

Garnett Station Partners: Q1 2026 Investor Report

Disclaimer and Other Important Disclosures

This presentation does not constitute an offer to sell or the solicitation of an offer to purchase any security. Recipients of this presentation agree that none of Garnett Station Partners, LLC ("Garnett Station Partners," "Garnett Station," "GSP," "we" or "us") or its affiliates or its or their respective partners, members, employees, officers, directors, agents, or representatives shall have any liability for any misstatement or omission of fact or any opinion expressed herein. Each recipient further agrees that it will (i) not copy, reproduce, or distribute this presentation, in whole or in part, to any person or party including any employee of the recipient other than an employee directly involved in evaluating an investment in a private fund managed by GSP (each, a "Fund" and collectively, the "Funds") without the prior written consent of GSP; and (ii) keep permanently confidential all information contained herein that is not already public. Additionally, by accepting this presentation, each prospective investor agrees that this presentation is being delivered to them subject to the provisions of (i) this disclaimer and (ii) any confidentiality agreement entered into between GSP and each prospective investor.

The information contained herein is preliminary, is provided for discussion purposes only, is only a summary of key information, is not complete, and does not contain certain material information about the Funds, including important conflicts disclosures and risk factors associated with an investment in a Fund, and is subject to change without notice. Any offer, sale or solicitation of interests with respect to a Fund will be made only pursuant to such Fund's confidential private placement memorandum (the "Memorandum"), limited partnership agreement and subscription agreement, and will be subject to the terms and conditions contained in such documents in accordance with applicable securities laws. This presentation is qualified in its entirety by reference to the respective Fund's Memorandum, including without limitation all of the cautionary statements and risk factors set forth therein, the limited partnership agreement and the subscription agreement related thereto, copies of all of which will be made available in the future to qualified investors upon request and should be read carefully prior to any investment in such Fund.

The information in this presentation is not presented with a view to providing investment advice with respect to any security, or making any claim as to the past, current or future performance thereof, and GSP expressly disclaims the use of this presentation for such purposes. Each recipient should consult its own advisers as to legal, business, tax and other related matters concerning an investment in a Fund.

Past performance is not indicative, or a guarantee, of future results. Information about a Fund and prior investments and investment strategies of GSP and its professionals is provided solely to illustrate GSP's and its professionals' investment experience, and processes and strategies. It does not represent any track record of, or any vehicles managed by, GSP, which were recently formed. Such information is not intended to be indicative of any Fund's future results. There can be no assurance that a Fund will achieve comparable results as those presented or that a Fund will be able to implement its investment strategy or achieve its investment objective. Investors in a Fund may lose part or all of their invested capital. Please refer to the "Notes and Methodologies" section located at the end of this presentation for additional important information related to the performance information included herein.

Any Fund securities will be subject to significant restrictions on transfer under the federal securities laws and the limited partnership agreement of such Fund. There is no trading market for a Fund's securities, and none is expected to ever develop.

Statements contained in this presentation are based on current expectations, estimates, projections, opinions and beliefs of GSP as of the date hereof. Such statements involve known and unknown risks and uncertainties, and undue reliance should not be placed thereon. Neither GSP nor any of its affiliates makes any representation or warranty, express or implied, as to the accuracy or completeness of the information contained herein and nothing contained herein should be relied upon as a promise or representation as to past or future performance of a Fund or any other entity. Unless otherwise noted, the information contained herein is unaudited and may be preliminary and subject to change, and GSP and its members, partners, stockholders, managers, directors, officers, employees and agents do not have any obligation to update any of such information. Certain figures in this presentation have been rounded. In addition, certain information contained herein has been obtained from published and non-published sources and/or prepared by third parties, and in certain cases has not been updated through the date hereof. While such information is believed to be reliable for the purposes of this presentation, GSP assumes no responsibility for the accuracy or completeness of such information and such information has not been independently verified by it. The inclusion of any third-party firm and/or company names, brands and/or logos does not imply any affiliation with these firms or companies. None of these firms or companies have endorsed GSP, any Fund or any entities or personnel.

Certain information contained herein constitutes "forward-looking statements," which can be identified by the use of terms such as "may," "will," "should," "could," "would," "predicts," "potential," "continue," "expects," "anticipates," "projects," "future," "targets," "intends," "plans," "believes," "estimates" (or the negatives thereof) or other variations thereon or comparable terminology. Forward looking statements are subject to a number of risks and uncertainties, some of which are beyond the control of GSP, including among others, the risks listed in the Memorandum. Actual results, performance, prospects or opportunities could differ materially from those expressed in or implied by the forward-looking statements. Additional risks of which GSP is not currently aware also could cause actual results to differ. In light of these risks, uncertainties and assumptions, prospective investors should not place undue reliance on any forward-looking statements. The forward-looking events discussed in this presentation may not occur. GSP undertakes no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.

Company summaries presented herein do not include or represent all investments made by GSP. These transaction summaries are for informational purposes only and are not reflective of how any GSP investment's performance overall may be comprised or may perform at a given point in time. It should not be assumed that investments made in the future will be comparable in quality, terms or performance to the investments described herein. Further, references to the investments included herein should not be construed as a recommendation of any particular investment or security. Past performance of any such investments is not indicative of overall results or future results. There can be no assurance that GSP will be able to obtain comparable returns or terms, or achieve its investment objectives, in the manner indicated or consistent with such summaries. Prospective investors should not expect the overall performance or terms of any GSP investment to resemble the investment performance or terms of the investments described herein. There can be no assurance that (i) any Fund will be able to implement its investment strategy or achieve its investment objective, (ii) any Fund's investment strategy will prove successful or (iii) investors will not lose all or a portion of their investment in any Fund.

Q1 2026 Update

Dear Partners—

Wall Street has a new buzzword: HALO. Heavy Assets, Low Obsolescence. It happens to describe every business we've owned for more than a decade: collision repair centers, gyms, drive-thru restaurants, funeral homes, HVAC repair shops, tire and auto maintenance centers, and roofing companies. These businesses were always fundamentally sound. Boring, real, and full of opportunity to professionalize, scale, and grow with technology. They were just decidedly not 'cool.' Now the pendulum is swinging back. In our world, AI is a tailwind, not a threat. These businesses may finally be so uncool they're cool again.

A recent Goldman Sachs report on HALO focuses on heavy industrial names. Our businesses are more "HALO as a service": essential-services companies with real assets, physical infrastructure, and skilled labor, but with lower capex and higher returns on invested capital than the machinery and heavy equipment companies that dominate Goldman's analysis. That makes them attractive platforms to acquire, professionalize, and scale. AI can optimize the back office and drive "organic growth as a process" through the GSP Playbook, but it can't install a rooftop unit, change your tire, or serve a customer at a restaurant counter.

The HALO interest isn't only about what these businesses are. It's also about what they're not. They're not software. And software, after a decade as private equity's most popular category, is where stress is surfacing *first*.

That observation leads to a question we've been thinking about for a while, one that goes well beyond just software: "*But, what if the addbacks don't materialize?*"

You've heard us talk many times about our low-leverage, "purchase price matters" investment philosophy and how we believe our approach enables us to generate excess returns per unit of risk through good times and bad. This quarter, we want to dig into a related concept that we think is underappreciated, particularly in the context of roll-ups: **earnings quality**.

Addbacks (projected cost savings, synergies, run-rate adjustments, pro forma normalizations) have powered modern leveraged buyout underwriting. They enhance the denominator, make leverage ratios palatable, and help lenders get comfortable with check sizes that the underlying cash flow may not yet support. According to Lincoln International, 24% of private equity EBITDA now comes from addbacks rather than from operating earnings. *Nearly a quarter of the earnings underpinning trillions of dollars of credit aren't earnings at all.* They're projections(!).

