7% of Committed Capital

Summaries of the four new investments follow.²

Catalyst MedTech—Follow-on Investment

In September 2024, with Catalyst MedTech (formerly TTG Imaging Solutions) underperforming (see page 10 for a fuller discussion), it breached certain debt covenants. We worked closely with Catalyst's lenders on a comprehensive solution that provides the company more time and flexibility to execute its turnaround. In September, we reached an agreement whereby the Partnership invested an additional \$3.0 million structured as a last-out senior term loan and the lenders deferred interest and term loan amortization of approximately \$3.3 million through March 2025 and reset covenants. Also, the mezzanine lenders agreed to PIK their interest through June 2026. The transaction closed on October 1, 2024. The follow-on brought the Partnership's total investment in Catalyst to \$101.0 million.

New You Bariatric Group—Follow-on Investment

In the second quarter of 2024, because of a continued decline in surgery volumes, NYBG faced a liquidity shortfall (see page 11 for the reasons for the shortfall). In April, as part of a debt amendment with lenders, the Partnership invested \$5.0 million and NYBG's CEO \$1.2 million—both structured as debt pari passu with the existing senior debt. In parallel, the lenders agreed to accrue about \$17 million of 2024 interest and provide covenant relief. The lender group was also granted a 10% ownership stake and a board seat. Following this investment, the Partnership's total exposure to NYBG was \$66.8 million.

NSI Industries—New Investment

On November 15, 2024, Sentinel acquired NSI Industries for \$1.5 billion, or 9.9x EBITDA. NSI is a leading provider of branded industrial products for the electrical, HVAC, and network infrastructure markets.

¹ Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein.

² Detailed reviews of new investments appear in the portfolio writeup section of this report, beginning on page A-1.

For the 12 months ending July 31, 2024, NSI generated revenue of \$682.7 million and EBITDA of \$150.7 million.

NSI supplies branded electrical, HVAC, and network infrastructure components to third-party distributors in the United States and Canada. Previously owned by Odyssey Investment Partners, NSI was brought to market by Harris Williams in 2023. While strategic buyers were interested in the segments separately, none was willing to acquire all three. Sentinel was among a small group of sponsors who saw an opportunity to acquire the combined business and create value by separately exiting each of them. Management and Odyssey chose Sentinel based on our industrials experience; past ownership of ECM Industries, which operates in the same electrical products market as NSI and that we successfully sold to nVent in 2023; strong management rapport; our deep understanding of NSI from participating in the last four sale processes; and confidence that we would close the transaction quickly and on the agreed terms. Sentinel built in structural and tax flexibility to allow us to sell the three businesses one at a time. Forty-two NSI employees invested \$21.5 million alongside Sentinel.

To finance the transaction, Sentinel secured a \$1.16 billion unitranche credit facility led by Blackstone, to which Sentinel Junior Capital II committed \$20.0 million. The total equity required was \$705.0 million, of which Sentinel VII invested \$518.6 million, the Partnership \$75.0 million, management \$21.5 million, Sentinel Junior Capital II \$20.0 million, and other coinvestors \$69.9 million.

Sentinel is currently exploring a sale of the HVAC and network infrastructure divisions with the aim to focus NSI on its electrical business, where we have a proven roadmap and record from previous ownership of Power Products and ECM and a strong team of operating partners to support this complex investment. Whether or not the two divisions are divested, we plan to reduce Sentinel VII's investment to approximately \$325 million or less within the first 12 months. We do not expect to reduce the Partnership's investment amount.

Spectrum Safety Solutions—New Investment

On July 1, 2024, Sentinel VII acquired the industrial fire assets of Carrier Global Inc. (NYSE:CARR) in a complex corporate carveout valued at \$1.375 billion, which represents 11.1x EBITDA or 10.4x after adjusting for the estimated present value of tax-deductible goodwill. This acquisition established Spectrum Safety Solutions, LLC, a new standalone platform, as a leading manufacturer of branded industrial fire detection and suppression products and services for mission-critical and high-hazard environments. For the 12 months ending March 31, 2024, Spectrum generated revenue of \$553.3 million and standalone adjusted EBITDA of \$123.8 million.

Spectrum consists of four brands previously owned by United Technologies Corp. (NYSE:UTX) until UTX spun off Carrier in 2020. As industrial fire was noncore to Carrier, it hired Goldman Sachs and J.P. Morgan in 2023 to sell the brands as a package. While strategic buyers were seriously interested in the individual brands at elevated purchase multiples, none was willing to purchase all. Sentinel was among a small field of sponsors willing to tackle the unusually complex package carveout. Leveraging our industrial expertise and past success with the 2013 highly complex carveout from UTC of IEP Technologies, a similar fire protection business, coupled with the strong chemistry we developed with management and Carrier's confidence we would close the transaction quickly and on the agreed terms, Sentinel was chosen.

To finance the transaction, Sentinel secured a \$1.035 billion senior credit facility led by Blackstone, with Sentinel Junior Capital II committing \$20.0 million. The total equity required for the transaction was \$715.0 million, of which Sentinel VII invested \$440.0 million, the Partnership \$190.0 million, Sentinel Junior Capital II \$20.0 million, Sentinel GP Holdings \$10.0 million, and other coinvestors \$55.0 million.

Lines of Credit and End of Primary Investment Phase

The Partnership has access to a \$155.0 million warehouse credit facility with BMO Bank. As of December 31, 2024, the facility had a balance of \$78.5 million outstanding. Amounts borrowed under the line in 2024, if any, bore interest at the prime rate minus 0.375%, or SOFR plus 2.775%. As of December 31, 2024, the Partnership was in compliance with all the terms of the loan agreement.

In our second-quarter letter, we reported that with the closing of the Spectrum investment, we completed the Partnership's primary investment phase and were retaining approximately \$125 million, or 5.8% of its commitment capital, to support the fund's active portfolio. Unexpectedly, in the fourth quarter, Sentinel VI was presented with an opportunity to coinvest \$75.0 million, or 3.5% of its capital, alongside Sentinel VII in a promising new platform, NSI Industries, discussed in greater detail on the previous page. The investment closed on November 15, 2024, bringing the Partnership's total capital invested to 102.7% of fund commitments and reducing the reserve of uncalled capital earmarked for existing portfolio companies to \$49.8 million, a level below our comfort threshold. To bolster the reserve, we secured a new \$100.0 million line of credit with BMO that, if needed, can be drawn at the Partnership's option, subject to customary financial covenants. In the years ahead, we would first draw the Partnership's \$49.8 million of uncalled capital before tapping the BMO line.

