Financial Statements of Fidelity Evergreen Private Credit Master Fund LP (Master Fund)	

To the General Partner of Fidelity Evergreen Private Credit Offshore Fund LP:

Opinion

We have audited the financial statements of Fidelity Evergreen Private Credit Offshore Fund LP (the "Offshore Fund"), which comprise the statement of assets, liabilities and partners' capital as of December 31, 2024, and the related statements of operations, changes in partners' capital, cash flows, and the financial highlights for the period from April 26, 2024 (commencement of operations) through December 31, 2024, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Offshore Fund as of December 31, 2024, and the results of its operations, changes in its partners' capital, its cash flows, and financial highlights for the period from April 26, 2024 (commencement of operations) through December 31, 2024 in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Offshore Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Offshore Fund's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Offshore Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Offshore Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Financial Statements

Financial Highlights

For the period April 26,
2024 (commencement of
operations) through
December 31, 2024

Total return^{A,B}:

Total return before performance fees	10.18 %
Performance fees	(1.33)%
Total return after performance fees	8.85 %

Ratios to average Limited Partners' Capital^{C,D}:

Net investment income (loss) ^E	13.05 %
Expenses, before reductions, interest expense and performance fees	5.11 %
Expense reductions	(3.16)%
Interest expense	14.26 %
Performance fees	1.26 %
Expenses, after reductions, interest expense and performance fees	17.47 %

^A The computation of the total return (TR) and ratios for an individual Limited Partner may vary from the TR and ratios presented above due to the timing of capital transactions and differences in management fees and performance fees between Limited Partners.

^B Not annualized

^C Average Limited Partners' Capital for the period ended December 31, 2024 was calculated based on the weighted average at the end of each valuation period of the Limited Partners' Capital which includes any capital contributions or distributions during the period as well as the allocation of net increase (decrease) in Limited Partners' Capital for the period.

^D Net investment income (loss) and expense ratios have been annualized except for non-recurring professional fees, organization costs, offering costs, performance fees and expense reductions.

^E Does not include performance fees, if any.

The accompanying notes are an integral part of these financial statements and should be read in conjunction with the attached consolidated financial statements of Fidelity Evergreen Private Credit Master Fund LP.

Fidelity Evergreen Private Credit Offshore Fund LP

Notes to Financial Statements

For the period April 26, 2024 (commencement of operations) through December 31, 2024

1. Organization:

Fidelity Evergreen Private Credit Offshore Fund LP (Offshore Fund) is organized as an Exempted Limited Partnership under the laws of the Cayman Islands. The Offshore Fund was formed pursuant to the Exempted Limited Partnership Act of the Cayman Islands by filing the Certificate of Exempt Limited Partnership on June 20, 2023 and commenced operations on April 26, 2024. Capitalized terms referred to herein have the meanings set forth in the Offshore Fund's Limited Partnership Agreement, as amended (Agreement). Fidelity Evergreen Private Credit Master Offshore Fund GP LLC, a Delaware limited liability company, is the general partner of the Offshore Fund (General Partner). The Offshore Fund has entered into an Investment Management Agreement with Fidelity Diversifying Solutions LLC, (Investment Manager), a Delaware limited liability company. The Investment Manager is registered with the U.S. Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940.

The investment objective of the Offshore Fund is available upon request.

The Offshore Fund invests substantially all of its investable assets in Fidelity Evergreen Private Credit Master Fund LP (Master Fund), a Delaware limited partnership, which has the same investment objective as the Offshore Fund.

As of December 31, 2024, the Offshore Fund owned approximately 100% of the Master Fund. The performance of the Offshore Fund is directly affected by the performance of the Master Fund. The consolidated financial statements of the Master Fund, including its Consolidated Condensed Schedule of Investments, are attached hereto, and should be read in conjunction with the Offshore Fund's financial statements.

The Offshore Fund does not have a fixed termination date and is expected to continue in existence indefinitely. The Offshore Fund may be terminated in accordance with the terms of the Agreement.

2. Significant Accounting Policies:

The Offshore Fund is an investment company and applies the accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 946 *Financial Services – Investment Companies* (ASC 946). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. All balances are expressed in United States dollars, the Offshore Fund's functional currency. The following summarizes the significant accounting policies of the Offshore Fund:

Investment in the Master Fund and Related Income, Expenses, Gains and Losses. The Offshore Fund's investment in the Master Fund is carried at fair value based upon the Offshore Fund's proportionate interest in the Partners' Capital of the Master Fund. Valuation of investments held by the Master Fund, including, but not limited to the valuation techniques used and classification within the fair value hierarchy of investments held by the Master Fund, are discussed in the notes of the attached consolidated financial statements of the Master Fund. The investment in the Master Fund, as an investment measured using the net asset value (NAV) as a practical expedient, is excluded from the requirement to be categorized within the fair value hierarchy.

The fair value of the Offshore Fund's investment in the Master Fund is \$77,617,867, approximately 100% of the Offshore Fund's Partners' Capital. Investment transactions, including contributions to and distributions from the Master Fund, are accounted for on a trade date basis.

The Offshore Fund records its proportionate share of the Master Fund's income, expenses, and realized and unrealized appreciation (depreciation). Expenses are recorded on the accrual basis on the Master Fund and are either pro-rata or directly allocated to the Offshore Fund. Income, expense and gain (loss) items, if any, from activities conducted directly by the Offshore Fund specifically are accounted for on an accrual basis. The Master Fund shall bear its own expenses as described in the notes to the attached Master Fund's consolidated financial statements.