The headlines and recent media attention have focused on software, and for good reason. Leveraged software firms account for roughly a quarter of all private credit borrowing. But there are questions popping up about earnings quality across the broader buyout universe, not just in tech. As Jim Grant wrote in the April issue of Grant's Interest Rate Observer, the typical private credit borrower shows leverage of 6.6x adjusted EBITDA. After stripping out what Grant's calls "the dubious hamburger helper of addbacks," the real number may be closer to 8.5x. Software may be getting the attention today, but their addbacks to increase dollar leverage availability are no more or less "bad" than those that exist in many other industries.

Consider a representative leveraged buyout at today's market terms: a 12x entry multiple with ~6x leverage at a 10% all-in cost of debt (interest & amortization). That business is paying ~\$60 million in debt service on every \$100 million of reported EBITDA. After maintenance capex, taxes and any swings in working capital,

free cash flow to equity is thin. Now ask: what if some material portion of 20-25% of that EBITDA, the addback portion, doesn't come through in a repeatable way? That 6x leverage is really closer to 7 or 8x. Debt service coverage drops precariously close to 1.0x. Free cash flow to equity / in place equity yield approaches zero. The business has no room to invest (in AI, innovation or otherwise), let alone weather a downturn which would put its debt service coverage beneath 1.0x and likely require additional equity from the sponsor.

Some of these cracks may already be showing. Lincoln International reports that covenant amendments at PE-backed companies rose 13% sequentially in Q4 2025, and 11% of borrowers turned on PIK features in the quarter, up from 5% in Q1 2022. Much of that PIK has been negotiated years post-closing to relieve stressed fixed-charge coverage — what bankers call "bad PIK."

We wrote in our Q1 2025 letter about how roll-ups are easy to model in Excel but hard to build in the real world, and how we expected this cycle to separate those building enduring businesses from those hoping to pass the hot potato. We think about that observation often, because the addback problem is particularly acute in roll-ups. When you're always closing the next deal, constant M&A activity can mask underlying operational issues. The new acquisition's revenue makes the top line look healthy. The projected synergies keep the model on track. But some deals may not be integrating the way the spreadsheet said they would, and by the time you see it clearly, especially with 6-8x of leverage sitting on top, it can be too late. We wrote in our Q4 2023 letter about how cyclicalities and leverage make dangerous bedfellows for roll-ups. The addback dynamic is the mechanism by which that plays out. We're not predicting a crisis. We are saying this is a risk worth watching carefully, and one we've built our GSP Playbook to not only avoid, but also to take advantage of using (i) liquidity at our own roll-ups so we can take market share through cycles, and (ii) through our evergreen credit vehicle as discussed in more detail below.

We believe our approach to roll-ups is genuinely different, and we've tried to be disciplined about it from the beginning.

Every GSP roll-up platform we build (Skybound Service Partners, GoodTurn, Grizzly MEP, FirstRidge Service Partners, True North Fleet Services, etc.) is capitalized with 100% equity at inception. No leverage out of the box. We don't add debt until the business "earns it" through scale, systems, and execution, and even then, we keep it modest (avg. leverage of our GSP 3.0 and 4.0 buy and builds today stands at ~2.5x net debt to EBITDA while all three GSP 5.0 buy and builds are still in the 100% equity phase of their lifecycle). We've talked about this approach in past letters, but it's worth explaining why it matters so much in the context of the addback question.

When you build a roll-up with all equity to start, the addbacks aren't load-bearing. If competition stiffens, turnover spikes, or a market turns soft in the first year, our model provides for the cash flows -- and the time -- to fix it. We view addbacks as a plan, not a covenant assumption. And because we work hard to integrate each acquisition with real technology and real systems from the very beginning, we can identify problems early and try to get ahead of them. We're not saying we don't have problems. Of course we do. Business building, in many ways, is problem solving. But we've built our capital structures, underwriting, and technology to surface those problems early, so we can work on them before they compound— and our low leverage gives us the time to fix them.

At Skybound (GSP 5.0's commercial roofing platform), for example, we went from our first acquisition to a multi-regional platform in six months — with a complete management team, technology stack, five acquisitions closed, and a strong pipeline ahead. That kind of speed requires spending ahead of growth, or J-curve G&A. With leverage, that's scary. Without leverage, it's good business building that diversifies us

away from end-market, estimator, and customer risk. We'll add leverage at Skybound to drive growth and returns — but only when the business has earned it (likely 2H '26, ~14 months after our first investment). It's the same approach we learned running our franchise business out of the Garnett Street Train Station more than a decade ago, honed over 34 platform companies across our five GSP funds.

Our businesses generate real, unlevered free cash flow. And because of that, we can do something that highly levered platforms cannot: we can invest in AI and innovation while also navigating the inevitable bumps that come with building businesses. As Howard Marks has reminded us all, 'It's not enough to survive in the investment world on average; you have to survive every moment.' Marks often illustrates the point with the six-foot-tall man who drowned crossing a river that was five feet deep *on average*. Capital structures, like river crossings, have to withstand the worst case — not just the mean, mode or median. We've tried to build a playbook that gives our companies the best chance to not only survive every moment, but to invest through them and take advantage of cycles similar to our portfolio companies' performance during the spring and summer of 2020.

We'll have much more to say about AI in future letters. For now, a brief note on where we stand. We are investing significantly in AI, both at the portfolio level and at the firm level. We believe the same discipline around data, systems, change management, and operational rigor that makes our roll-ups work is also what makes AI adoption work. It's the most exciting time for us since we started GSP. We're leaning hard into the new technologies and believe they will further strengthen the GSP Playbook and help drive outcomes. We're seeing early successes already within the portfolio.

We've also built a proprietary AI platform called Bison that lets our investment team (none of whom are engineers) work with AI agents connected to our real systems and trained on GSP's workflows. We're not saying we have all the answers to the important ROI questions, and we're skeptical of those who say they do. But we believe the companies with the cash flow to invest, the culture to experiment, and the operational discipline to implement will benefit the most. We like our hand.

We also believe the market's growing focus on HALO businesses will continue to be a tailwind for our returns and capital distributions. The Wall Street Journal recently reported, citing CoStar data, that service-oriented tenants now lease more than 50% of all U.S. retail square footage, surpassing goods-based retailers for the first time in history. Fifteen years ago, that figure was 40%. Consumers are spending on services and experiences, not things, and the businesses we invest in sit squarely on the right side of that trend. Buyer appetite for essential-services businesses with real assets, recurring revenue, and defensible cash flow is as strong as we've seen, and we think the macro data helps explain why. In our last letter, we reported that GSP 3.0 (2021 fund) distributed approximately 0.7x DPI following the dividend recap at our largest investment, a level we believe to be industry-leading for the 2021 vintage. Since then, momentum has continued to build across the portfolio. Each of our fund vintages ranks in the top 5% for DPI, driven not by any one outcome but by consistency and the kind of well-integrated, professionalized businesses that attract premium buyer interest. We expect to provide meaningful updates on additional distributions through year-end.

Finally, we wanted to provide an update on our Credit Opportunities Fund ("COF"), our performing credit investment vehicle. We're excited to report that we successfully transitioned the fund to an evergreen structure (from its prior closed-end, drawdown structure) at the end of Q1 based on investor feedback. COF has generated a ~16% net return since inception (3 years ago) buying 1st lien senior credit (in the secondary market) in the same types of businesses we specialize in for our private equity business. We're proud of the returns we've generated and believe the vehicle is strategic for our PE business because it (i) provides insights

into our competitor companies and (ii) serves as great training for our junior team in how to “not lose money” as credit investors (in addition to their equity investment training).