The new loan facility, which was approved by the Partnership's advisory board in early November in accordance with the partnership agreement, enables the Partnership to productively invest a higher percentage of its committed capital during its life than we have for predecessor funds. Since its inception five years ago, the Partnership has made 18 platform investments, of which 14 remain active.

Portfolio Construction

The capital invested in the 18-company portfolio is well diversified across our four core industry sectors, as shown in the chart below.

Sentinel VI¹
(\$2.1 billion | 102.9% Committed | 18 Portfolio Companies)

¹ Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein.

Liquidity Event and Distribution

In 2024 and early 2025, the Partnership received \$278.4 million of cash proceeds, or 13.0% of committed capital, from the sale of TranSystems, highlights of which follow.

TranSystems. On August 5, 2024, TranSystems was sold in an all-cash transaction to Gannett Fleming, a strategic buyer backed by private equity firm OceanSound Partners, for an enterprise value of \$770.0 million, or 15.2x trailing 12-month EBITDA. TranSystems performed exceedingly well during our ownership. In March 2021, the Partnership made an initial investment of \$80.0 million. Then, in 2022 and 2023, the Partnership made four small follow-on investments totaling \$12.5 million to complete four add-ons. In the three years after the Partnership made its original investment, TranSystems demonstrated strong organic growth driven by increased demand for infrastructure services and, in total, completed seven accretive add-ons. Revenue grew from \$140.2 million in 2021 to \$350.4 million for the 12 months preceding the sale, up more than twofold, and EBITDA grew from \$19.9 million to \$50.5 million, up more than two and a half times.

At closing, the Partnership received \$279.8 million of total proceeds, of which \$276.6 million was in cash and \$3.2 million was held in escrow pending certain post-closing adjustments and contingencies. Including \$1.7 million of proceeds received in March 2025 from the escrow and valuing the seller holdback at 50% of face value, TranSystems has returned \$278.5 million, or 3.0x/2.7x gross/net cost, for a gross IRR of 39.3% and a net levered/unlevered IRR of 28.5%/26.8%.

The Partnership retained \$195.8 million of the proceeds of the third-quarter distribution to fund the new investment in Spectrum Safety Solutions and partnership expenses. Because the Partnership Agreement requires the distribution of net proceeds from portfolio investments to the limited partners, a dollar-for-dollar distribution to and capital contribution by the limited partners was deemed to have occurred. The result will be to reduce future capital commitments of the limited partners by the amount of the deemed capital contribution, the impact of which is reflected in our audited financial statements.

Portfolio Company Progress and Valuations

Under generally accepted accounting principles, the Partnership is required to value its portfolio companies at fair market value. We started 2024 with 13 active portfolio companies, invested in two new platforms, and sold one company, ending the year with 14. As noted, the TranSystems sale generated a significant realized gain; two of the 14 unrealized portfolio companies appreciated in value and 11 declined; and the Partnership's investment in Spectrum Safety Solutions is being held at cost. In total, the value of the portfolio as of December 31, 2024 depreciated by \$283.0 million, or 15.3%. The EBITDA multiples used to value each unrealized portfolio company and the resulting changes in valuation by company and for the Partnership overall are shown in the table on the following page.

Realized and Unrealized Portfolio Valuations¹
Trailing 12-Month Performance Comparison as of December 31, 2024
(\$000s)

Company	Total Investment Cost	Value at 12/31/23	New TTM Investment	12/31/24 Debt / EBITDA	EBITDA Multiples			Value at 12/31/24	Changes vs. Prior Year or Cost	
					Entry	12/31/2023	12/31/2024		In Value	%

The average EBITDA multiple for the unrealized portfolio at December 31, 2024 was 10.3x, unchanged from the prior year, and down 0.1x from the average entry multiple paid for the entire portfolio.

As discussed in the 14 unrealized portfolio company summaries that follow this paragraph, three companies have presented us with formidable, and humbling, challenges. Sentinel is no stranger to underperforming portfolio companies—over the past two decades, each of our prior funds was a top-quartile performer, yet contained no fewer than six unrealized markdowns during its hold period. Over the years, we have built a robust toolkit for fixing our underperformers, as discussed at our recent investor conference. All the same, it is disheartening when our full resources and efforts cannot save an investment, as has happened with American West and is a likely scenario for New Era, or we do not achieve the type of return we expected, as is the case for New You Bariatric. To our LPs, we extend our apologies for these disappointing results. We remain confident, however, that the Partnership will

¹ Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein.

² 12/31/24 values include trailing 12-month distributions received.

achieve solid equity returns, and you can count on us to continue aggressively working our challenged investments.

A brief discussion of the 14 unrealized portfolio companies follows.¹

AmWest. As previously reported, AmWest has significantly underperformed because of persistent dysfunction at the franchisor, Pizza Hut's inability to develop new menu items and implement effective marketing initiatives, and higher costs, notably, California's recent 25% minimum wage increase for fast food workers. Revenue in 2024 was \$251.7 million, down 11.0% from 2023, and EBITDA was \$10.6 million, down 42.6%. AmWest's weak topline performance is a result of decreased store traffic and a 11.5% same-store sales decline versus 2023. Despite management's heroic measures to cut costs by switching to outsourced delivery and reducing G&A, EBITDA fell more sharply than revenue due to fixed costs. AmWest's net debt to EBITDA was 8.7x as of December 31, 2024, up from 5.1x in 2023 because of lower EBITDA.

AmWest continues to face steep challenges in 2025, leaving little reason for optimism. Pizza Hut's sales initiatives to start the year have not resonated with customers, resulting in same-store sales declining 5.2% through the first four weeks. Given the challenges AmWest is experiencing, it can no longer meet its debt and royalty obligations, and we do not see an investment thesis to support the liquidity shortfall. As a result, AmWest's lender has exercised its right to take board control, and we are currently collaborating to facilitate a smooth transition. Accordingly, we expect this investment to face permanent impairment. As of December 31, 2024, Sentinel is placing zero value on its AmWest holdings, resulting in a gross/net multiple of cost of 0.0x/0.0x.

Bandon. As part of a planned leadership transition, in June 2024, Sentinel appointed Michael Abt as new CEO. The former head of Sentinel IV portfolio company Huddle House, he has deep multi-unit leadership experience. Bandon acquired four clubs for the year for an aggregate enterprise value of \$7.6 million, or a highly accretive 3.8x the clubs' combined \$2.0 million of EBITDA. The acquisitions were funded with cash on hand and incremental senior debt.