Expenses. Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate and adjustments are made when actual amounts are known.

Organization Costs. Organization costs include, among other things, the cost of incorporating the Offshore Fund and the cost of legal services and other fees pertaining to the Offshore Fund's organization. These costs are expensed as incurred. The Offshore Fund is responsible for all costs and expenses incurred in connection with the Offshore Fund's organization as defined in the Agreement.

Offering Costs. The Offshore Fund's offering costs include, among other things, legal fees, registration fees and other costs relating to the Offshore Fund's offering of partnership interests and associated marketing materials. Offering costs are recorded as deferred offering costs on the Statement of Assets, Liabilities and Partners' Capital and amortized to expense on the Statement of Operations on a straight line-basis over 12 months.

Cash. Cash represents deposits maintained with the Offshore Fund's custodian. Deposits may be in excess of federally insured limits. The Offshore Fund deposits its cash with high credit-quality institutions to minimize credit risk.

Taxes. The Offshore Fund is registered as an exempted limited partnership under the laws of the Cayman Islands. The Offshore Fund has received an undertaking from the Cayman Islands authorities that, for a period of fifty years from the date of formation, the Offshore Fund will be exempt from taxation in the Cayman Islands. As a result, no local income, profits, or capital gains taxes are levied in the Cayman Islands at the current time.

For the period ended December 31, 2024, the Offshore Fund was classified as a corporation for U.S. federal income tax purposes. The Offshore Fund does not believe that it engaged in the conduct of a U.S. trade or business and thus it does not expect to be subject to U.S. federal income tax on its income and gains (other than possibly U.S. withholding taxes applicable to certain U.S. source income). No provisions for income taxes are recorded in the financial statements.

In the normal course of business, the Offshore Fund may be subject to examination by tax authorities. ASC Topic 740 *Income Taxes* (ASC 740) provides guidance on the accounting for and disclosure of uncertainty in tax positions. ASC 740 requires the evaluation of tax positions taken or expected to be taken to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. As of December 31, 2024, the Offshore Fund did not have any unrecognized tax benefits in the financial statements; nor is Offshore Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. The Offshore Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Offshore Fund's federal income tax returns are generally subject to examination by the Internal Revenue Service (IRS) for a period of three years after they are filed. State and local tax returns may be subject to examination for an additional period of time depending on the jurisdiction.

3. Partner Transactions:

Capital Commitment and Contributions. Each Limited Partner is obligated to pay to the Offshore Fund its Capital Commitment in installments. Each capital contribution due from the Limited Partners is payable to the Offshore Fund upon not fewer than ten business days' prior written notice given by the General Partner to each Limited Partner. The General Partner generally expects to draw down Capital Commitments based on a queue that will be maintained to record the order in which Capital Commitments are accepted (the Commitment Queue).

All Capital Commitments having the same acceptance date will constitute a "tranche" of the Commitment Queue. Drawdowns of Capital Commitments generally will be made pro rata; provided, that the General Partner expects to draw down approximately:

- i. 50% of the Capital Commitments within the first tranche before drawing down any Capital Commitments within the second sequential tranche;
- ii. 90% of the Capital Commitments within each of the first tranche and the second tranche before drawing down any Capital Commitments within the subsequent sequential tranches;

- iii. 90% of the Capital Commitments with respect to each subsequent tranche before drawing down any Capital Commitments within the next subsequent tranche.

Any additional Capital Commitments from existing Limited Partners made on or before December 31, 2024 will be deemed solely for purposes of the Commitment Queue, to be part of the second tranche.

The General Partner may in its discretion draw down from a Limited Partner's unfunded Capital Commitment without regard to the applicable tranche and/or determine to draw down Capital Commitments on a non-pro rata basis for the applicable tranche at any time for any reason.

The following table provides information on the Partners' Capital Commitments for the period April 26, 2024 (commencement of operations) through December 31, 2024.

	Committed Capital	Unfunded Capital Commitment	Unfunded Capital Commitment %
General Partner ¹	\$ -	\$ -	0.0%
Limited Partners	344,250,000	269,250,000	78.2%
Total	<u>\$ 344,250,000</u>	<u>\$ 269,250,000</u>	78.2%

¹ The General Partner does not have a commitment into the Offshore Fund.

Capital contributions include \$32,045 related to reinvestment of distributions. The reinvestment is effective the first business day of the month following the distribution.

Capital Distributions and Allocation of Net Profits and Losses. Distributions will be made by the Offshore Fund to each Partner as soon as reasonably practicable after receipt of corresponding distributions from the Master Fund. Distributions from the Offshore Fund may be made at any time as determined by the General Partner to each Limited Partner. The Offshore Fund's income, expense, gains and losses shall be allocated among the partners in proportion to their respective percentage of Capital Account after making such allocation and taking into account actual distributions made during such accounting period.

Capital Withdrawals. Limited Partners are permitted to withdraw all or any portion of its Capital Account with respect to a Capital Commitment on the first December 31st on or after the third anniversary of such Capital Commitment with written notice to the General Partner at least 90 days prior. The Offshore Fund will establish a Withdrawal Account for all or any portion of each Capital Account that is being withdrawn; however the General Partner may, in its sole discretion, determine to pay the withdrawal to the Limited Partner instead of establishing a Withdrawal Account.

Beneficial Ownership. At December 31, 2024, unaffiliated Limited Partners were each owners of 10% or more of the Partners' Capital of the Fund. The table below shows the number of unaffiliated partners owning 10% or more of the Partners' Capital and the aggregate percentage that represents at the end of the period.

