INDEPENDENT AUDITOR'S REPORT

To NCH New Europe Property Fund, L.P. and Subsidiaries:

Opinion

We have audited the consolidated financial statements of NCH New Europe Property Fund, L.P. (A Cayman Islands Exempted Limited Partnership) and Subsidiaries (collectively, the “Partnership”), which comprise the consolidated statement of assets, liabilities and partners’ capital, including the consolidated condensed schedule of investments, as of December 31, 2025, and the related consolidated statements of operations, changes in partners’ capital, and cash flows for the year then ended, and the related notes to the consolidated financial statements (collectively referred to as the “financial statements”) (all stated in United States Dollars).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Partnership as of December 31, 2025, and the results of its operations, changes in its partners’ capital, and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor’s Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Partnership and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership’s ability to continue as a going concern for one year after the date that the financial statements are available to be issued.

Auditor’s Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor’s report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Partnership's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Partnership's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Deloitte & Touche LLP

NCH NEW EUROPE PROPERTY FUND, L.P. AND SUBSIDIARIES
(A Cayman Islands Exempted Limited Partnership)
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
AS OF AND FOR THE YEAR ENDED DECEMBER 31, 2025
(Stated in United States Dollars)

1. ORGANIZATION

NCH New Europe Property Fund, L.P. was organized as a Cayman Islands Limited Partnership pursuant to the Exempted Limited Partnership Act of the Cayman Islands, as amended, and all other pertinent laws of the Cayman Islands and is registered under the Private Funds Act of the Cayman Islands. NCH New Europe Property Fund, L.P. has wholly-owned subsidiaries which were established to facilitate the ownership of certain investments. The consolidated financial statements include the accounts of NCH New Europe Property Fund, L.P. and its wholly-owned subsidiaries. The general partner of NCH New Europe Property Fund, L.P. is NCH Property Associates LLC (the “General Partner”). NCH New Europe Property Fund, L.P. was formed on July 29, 2005, for the purpose of acquiring, developing, redeveloping, managing, leasing, and selling retail, commercial, industrial and residential real estate properties and real estate-related securities in markets that are expected to join the European Union, selected other markets in Eastern Europe and countries which were, until 1991, Republics of the Soviet Union. The “Partnership” as used hereafter will refer to NCH New Europe Property Fund, L.P. and its subsidiaries. In accordance with the Limited Partnership Agreement (the “Agreement”), the term of NCH New Europe Property Fund, L.P. was originally ten years, however, it was extended for two additional one-year periods. Although the term has expired, pursuant to the Agreement, the Partnership will continue until the orderly disposition of investments is accomplished or other action is taken.

Capitalized terms used but not defined herein shall have the meaning ascribed to them in the Agreement.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation — The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”). All intercompany balances and transactions have been eliminated upon consolidation. The Partnership is an investment company under the accounting definition and accordingly follows the investment company accounting and reporting guidance of the Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 946, *Financial Services – Investment Companies*.

Estimates — The preparation of the consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of increases and decreases in partners' capital from operations during the year. As a result, actual results may differ from those estimates.

Cash and Cash Equivalents — Cash and cash equivalents includes cash held at a bank and short-term money market investments. The Partnership defines cash equivalents as highly liquid financial instruments with original maturities of three months or less when purchased and money market funds. A portion of the Partnership's cash may be swept into an overnight sweep account of the financial institution where the Partnership's cash is held. At times, cash may be in excess of federally insured limits. Money market funds are carried at fair value. All cash and cash equivalents are maintained

with major financial institutions. As of December 31, 2025, \$13,247,748 of cash equivalents was held in the JP Morgan US Dollar Liquidity Fund.

Dividend and Interest Income — Dividends are recorded by the Partnership on the ex-dividend date or at a later date when the information becomes available to the Partnership. Dividends are recorded net of applicable withholding taxes. Interest income is recorded on an accrual basis.