Bandon's financial performance in 2024 was below plan. Including a full year of ownership of all acquired clubs, revenue was \$121.6 million, up 2.8% from the prior year, and EBITDA was \$35.3 million, up 1.4% from the prior year. Price increases and acquired clubs drove top-line growth, partly offset by negative same-store sales, down 0.7% from the prior year, due to membership declines and lower personal training revenue. EBITDA growth lagged sales growth due to increased operating expenses. As of December 31, 2024, Bandon's total net debt to EBITDA was 4.7x, up from 4.6x the prior year. As of December 31, 2024, we are valuing Bandon based on the same 8.6x EBITDA multiple we paid for the business. After adjusting for net debt outstanding as of December 31, 2024, Sentinel is valuing the Partnership's holdings at \$124.9 million, for a gross/net multiple of cost of 1.0x/0.9x, down 2.3% from the prior year.

Bridgeview Eye. For Bridgeview, 2024 was another productive year in which it acquired four optometry practices and two surgical practices in Nebraska and Indiana. Bridgeview paid a total of \$16.2 million for the six add-ons, or a highly accretive 6.5x their adjusted EBITDA of \$2.5 million for the 12 months before closing, financing them with cash on hand and rollover equity from sellers. In

¹ Detailed reviews of each company appear in the portfolio writeup section of this report, beginning on page A-1.

December, to support future M&A, Bridgeview raised an incremental \$75.0 million senior delayed-draw term loan from existing lenders. Pro forma for the six add-ons, revenue for 2024 was \$176.7 million, up 0.2% from 2023, but EBITDA was \$28.1 million, down 6.9%. Solid performance in Bridgeview's base business in Indiana and Ohio drove the revenue increase. The EBITDA decline was attributable to underperformance in Oklahoma and upfront investment in SG&A. As of December 31, 2024, Bridgeview's net debt to EBITDA was 5.8x, up from 5.6x the prior year.

Bridgeview's organic growth and overall performance in 2024 were somewhat below plan. As of December 31, 2024, Sentinel is valuing Bridgeview at the same 11.7x EBITDA we paid for the business and unchanged from the prior year. After adjusting for net debt outstanding as of December 31, 2024, the value of the Partnership's holdings is \$101.3 million, for a gross/net multiple of cost of 1.0x/0.9x, down 1.3% from the prior year.

Catalyst MedTech. As previously reported, TTG Imaging Solutions, now known as Catalyst MedTech, has underperformed because of operational challenges. In response, the board replaced Catalyst's CEO, CFO, and COO in 2024. The reinvigorated leadership team, led by the CEO of the successful Digirad division and including a Sentinel operating partner, immediately developed and began executing a multistep turnaround plan. They terminated senior nonperformers and then focused on fixing persistent, unresolved issues. They restructured the field service organization, realigned equipment sourcing, redirected the go-to-market strategy, reduced headcount, fixed the ERP system, and outsourced Catalyst's noncore pharmacy division to a third party.

Despite Catalyst's difficulties, the company's top line remained resilient in 2024, with revenue of \$117.1 million for the 12 months ending December 31, 2024 down only 2.2% from 2023. However, the one-time costs of the turnaround suppressed EBITDA, which was \$9.6 million, down 17.6%. As described on page 4, in September 2024, the Partnership invested \$3.0 million in Catalyst as part of a debt amendment with lenders to waive certain covenant defaults and provide additional runway for executing the turnaround. As of December 31, 2024, net debt to EBITDA was 9.7x, up from 7.4x the prior year; net senior debt to EBITDA was 7.3x, up from 5.4x; and mezzanine debt to EBITDA was 2.4x, up from 1.9x.

Demand in Catalyst's end markets remains solid. With the most difficult aspects of the operational restructuring complete, we believe that Catalyst is now on a solid path to recovery. The January 2025 rebranding gives the refocused company a fresh identity. We continue to work closely with management and are encouraged by the progress made. As of December 31, 2024, Sentinel is valuing the equity at the same 11.9x EBITDA paid for the business, unchanged from the prior year-end. After adjusting for net debt outstanding as of December 31, 2024 and including accrued interest, this results in a total value for the Partnership's holdings of \$8.6 million, for a gross/net multiple of cost of 0.1x/0.1x, down 76.7% from 2023.

Empire Auto Parts. Empire continued its greenfield expansion in 2024, opening two distribution hubs and six satellites. Empire also hired a new CFO. For the year, Empire's revenue was \$261.6 million, up 16.8% from the prior year, while adjusted EBITDA declined by 4.8% to \$55.4 million. Revenue growth was driven by new location openings, new strategic MSO partnerships, and market share gains. However, these gains were partly offset by a decline in repairable claims due to rising repair costs and higher insurance premiums. EBITDA growth lagged revenue growth due to front-loaded investments in new regions and increased G&A infrastructure

spending. Pro forma revenue for the 12 months ended December 31, 2024 was \$342.8 million, with adjusted EBITDA of \$87.6 million. As of December 31, 2024, Empire's net debt to EBITDA was 5.6x, up from 4.9x the prior year due to the debt-financed greenfield expansion.

Overall, Empire delivered solid performance in 2024. As of December 31, 2024, Sentinel is valuing Empire at the same 11.2x EBITDA multiple we paid for the business, unchanged from year-end 2023. After adjusting for net debt outstanding and a normalized level of working capital as of December 31, 2024, the value of the Partnership's holdings is \$243.4 million, for a gross/net multiple of cost of 1.6x/1.4x. Including proceeds received through December 31, 2024, the value of the Partnership's holdings is therefore \$320.6 million, for a gross/net multiple of cost of 2.1x/1.9x, up 4.4% from the prior year.

New Era Technology. As reported in our previous letters and discussed in depth in the company writeup that begins on page A-39, New Era's financial performance has steadily deteriorated because of macroeconomic pressures and soft market demand to which former management responded with misguided cost cuts that made the problems much worse. For the 12 months ended December 31, 2024, revenue was \$846.0 million, down 9.6% from the prior year, and adjusted EBITDA was \$79.4 million, down 42.2%.

For the first three years of our ownership, New Era was a strong-performing, asset-light business with a comfortable leverage profile. However, New Era's EBITDA has now sunk to a level at which the company cannot sustain its debt load, which has grown substantially through 26 add-ons financed entirely with debt. Compounding the problem is that New Era's 26 debt-financed add-ons were predicated on realizing cost-saving synergies totaling \$35 million, most of which have been erased by two years of labor cost inflation. As of December 31, 2024, New Era's net debt to EBITDA was 12.2x, up from 6.5x the prior year.