Number of Unaffiliated Partners	Aggregate Percentage for Unaffiliated Partners (%)
4	91.2

4. Expenses and Transactions with Affiliates:

The Management, Incentive Fees and Administrative Fees are charged at the Master Fund level and allocated to the Offshore Fund. In addition, the Offshore Fund will pay an Administrative Fee of 1 basis point on the total Partners' Capital of the Offshore Fund for administration of the Offshore Fund. See Note 5 in the attached Master Fund's

consolidated financial statements for the description of the terms relating to Management, Incentive Fees and Administrative Fees.

5. Risks and Uncertainties:

Due to the nature of the master-feeder structure, the Offshore Fund will be affected by the actions of the Master Fund. Certain risks related to the operations of the Master Fund are discussed in the attached consolidated financial statements of the Master Fund.

6. Commitments and Contingencies:

In the normal course of business, the Offshore Fund may enter into contracts that provide general indemnifications. The Offshore Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Offshore Fund that have not occurred. The risk of material loss from such claims is considered remote.

7. Subsequent Events:

Management has evaluated all subsequent events and transactions through April 18, 2025, the date on which these financial statements were available to be issued and determined that there were no subsequent events requiring adjustment to or disclosure in the accompanying financial statements.

Report of Independent Auditors

To the General Partner of Fidelity Evergreen Private Credit Master Fund, LP:

Opinion

We have audited the consolidated financial statements of Fidelity Evergreen Private Credit Master Fund, LP (the "Fund"), which comprise the consolidated statement of assets, liabilities, and partners' capital, including the consolidated condensed schedule of investments, as of December 31, 2024, and the related consolidated statements of operations, changes in partners' capital, cash flows, and the financial highlights for the period from April 26, 2024 (commencement of operations) through December 31, 2024, and the related notes to the consolidated financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2024, and the results of its operations, changes in its partners' capital, its cash flows, and financial highlights for the period from April 26, 2024 (commencement of operations) through December 31, 2024 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.

- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Fidelity Evergreen Private Credit Master Fund LP

Consolidated Financial Statements

Consolidated Financial Highlights

	For the period April 26, 2024 (commencement of operations) through December 31, 2024
Total return^{A,B}	
Total return before performance fees	10.34 %
Performance fees	(1.33)%
Total return after performance fees	9.01 %
Ratios to average Limited Partners' Capital^{C,D:}	
Net investment income (loss) ^E	13.21 %
Expenses, before reductions, interest expense and performance fees	4.94 %
Expense reductions	(3.16)%
Interest expense	14.25 %
Performance fees	1.25 %
Expenses, after reductions, interest expense and performance fees	17.28 %

^A The computation of the total return (TR) and ratios for an individual Limited Partner may vary from the TR and ratios presented above due to the timing of capital transactions and differences in management fees and performance fees between Limited Partners.

^B Not annualized

^C Average Limited Partners' Capital for the period ended December 31, 2024 was calculated based on the weighted average at the end of each valuation period of the Limited Partners' Capital which includes any capital contributions or distributions during the period as well as the allocation of net increase (decrease) in Limited Partners' Capital for the period.

^D Net investment income (loss) and expense ratios have been annualized except for non-recurring professional fees, organization costs, offering costs, performance fees and expense reductions.

^E Net investment income (loss) does not include the effects of performance fees, if any.

See accompanying notes which are an integral part of the consolidated financial statements.

(a) Position or portion thereof is an unfunded loan commitment, and no interest is being earned on the unfunded portion, although the investment may be subject to unused commitment fees. Negative cost and fair value results from unamortized fees, which are capitalized to the investment cost. The unfunded loan commitment may be subject to a commitment termination date that may expire prior to the maturity date stated. See Notes to Financial Statements for more information on the Fund's unfunded commitments.

(b) The rate quoted is the annualized seven-day yield of the fund at period end.

See accompanying notes which are an integral part of the consolidated financial statements.

Fidelity Evergreen Private Credit Master Fund LP

Notes to Consolidated Financial Statements

For the period April 26, 2024 (Commencement of Operations) through December 31, 2024

1. Organization:

Fidelity Evergreen Private Credit Master Fund LP (Master Fund) is organized as a Delaware Limited Partnership under the laws of the state of Delaware. The Master Fund was formed pursuant to the Delaware Revised Uniform Limited Partnership Act by filing the Certificate of Limited Partnership on May 15, 2023 and commenced operations on April 26, 2024. Capitalized terms referred to herein have the meanings set forth in the Master Fund's Limited Partnership Agreement, as amended (Agreement). Fidelity Evergreen Private Credit Master Offshore Fund GP LLC, a Delaware limited liability company, is the general partner of the Master Fund (General Partner). The Master Fund has entered into an Investment Management Agreement with Fidelity Diversifying Solutions LLC (Investment Manager), a Delaware limited liability company. The Investment Manager is registered with the U.S. Securities and Exchange Commission as an investment adviser under the Investment Advisers Act of 1940.

The investment objective of the Master Fund is available upon request.

Fidelity Evergreen Private Credit Offshore Fund LP, a Cayman Islands Exempted limited partnership (Offshore Fund) is the Limited Partner of the Master Fund. The Master Fund was organized to receive substantially all of its capital contributions from the Offshore Fund. The Offshore Fund's ownership in the Master Fund is approximately 100%, based on the ending Limited Partners' capital balance in the Master Fund.

The Master Fund invests directly in loans and also in other loans through consolidated subsidiaries. Fidelity Diversifying Solutions serves as the asset manager to the subsidiaries.