Investments — The Partnership carries its investments at fair value in accordance with ASC 820, *Fair Value Measurement*. Equity securities, which are regularly traded on any securities exchange, are valued at the mid-point between the last quoted bid and ask prices, as reported by an independent pricing service on the primary market or exchange on which they are traded. Pricing sources are used in accordance with a predetermined hierarchy, as determined by the General Partner. The General Partner's determination of fair value is based on the best information available in the circumstances and incorporates the General Partner's own assumptions (including assumptions that the General Partner believes market participants would use in valuing the investments) and involves a significant degree of judgment, taking into consideration a combination of internal and external factors, including appropriate risk adjustments for nonperformance and liquidity. The values estimated by the General Partner may differ significantly from values that would have been used had a ready market for the investments existed and the differences could be material to the consolidated financial statements.

Under the income approach, fair value is determined by converting future amounts (e.g., cash flows or earnings) to a single present amount (discounted) using current market expectations about those future amounts. In determining fair value under this approach, the General Partner makes assumptions (over a projection period) regarding unobservable inputs such as revenues, operating income, depreciation and amortization, capital expenditures, income taxes, working capital needs, and the terminal value (exit multiple) of the investee company. The General Partner discounts those projected cash flows by deriving a discount rate based on a capital structure similar to that of a market participant (using observable inputs such as the rate of return available in the market on an investment free of default risk, an equity risk premium to reflect the additional risk of a market portfolio of equity instruments over risk free instruments, beta as a measure of risk based on share price correlation to the market, and equity and debt-to-capital ratios of companies deemed comparable to the investee company).

Under the market approach, fair value may be determined by reference to a recent transaction involving the investment or by reference to observable valuation measures for companies or assets that are determined by the General Partner to be comparable (e.g., multiplying a key performance metric of the investee company, such as earnings before interest, taxes, depreciation and amortization ("EBITDA"), by a relevant valuation multiple observed in the range of comparable companies or transactions, adjusted by the General Partner for differences between the investment and the referenced comparables). Observable inputs used in the market approach to derive a valuation multiple may include the public prices for securities issued by, and the relevant performance metrics of, companies deemed comparable to the investee company, and/or transaction prices involving significant equity interests in companies deemed comparable to the investee company. Unobservable inputs used in the market approach may include the key performance metric of the investee company (e.g., EBITDA).

Investments may also be valued at their acquisition price for a period of time after an acquisition as the best measure of fair value in the absence of any conditions or circumstances that would indicate otherwise. In the event of an announced sale for investments with a definitive agreement in place, investments may also be valued using a discount-to-sale approach as the primary method.

Investment Transactions — Investment transactions are recorded on the transaction date and include loans made to portfolio companies for working capital purposes. Realized gains and losses are recognized on a specific identification method when an investment is sold, and are computed as proceeds from the sale, less the cost basis of the security or property and any related expenses. Proceeds from the sale of investments not collected as of the end of the year are recorded as receivable from sale of investments.

Operating Income — The Partnership participates in equity interests of certain portfolio companies and records related income distributions received as operating income in the consolidated statement of operations.

Expenses — The Partnership is responsible for and pays all expenses of the Partnership or any wholly owned subsidiary. All expenses are recorded on an accrual basis.

Taxes — The Partnership is not a taxable entity for United States federal income tax purposes. In addition, there are currently no income or capital gain taxes in the Cayman Islands. Accordingly, there is no provision for taxes in the consolidated financial statements.

Foreign Currency Translation — The books and records of the Partnership are maintained in United States dollars. Foreign currency amounts are translated into United States dollars on the following basis: (i) value of investments, other assets and liabilities — at the rates of exchange prevailing at year-end and (ii) purchases and sales of investments, income, and expenses — at the rates of exchange prevailing on the respective dates of such transactions. The Partnership does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices. Such fluctuations are included with net realized gain (loss) and net change in unrealized appreciation and depreciation on investments, if any, in the consolidated statement of operations.