We see little reason for optimism in the near term, despite our best efforts to execute a turnaround. As of December 31, 2024, we are placing zero value on the Partnership's equity, for a gross/net multiple of cost of 0.0x/0.0x.

In the first quarter of 2025, New Era breached certain debt covenants. Without an equity injection from Sentinel—an investment we cannot today justify given that the turnaround has not yet taken root—the lenders might not give us more time to work the problem. If they decide to take ownership, we would face a realized loss. We expect to know how the lenders will proceed in the next 45–60 days.

New You Bariatric Group. As covered in our previous reports, NYBG's performance has deteriorated sharply because of the explosive popularity of prescription weight loss drugs. A one-time reimbursement cut from a large payor compounded the problem. NYBG's 2024 performance fell significantly from 2023—surgeries dropped 16%; revenue fell 5.7% to \$111.8 million; and EBITDA plummeted 48.4% to \$12.3 million. EBITDA fell more sharply than revenue due to NYBG's inability to cut essential fixed costs, partly offset by solid progress at newly opened high-margin ambulatory surgery centers. As discussed on page 4, in April, the Partnership invested another \$5.0 million in NYBG as part of a debt amendment. As of December 31, 2024, NYBG's net debt to EBITDA had risen to 18.0x from 7.2x the prior year.

NYBG continues to face significant challenges that materially affect its prospects. At present, we do not see a path to recovering our remaining unrealized equity investment. However, we are optimistic that a portion of the Partnership's recent pari passu debt investment will be recovered. As of December 31, 2024, Sentinel is placing zero value on its equity holdings. For the debt, we are using the same 8.4x EBITDA we paid for the business, unchanged from the prior year, which values our senior debt holdings at 52.6% of cost, or \$2.6 million. Including \$59.3 million of proceeds received through 2024, the total value of the Partnership's holdings is therefore \$61.9 million, for a gross/net multiple of cost of 0.9x/0.8x, down 29.9% from the prior year.

NSI Industries. NSI performed as anticipated between the November 2024 closing and year-end. For the 12 months ended December 31, 2024, revenue was \$682.2 million, up 4.3% over the same prior-year period, and EBITDA was \$158.0 million, up 8.0%. As of December 31, 2024, NSI's total net debt to EBITDA was 5.4x, down from 5.7x at closing. Sentinel is valuing NSI at the same 9.9x EBITDA multiple that we paid for the business. After adjusting for net debt outstanding at year-end, we are valuing the Partnership's holdings as of December 31, 2024 at \$76.7 million, up 2.3% from the closing.

The Recreational Group. In 2024, RecGroup continued its M&A program, acquiring a turf and playground surfacing installer with annual EBITDA of \$4.0 million and financing the add-on with senior debt. RecGroup's financial performance in 2024 was below plan. Pro forma revenue was \$326.6 million, up 0.2% from 2023, but EBITDA was \$55.6 million, down 14.7%. Revenue grew because of the Perfect Turf add-on and declined organically because of soft demand in the retail division. Organic EBITDA declines were steeper because of selective price concessions at stores and higher operating expenses from new store buildouts. Looking ahead, we are cautiously optimistic RecGroup will stabilize its revenue trajectory. Despite continued softness in retail sales, demand across the rest of the business remains solid, with the year-end backlog up 21.9% over 2023. As of December 31, 2024, RecGroup's net debt to EBITDA was 6.3x, up from 5.5x the prior year.

As of December 31, 2024, Sentinel is valuing RecGroup at the same 11.5x multiple paid for the business, unchanged from the prior year. After adjusting for net debt outstanding and a normalized level of working capital as of December 31, 2024, this valuation equals \$158.2 million, for a gross/net multiple of cost of 1.0x/0.9x, down 33.6% from the prior year.

RefrigiWear. In 2024, RefrigiWear made excellent progress with its acquisition strategy. It completed one add-on in the United States and two in Europe that fortify the company's global leadership in the B2B Food market. RefrigiWear paid \$46.2 million, or a highly accretive 8.1x the combined add-ons' 12-month EBITDA of \$5.7 million, financing them with debt, balance sheet cash, and rollover equity.

RefrigiWear's organic growth was below plan in 2024. Revenue was impacted by industrywide headwinds in the United States as throughput at major cold storage companies declined, reducing demand for protective clothing. Pro forma for the full-year impact of the three add-ons, revenue was \$107.4 million, down 4.0% from the prior year, and adjusted EBITDA was \$25.8 million, down 12.2%. As of December 31, 2024, RefrigiWear's net debt to EBITDA was 5.2x, up from 4.5x the prior year. Entering 2025, RefrigiWear is off to a good start on the M&A front, having made two more acquisitions in Germany and the UK.

As of December 31, 2024, Sentinel is valuing RefrigiWear at 11.5x EBITDA, down from 12.5x the prior year-end and below the 12.9x entry multiple. After we adjust for net debt outstanding as of December 31, 2024, the value of the Partnership's holdings is \$112.0 million, for a gross/net multiple of cost of 1.1x/1.0x, down 16.1% from the prior year.

SmartSign. For SmartSign, 2024 was a transition year. In response to the largely self-inflicted challenges of 2023, SmartSign replaced its CEO with Sentinel operating partner Chris McClain, who had been serving on the board, as permanent CEO. Under Chris's leadership, SmartSign has rebuilt its management team, adding a new CFO, COO, Chief Growth Officer, Chief of Staff, and President of FenceScreen.

Performance for 2024 fell short of plan but stabilized under new leadership in the second half of the year. For the full year, revenue declined 3.0% to \$167.6 million, and EBITDA fell 10.6% to \$34.5 million. The revenue decrease was driven by lower order volumes, and the larger EBITDA decline stemmed from operational issues at one plant. Looking ahead, we are optimistic about SmartSign's prospects. With new leadership in place, the business is making meaningful improvements in overall execution and is well positioned to execute an accretive acquisition strategy, with one currently under LOI.

As of December 31, 2024, SmartSign's total net debt to EBITDA was 6.4x, up from 6.2x the prior year. Sentinel is valuing SmartSign at the same 11.9x EBITDA multiple paid for the business and unchanged from the prior year. After we adjust for net debt outstanding as of December 31, 2024, the value of the Partnership's holdings is \$125.4 million, for a gross/net multiple of cost of 0.8x/0.7x, down 19.0% from the prior year.