The Master Fund does not have a fixed determination date and is expected to continue in existence indefinitely. The Master Fund may be terminated in accordance with the terms of the Agreement.

2. Significant Accounting Policies:

The Master Fund is an investment company and applies the accounting and reporting guidance of the Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) Topic 946 *Financial Services – Investment Companies* (ASC 946). The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP), which require management to make certain estimates and assumptions at the date of the financial statements. Actual results could differ from those estimates. All balances are expressed in United States dollars, the Master Fund's functional currency. The following summarizes the significant accounting policies of the Master Fund:

Consolidation. The Master Fund pursues its investment strategy using one or more subsidiaries. The Master Fund consolidates a wholly-owned, or substantially wholly-owned, subsidiary when the design and purpose of the subsidiary is to act as an extension of the Master Fund's investment operations and to facilitate the execution of the Master Fund's investment strategy. The financial statements have been consolidated and include the accounts of the Master Fund and its wholly-owned, or substantially wholly-owned, subsidiaries. Accordingly, all inter-company transactions and balances have been eliminated. These consolidated financial statements and consolidated condensed schedule of investments are referred to collectively herein as the "financial statements" and "schedule of investments".

Investment Valuation. Investments are valued as of 4:00 p.m. Eastern time on the last calendar day of the period. In accordance with valuation policies and procedures approved by the General Partner (or Investment Manager on behalf of the General Partner), the Master Fund attempts to obtain prices from one or more third party pricing services or brokers to value its investments. When current market prices, quotations or currency exchange rates are not readily available or reliable, investments will be fair valued in good faith by the General Partner's fair value committee (the Committee), in accordance with procedures adopted by the General Partner. Factors used in determining fair value vary by investment type and may include market or investment specific events, transaction data, estimated cash flows, market observations of comparable investments, changes in interest rates, and credit quality. The frequency with which these procedures are used cannot be predicted and they may be utilized to a significant extent. The Committee oversees the Master Fund's valuation policies and procedures and is responsible for approving and reporting to the General Partner all fair value determinations.

The Master Fund categorizes the inputs to valuation techniques used to value its investments into a disclosure hierarchy consisting of three levels as shown below:

Level 1 – unadjusted quoted prices in active markets for identical investments

Level 2 – other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, etc.)

Level 3 – unobservable inputs (including the Master Fund’s own assumptions based on the best information available)

The fair value of the Master Fund’s investments is estimated based on the price that would be received to sell an asset in an orderly transaction between marketplace participants at the measurement date. Fair value determinations are based upon all available factors that the Committee deems relevant and consistent with the principles of fair value measurement which includes the market approach, cost approach, and/or income approach as appropriate. In general, the Committee considers multiple valuation techniques when measuring the fair value of an investment. However, in certain circumstances, a single valuation technique may be appropriate. Valuation techniques used to value the Master Fund’s investments by major category are as follows:

Debt securities, including restricted securities, are valued based on evaluated prices received from third party pricing services or from brokers who make markets in such securities. Debt securities for which observable inputs are not available, are valued using alternate valuation approaches, including the market approach, the income approach and the cost approach. The market approach considers factors including the price of recent investments in the same or a similar security or financial metrics of comparable securities. The income approach considers factors including expected future cash flows, security specific risks and corresponding discount rates. The cost approach considers factors including the value of the security’s underlying assets and liabilities. In determining fair value of the debt securities the types of factors that are considered generally include comparison to publicly-traded securities including such factors as yield, maturity and measures of credit quality, the enterprise value of the portfolio company, the nature and realizable value of any collateral, the portfolio company’s ability to make payments and its earnings and discounted cash flows, the markets in which the portfolio company does business and other relevant factors. Debt securities are generally categorized as Level 2 in the hierarchy but may be Level 3, depending on the circumstances.

Equity securities, including restricted securities, for which market quotations are readily available, are valued at the last reported sale price or official closing price as reported by a third party pricing service on the primary market or exchange on which they are traded and are categorized as Level 1 in the hierarchy. In the event there were no sales during the day or closing prices are not available, securities are valued at the last quoted bid price or may be valued using the last available price and are generally categorized as Level 2 in the hierarchy. For equity securities, including restricted securities, where observable inputs are limited, assumptions about market activity and risk are used and these securities may be categorized as Level 3 in the hierarchy. Equity securities, including restricted securities, for which observable inputs are not available, are valued using alternate valuation approaches, including the market approach, the income approach and cost approach, and are categorized as Level 3 in the hierarchy. The market approach considers factors including the price of recent investments in the same or a similar security or financial metrics of comparable securities. The income approach considers factors including expected future cash flows, security specific risks and corresponding discount rates. The cost approach considers factors including the value of the security’s underlying assets and liabilities.

The Master Fund has engaged a third-party valuation firm to prepare month-end valuation recommendations for a selection of investments, as determined by the General Partner, for which market quotations are not readily available as of the last calendar day of each month. The third-party valuation firm undertakes a full analysis of the investments and provides a range of estimated fair values for such investments to the General Partner. The third-party valuation firm also provides analyses to support their valuation methodology and calculations. The Committee reviews and approves each valuation recommendation and confirms it has been calculated in accordance with the approved policies and procedures.

Investments in money market funds are valued at their closing net asset value (NAV) each business day and are

categorized as Level 1 in the hierarchy.

In accordance with the General Partner's fair value pricing policies, the General Partner may use another method to determine the fair value of investments in money market funds when the NAV is unavailable or not calculated consistent with the measurement principles of ASC 946.