3. FAIR VALUE MEASUREMENTS

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the Partnership discloses the fair value of its investments in a hierarchy, which prioritizes and ranks the level of market price observability used in measuring investments at fair value. Market price observability is impacted by a number of factors, including the type of investment and the characteristics specific to the investment. Investments with readily available quoted prices in an active market generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value.

Investments measured and reported at fair value are classified and disclosed in one of the following categories:

Level I — Quoted prices are available in active markets and exchanges for identical investments as of the reporting date. The type of investments included in Level I are publicly traded equity securities and money market funds. The Partnership does not adjust the mid-point between the bid and the ask price for these investments even in situations where the Partnership holds a large position and a sale could reasonably impact the quoted price.

Level II — Quoted prices for identical assets or liabilities in markets that are not active, that is, markets in which there are few transactions for the asset or liability, the prices are not current, or price quotations vary substantially either over time or among market makers.

Level III — Pricing inputs are unobservable and include situations where there is little, if any, market activity for the investment. Fair values for these investments are determined using valuation techniques that consider a range of factors, including but not limited to the nature of the investment, the price at which the investment was acquired, the most recent available market comparables, or estimates of value from other market participants. Investments included in this category are private portfolio investments.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The determination of fair value for Level III investments using the above criteria requires significant management judgment and the valuations determined could differ from the values that would have been used had a ready market for these investments existed.

The following table summarizes the valuation of the Partnership's investments and cash equivalents by the above fair value hierarchy levels as of December 31, 2025:

	Level I	Level II	Level III	Total
ASSETS:				
Cash equivalents	\$ 13,247,748	\$ -	\$ -	\$ 13,247,748
Agribusiness	-	-	207,323,000	207,323,000
Real estate	-	-	35,019,815	35,019,815
Total	<u>\$ 13,247,748</u>	<u>\$ -</u>	<u>\$ 242,342,815</u>	<u>\$ 255,590,563</u>

The following table presents the purchases and transfers of investments classified within Level III for the year ended December 31, 2025:

	Purchases	Transfers in	Transfers out
Agribusiness	\$ 11,158,512	\$ -	\$ -
Real estate	33,158,427	-	-
Total	<u>\$ 44,316,939</u>	<u>\$ -</u>	<u>\$ -</u>

The following table summarizes the valuation techniques and significant unobservable inputs used for the Partnership's investments that are categorized within Level III of the fair value hierarchy as of December 31, 2025:

	Fair Value	Valuation Technique	Unobservable Input	Range	
				Low	High
Agribusiness	\$ 207,323,000	Discounted Cash Flows	Weighted average cost of capital	18.40%	21.40%
			Capitalization rate	15.00%	15.00%
Real estate	16,295,291	Net Asset Value ⁽¹⁾	n/a	n/a	n/a
	7,234,000	Liquidation Value	n/a	n/a	n/a
	6,485,736	Market Comparables	Comparable sales price per square meter ("sqm")	\$0.88/ sqm	\$1,360.98/ sqm
	4,118,313	Adjusted Net Asset Value ⁽²⁾	n/a	n/a	n/a
	821,927	Discounted Cash Flows	Weighted average cost of capital	16.00%	29.00%
			Capitalization rate	12.50%	12.50%
	64,548	Transaction Pricing	n/a	n/a	n/a
Total	<u>\$ 242,342,815</u>				

(¹) Includes \$7,580,158 of underlying real estate portfolio fair valued using market comparables.

(²) Includes \$4,929,120 of underlying real estate portfolio fair valued using discounted cash flows.

The Partnership, through its holdings in investments detailed in the consolidated condensed schedule of investments, has interests in underlying real estate assets as of December 31, 2025 that are valued using the following valuation techniques and significant unobservable inputs:

		Valuation	Unobservable	Range	
Fair Value		Technique	Input	Low	High
\$	7,580,158	Market Comparables	Comparable sales price per square meter ("sqm")	\$0.47/sqm	\$190.12/sqm
	4,929,120	Discounted Cash Flows	Weighted average cost of capital	11.10%	11.10%
			Capitalization rate	9.00%	9.00%
Total					
	\$	12,509,278			

During the year ended December 31, 2025, there was a change in valuation techniques within Level III from market comparables to transaction pricing for one investment and from discounted cash flows to liquidation value for another investment. Management believes that these changes result in the most representative fair values under current market conditions.