Spectrum Safety Solutions. Spectrum performed well following the July 2024 closing. For the six months through year-end, revenue was up 2.4% and EBITDA was up 2.0% over the comparable prior-year period. For the full year, pro forma revenue was \$579.5 million, up 5.9% over 2023, and pro forma EBITDA was \$128.3 million, up 4.8%. Autronica and Marioff experienced double-digit revenue gains, and EBITDA growth was propelled by higher operating leverage. As of December 31, 2024, Spectrum's net debt to EBITDA was 5.4x, down from 5.8x at closing. Because the transaction closed so recently, we are carrying the investment at cost, or \$190.0 million as of December 31, 2024. After adjusting for net debt outstanding as of December 31, 2024, this results in an 11.3x EBITDA multiple, up from 11.1x at closing because of transaction costs.

SPL. In 2024, SPL made solid progress building its environmental lab segment, acquiring two lab testing businesses that together generated \$16.9 million of revenue in the 12 months pre-closing and \$2.2 million of adjusted EBITDA. The \$14.5 million combined purchase price represents an accretive 6.6x EBITDA multiple and was financed with cash on hand and senior debt from existing lenders. Pro forma for the full-year impact of the two add-ons, revenue was \$143.4 million, down 1.3% from 2023, and EBITDA was \$36.1 million, down 12.5%. Management had planned for soft sales because of SPL's strategic initiative to deprioritize elements of the metrology segment, but unplanned losses of metrology customers driven by unexpected employee turnover and slow responses to competitive pricing resulted in larger declines than expected. Wage inflation exacerbated the EBITDA decline. As of December 31, 2024, total net debt to EBITDA was 5.3x, up from 4.3x the prior year.

At the outset, we planned a CEO succession. With SPL's largely self-inflicted underperformance in 2024, we accelerated our timeline. In March 2025, SPL appointed as new CEO Colin Duncan, a seasoned executive with nearly 20 years of experience leading technical services companies.

Despite SPL's disappointing overall performance in 2024, our outlook is optimistic. The worst of the self-inflicted problems are behind and with new, energized leadership in place, SPL can capitalize on its robust environmental lab acquisition pipeline and continue building operational scale and efficiency. As of December 31, 2024, Sentinel is valuing SPL at the same 8.6x EBITDA we paid for the business, unchanged from the prior year. After adjusting for net debt outstanding as of December 31, 2024, we are valuing the Partnership's holdings at \$101.8 million, for a gross/net multiple of cost of 1.2x/1.1x, down 31.4% from the prior year.

TriMech. In 2024, TriMech acquired two companies with combined revenue of \$8.6 million and adjusted EBITDA of \$2.2 million for a total price of \$11.9 million, or an accretive 5.4x EBITDA. TriMech financed the add-ons with cash on hand and existing revolver capacity.

TriMech's organic growth in 2024 was below plan. Pro forma revenue was \$345.8 million, up 3.0% from 2023, but EBITDA was \$64.4 million, down 0.5%. Revenue growth was partly offset by the continued shift from perpetual to lower-priced term licenses that we expected. TriMech's EBITDA decline was the result of higher operating expenses and the residual impact of the SolidWorks channel changes in 2023. As of December 31, 2024, total net debt to EBITDA was 5.8x, up from 5.7x the prior year. As of December 31, 2024, Sentinel is valuing TriMech at the same 11.2x EBITDA we paid for the combined U.S. and U.K. platforms, unchanged from the prior year. After adjusting for net debt outstanding as of December 31, 2024, the value of the Partnership's holdings is \$177.9 million, for a gross/net multiple of cost of 1.1x/1.0x, down 0.8% from the prior year.

As of year-end, the average holding period for the 14 unrealized companies was approximately 3.0 years. The values of each portfolio company and the performance of the total portfolio as of December 31, 2024 are highlighted in the table on the following page.

Portfolio Company Valuations¹
December 31, 2024
(\$000s)

Company	Initial Investment Date	Partnership Investment	Cash Realized	Unrealized Value	Total Value	Gross / Net Multiple of Investment	Gross IRR	Net IRR Levered/Unlevered
Realized Portfolio								
ECM Industries	Dec-19	\$141,000	\$530,070	\$1,946	\$532,016	3.8x / 3.4x	57.3%	41.6% / 39.0%

New You Bariatric Group	Aug-19	66,800	59,277	2,628	61,905	0.9x / 0.8x	(3.0%)	(2.2%) / (2.1%)
NSI Industries	Nov-24	75,000		76,697	76,697	1.0x / 0.9x	9.4%	6.8% / 6.4%
Recreational Group, The	Oct-21	157,500		158,160	158,160	1.0x / 0.9x	0.1%	0.1% / 0.1%
RefrigiWear	Nov-21	100,000		112,062	112,062	1.1x / 1.0x	3.9%	2.8% / 2.6%
SmartSign	Sep-22	162,857		125,367	125,367	0.8x / 0.7x	(11.2%)	(8.1%) / (7.6%)
Spectrum Safety Solutions	Jul-24	190,000		190,000	190,000	1.0x / 0.9x	0.0%	0.0% / 0.0%
SPL	Apr-22	85,000		101,753	101,753	1.2x / 1.1x	7.5%	5.4% / 5.1%
TriMech	Mar-22	167,123		177,946	177,946	1.1x / 1.0x	2.3%	1.7% / 1.6%
Subtotal		\$1,712,024	\$136,494	\$1,422,713	\$1,559,207	0.9x / 0.8x	(3.8%)	(2.7%) / (2.6%)
Total		\$2,130,010	\$1,568,919	\$1,426,540	\$2,995,459	1.4x / 1.3x	17.0%	12.3% / 11.6%
Average EBITDA Purchase Multiple = 10.1x					Average Investment Size = \$107.5 million			
Average Enterprise Value = \$311.9 million					Average Hold Period = 3.0 years			

During the Partnership's investment period to date, the average EBITDA purchase multiple for businesses in the midmarket has been 10.5x.² Consistent with our value-oriented strategy, the average EBITDA multiple we paid for the 18 portfolio companies was 10.1x.