Investment Transactions and Related Gains and Losses. The Master Fund records investment transactions on a trade date basis. For financial reporting purposes, the Master Fund's investment holdings include trades executed through the end of the last business day of the period. Certain distributions received by the Master Fund represent a return of capital or capital gain and are recorded as a reduction of cost of investments and/or as a realized gain. Realized gains or losses on investments are measured by the difference between net proceeds received (excluding prepayment fees, if any) and the amortized cost basis of the investment using the specific identification method and may include proceeds received from litigation.

For the Master Fund's investments in financial instruments with unfunded commitments, including revolving credit facilities and delayed draw term loans, the cost basis of the investment is adjusted for any market discount or original issue discount on the total balance committed. The fair value is also adjusted for price appreciation or depreciation on the unfunded portion. As a result, the purchase of commitments not fully funded may result in a negative cost and fair value until funded. The unfunded commitments are carried at fair value with the unrealized appreciation or depreciation on the unfunded portion being included in the net change in unrealized appreciation (depreciation) on the Statement of Operations.

Dividend Income. Dividend income is recognized by the Master Fund on the ex-dividend date. Dividends receivable on cash dividends declared are reported as dividends receivable until collected.

Interest Income. Interest income is accrued as earned. Interest income includes coupon interest, amortization of premium and accretion of discount on debt investments. Upon prepayment of a loan or debt instrument, any prepayment premium and any unamortized discount or premium are recognized through interest income. Commitment fees, loan origination fees, original issue discount and market discount or premium are capitalized into the cost of the investment to which it applies and accreted into interest income. Debt obligations may be placed on non-accrual status and related interest income may be reduced by ceasing current accruals and writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is reasonably assured. Certain debt securities have pre-paid future coupon payments. Any coupon payments received but not yet earned are presented as deferred revenue on the Statement of Assets, Liabilities and Partners' Capital.

Fee Income. The Master Fund earns certain fees in connection with its investment activities. These fees are in addition to interest payments earned and may include amendment fees, consent fees and syndication fees. Certain fees such as structuring fees and syndication fees are recorded as other income when earned.

Expenses. Expenses are recorded on the accrual basis. Expense estimates are accrued in the period to which they relate, and adjustments are made when actual amounts are known. Expenses included in the accompanying financial statements reflect the expenses of the Master Fund and do not include any expenses associated with the underlying funds, as applicable.

The Master Fund is responsible for all costs and expenses incurred in connection with the Master Fund's operations as defined in the Agreement. The Master Fund shall pay or reimburse the General Partner, the Investment Manager or one of their respective affiliates, all expenses attributable to the operation of the Master Fund and its investments and the performance by the General Partner, the Investment Manager, and their respective affiliates of their respective obligations to the Master Fund as set forth in the Agreement.

Organization Costs. Organization costs include, among other things, the cost of incorporating the Master Fund and the cost of legal services and other fees pertaining to the Master Fund's organization. These costs are expensed as incurred. The Master Fund is responsible for all costs and expenses incurred in connection with the Master Fund's organization as defined in the Agreement.

Offering Costs. The Master Fund’s offering costs include, among other things, legal fees, registration fees and other costs relating to the Master Fund’s offering of partnership interests and associated marketing materials, registration statements (and any amendments of supplements thereto) relating to the offering and associated marketing materials. Offering costs are recorded as deferred offering costs on the Statement of Assets, Liabilities and Partners’ Capital and amortized to expense on the Statement of Operations on a straight line-basis over 12 months.

Cash. Cash represents deposits maintained with the Master Fund’s custodian. Deposits may be in excess of federally insured limits. The Master Fund deposits its cash with high credit-quality institutions to minimize credit risk.

Deferred Financing Costs. Deferred financing costs represent fees and other direct incremental costs incurred in connection with the Master Fund’s debt. Deferred financing costs are capitalized and recorded as an asset on the Statement of Assets, Liabilities and Partners’ Capital. These costs are deferred and amortized using the straight-line method through interest expense on the Statement of Operations over the life of the related debt.

Taxes. The Master Fund is classified as a partnership for U.S. federal income tax purposes. No provisions for income taxes are recorded in the financial statements since the Master Fund is not subject to U.S. federal income tax. Each Limited Partner, in computing its own U.S. federal income tax liability, is required to take into account its allocable share of all items of income, gain, loss, deduction and credit of the Master Fund.

In the normal course of business, the Master Fund may be subject to examination by tax authorities. ASC Topic 740 *Income Taxes* (ASC 740) provides guidance on the accounting for and disclosure of uncertainty in tax positions. ASC 740 requires the evaluation of tax positions taken or expected to be taken to determine whether the tax positions are “more-likely-than-not” of being sustained by the applicable tax authority. As of December 31, 2024, the Master Fund did not have any unrecognized tax benefits in the financial statements; nor is the Master Fund aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. However, the Master Fund’s conclusions may be subject to review and adjustment at a later date based on factors including, but not limited to, the nexus of income among various tax jurisdictions; compliance with U.S. federal, U.S. state, and foreign tax laws; and changes in the administrative practices and precedents of the relevant taxing authorities.

The Master Fund files a U.S. federal tax return, in addition to state and local tax returns as required. The Master Fund’s federal income tax returns are generally subject to examination by the Internal Revenue Service (IRS) for a period of three years after they are filed. State and local tax returns may be subject to examination for an additional period of time depending on the jurisdiction.

3. Fair Value Measurements:

The following is a summary of the inputs used, as of December 31, 2024, involving the Master Fund’s assets and liabilities carried at fair value. The inputs or methodology used for valuing investments may not be an indication of the risk associated with investing in those investments.