We believe now is a particularly good time for this strategy. Private credit is under pressure, and our evergreen structure allows the Fund to take in new capital and deploy it as opportunities emerge. Redemption pressures (largely software-driven) are forcing funds to sell good "HALO" businesses in the secondary market at attractive prices. Meanwhile, the leveraged buyouts completed during the 2020-2022 zero-rate environment are approaching their refinancing windows just as the addback dynamic we described above is being tested in real time. Sponsors are finding that the EBITDA they underwrote against has not fully materialized, and the credit markets are repricing accordingly. Spreads on new unitranche loans have widened from S+450-475 to S+500-550, OIDs are 50 to 100 basis points wider, and for the first time in three years, upward price flexes exceeded downward flexes in March. The market is shifting from borrower-favorable to lender-favorable, and borrowers refinancing in the next 24 months are walking into a very different environment than the one in which they originally borrowed. We expect COF to take full advantage and continue buying senior debt in the highest-quality businesses in our universe at prices that should allow us to keep generating strong risk-adjusted returns.

GSP Fund Highlights¹:

As of March 31, 2026, we have generated private equity realized returns of 2.8x gross MOIC and 40% gross IRR, representing a 2.4x net MOIC and 34% net IRR (34% regulatory net IRR) across 10 realized / partially realized investments². Overall, we have generated private equity returns of 1.8x gross MOIC / 1.6x net MOIC and 31% gross IRR / 23% net IRR (22% regulatory net IRR)³ across 32 investments and ~\$1.9 billion invested. Assets under management ("AUM") as of 3/31/26 are ~\$4.4 billion.

GSP 5.0⁴

As of March 31, 2026, GSP 5.0 generated a gross MOIC of 1.1x and gross IRR of 16%, representing a 1.0x net MOIC and NA net IRR (NA regulatory net IRR). All investments excluding Honey Baked Ham and Skybound Service Partners are currently marked at cost⁵.

GSP 4.0^{6,7}

As of March 31, 2026, GSP 4.0 generated a gross MOIC of 1.6x and gross IRR of 26%, representing a 1.4x net MOIC and 16% net IRR (15% regulatory net IRR). On an aggregate basis, GSP 4.0 generated \$84.6

¹ Past performance is not indicative of future results. Metrics aggregated across all portfolio companies since inception. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment. Includes ARB Co-investment vehicle.

² Private equity investments exclude a realization attributable to an investment made in public equities pursuant to a potential take-private investment opportunity that was not consummated and where no capital was called. The adviser and fund(s) investment strategy generally does not seek returns through short term trading of public securities.

³ Realized and total private equity performance metrics aggregated across all portfolio companies since inception include all private equity investments, as well as GSP 2.0 loan to own credit investments (effective Q1 2026 for further alignment with the classification of investments for GSP 3.0, GSP 4.0, and GSP 5.0 and as further detailed in the appendix).

⁴ GSP 5.0 refers to GSP 5.0 Complex (including GSP 5.0 Fund-A, L.P. and GSP 5.0 Fund-B, L.P.). Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment.

⁵ Certain Gross, Net, and Regulatory IRR figures are noted as NM given the recency of GSP 5.0's investment period and will be added at the one year anniversary of the investment unless such investment has been marked up or down pursuant to GSP's valuation policy. Net IRR and Regulatory IRR are noted as NM given the recency of GSP 5.0's investments and the allocation of expenses associated with such investments, which GSP believes makes such Net IRR and Regulatory IRR figures not meaningful given the long-term nature of the fund's investments.

⁶ GSP 4.0 refers to GSP 4.0 Complex (including GSP 4.0 Fund-A, L.P. and GSP 4.0 Fund-B, L.P.). Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment.

⁷ Please refer to Endnote 32.

million⁸ of additional gains in Q1 2026 over the last quarter primarily driven by the GoodTurn Tire & Auto, FirstRidge Service Partners, and Pet Supplies Plus investments.

GSP 3.0⁹

As of March 31, 2026, GSP 3.0 Private Equity¹⁰ generated a gross MOIC of 2.5x and gross IRR of 29%, representing a 2.0x net MOIC and 21% net IRR (21% regulatory net IRR). Overall, including 3.0's one credit investment, GSP 3.0 generated a gross MOIC of 2.3x and gross IRR of 26%, representing a 1.9x net MOIC and 18% net IRR (17% regulatory net IRR). On an aggregate basis, GSP 3.0 generated \$85.2 million⁸ of additional gains in Q1 2026 over last quarter primarily driven by the Woof Gang Bakery & Grooming and Authentic Restaurant Brands investments.

GSP 2.0¹¹

As of March 31, 2026, GSP 2.0 Private Equity¹² generated a gross MOIC of 2.4x and gross IRR of 25%, representing a 2.1x net MOIC and 19% net IRR (19% regulatory net IRR). Overall, inclusive of 2.0's credit investments, GSP 2.0 generated gross MOIC of 2.1x and gross IRR of 23%, representing a 1.9x net MOIC and 17% net IRR (17% regulatory net IRR). On an aggregate basis, GSP 2.0 generated \$1.5 million fewer gains in Q1 2026 over the last quarter primarily driven by the Bechtun Credit Partners investment.

GSP 1.0¹³

As of March 31, 2026, GSP 1.0 generated a gross MOIC of 3.0x and gross IRR of 39%, representing a 2.5x net MOIC and 33% net IRR (33% regulatory net IRR). All seven investments in GSP 1.0 have been realized as of 3/31/26.

As always, please reach out to either of us with questions or suggestions.

Warm regards,

Matt & Alex

⁸ Excludes ARB co-investment.

⁹ GSP 3.0 refers to GSP 3.0 Complex (including GSP 3.0 Fund, L.P., GSP 3 FT AC, L.P., GSP 3 CC AC, L.P., GSP 3 PJW AC, L.P., GSP 3 WC AC, L.P., GSP 3.0 Fund WGB AIV-1 L.P., GSP 3 WGB AC L.P. and GSP 3 WGB AC-PF 1, L.P.). Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment.

¹⁰ Effective Q4 2025, GSP has reconstituted the internal classification of investments within GSP 3.0 as between "Private Equity" and "Credit" to further align such internal fund composites with the classification of private equity and credit investments for GSP 2.0, GSP 4.0 and GSP 5.0. Consequently, effective Q4 2025 "GSP 3.0 Credit" includes performance metrics associated with performing credit investments, whereas "GSP 3.0 Private Equity" includes performance metrics from private equity investments made by GSP 3.0.

¹¹ GSP 2.0 refers to GSP 2.0 Fund (including GSP 2.0, L.P. and GSP 2.0A, L.P.). Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment.

¹² Effective Q4 2025, GSP has reconstituted the internal classification of investments within GSP 2.0 as between "Private Equity" and "Credit" to further align such internal fund composites with the classification of private equity and credit investments for GSP 3.0, GSP 4.0 and GSP 5.0.

Consequently, effective Q4 2025 "GSP 2.0 Credit" includes performance metrics associated with performing credit investments, whereas "GSP 2.0 Private Equity" includes performance metrics from both private equity and loan-to-own credit investments made by the Fund. The inclusion of loan-to-own credit investments in the "Private Equity" rather than "Credit" performance composite results in a higher performance figure for "GSP 2.0 Private Equity" than if such investments were included in the "GSP 2.0 Credit" composite.

¹³ GSP 1.0 refers to Single Purpose Vehicles. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment.