High-Level Overview of Portfolio Company Operating Metrics

In 2024, the Partnership's 14 unrealized portfolio companies collectively saw modest revenue declines and lower overall margins. The main contributors to the soft performance were the specific difficulties facing New Era and the ongoing challenges from prescription weight-loss drugs at NYBG, each covered in this and prior reports. For 2024, revenue for these two companies declined \$97.2 million, or 9.2%, and EBITDA declined \$72.1 million, or 44.4%. For the other 12 companies, residual cost pressures from inflation and labor shortages coupled with a limited ability to raise prices suppressed margins—their

¹ Past performance is not necessarily indicative of future results. Returns show unrealized valuations. The actual realized return of such unrealized investment may differ materially from the returns indicated herein. Please see "Important Information" at the front of this report for more information on calculation methodologies for net returns.

² Source: Robert W. Baird & Co., January 2025.

combined revenue was \$3.4 billion, up 2.2% over 2023, and EBITDA was \$667.2 million, down 4.0%. The table below summarizes the aggregate financial performance of all 14 companies.

14-Company Portfolio Income Statement
(\$ in millions)

	12 Months Ending December 31,			
	2023	2024	Change	
			\$	%
Revenue	\$4,344.5	\$4,239.2	(\$105.3)	(2.4%)
EBITDA	\$857.6	\$757.4	(\$100.2)	(11.7%)
EBITDA Margin	19.7%	17.9%		
Capital Expenditures	\$73.4	\$72.9	(\$0.5)	(0.7%)
CAPEX as % Revenue	1.7%	1.7%		

For the 14-company portfolio, net tangible assets employed as of December 31, 2024 were \$925.7 million. These assets produced \$757.4 million of EBITDA, for a strong 81.2% return on net tangible invested capital and a healthy 17.9% EBITDA margin. The table above shows that capital expenditures in 2024 were just 1.7% of sales. These metrics highlight an essential element of our investment strategy—to target high-operating-margin, asset-light companies that produce strong returns on net tangible invested capital. We seek non-capital-intensive businesses that convert the vast majority of EBITDA to cash, which provides greater flexibility to fund growth and repay debt.

In the average 2.9 years we have held the 14 companies, total debt is up \$1.5 billion. The \$1.5 billion debt increase results from (i) 90 add-on acquisitions that incurred \$1.4 billion of new debt, (ii) dividend recaps at Empire Auto and New You Bariatric that incurred \$171.9 million of new debt, and (iii) \$40.8 million of negative cash flow, offset by (iv) \$136.2 million of preferred equity raised by New Era. The chart below highlights the changes in debt since the closings of the 14 platform investments.

14-Company Portfolio Change in Net Debt

During our ownership, aggregate EBITDA for the portfolio has increased by \$157.7 million, up 1.3x since the original closings. At year-end, the portfolio's net debt to EBITDA was 6.5x, up from 5.7x at the closings of the investments. Net debt to EBITDA for New Era and NYBG—the companies largely responsible for the portfolio's 2024 revenue and EBITDA declines—was disproportionately high at 12.9x; for the other 12 companies, the ratio is 5.7x, which we consider manageable. The table on the following page summarizes key portfolio-level EBITDA and leverage metrics at the end of 2024.

Portfolio EBITDA and Leverage Trends

	At Closing	At 12/31/2024	Change	
			\$ / x	%
EBITDA (\$ millions)	\$599.7	\$757.4	\$157.7	26.3%
Net Debt to EBITDA	5.7x	6.5x	0.8x	14.3%

Firmwide Deal Flow Metrics

Across Sentinel’s family of funds, 2024 was a productive year, with four new investments—one more than the prior year. We also closed 36 portfolio company add-ons at a highly accretive 7.3x blended EBITDA multiple.

We source investment opportunities from nearly 200 deal sources, including bulge-bracket and midmarket investment banks, Fortune 500 corporate development executives, business brokers, independent sponsors, accountants, and lawyers. Covering this broad network and its several thousand professionals requires consistency, close management, and a disciplined process, which our four-person business development team efficiently executes.

One of our new platform investments came from a top 10 relationship, highlighting the strong return on time invested in these relationships. Preferred access and compelling insights from the top 10 provide Sentinel with a distinct competitive edge. The other three platforms were sourced from two midmarket investment banks and one bulge-bracket firm, reflecting the breadth of our coverage. Our team’s long-term relationship-building with bankers at these firms played a critical role in securing these deals.

The deal flow environment in 2024 improved slightly over 2023. M&A activity was strong in the first half, a carryover of late 2023’s momentum, though deal quality varied. In the second half, deal volume declined due to mixed economic conditions and a wait-and-see approach to the U.S. election. The table below highlights key deal flow metrics.

Deal Flow Metrics: Sentinel vs. Industry (Enterprise Value \$100–1,000 Million)

	2023	2024	% Change
N.A. M&A Deal Volume ¹	3,408	3,513	3.1%
Sentinel Deal Flow ²	471	485	3.0%
# Sentinel Deals Closed			
– Platforms	3	4	33.3%
– Add-ons	34	36	5.9%

Despite ongoing macroeconomic challenges and tariff uncertainty, overall M&A conditions have modestly improved. With unsold private equity businesses at record levels and institutional investors needing liquidity, we expect more sellers to seek exits this year. Notably, all of our top 10 intermediaries report higher sellside backlogs in early 2025 than a year ago.

With substantial liquidity and a deep team efficiently assessing and executing private equity and structured capital opportunities, Sentinel is well positioned to play offense in 2025.

¹ Source: Pitchbook’s Q4 2024 Global M&A Report.

² Sentinel deal flow includes only companies with more than \$15 million of EBITDA.

Sustainability and Responsibility Initiatives¹

Sustainability and responsibility (S&R) have long shaped Sentinel's business practices, and we continue to institutionalize these principles across our platform. In 2024, we partnered with Malk Partners, a consultant advising over 150 private equity and multi-strategy firms on S&R. Malk supported our analysis of 2023 data for 22 portfolio companies, including Scope 1 and 2 GHG emissions for 14 companies, providing insights into company-specific performance and portfolio-wide trends.

S&R factors also play a critical role in our investment process. All new platform investments in 2024 met our comprehensive S&R checklist. Internally, our third annual carbon footprint assessment included Scope 3 emissions for the first time, and we began tracking printing consumption to identify opportunities for further improvement.

We believe that fostering an inclusive workplace inside Sentinel starts with listening to our team. Based on feedback from our second annual employee engagement survey, we refined business practices and expanded our mentorship program to include our newest associate class. All employees have access to our inclusivity tools, workshops, and resources.

Employee well-being and personal wealth creation remain core to our S&R strategy. In 2024, we partnered with Ownership Works to begin implementing employee equity incentive programs into our portfolio companies, thereby empowering all employees to share in the rewards of their company's success.