4. TAXES

The Partnership reviews and evaluates tax positions in its major jurisdictions and determines whether or not there are uncertain tax positions that require financial statement recognition. Such recognition would be required in the event that it is probable that there is a tax liability incurred at the date of the consolidated financial statements, and the amount of such tax liability can be reasonably estimated. No income tax liability for uncertain tax positions was required to be recognized in the accompanying consolidated financial statements. Based on this review, the Partnership has determined the major tax jurisdictions as where the Partnership is organized and where the Partnership makes investments.

Each partner is individually responsible for reporting income or loss, to the extent required by the U.S. federal and state income tax laws and regulations, based upon its respective share of the Partnership's income and expenses as reported for income tax purposes.

The Partnership may be subject to taxes imposed in other jurisdictions. Taxes may be imposed based on income earned. The Partnership's subsidiaries' tax returns generally remain open for examination for a period of up to six years from when they are filed. No income tax liability has been recorded in the accompanying consolidated statement of assets, liabilities and partners' capital.

5. PARTNERSHIP ALLOCATION OF PROFITS AND LOSSES

All profits and losses of the Partnership are allocated pro rata based on the partners' capital commitments, as explained in Note 6. Management fees are allocated only to Group A Limited Partners pursuant to the Agreement.

6. PARTNERSHIP CONTRIBUTIONS AND DISTRIBUTIONS

Capital commitments of the Partnership aggregate to \$550,788,889. Partners are required to make capital contributions in proportion to their capital commitments when called by the General Partner. As of December 31, 2025, the Partnership's capital commitments were fully funded, consisting of:

	Limited Partners		General	
	Group A	Group B	Partner	Total
Original commitment *	\$ 460,710,000	\$ 89,978,889	\$ 100,000	\$ 550,788,889
Capital calls for investments	(460,710,000)	(89,978,889)	(100,000)	(550,788,889)
Unfunded commitment	\$ -	\$ -	\$ -	\$ -

* Adjusted to reflect transfers by sale.

In addition, Group A Limited Partners are obligated to fund their pro rata share of management fees paid to an affiliate of the General Partner (the "Manager"). Distributions of proceeds derived from an investment will be apportioned among the partners based on their pro rata share of the Partnership. Operating proceeds shall be distributed no less than quarterly or more frequently as determined by the General Partner in its sole and absolute discretion net of reserves and amounts necessary to pay expenses or management fees. The General Partner shall use reasonable efforts to distribute capital proceeds attributable to any investment promptly after receipt of such capital proceeds by the Partnership net of reserves and amounts necessary to pay expenses or management fees. Proceeds attributable to any such investment shall be distributed among the partners as follows:

(i) 100% to the Group A Limited Partners until such partners have received aggregate distributions equal to an annually compounded rate of return of 9% on the partners' unreturned capital contributions; (ii) 100% to the Group A Limited Partners until such partners have received aggregate distributions equal to the partners' aggregate capital contributions; (iii) 20% to the Group A Limited Partners and 80% to the General Partner until such time as the General Partner has received aggregate distributions pursuant to this clause (iii) and distributions equal to 20% of the sum of the distributions pursuant to clause (i) above and this clause (iii); and, (iv) 80% to the Group A Limited Partners and 20% to the General Partner.

Group B Limited Partners' distributions of proceeds derived from an investment will be apportioned among the partners based on their pro rata share of the Partnership.

7. RELATED-PARTY TRANSACTIONS

As consideration for the investment management services to be provided by the Manager to the Partnership, the Group A Limited Partners pay a management fee to the Manager. The management fee is two percent (2%) per annum of funded commitments of Group A Limited Partners as adjusted in accordance with the Agreement, as of the last day of the preceding fiscal quarter. Effective July 30, 2016, in accordance with the agreement dated November 10, 2015, the annual management fee on funded commitments invested in non-agribusiness investments was reduced by 81%. In addition, the Partnership reimburses the Manager for expenses paid on the Partnership's behalf.