Investments, at fair value	Valuation Inputs at Reporting Date:			
	Total	Level 1	Level 2	Level 3
First lien debt	\$ 223,540,404	\$ -	\$ -	\$ 223,540,404
Money market funds	4,217,629	4,217,629	-	-
Equity	1,399,501	-	-	1,399,501
Investments, at fair value	\$ 229,157,534	\$ 4,217,629	\$ -	\$ 224,939,905

The following table presents changes in assets classified in Level 3 of the fair value hierarchy for the period April 26, 2024 (commencement of operations) through December 31, 2024 attributable to the following:

	Total	First lien debt	Equity
Cost of Purchases	\$ 237,552,054	\$ 236,316,154	\$ 1,235,900
Transfers into Level 3	-	-	-
Transfers out of Level 3	-	-	-

Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy. The information used in the above disclosure represents fiscal year to date activity for any investments identified as using Level 3 inputs at either the beginning or the end of the current fiscal period.

There were no transfers into or out of Level 3 for the period April 26, 2024 (commencement of operations) through December 31, 2024.

The following table provides information on Level 3 securities held by the Master Fund that were valued at December 31, 2024 based on unobservable inputs.

Asset Type	Fair Value at 12/31/2024	Valuation Technique (s)	Unobservable Input (s)	Amount or Range
First lien debt	\$ 223,540,404	Discounted cash flow	Yield	9.0% - 14.1%
Equity	\$ 1,399,501	Market comparable	Enterprise value/EBITDA multiple (EV/EBITDA)	7.5 - 11.0

4. Partner Transactions:

Capital Commitment and Contributions. Each Limited Partner is obligated to pay to the Master Fund its Capital Commitment in installments. Each capital contribution due from the Limited Partners is payable to the Master Fund upon not fewer than ten business days' prior written notice given by the General Partner to each Limited Partner. The General Partner generally expects to draw down Capital Commitments based on a queue that will be maintained to record the order in which Capital Commitments are accepted (the Commitment Queue).

All Capital Commitments having the same acceptance date will constitute a "tranche" of the Commitment Queue. Drawdowns of Capital Commitments generally will be made pro rata; provided, that the General Partner expects to draw down approximately:

- i. 50% of the Capital Commitments within the first tranche before drawing down any Capital Commitments within the second sequential tranche;
- ii. 90% of the Capital Commitments within each of the first tranche and the second tranche before drawing down any Capital Commitments within the subsequent sequential tranches;
- iii. 90% of the Capital Commitments with respect to each subsequent tranche before drawing down any Capital Commitments within the next subsequent tranche.

Any additional Capital Commitments from existing Limited Partners made on or before December 31, 2024 will be deemed solely for purposes of the Commitment Queue, to be part of the second tranche.

The General Partner may in its discretion draw down from a Limited Partner's unfunded Capital Commitment without regard to the applicable tranche and/or determine to draw down Capital Commitments on a non-pro rata basis for the applicable tranche at any time for any reason.

The following table provides information on the Partners' Capital Commitments for the period April 26, 2024 (commencement of operations) through December 31, 2024.

	Committed Capital	Unfunded Capital Commitment ¹	Unfunded Capital Commitment %
General Partner	\$ 10,000	\$ -	0.0%
Limited Partners	344,250,000	269,250,000	78.2%
Total	<u>\$ 344,260,000</u>	<u>\$ 269,250,000</u>	78.2%

¹ Amounts shown are inclusive of recallable capital distributions

Capital contributions include \$32,045 related to reinvestment of distributions. The reinvestment is effective the first business day of the month following the distribution.

Capital Distributions and Allocation of Profit and Loss. Distributions from the Master Fund may be made at any time as determined by the General Partner to each Limited Partner. The Master Fund's income, expense, gains and losses shall be allocated among the Partners in proportion to their respective percentage of Capital Account after making such allocation and taking into account actual distributions made during such accounting period.

Capital Withdrawals. Limited Partners are permitted to withdraw all or any portion of its Capital Account with respect to a Capital Commitment on the first December 31st on or after the third anniversary of such Capital Commitment with written notice to the General Partner at least 90 days prior. The Master Fund will establish a Withdrawal Account for all or any portion of each Capital Account that is being withdrawn; however the General Partner may, in its sole discretion, determine to pay the withdrawal to the Limited Partner instead of establishing a Withdrawal Account.

5. Expenses and Transactions with Affiliates:

Management Fees. The Master Fund will pay the Investment Manager, quarterly in arrears, an annual management fee based on each Limited Partner's management fee rate applicable to such Limited Partner's Capital Account and Withdrawal Account, as applicable, multiplied by the aggregate original cost basis of all investments held by such Limited Partner's Capital Account and Withdrawal Account, calculated as of the last day of such quarter. The management fee annual rate with respect to each Limited Partner means:

- i) 0.75% per annum with respect to a Limited Partner with aggregate Capital Commitments less than \$50 million;
- ii) 0.65% per annum with respect to a Limited Partner with aggregate Capital Commitments equal to or greater than \$50 million but less than \$100 million;
- iii) 0.575% per annum with respect to a Limited Partner with aggregate Capital Commitments greater than or equal to \$100 million but less than \$200 million; and
- iv) 0.50% per annum with respect to a Limited Partner with aggregate Capital Commitments greater than or equal to \$200 million.