For 2025, we are collaborating with Malk to collect 2024 S&R data from portfolio companies. In January, nearly 1,400 employees at new portfolio company Spectrum Safety Solutions participated in the rollout of a broad-based equity incentive program. And in February, we launched a women's affinity group at Sentinel to foster connection and support.

Exploring AI

While AI's impact on private equity is still unfolding, it's too important to ignore. That's why we've assembled a 25-person due diligence team—our largest ever—spanning every functional area of our firm, including deal professionals, business development, finance, tax, legal and compliance, investor relations, and debt capital markets.

Our goal is simple: to explore how AI can help us to work better, faster, and smarter, and to find practical ways to integrate it into everything we do. We're also looking at how AI can strengthen our engagement with portfolio companies.

This is just the beginning, but rest assured, AI will enhance—not replace—our human capabilities. Our greatest strength will always be our people.

Organizational Update

In 2024, Sentinel welcomed five operating partners, its first credit strategies professional, an assistant controller, a tax manager, a vice president of legal and compliance, a senior associate of investor

¹ Sustainability and responsibility goals are aspirational and not guarantees or promises of meeting such goals, and distinctions and regional variations exist in the meaning and use of these terms. There is no guarantee that any investment or company will have or create a positive sustainability and responsibility impact or that any Sentinel sustainability and responsibility consideration will ultimately align with Sentinel's or any investor's goals. Please refer to "Important Information" at the front of this report for further information.

relations, and five pre-MBA investment associates. Associates Adam Jacobs, Greg Markovitz, Conor Murphy, and Carter Thompson were promoted to senior associate; senior associates Haley Abate and Grant Wilson were promoted to vice president; vice presidents Cam Smith, Erika Stanford, and Tyler Lowenstein were promoted to principal; and principal Pat Knise was promoted to managing director. Operating partner Chris McClain became the fulltime CEO of SmartSign, a Sentinel VI portfolio company. Rachel Cantor, recently promoted to director, now heads our sustainability and responsibility efforts, and Lauren Rakower has returned her full attention to legal matters. Assistant controller James Lypen, associates Alan Bliss and Grant Dalton, vice president James Frier, and principals Marc Buan and Jon Gurss left Sentinel to pursue other opportunities. Profiles of our new colleagues follow.

James Darby joined as an Operating Partner. He has worked closely with Sentinel since 2013, first through Sentinel's investment in Power Products, where he served as Vice President of Operations, and most recently through Sentinel portfolio company ECM Industries, where he was COO. Before Power Products, Darby held various operational leadership roles in Actuant's Electrical segment and spent seven years at Newell Brands. He received a BA from the University of Wisconsin, where he played on their NCAA football team.

Spencer Houlihan joined as Operating Partner, Finance. He has worked closely with Sentinel since 2015, when Sentinel acquired Fazoli's, where Spencer was most recently CFO and treasurer. Before Fazoli's, he was Director of Finance at University of Kentucky Healthcare. He began his career at Lexmark International, where he held various financial leadership roles. Spencer holds a BS in business management and an MBA in corporate finance from the University of Kentucky.

Mike Masino joined as an Operating Partner. He has more than 30 years of experience in the electrical industry and has worked closely with Sentinel since 2014 in two highly successful investments, first through Sentinel's investment in Power Products, where Mike was division president, and most recently through Sentinel portfolio company ECM Industries, where he was CEO. Before Power Products, Mike was with Actuant Corporation, parent of Power Products, in various leadership roles. He holds a BA from Elmhurst University, where he was a member of the men's basketball team.

Jim Mauck joined as an Operating Partner. He has more than 36 years of experience in information technology and has worked with Sentinel since 2013 through Sentinel's investments in Power Products and ECM Industries, where he was Vice President of Information Technology. Previously, Jim was IT Director of Actown Electrocoil and in IT leadership roles at Actuant following Actuant's acquisition of Actown.

Matt Walter joined as an Operating Partner. He has more than 20 years of experience in the electrical industry and has worked closely with Sentinel since 2013, first through Sentinel's investment in Power Products, where Matt was most recently VP of Finance, and later through ECM Industries, where he was CFO. Before Power Products, Matt worked in public accounting at Deloitte. He holds a BS in accountancy from University of Wisconsin-La Crosse.

Justin Augustine joined as Tax Manager. Previously, he was a tax manager at Insight Partners, and before that, a tax supervisor at RSM in its investment fund practice. Justin is a CPA and holds a BS in accounting from Binghamton University.

Callum Cusinato joined as an Associate from Moelis's Investment Banking Analyst Program, where he spent two years. Previously, he was an analyst at Stifel Nicolaus. Callum holds a BS in mathematics and economics, summa cum laude, from St. Lawrence University, where he was captain of St. Lawrence's ECAC Hockey Championship team in 2021.

George Estrada joined as an Associate from Piper Sandler's Investment Banking Analyst Program, where he spent two years. He holds a BA in politics, summa cum laude, from the University of Richmond.

Michael Gebicki joined as Managing Director, Credit Strategies. From 2003 until joining Sentinel, Mike was a managing director in the Leveraged Acquisition Finance group of Bank of Ireland, where he originated senior debt transactions with middle market private equity clients. For many years, Bank of Ireland has been an important Sentinel lending partner, and Mike had primary responsibility for the Sentinel relationship. Previously, he spent five years in the Technology, Media & Telecom group at JPMorgan, most recently as a vice president. Mike holds a BBA in economics and finance from the University of Notre Dame and an MBA from New York University's Stern School of Business.

Alexandra Ladley joined as Senior Associate, Investor Relations. Previously, she spent three years at Avenue Capital Group, most recently as a senior associate with a focus on investor relations and fundraising; before that, she was an analyst at Global Endowment Management. Allie holds a BBA in finance from Southern Methodist University.

Elvira Lee joined as an Assistant Controller. Previously, she was a director at Blackstone and, before that, a senior manager at EY in its assurance practice. Elvira holds a BA in Chinese literature and BS in accounting from National Taipei University in Taiwan and master's degrees in accounting and finance from the University of Illinois at Urbana-Champaign. She is also a CPA.

Devon Lis joined as an Associate from Citigroup's Investment Banking Analyst Program, where she spent two years. She holds a BS in business administration from Georgetown University, where she was a member of the varsity women's soccer team.

Elizabeth Nichols joined as an Associate from William Blair's Investment Banking Program, where she spent three years. She holds a BA in applied mathematics and business, cum laude, from the University of Notre Dame.