GSP Values

1. Accountability

- At GSP, you are an owner. Act like one at all times. If this is your “job,” you won’t last long
- “LPs, LPs, LPs”: we are here to generate the best risk adjusted returns for our investors. We all work for our LPs. Never forget that
- Is this a GSP deal?
- Integrity is paramount
- Every single conversation and analysis is a reflection on our firm and our values

2. Analytical rigor

- Every deal is the enemy
- Work tirelessly, do the extra analysis & never “mail it in”
 - We’re in retail – Sunday is a work day
- Figure out what matters, get to the bottom of it and don’t get distracted by the fringes

3. Collaboration

- Investing at GSP is a team sport
 - We’re only as strong as our weakest team member. Coach and help each other
 - Strive to be in the room where it happens
- Relationships matter. It’s not just capital that compounds, relationships compound too
- Speak up, speak up, speak up
 - No one knows it all. Ask questions, challenge the experts and each other
- Ability to put our counterparties at ease; and the judgment to know when to put them out of ease

4. Entrepreneurship

- Scrappiness – remember the 20th floor ceiling
- Get on the plane – in person is everything. Show up prepared always
- Run through walls to get GSP deals done
- We don’t have to win every nickel, investing at GSP is a repeat game
- Adapt, learn from our mistakes, from our successes and from our network
- Lean into and embrace technology in all things

GSP Rules to Live By

1. Don't lose money. We believe purchase price and structure are the best forms of downside protection.
2. Don't forget Rule #1.
3. Only invest in high quality businesses. Some deals are cheap for a reason – stay away.
4. Maintain enough liquidity to go on the offense when the cycle turns against you.
5. Roll-ups are really, really, really hard.
6. Ring the bell. When the opportunity to generate DPI through dividends, recaps or monetization events, at multiples well above cycle average present themselves - take advantage. Position our businesses for maximum exit optionality.
7. None of us is as smart as “all of us”: The Team. The Team. The Team. Private Equity is a Team Sport.

GSP 5.0 Complex (including GSP 5.0 Fund-A, L.P. and GSP 5.0 Fund-B, L.P.)

Investment Valuation

In accordance with GSP's valuation policy, GSP reports all investments at fair value and utilizes several valuation methodologies including discounted cash flow, comparable transactions, public company comparables, recent investments and capitalization at entry multiple analyses to assist in such fair value determination.

Notes:

Please see tab titled "Notes & Methodologies" for footnotes referenced in this sheet. Past performance is not indicative of future results. Investors may lose invested capital. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment. GSP 5.0 refers to GSP 5.0 Complex (including GSP 5.0 Fund-A, LP and GSP 5.0 Fund-B, LP).

*Certain Gross, Net, and Regulatory IRR figures are noted as NM given the recency of GSP 5.0's investment period and will be added at the one year anniversary of the investment unless such investment has been marked up or down pursuant to GSP's valuation policy. Net and Regulatory IRR are noted as NM given the recency of GSP 5.0's investments and the allocation of expenses associated with such investments, which GSP believes makes such Net IRR and Regulatory IRR figures not meaningful given the long-term nature of the fund's investments.

** Excludes capital called in April 2026.

*** Reflects capital called in April 2026.

**** Total performance metrics for GSP 5.0 include amounts attributable to an investment in a potential take-private investment opportunity in a publicly traded multi-unit business. The fund acquired a toe-hold position in the stock in the second quarter of 2025 utilizing the fund's subscription line. Unable to gain line of sight into a transformative transaction, GSP divested the shares in the third quarter of 2025, generating a realized gain of \$6.9 million for the fund which was distributed in October 2025.

***** In December 2025, GSP raised ~\$23 million of LP co-invest capital.

***** In March 2026, GSP raised ~\$51 million of LP co-invest capital.

***** Excludes investment made in March 2026, expected to be called in the second half of 2026.

Sarku Japan¹⁴

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ¹⁵
	December 2025	100% ¹⁶	\$130.0 ¹⁶	\$130.0	1.0x / 0%	0.9x / NM	NM

Company Description:

Founded in 1987, Sarku Japan (“Sarku” or the “Company”) is the largest Japanese QSR brand in the U.S., known for freshly cooked, teppanyaki-style meals anchored by its signature Chicken Teriyaki plate prepared on a flat-top grill in front of guests.

As of April 2026, Sarku operates or franchises 206 restaurants across 33 U.S. states and Colombia (168 domestic units and 38 franchised units in Colombia). The footprint is predominantly corporate-owned (139 corporate and 67 franchised), and the concept has expanded from its mall food court roots into street locations over time.

Company Highlights:

Q1 2026 was Sarku’s first full quarter under GSP ownership and was defined by foundational work to set up the Company’s next chapter of growth.

The Company held its first Board Meeting in April, which included the full Executive leadership team and Board Advisors. Company leadership charted out the Company’s multi-year roadmap, organized around three growth pillars — Win with Our Food, Modernize the Experience, and Scale Beyond Malls — each underpinned by foundational investments in people, process, and technology. Key topics also covered included menu simplification and innovation, a more data-driven, localized pricing strategy and the continued consumer survey work that will be used to inform our brand refresh.

The Company also made significant progress with its digital and technological infrastructure upgrade, a core tenet of our deal underwrite. Sarku is working cross-functionally and with third-party implementation advisors, Crowe, to develop a phased IT roadmap with the goal of building an integrated, modern technology stack. Sarku has signed a contract with PAR to help modernize the POS and back-of-house systems. The Company has also selected PAR Punchh as the backbone for the new loyalty program and new white-labeled mobile app, and selected Olo as the platform to support first-party and third-party ordering. The team plans to roll out the new POS across the system by the end of 2026.

On the development front, Sarku is standing up the infrastructure required to scale. The team is working with third party real estate consultants to develop a comprehensive market mapping and site selection model. The team is also actively designing a 3rd-generation street unit prototype, with a goal to break ground in early 2027.

It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

¹⁵ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

¹⁶ Ownership shown on a common equity basis and includes \$55 million of co-invest. Investment amount excludes \$55 million of co-invest.

We also made two additions to our executive team this quarter, Bryan McCormick as the Chief Administration Officer and Keith Ortiz as the VP of Supply Chain. Bryan brings extensive leadership experience across HR, operations, and administration, most recently serving as Senior Vice President, Store Strategy and Operations at PetSmart. Keith spent 12 years at Yoshinoya, most recently serving as Head of Supply Chain, where he worked directly alongside Sarku CEO Jon Gilliam.

Management has not yet implemented its key demand driving initiatives, and yet same-store sales continue to trend positively, with YTD April 2026 up +1.2%, in line with our underwriting and driven by average ticket growth of 4.9%, offset by soft traffic consistent with the broader QSR sector. Importantly, the Company had not changed any of its digital marketing strategies in Q1 and plans to begin testing and investing in performance marketing throughout the remainder of 2026.

For Q1 2026, total revenue, Store-Level EBITDA, and Adj. EBITDA were \$41.6 million, \$8.0 million (~19% margin), and \$5.3 million (~13% margin), respectively, compared to \$41.5 million, \$7.9 million (~19% margin), and \$5.8 million (~14% margin) in the same period in the prior year. The decrease in Adj. EBITDA in the quarter was driven by incremental SG&A investment as we build out the corporate infrastructure.

As of Q1 2026, Sarku had net leverage of approximately 3.8x EBITDA and \$25 million of undrawn revolver capacity.

Valuation:

GSP's Q1 2026 valuation of Sarku is at a mark of 1.0x Gross MOIC / 0.9x Net MOIC. The investment is valued using a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. Our blended methodology approach results in an implied valuation multiple meaningfully below public company comparables and recent precedent transaction comparables.

The Honey Baked Ham Company¹⁷

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ¹⁸
	September 2025	87% ¹⁹	\$105.0 ¹⁹	\$124.3	1.2x / 46%	1.1x / NM	NM

Company Description:

Founded in 1957, The Honey Baked Ham Company (“HBH” or the “Company”) is an iconic American brand and franchisor selling specialty food products and best known for its premium spiral-sliced hams. For decades, the Company has been a household brand with a product portfolio tailored to holidays and occasion-based experiences. Today, HBH operates or franchises 500+ locations nationwide. In addition, the Company also offers corporate catering, e-commerce/direct-to-consumer (“DTC”), and gifting products. The business is seasonal with most sales occurring during the holiday periods of Thanksgiving, Christmas, and Easter. In addition to its strong brand heritage, consumer awareness, and loyalty, HBH has attractive unit economics of over \$1.5 million average unit volumes (“AUVs”) and 22% store-level margins²⁰, as well as a consistent track record of steady same-store growth and stable profitability.