Incentive Fees. If, as of the end of each Incentive Period, there are net investment profits with respect to a Limited Partner's Capital Account and Withdrawal Account, as applicable, in excess to equal a rate of return of 7% per annum (non-compounded) as of the beginning of the applicable Incentive Period, adjusted accordingly for Incentive Periods that are less than 12 months, (Hurdle Threshold), the General Partner or its designated Affiliates will be entitled to receive from the Master Fund an incentive fee (Incentive Fee) in respect of such Capital Account (or Withdrawal Account) in an amount (when aggregated with payments of Incentive Fees previously made in respect of such Capital Account (or Withdrawal Account)) equal to 12.5% of net investment profits with respect to such Capital Account (or Withdrawal Account); provided, that, the General Partner will be entitled to amounts equal to 80% of such excess net investment profits until the General Partner has received in the aggregate 12.5% of the net investment profits with respect to such Capital Account (or Withdrawal Account).

The initial Incentive Period will be extended and will end on December 31, 2027. The General Partner shall not receive

any payment of the Incentive Fee (other than tax advances) in respect of a Limited Partner until December 31, 2027. Following January 1, 2028, the incentive fee shall be calculated as of either the last day of each calendar year, in connection with a Limited Partner's withdrawal(s) from the Master Fund, or the date of the final liquidating distribution from the Master Fund (Incentive Period).

The Investment Manager may, at its discretion, waive or reduce the Management Fee Rate and or Incentive Fees for certain Limited Partners. Pursuant to the Agreement, the Investment Manager has reduced the Management Fee Rate for certain investors in the Master Fund.

Administrative Fees. The Master Fund has entered into an administration agreement with Fidelity Service Company, Inc. (Administrator), an affiliated entity. The Administrator maintains the Master Fund's official books and records and provides accounting services, investor relations, and audit support. The fee charged by the Administrator is reflected in administrative fees in the accompanying Statement of Operations. Any incurred but not yet paid administrative fees as of December 31, 2024, are included in administrative fees payable in the accompanying Statement of Assets, Liabilities and Partners' Capital.

Transactions with Affiliates. The Master Fund intends to acquire loans or certain other assets originated by other funds and accounts managed by the Investment Manager or its Affiliates. For the period April 26 (commencement of operations) through December 31, 2024, the Master Fund acquired \$234,366,280 in debt and equity securities from Affiliates.

Due to Affiliates. Certain legal fees were paid by the Investment Manager on behalf of the Master Fund and will be reimbursed. These amounts are included in due to affiliates in the Statement of Assets, Liabilities and Partners' Capital.

6. Expense Reductions:

Per the Agreement, the Investment Manager has the right to waive, reduce or make non-adverse adjustments that will have the effect of waiving, reducing or adjusting all or part of the Management Fees with respect to certain Limited Partners. For the period April 26, 2024 (commencement of operations) through December 31, 2024, the Management Fees incurred by the Master Fund were reduced in the amount of \$566,069 which are included as expense reductions in the Statement of Operations.

In accordance with the Agreement, the General Partner or its Affiliates has agreed to bear the organization and offering costs through the initial close of the Master Fund. For the period April 26, 2024 (commencement of operations) through December 31, 2024, the organization and offering costs incurred by the Master Fund were reduced in the amount of \$989,586 which are included as expense reductions in the Statement of Operations.

7. Risks and Uncertainties:

Many factors affect a Fund's performance. Developments that disrupt global economies and financial markets, such as pandemics, epidemics, outbreaks of infectious diseases, war, terrorism and environmental disasters, may significantly affect a Fund's investment performance. The effects of these developments to a Fund will be impacted by the types of securities in which a Fund invests, the financial condition, industry, economic sector, and geographic location of an issuer, and a Fund's level of investment in the securities of that issuer.

Interest Rate and Credit Risk. The Master Fund is subject to interest rate and credit risk. The value of debt securities may decline as interest rates increase. The Master Fund could lose money if the issuer of a fixed income security is unable to pay interest or repay principal when it is due. The Master Fund may be exposed to credit risks in the event that the contracting party to a transaction fails to perform or that an institution or other entity with which the Master Fund has unsettled or open transactions will default. The ability of the issuers of debt to meet their obligations may be affected by the economic and political developments in a specific industry or region.

Interest Rate Changes. Debt securities, including money market securities, have varying levels of sensitivity to changes in interest rates. In general, the price of a debt security can fall when interest rates rise and can rise when

interest rates fall. Securities with longer maturities and certain types of securities, such as mortgage securities and the securities of issuers in the financial services sector, can be more sensitive to interest rate changes, meaning the longer the maturity of a security, the greater the impact a change in interest rates could have on the security's price. Short-term and long-term interest rates do not necessarily move in the same amount or the same direction. Short-term securities tend to react to changes in short-term interest rates, and long-term securities tend to react to changes in long-term interest rates. Securities with floating interest rates can be less sensitive to interest rate changes, but may decline in value if their interest rates do not rise as much as interest rates in general. Securities whose payment at maturity is based on the movement of all or part of an index and inflation-protected debt securities may react differently from other types of debt securities.

Liquidity Risk. Instability in the credit markets for below investment grade securities can affect the liquidity of the Master Fund and may result in less frequent observable market trading and fewer dealers valuing these types of securities. At period end, a significant portion of the Master Fund's below investment grade securities are valued on the basis of a price provided by a single source dealer or fair valued. As a result, the prices used by the Master Fund under these conditions may differ significantly from the values that would be realized if the securities were sold and the difference could be material. If the Master Fund experiences significant redemptions which exceed cash and liquid maturities, it may result in securities being disposed of at prices different from the recorded value, since the market price of such securities could be more volatile than in stable market conditions.