Will Nicklaus joined as an Associate from BlackArch Partners' Investment Banking Analyst Program, where he spent two years. He holds a BS in business administration from the University of North Carolina at Chapel Hill, where he was a member of the varsity men's lacrosse team.

Arielle Padover joined as Vice President, Legal & Compliance. Previously, she spent five years at Willkie Farr & Gallagher as an associate in the Corporate and Financial Services group, representing clients in general corporate and securities law matters, including debt and equity offerings and corporate governance compliance. Arielle holds a JD from Cornell Law School and a BS in management, cum laude, from Tulane University. She is also a member of the New York Bar.

Today, our professional and administrative staff stands at 96, as shown in the table on the next page.

News Highlights from Other Sentinel Funds³

Today, Sentinel has fully realized four flagship equity funds and actively manages three successor funds and three affiliated-fund strategies. The fully realized funds are Sentinel I (1995 vintage), Sentinel II (1998 vintage), Sentinel III (2005 vintage), and Sentinel IV (2009 vintage). Highlights of our six active funds include:

Sentinel V (2014 vintage) is in its harvest phase, has exited 17 of its 21 investments that together have produced a 2.5x/2.1x gross/net multiple of cost, and has generated a gross IRR of 28.3%, a net levered/unlevered IRR of 22.5%/22.0%, a DPI of 1.9x, and a TVPI of 2.1x.

Sentinel VII (2023 vintage), our newest equity fund, is off to a good start with eight platform investments. Last year's unusually large deployment put us somewhat ahead of schedule, but with nearly 60% of the fund's capital still available, plenty of work remains. Sentinel VII is well positioned to pursue new investment opportunities.

Sentinel Junior Capital I (2018 vintage) has completed its primary investment phase and has realized or substantially realized 12 of its 23 investments. With a DPI of 0.8x, a gross IRR of 16.7%, and a net levered/unlevered IRR of 14.4%/13.1%, our inaugural structured capital solutions fund is exceeding expectations.

Sentinel Junior Capital II (2023 vintage), our sophomore structured capital solutions fund, is making good progress. With 14 investments under its belt, this fund has deployed 46.9% of its capital is ideally situated to pursue investment opportunities for companies seeking flexible and creative mid-balance-sheet capital solutions.

Sentinel Continuation Fund I (2021 vintage) has deployed 19.2% of its capital in four investments. This fund's deployment pace has been much slower than anticipated because of the industrywide slowdown in private equity exits, which is holding a lid on the available investment opportunities.

And as discussed in this letter, Sentinel VI (2019 vintage) completed its primary investment phase in 2024 with the closing of its 18th platform investment. Sentinel VI has exited four platform investments that together have produced a 3.4x/3.0x gross/net multiple of cost, a gross IRR of 51.2%, and a net levered/unlevered IRR of 37.2%/34.9%. As of the end of 2024, Sentinel VI had generated a 1.4x/1.3x gross/net multiple of cost, a 0.6x DPI, a 17.0% gross IRR, and a 12.3%/11.6% net levered/unlevered IRR.

¹ These individuals are not Sentinel employees.

² Five of the 10 operating partners are not Sentinel employees.

³ Full records for the funds referenced in this section are available on request.

And with respect to our investments facing challenges, you can count on us to continue aggressively working them.

For David, serving as Sentinel's founding managing partner for the past three decades has been an extraordinary experience and privilege. He still wakes up every day excited to work alongside our incredible team and feels fortunate to have helped build a firm with such a deep, experienced, dedicated, and talented group of professionals.

In the coming years, Eric, John, David, and our seven tenured partners will work together closely as Eric transitions to an expanded leadership role. The same core leadership team that successfully navigated the Great Financial Crisis and Covid will apply valuable lessons from those experiences as they steer Sentinel through the current volatility.

Along the way, we will continue to protect and enhance Sentinel's collaborative culture and disciplined investment approach, while also embracing new ideas, like AI. But our values will remain the foundation of everything we do.

Respectfully yours,

David S. Lobel

- Information we receive from you in subscription agreements, investor questionnaires, applications or other forms or in other communications (including without limitation, any anti-money laundering, identification, and verification documentation); and
- Information about your transactions with us.

We do not disclose any non-public personal information about you to anyone, except (i) as may be permitted by law or regulation (ii) affiliates and service providers, including but not limited to administrators, lenders, banks, auditors, law firms, consultants, and placement agents, or (iii) pursuant to legal process or to governmental agencies or self-regulatory organizations.

We maintain non-public personal information of our former investors and apply the same policies that apply to current investors. We employ physical, electronic and procedural safeguards to protect your non-public personal information in our possession or under our control.

We reserve the right to change our privacy policies and this Privacy Notice at any time. The examples contained within this notice are illustrations only and are not intended to be exclusive. This notice complies with the privacy provisions of the Gramm-Leach-Bliley Act and certain privacy provisions of other laws. You may have additional rights under other United States or non-United States laws that apply to you, including as set forth in our additional privacy notices.

¹ This Privacy Notice is intended only for individuals and certain entities that are essentially “alter egos” of individuals (e.g., revocable grantor trusts, IRAs, or certain estate planning vehicles).

Investment Policy Statement

SENTINEL CAPITAL PARTNERS VI, L.P.
SENTINEL CAPITAL PARTNERS VI-A, L.P.
SENTINEL CAPITAL INVESTORS VI, L.P.

Effective January 1, 2013, the general partners of the private funds (the “Funds”) advised by Sentinel Capital Partners, L.L.C. and/or its advisory affiliates (together, “Sentinel”) adopted an Investment Policy Statement (the “Policy Statement”) with respect to each of the Funds. The Policy Statement was adopted to clarify each Fund’s regulatory status as a “private equity fund,” and not a “hedge fund,” for purposes of the Form PF that is filed by Sentinel under Rule 204(b)-1 of the Investment Advisers Act of 1940, as amended.

The Policy Statement provides that the Funds may not (a) incur indebtedness (including guarantees of portfolio company borrowings), if the aggregate amount of such indebtedness of the Fund is greater than 50% of the Fund’s net asset value plus unfunded commitments, (b) incur Fund-level gross notional exposure (e.g., through derivative instruments) greater than 200% of the Fund’s net asset value plus unfunded commitments or (c) sell securities or other assets short or enter into similar transactions (other than for limited purposes of hedging currency exposure or managing duration).

The Policy Statement and the restrictions set forth therein may be modified by Sentinel at any time, but only to the extent consistent with a Fund’s governing documents.