Company Highlights:

In fiscal Q2 2026 (period ending March 29th) the Company generated \$38 million in net sales compared to the same period last year of \$34 million (+14% growth YoY) and \$27 million Adj. EBITDA loss compared to \$29 million loss for the prior year (+5% improvement YoY) (as a reminder the business historically has generated \$100 million+ of profit during the Thanksgiving/Christmas season offset by losses during the remainder of the year). For the Easter holiday, which occurred in fiscal Q3 2026, net sales were down 2% YoY driven largely by Easter falling earlier than last year and the holiday overlapping with spring break in some of the Company’s largest markets.

Over the trailing twelve months, the Company generated ~\$345 million in net sales (+3% YoY). Net sales for company-owned stores have grown 4% YoY (+2% on same-store basis), driven by the addition of new seasonal locations and the enablement of online advance ordering at seasonal locations, offset by softness in the DTC channel (down 1% YoY). HBH is ahead of our investment case with \$48 million of TTM Adj. EBITDA (vs. \$45 million in our underwriting for the same period).

The quarter marked several highlights on team building. In addition to welcoming our new CEO Deb Derby (formerly CEO of GSP 1.0 portfolio company Carrolls Restaurant Group) in January, the Company hired Carl Stealey as Chief Commercial Officer. Carl brings deep branded food and consumer leadership, with experience at Conagra Brands, Mead Johnson Nutrition, and Procter & Gamble, most recently serving as President of the Retail Business Unit at The T. Marzetti Company, where he led a ~\$1 billion multi-brand, multi-category business and drove growth by building organizational capabilities across commercial functions. We believe Carl

¹⁹ Ownership shown on a common equity basis and includes \$25.0 million of co-invest. Investment amount excludes \$25.0 million of co-invest.

²⁰ AUVs and store level margins reflect economics for mature company owned units (excluding seasonal units).

will be instrumental in spearheading marketing, growth initiatives, and expansion into new channels in the months ahead.

We are making meaningful progress executing against our value creation plan. The Company is working with third parties to identify and execute on cost saving and optimization initiatives. These initiatives span both store operations and corporate overhead. There are also several operational pilots in-store which were designed and tested over the Easter holiday which will be expanded upon for the upcoming Thanksgiving season. The Company is also building out the marketing team, focusing on improving capabilities in digital channels and CRM/loyalty. Lastly, the Company is accelerating investment in the corporate backbone - financial systems and processes, data governance, and strategic IT priorities. We look forward to reporting on these initiatives as they roll out.

As of fiscal Q2'26, Honey Baked Ham generated ~\$48 million of TTM Run-Rate Adj. EBITDA with ~\$25 million of cash on the balance sheet and an undrawn \$50 million revolver (the Company fully paid off the seasonal portion of the revolver during FY Q1)²¹. The Company is ~3.2x net senior levered²². Notably, in April 2026 the Company distributed back to shareholders ~\$19 million of tax distributions representing ~12% of capital invested.

Valuation:

GSP's Q1 2026 valuation of Honey Baked Ham is at a mark of 1.2x Gross MOIC / 1.1x Net MOIC. The investment is valued using a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. Our blended methodology approach results in an implied valuation multiple meaningfully below public company comparables and recent precedent transaction comparables.

²¹ Cash and debt figures are based on amounts not inclusive of the \$18.6 million tax distribution payment.

²² Based on definition in Credit Agreement. Includes term loan balance of \$144 million, permanent revolver balance of \$25 million, and LTM FY Q2'26 average revolver (non-permanent portion) balance of ~\$16 million and LTM average cash balance of ~\$30 million.

Grizzly MEP²³

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ²⁴
	April 2025 ²⁵	78% ²⁶	\$100.0 ²⁶	\$100.0	1.0x / 0%	0.9x / NM	NM

Company Description:

Grizzly MEP (“Grizzly” or the “Company”) is a buy-and-build consolidation in the Commercial Mechanical, Electrical, and Plumbing (“MEP”) industry focused on acquiring best-in-class founder- and entrepreneur-led businesses across the United States. Today, Grizzly is comprised of four market-leading brands with capabilities spanning HVAC, plumbing, electrical, building controls, and related services. The Company primarily serves customers in the education, healthcare and life sciences, government, industrial, military, institutional, and data center markets across +15 states in the Eastern U.S.

Company Highlights:

Q1 2026 marked Grizzly’s first full quarter operating as a four-brand platform following the close of Vermont Mechanical, Inc. (“VMI”) in October 2025. Comprising Stiles Heating & Cooling (“Stiles”), Air Design Systems (“ADS”), Excel Mechanical (“Excel”), and VMI, Grizzly today represents a scaled platform footprint spanning diverse end markets and geographies across the Eastern U.S. The platform was created at a blended entry multiple of ~8.5x Adjusted EBITDA (attaching at ~7.5x given our 1.0x liquidation preference), which remains significantly below comparable public and private market peers. With the platform foundation in place, our focus in Q1 2026 turned to the execution priorities that will define the year ahead: deploying a unified technology stack, professionalizing the go-to-market function across the operating companies, building disciplined financial controls, and continuing to advance our M&A pipeline.

In Q1 2026, Grizzly generated approximately \$33.9 million of revenue, \$6.7 million of gross profit, and \$1.5 million of brand-level adjusted EBITDA, compared to \$37.5 million of revenue, \$6.7 million of gross profit, and \$2.4 million of brand-level adjusted EBITDA in the comparable prior year period. While revenue and EBITDA declined modestly year over year, gross profit remained flat. Q1 EBITDA performance was primarily impacted by planned growth investments across the platform, including approximately ~\$3 million of annualized brand-level G&A and further investment in corporate infrastructure, operational processes, technology, and resources to support future performance. Revenue declines were largely driven by timing-related project delays at ADS (temporal in nature) and updated bidding procedures across the brands.

At the brand level in Q1, VMI delivered another strong quarter of double-digit revenue growth and EBITDA expansion driven by service mix and account management, while Excel held revenue roughly flat and delivered substantial gross margin expansion and an adjusted EBITDA inflection from professionalization

It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms, or performance to the investments described herein.

²⁴ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

²⁵ Represents date of initial investment.

²⁶ Ownership shown on a common equity basis; ownership and investment amounts shown do not reflect funding via the GSP 5.0 subscription line for Excel or VMI.

initiatives launched in early 2026. Excel continues to lead the broader platform in backlog momentum and depth, illustrating the strength of the Mid-Atlantic MEP market. At Stiles, we rolled out a redesigned bidding process during the quarter and tightened our focus on higher-quality, higher-margin opportunities, which weighed on revenue in Q1 but is expected to drive strong performance over the balance of the year. Win rates at Stiles are already trending higher under the new approach, and a growing backlog positions the brand for healthier conversion in the months ahead. ADS results were impacted by equipment timing and several plumbing project delays, though backlog at the brand remains strong and reflects attractive project margins that we expect to drive performance beginning in Q2 2026. More broadly, demand remains healthy across mission-critical end markets including data centers, industrial facilities, and education, which we view as key growth vectors for the remainder of 2026 and beyond.

Building on the executive and functional leadership team assembled at the holding company, in Q1 2026, we welcomed Wesley Brown as Vice President of FP&A and added a Senior Systems Manager to support the platform-wide technology rollout and systems integration. Wes brings extensive experience leading financial planning, budgeting, and forecasting at scaled, private equity-backed portfolio companies and is leading the rollout of enterprise-wide reporting, forecasting, KPI dashboards, and financial-planning automation. Senior-level recruiting momentum remains strong, and we are in the final stages of bringing on a new Chief Financial Officer who is highly experienced in building and scaling private equity-backed commercial services platforms, and whose appointment we look forward to formally announcing next quarter. With the senior team largely built out, our focus continues to be on execution, driving organic growth, and realizing platform synergies through the balance of 2026.

