FUND OUTLOOK

Seed Fund II is a 2021 vintage fund that was invested too quickly but we have several early winners emerging including **Probo**, **WATI**, **Absolute**, **Attentive.ai** and **SriMandir**. Over 40% of the investments in this fund were made into software companies at pre-launch or very early stages. It has taken time for these software companies to get to product-market fit (PMF) and now we have some promising companies emerging (including **TrueFoundry** and **Checkbox**) that have early PMF and are in large markets. We had early liquidity from this fund, most of which we are recycling into our promising companies and some new investments. Most companies in this Fund are very early and we expect more winners to emerge over time. There is a lot of work ahead to make this fund successful and we are strongly committed to it.