8. FINANCIAL HIGHLIGHTS

For the year ended December 31, 2025, the following are the financial highlights of Group A Limited Partners of the Partnership:

Group A Limited Partners

Ratios to weighted average Limited Partners' capital	
Expenses	2.13%
Net investment income	4.61%
Total contributed capital to total committed capital *	100%

* Presented for the Partnership as a whole.

The ratios of expenses and net investment income to Group A Limited Partners' weighted average partners' capital represent the Group A Limited Partners' expenses and net investment income for the year ended December 31, 2025, as reported on the consolidated statement of operations and are measured using weighted average partners' capital adjusted by contributions and distributions.

The Internal Rate of Return ("IRR") of the Group A Limited Partners, net of all fees to the General Partner, is (0.21%) and (0.60%) from inception through December 31, 2025 and December 31, 2024, respectively. The IRR was computed based on the actual dates of capital contributions and distributions and the ending partners' capital at each measurement date.

9. CERTAIN RISK FACTORS

Investments by the Partnership may be adversely affected by significant economic, political, regulatory and social uncertainties in the countries where it invests. There can be no assurance that the emerging markets in which the Partnership invests will experience growth or that decreases in the fair value of the Partnership's investments will not prove to be long term. Adverse economic conditions or stagnant economic development could further affect the value of the Partnership's investments.

The Partnership invests in agribusiness and real estate in Ukraine. As of December 31, 2025, 80.3% of Partners' Capital was invested in Ukraine with 78.4% of Partners' Capital invested in agribusiness and 1.9% of Partners' Capital invested in real estate. In the wake of Russia's invasion of Ukraine in February 2022, the Partnership has no visibility into how the current conflict and its outcome will ultimately affect the Partnership's investments. While the Partnership has formulated strategies to manage the operations through this crisis, given the very fluid situation in Ukraine, the Partnership is unable to assess the extent of the negative impact that these events will have on the fair value of its investments or whether this impact will be long term. Under regulations adopted by Ukraine in 2022 following the onset of the war, future distributions may be restricted.

The Partnership's investments are subject to the risks incidental to the ownership and operation of agricultural-related assets and agricultural-related real estate, including risks associated with the general political and economic climate, local real estate conditions, geographic or market concentration, competition, the ability of the Partnership to manage the agricultural properties and government regulations. Furthermore, agriculture is a weather-dependent sector and extreme climate

variability carries multi-dimensional impacts. Natural disasters and fluctuations in weather patterns can have potentially devastating effects on agricultural production.

The Partnership's investments expose it to credit and counterparty risk, which is the risk that a counterparty to a financial instrument or unsettled or open transactions will cause a financial loss to the other party by failing to discharge an obligation. Financial assets, which potentially expose the Partnership to credit risk, consist principally of cash due from counterparties and investments. The risk of default is considered minimal. Additionally, the Partnership places its cash and cash equivalents with high credit quality institutions and minimizes its credit exposure through the use of formal credit policies and monitoring procedures. The extent of the Partnership's exposure to credit and counterparty risks with respect to these financial assets approximates their fair value as recorded in the Partnership's consolidated financial statements.

Global events such as war, acts of terrorism, spread of infectious diseases or other public health issues, recessions, or other events could have a negative impact on the Partnership and its investments.

10. COMMITMENTS AND CONTINGENCIES

The Partnership enters into contracts that contain indemnification obligations. The exposure under these obligations is unknown. The Partnership is not aware of any such obligations that have a material impact at this time and expects the risk of significant loss under these obligations to be remote.

11. SUBSEQUENT EVENTS

The Partnership has reviewed subsequent events occurring through April 28, 2026, the date that these consolidated financial statements were available to be issued, and determined that no subsequent events occurred that would require adjustment to or disclosure in the consolidated financial statements.