Project Kodiak, Grizzly's initiative to migrate the operating companies onto a unified technology stack, moved from planning to execution in Q1 2026. ADS went live on Sage Intacct and ServiceTitan on April 1st, with early results already surfacing sharper operational visibility and faster reporting cycles. Excel's implementation is underway, and VMI and Stiles are scheduled to onboard later this year. In Q1, we also selected a unified third-party IT managed services provider for the platform, and implemented automated dashboards across sales pipelines, bid tracking, cash forecasting, AR/AP tracking, and brand-level estimator performance. On the go-to-market front, we operationalized a unified branding and digital marketing program across the platform, deployed an AI-enabled lead-generation tool to help estimators source higher-quality bid opportunities, and launched a General Services Administration ("GSA") Schedule application process to enable streamlined federal procurement and public project growth.

Grizzly's M&A momentum continued in Q1 2026 under the leadership of our SVP of M&A, Pete Morgan. The team evaluated more than 30 opportunities in the quarter and continues to benefit from a strong pipeline of proprietary and advantaged opportunities. As of April 2026, we are under LOI with a Southeast-based, founder-owned commercial mechanical and plumbing contractor that we expect to close in May, representing Grizzly's fifth operating company (~\$2.8 million of brand-level EBITDA to be acquired at a ~7.5x multiple). In parallel, we expect to have several additional LOIs signed in the near term representing strategically compelling targets that will add meaningful density and geographic expansion, as well as broaden the platform's depth of service capabilities and expertise. We remain disciplined on valuation, focusing on opportunities that bring Grizzly into growing markets, fill geographic whitespace, expand recurring service revenue, and further build out the "three legs" of the MEP stool (mechanical, electrical, and plumbing services).

As of Q1 2026, the Company had approximately \$14 million of cash on the balance sheet and no financial debt.

Valuation:

GSP's Q1 2026 valuation of Grizzly is at a mark of 1.0x Gross MOIC / 0.9x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 11.0x multiple on Adjusted EBITDA of ~\$14 million (based on LTM Feb'26 Pro Forma Adj. EBITDA after corporate costs). Our multiple represents a ~30% discount to recent market and precedent transaction comparables. The DCF analysis forecasts the Company through 2031 and discounts cash flows at ~19% WACC.

Skybound Service Partners²⁷

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ²⁸
	May 2025 ²⁹	60% ³⁰	\$90.0 ³¹	\$95.2	1.1x / 15%	1.0x / NM	NM

Company Description:

Skybound Service Partners (“Skybound” or the “Company”) is a buy-and-build consolidation platform in the commercial roofing industry focused on acquiring best-in-class founder and entrepreneur-led businesses across the United States. We formed Skybound in partnership with Jack Miner, who spent ~15 years investing in middle-market, founder-owned commercial services companies at Cortec Group. Skybound has acquired five family and founder-owned companies located in Georgia, Minnesota, Pennsylvania, Florida and Ohio. The Company derives ~90% of its revenue from re-roofing, coatings, and service projects, primarily serving customers in the SLED (state and local government and education), multi-family, commercial and industrial end-markets.

Company Highlights:

Q1 2026 was a transformative quarter for Skybound as we recently acquired three founder-owned businesses - scaling the platform from two to five partner companies. We’ve also continued to invest in G&A at both the partner companies, as we deploy our Growth-as-a-Process playbook, and the platform level to support professionalization and integration efforts.

In February, we closed Skybound’s third acquisition, David M. Maines Associates, a family-owned business in Pennsylvania with a ~40-year operating history and deep customer relationships in the education sector. In March, we closed the acquisition of Unicoat Industrial Roofing, a founder-owned contractor based in Florida. Led by ~25-year industry veteran David Kessler, Unicoat has built a strong brand in the coatings market, one of the fastest-growing segments in the commercial roofing industry. Coatings represent a lower-ticket-size, preventative maintenance-oriented service offering that we view as recession resilient. We expect to pursue additional coatings M&A opportunities in the future as well as cross-sell opportunities through our other partner brands. Finally, in early April, we closed on the platform’s fifth acquisition with Technique Roofing Systems, a family-owned contractor based in Ohio with a ~35-year operating history spanning multiple generations and a strong service department focused on commercial and light industrial end markets.

Pro forma for these three recently completed transactions, Skybound will have created ~\$21 million of brand-level Adj. EBITDA for ~6.4x Adj. EBITDA (attaching at ~5.5x given our 1.0x liquidation preference). Our M&A pipeline remains robust with a focus on founder-owned targets that would provide further

²⁷ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

²⁸ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

²⁹ Represents date of initial investment. First capital called in July 2025.

³⁰ Represents basic ownership (excludes management incentive plan).

³¹ Includes April 2026 capital call.

geographic, service offering, customer, and end market diversification to Skybound at accretive purchase prices.

In Q1 2026, our results are inclusive of Skybound's first two partners, Roof Technology Partners ("RTP") and Quality Trusted ("QT"). Skybound generated revenue of \$13.5 million and break-even brand-level Adj. EBITDA versus \$9.6 million and \$1.4 million, respectively, in the prior year period. Our results reflect the upfront investments made as part of our Growth-as-a-Process playbook in sales leaders, estimators, service managers and greenfield operations to accelerate organic growth this year. Skybound has a strong backlog, projects that have been contractually won but not completed, totaling ~\$50 million of future revenue across RTP and QT, positioning the platform for growth heading into the spring and summer months of 2026.

We also continued to make progress on our greenfield strategy this quarter. We are encouraged by early performance at both the RTP-Houston branch (Skybound's first greenfield) since its opening in September 2025 and the QT-Chicago branch, which opened in December 2025. RTP-Houston and QT-Chicago have backlogs of ~\$6.7 million and ~\$0.6 million, respectively. Skybound also launched two additional RTP greenfields in Dallas, TX and Birmingham, AL; both already have general managers in seat, active jobs, and a combined ~\$4.2 million of revenue backlog. The goal of the Skybound greenfield playbook is to provide for a scalable, repeatable organic growth engine that can be deployed across acquisitions. We're encouraged by the early results.

At the corporate level, we've continued to build out the team. We recently hired Josh Slater to serve as Director of Integration to help lead the integration of people, processes and technology across the platform as we acquire additional brands. Josh previously spent 2 years in the same role at a blue-chip commercial roofing competitor. The Company also hired Flossie Holmes as Controller, adding depth to the platform's finance function.

As of quarter-end, the Company had ~\$14.4 million of total cash on the balance sheet and zero debt.

Valuation:

GSP's Q1 2026 valuation of Skybound is at a mark of 1.1x Gross MOIC / 1.0x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 10.0x multiple on Adjusted EBITDA of ~\$14 million (inclusive of RTP, QT, David Maines, Unicoat, and Corporate expenses). Our multiple represents a ~20% discount to public market and precedent transaction comparables.

True North Fleet Services³²

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ³³
	July 2025 ³⁴	85% ³⁵	\$50.0	\$50.0 ³⁶	1.0x / 0%	0.9x / NM	NM

Company Description:

True North Fleet Services (“TNFS” or the “Company”) is a buy-and-build consolidation platform in the commercial fleet maintenance and repair industry, focused on partnering with best-in-class operators across the U.S. to build a leading national network of in-shop and mobile service providers. We formed TNFS in partnership with GSP Operating Partner and former Executive Vice President of Truck Care at Love’s Travel Stops, Gary Price. Today, TNFS is comprised of seven brands with in-shop and mobile maintenance capabilities, offering heavy-duty repair, collision, towing, tire, and related services. The Company serves commercial fleet customers across the Northeast, Midwest, Southeast, and South regions, with a footprint concentrated near major freight corridors.

Company Highlights:

Since launching the TNFS platform in May 2025, the Company has successfully executed seven platform acquisitions. Following the closing of PennFleet, Billy Bob’s, Myles Fleet Services, and Elite Diesel in Q4 2025, TNFS closed Total Tire Solutions (“Total Tire”) in February 2026, a 3-shop specialty tire repair and service provider in southern Louisiana; Miles Truck Services (“Miles”) in April 2026, a 2-shop platform providing both in-shop and mobile capabilities in Indiana and Michigan; and Truck & Trailer Service (“Truck & Trailer”) in May 2026, a heavy-duty collision repair shop in Brooklyn, New York.