Credit and Liquidity Risk. Failure by a Limited Partner to meet a capital call could result in the Master Fund having to reduce the number of investments the Master Fund may make. In addition, if a Limited Partner fails to meet a capital call, the Investment Manager may require each non-defaulting Limited Partner to make an additional capital contribution (but not in excess of each such non-defaulting Limited Partner's available Capital Commitment) to make up for the shortfall.

Use of Leverage. The Master Fund's use of leverage may magnify gains or losses and increase volatility. Leveraging can expose the Master Fund to additional risks, such as higher interest costs, reduced flexibility in meeting financial obligations, and potential declines in the values of collateral assets supporting the leverage.

8. Borrowings:

Capital One Line of Credit

On April 26, 2024, the Master Fund entered into a revolving line of credit (Capital One Note) with Capital One, National Association, which serves as administrative agent, for an aggregate principal amount of \$80 million, later revised to \$100 million on July 16, 2024, for purposes of undertaking the investment objective of the Master Fund. Pursuant to the terms of the Capital One Note, each borrowing is required to be in the minimum amount of \$1 million and in integral multiples of \$100,000. Interest on the outstanding principal of the Capital One Note is accrued on a daily basis at SOFR or Reference Rate plus applicable margin if any as defined in the credit agreement. The interest rate will increase an additional 2.0% per annum upon an event of default, and this default rate will continue in effect until the event of default has been rectified. The Master Fund also paid a commitment fee of 0.35% per annum on the unused part of the commitment, which is included in deferred financing costs in the Statement of Assets, Liabilities and Partners' Capital. The Master Fund, by providing the appropriate notice as stated in the credit agreement, had the option to prepay without penalty or premium all or any portion of the outstanding principal in a minimum aggregate amount of \$100,000 and in integral multiples of \$50,000. The stated maturity date of the Capital One Note is April 26, 2025.

As of December 31, 2024, the Master Fund has \$50 million outstanding principal on the Capital One Note, which is presented as debt on the Statement of Assets, Liabilities and Partners' Capital.

BNP Paribas Line of Credit

On July 16, 2024, Fidelity Evergreen Private Credit Master Fund BSPV LLC (BSPV), a wholly-owned subsidiary of the Master Fund, entered into a revolving credit facility (BSPV Facility) with BNP Paribas (BNP). BNP serves as administrative agent, State Street Bank and Trust Company serves as collateral agent, and Virtus Group, LP serves as collateral administrator under the BSPV Facility.

The principal commitment amount under the BSPV Facility is \$100 million, later revised to \$150 million on December 6, 2024, subject to availability under the borrowing base, which is based on the BSPV's portfolio investments and outstanding indebtedness, subject to the satisfaction of certain conditions. Proceeds from borrowings under the credit facility may be used for general corporate purposes, including, without limitation, repaying outstanding indebtedness, making distributions, contributions and investments, and acquisition and funding, and such other uses as permitted. The Master Fund can draw on the BSPV Facility until July 16, 2027, and the facility will mature on July 16, 2029. During the period from July 17, 2027 to July 16, 2029, the Master Fund will be obligated to make equal monthly payments such that the final monthly payment renders the loan fully paid.

Advances under the BSPV Facility currently bear interest at a per annum rate equal to the benchmark in effect for the currency of the applicable advance (which is Term SOFR in the case of U.S. dollar advances), plus an applicable margin of 2.25% per annum prior to July 16, 2027 and 2.75% per annum subsequent to July 16, 2027. The BSPV will also pay a commitment fee of up to the applicable margin on average daily undrawn amounts under the BSPV Facility.

In connection with the BSPV Facility, the BSPV has made certain customary representations and warranties and is required to comply with various covenants, reporting requirements and other customary requirements for similar facilities. The BSPV Facility contains customary events of default for similar financing transactions. Upon the occurrence and during the continuation of an event of default, the lender under BSPV Facility may declare the outstanding advances and all other obligations under the BSPV Facility immediately due and payable. The BSPV Facility is secured by a first-priority interest in substantially all of the portfolio investments held by the BSPV, subject to certain exceptions.

As of December 31, 2024, the BSPV has \$105 million outstanding principal on the BSPV Facility, which is presented as debt on the Statement of Assets, Liabilities and Partners' Capital.

9. Commitments and Contingencies:

In the normal course of business, the Master Fund may enter into contracts that provide general indemnifications. The Master Fund's maximum exposure under these arrangements is unknown as this would be dependent on future claims that may be made against the Master Fund. The risk of material loss from such claims is considered remote.

Commitments. In the normal course of business, the Master Fund may become party to financial instruments with off-balance sheet risk to fund investments that have unfunded commitments associated with such instruments. These financial instruments may include commitments to extend credit on the unused portions of the Master Fund's commitments pursuant to the terms of certain of the Master Fund's investments in revolving credit facilities, delayed draw and other loan financing agreements in connection with the Master Fund's investments in direct lending instruments. The following table details the unfunded loan commitments at December 31, 2024:

Investments, at fair value	Commitment Type	Commitment Expiration Date	Unfunded Commitment (\$)
First lien debt			
AB Centers Acquisition Corporation	Delayed draw term loan	07/02/2031	1,561,433

10. Subsequent Events:

Management has evaluated all subsequent events or transactions for potential recognition or disclosure through April 18, 2025, the date on which these financial statements were available to be issued and has determined that there were no subsequent events requiring adjustment to or disclosure in the accompanying financial statements.
