I Fund Outlook

We continue to work with the CEOs of the remaining portfolios to create value for the Partnership and will further distribute our public holdings as we see fit. We believe this Partnership will do well when all is said and done.

HongShan Capital Growth 2010

Semi-Annual Fund Report - December 2024

This Report is confidential and intended solely to provide a brief overview of selected metrics related to the Partnership. It is not intended to serve as the basis for any investment-related decision and does not constitute an offer or solicitation for partnership interests. The numbers in this Report are preliminary, unaudited and subject to revision. Past performance is not indicative of future results. This Report is not a substitute for the Partnership's official financial statements and does not provide a comprehensive representation of the Partnership's financial condition, performance, prospects or other attributes. The General Partner may possess material information not included in this Report, which could be necessary to fully understand the context and implications of the information presented herein. Much of the information concerning portfolio companies in this Report has been provided by the companies themselves, is based on unaudited financial or operational data and may not have been independently verified by the General Partner. The inclusion of featured companies in this Report does not represent a comprehensive or representative sample of the Partnership's financial condition, performance or prospects. All forward-looking statements contained herein are based on assumptions that may prove to be incorrect. The Appendix of Disclosures and/or Risk Factors provided to prospective Limited Partners during the formation of the Partnership is hereby incorporated by reference. For convenience, certain financial performance metrics in this Report may have been calculated using methodologies or conventions that differ from those used for other Partnership purposes.

Net IRR is calculated based on the due dates of Limited Partners' capital calls and the actual cash flow dates of distributions, using Limited Partners' ending capital as the terminal value. Net Multiple is equal to actual distributions to all Limited Partners plus all Limited Partners' share of remaining value in the Fund after taking into account allocations of carried interest, management fees and all other fund expenses, divided by contributed capital from all Limited Partners. These metrics reflect the aggregate performance of all Limited Partners in the Partnership, however, individual Limited Partners' results may vary. Unless otherwise stated, all figures excluding Net IRR and Net Multiple are presented on a gross basis, without deducting the fees and expenses of the Partnership, and include interests held by both the General Partner and Limited Partners. The deduction of fees and expenses will reduce returns, and these fees and expenses, in aggregate, are expected to be substantial. By-company fair market value (FMV) presented herein are gross of ASC 740-10 tax accruals, where applicable. Total FMV is an amount equal to realized and unrealized FMV. Proceeds refer to the considerations received from investments, which includes sales considerations, dividends and other related income. Multiple on invested capital (MOIC), is calculated on a gross basis by dividing the sum of an investment's FMV and the total proceeds received by the cost of the investment. Not applicable (n/a), in the context of MOIC or gross multiple, is used when the applicable calculation does not yield an accurate or meaningful representation (e.g. when the cost basis of an investment is too low or zero, etc.).