Together, these transactions bring TNFS to approximately \$65 million of pro forma revenue and \$13 million of pro forma brand-level Adj. EBITDA (before corporate costs) and provide coverage across the Northeast, Midwest, Southeast, and South regions. We’ve built the platform at an attractive entry multiple of ~6.5x Adj. EBITDA, below comparable market peers, which typically trade at low-to-mid double-digit multiples. Each seller has rolled equity to be partners with TNFS going forward.

On a consolidated basis, Q1 2026 revenue was \$12.2 million, up 3% versus Q1 2025 and brand-level Adj. EBITDA was ~\$1.5 million, below prior year by ~\$0.4 million, driven by operating expense investments we made to drive long-term earnings growth.

In Q1, we continued to build out the TNFS management team to accelerate integration, long-term growth and operational excellence across the platform. We recently hired Mike Zalas to serve as Chief Commercial

³² Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. ³⁵ Ownership shown on a common equity basis and reflects funding via the GSP 5.0 subscription line. Ownership does not reflect Miles and Truck & Trailer as the transactions closed subsequent to quarter end.

³⁶ Investment of \$50.0 million does not reflect funding via the GSP 5.0 subscription line. Investment does not reflect Miles and Truck & Trailer as the transactions closed subsequent to quarter end.

Officer. Mike brings 20+ years of experience driving profitable growth and transformation across complex, asset-intensive businesses, spending almost 15 years in various leadership roles at fleet leasing companies Wheels, Inc. and LeasePlan. The Company also hired a Director of Technical Training to lead the development of a technician training program, a Director of M&A Integration, and is onboarding a VP of Sales to work under Mike to build out the platform's sales function.

Adding mobile repair & maintenance trucks to the brands TNFS acquires is among the largest upside opportunities for the platform and enables the Company to bring service capabilities directly to the customer at their facilities, minimizing customers' asset downtime while generating recurring, high-margin work for the Company. In Q1, we made meaningful progress rolling out the initiative: Billy Bob's and PennFleet have each deployed two additional mobile units since closing, while Elite Diesel and Total Tire are in the process of launching mobile mechanical capability. Pro forma for the recent acquisitions, the platform now has 20+ mobile mechanical technicians. The Company also held the inaugural "Run to the Storm" Partner Summit in March, which generated strong alignment among our founding partners, explored cross-partner expansion into new services and revenue streams, and defined growth priorities for the remainder of 2026.

On the technology and integration front, TNFS is focused on migrating all operating companies into a unified technology stack (Workday for HR and Finance, HubSpot for CRM, FullBay & ProfitNet operating systems for mechanical & collision, etc.) and building out its operational dashboard. Once complete, the TNFS and its underlying brands will have real-time visibility into shop-level performance, financial results, and key operational KPIs, all of which will serve to improve strategic planning and decision-making across the organization and enhance organic growth.

TNFS maintains an active pipeline of founder-owned businesses designed to broaden the platform's geographic, customer, and end-market mix and create a leading national platform. The Company currently has three deals under LOI, which we expect to close in the coming months and would bring the platform to nearly \$20 million of brand-level EBITDA (before corporate costs) at a ~6x brand-level creation multiple. As of March 2026, the Company had approximately \$6 million of cash on the balance sheet and no debt.

Valuation:

GSP's Q1 2026 valuation of True North Fleet Services is at a mark of 1.0x Gross MOIC / 0.9x Net MOIC.

Notes:

Please see tab titled "Notes & Methodologies" for footnotes referenced in this sheet. Past performance is not indicative of future results. Investors may lose invested capital. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment. GSP 4.0 refers to GSP 4.0 Complex (including GSP 4.0 Fund-A, LP and GSP 4.0 Fund-B, LP).

* In October 2023, GSP raised ~\$43 million of LP co-invest capital with a follow-on investment of ~\$4.7 million in January 2025.

** Total performance metrics for GSP 4.0 include amounts attributable to a terminated investment in Encore Platform, a proposed consolidation of a Medspa roll-up (Well Labs+) and pet boarding roll up (Better Than Home). In Q1 2024, prior to initiating operational activity on acquired investments at the Encore Platform, GSP determined to end our partnership with the Encore Management team and receive a reimbursement for the initial invested capital amounts (\$13.3 million) invested by GSP 4.0 into the Encore Platform. The fund's initial invested capital amounts have been reimbursed by the Encore Management team in the entirety (\$8 million in June 2024 and \$5.3 million in August 2024). Invested capital, realized value, and total value for GSP 4.0 do not include Encore Platform of \$13.3 million each. Inclusive of these values, total amounts for GSP 4.0 would be \$679.4 million of invested capital, \$57.4 million of realized value, and \$1,069.6 million of total value. See endnote 32.

*** Includes realization event that occurred in April 2026.

³⁷ Note investment in Authentic Restaurant Brands reflects GSP 4.0 investment only.

Firebirds Wood Fired Grill³⁸

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ³⁹
	March 2023	83% ⁴⁰	\$120.7	\$215.2	1.8x / 22%	1.5x / 16%	16%

Company Description:

Founded in 2000, Firebirds (“Firebirds” or the “Company”) is a leading polished-casual dining chain with a loyal guest following, national footprint (69 units across 22 states), and best-in-class unit economics with significant whitespace for new store development.

Financial Update and Company Highlights:

During Q1 2026, Firebirds generated Revenue of \$87.6 million compared to \$80.5 million in the prior year, Store-Level EBITDA of \$17.0 million (19% margin) compared to \$16.7 million (21% margin) in the prior year, and Consolidated EBITDA of \$11.6 million (13% margin) compared to \$11.5 million (14% margin) in the prior year. On a run-rate basis, the Company generated Run-Rate Adj. EBITDA of ~\$54 million which includes full-year performance for recently opened units.

Increased food costs (specifically beef) and higher operating expenses (e.g., utilities and repair & maintenance) weighed on margins on a year-over-year basis. We believe these margin pressures are temporary in nature, and management is actively mitigating them through enhanced tracking and menu mix optimization.

Notably, Firebirds outperformed the Black Box upscale casual index in each of the last 5 months on a same-store-sales and same-store-traffic basis. In Q1 specifically, the Company’s +2.2% SSS represented ~150 bps of outperformance versus the index. In P3, Firebirds launched an enhanced marketing campaign anchored around the Company’s three-course-dinner offering and brunch program. Early results of the campaign are promising: +2.7% P3 SSS driven by the strongest YoY traffic performance since mid-2025.

In April, we hired Jeff Uttz as our new Chief Financial Officer to help lead the next phase of growth for the Company. Jeff joins Firebirds from Kura Sushi (NASDAQ: KRUS), where he served as CFO for ~4 years, helping grow the chain from 39 to 88 units. Jeff previously served as CFO of Shake Shack (NYSE: SHAK), where he was instrumental in preparing the company for its initial public offering in 2015. Jeff was deeply involved in the development of 45 new units at Shake Shack and partnered cross-functionally with the operations, real estate, marketing, human resources, and supply chain teams. Prior to Shake Shack, Jeff was the CFO of Yard House when the company was sold to Darden Restaurants (NYSE: DRI). We believe Jeff’s experience scaling some of the fastest-growing brands in America will be highly valuable as Firebirds continues to grow.

³⁹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

⁴⁰ Represents GSP ownership after \$0.9 million sell down to co-investors, founder investment of \$1.1 million post-close, and buyout of J.H. Whitney Rollover.

Since partnering with Garnett Station Partners in March 2023, Firebirds has opened thirteen new restaurants across nine states, generating average unit volumes (“AUVs”) exceeding \$5 million, consistent with system-wide AUVs. The Company expects to open seven new stores in 2026 (all seven stores are currently under development with signed leases) and has a growing pipeline of new units slated to open in 2027. In addition to its robust cash flow, the Company currently has ~\$12 million of cash on the balance sheet and ~\$23 million of revolver availability representing ample liquidity to fund future new unit development.

Valuation:

GSP’s Q1 2026 valuation of Firebirds is marked at 1.8x Gross MOIC / 1.5x Net MOIC. In order to value the investment, we used a combination of two methods (equally weighted in determining the total enterprise at valuation): (i) a discounted cash flow analysis based on historical and expected performance of the business, and (ii) a blended EBITDA multiple analysis that includes public company comparables and recent precedent transactions, applying an 8.5x multiple (~10% discount to public company comparables) on the Company’s LTM P2 2026 Run-Rate Adj. EBITDA of ~\$54 million, and P2 cash balance of \$14.2 million and debt balance of \$193.8 million.

GoodTurn Tire & Auto⁴¹

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁴²
	February 2023	76%	\$51.5	\$133.2	2.6x / 39%	2.2x / 31%	31%

Please see "Notes & Methodologies" for additional information. Past performance is not indicative of future results.

Company Description:

Founded in 2021, GoodTurn Tire & Auto ("GoodTurn" or the "Company") is a "buy-and-build" platform operating in the highly fragmented tire and general auto services industry. The Company is focused on consolidating the ~\$250 billion Do-It-For-Me (DIFM) auto services market, of which approximately ~\$100 billion is attributable to general tire and auto services. GoodTurn offers a range of services that benefit from strong industry tailwinds, including rising vehicle miles driven, an increasing domestic car parc, and the aging U.S. vehicle fleet.

GSP partnered with GoodTurn in February 2023. Over the past three years, GSP has supported the Company's growth into a ~70-unit platform (+5x growth since acquisition) operating across eight states today.

Company Highlights⁴³:

In Q1 2026, GoodTurn generated \$29.3 million in revenue and \$6.7 million in Facility EBITDA (~23% margin), compared to \$28.5 million in revenue and \$5.0 million in Facility EBITDA (~18% margin) in the prior year period. The strong performance in Q1 2026 was driven by a combination of organic growth and margin expansion. Q1 2026 same-store sales ("SSS") were up ~3% and Facility EBITDA margins increased +500 bps, driven by parts margin up +550 bps and labor margin up +230 bps versus the same period in the prior year. Adj. EBITDA was up ~\$1.2 million YoY as G&A has increased to support the scaling platform. In Q1 2026, the Company beat its Adj. EBITDA Budget by ~\$700K (~20%).

GoodTurn made several investments in its business development process during 2025 to accelerate acquisition efforts. These investments have yielded results, with the Company closing 6 deals representing 14 units and ~\$5 million in Facility EBITDA at a ~6.5x blended valuation multiple during the first quarter of 2026 (compared to 3 deals and ~\$1.6 million of Facility EBITDA acquired in the prior year period). We expect a continued strong pace of M&A throughout the next few quarters, with 11 units and +\$3.5 million of Facility EBITDA currently under LOI. As of the end of Q1 2026, on a run-rate basis including deals closed in the quarter, GoodTurn generated ~\$130 million in revenue and +\$18 million in Adj. EBITDA.

The Company increased liquidity during the quarter through an amendment to its credit facility with BMO, adding \$25 million of delayed draw term loan capacity to fund its active M&A pipeline. As of Q1 2026, GoodTurn was ~3.1x net levered with ~\$5 million of cash on hand and total liquidity of ~\$35 million,

⁴³ Financials and KPI excluding Drive, the 7-unit acquisition that closed at the end of Q1'26.

including an additional \$5 million of unfunded revolver capacity. Given the Company's strong performance, we are beginning to explore a potential monetization of the platform.

Valuation:

GSP's Q1 2026 valuation of GoodTurn Tire & Auto is at a mark of 2.6x Gross MOIC / 2.2x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 15.0x multiple on the Company's run rate Q1 2026 Adj. EBITDA of ~\$18.5 million⁴⁴. Our multiple is in-line with recent precedent transaction comparables and public market comparables. The DCF analysis forecasts the Company through 2031 and discounts cash flows at ~16% WACC.

⁴⁴ Includes base business financials through February 2026 and deals closed and under LOI as of March 2026.

Mountainside Fitness⁴⁸

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁴⁹
	August 2024	86%	\$92.5	\$125.3	1.4x / 20%	1.2x / 10%	10%

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Mountainside Fitness (“Mountainside”, “MSF”, or the “Company”) is the leading fitness brand in the Scottsdale-Phoenix MSA with industry leading unit economics and brand scores. Founded in 1991, Mountainside operates 22 gyms in the “Premium Value” segment and differentiates itself with its childcare offering, group fitness program, medical / insurance offerings, personal training, and strong customer service.

Company Highlights:

Mountainside generated same-store-sales (“SSS”) growth of 5.8% in Q1 2026 driven by strong growth from medical/insurance memberships (+19%) and membership add-ons (+41%). The Company generated Store-Level Sales of \$19.1 million, Store-Level EBITDA of \$5.8 million (30% margin), and Consolidated EBITDA of \$4.1 million (21% margin) during the first quarter 2026, compared to Q1 2025 Store-Level Sales of \$17.8 million, Store-Level EBITDA of \$5.4 million (30% margin), and Consolidated EBITDA of \$4.0 million (22% margin), respectively. The Company outperformed Q1 2026 budget by +\$0.2 million (+4%) on Consolidated EBITDA. On a run-rate basis, the Company generated TTM March 2026 Run-Rate Adj. EBITDA of ~\$19.6 million.

In February 2026, the Company opened its 22nd location in San Tan Valley. The unit has had a strong launch with 1,423 joins through Q1 2026, performing roughly in-line with Avondale (the Company’s strongest opening to date) over the same time period. In addition, Mountainside remains focused on executing against its robust new unit pipeline, with 11 new units currently identified through 2027. In the Phoenix-Scottsdale market, the Company has one new build under construction (expected to open in Q3/Q4 2026) and visibility into an additional 7 units. In Tucson, MSF began construction on its first club in March 2026, which is slated to open in Q3 2026; this location, together with two additional units in the pipeline, will mark Mountainside’s first expansion outside the Scottsdale-Phoenix market. We continue to actively evaluate opportunities to enter adjacent markets and have engaged a third-party consultant to identify and assess potential target markets for expansion.

Mountainside continues to invest in marketing and member experience to drive new customer acquisition, improve retention, and expand ancillary revenue. As of Q1 2026, the Company has completed 9 major club remodels and remains on track to deliver a fully amenitized system by year-end 2026. These upgrades continue to drive strong adoption of the “Peak” and “Wellness” add-ons, with monthly revenues surpassing \$350k in March, achieving a run-rate revenue of ~\$4.3 million. Building on this momentum, MSF has begun introducing Pilates as a new ancillary offering. Conversions are complete at 2 clubs (~230 joins across both to

⁴⁸ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. ⁴⁹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

date), with a third currently in process. Pilates is offered as an \$89/month add-on to traditional memberships with attractive payback economics. Additionally, the Company's recently launched Rewards program continues to incentivize member engagement, alongside a referral program designed to drive incremental new memberships. In Q1, MRewards reached 3.3k+ members while the referral program has led to ~400 new members enrolled with over 1k referrals submitted since launch.

As of March 2026, MSF is generating run-rate EBITDA of ~\$19.6 million and has ~2.6x net senior leverage⁵⁰ with strong liquidity for our growth plans (~\$34 million of total liquidity as of March 2026).

Valuation:

GSP's Q1 2026 valuation of Mountainside is at a mark of 1.4x Gross MOIC / 1.2x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. For the EBITDA multiple analysis, we applied a 9.0x multiple (our investment multiple was ~9.1x), representing a ~6% discount to public company comparables and recent precedent transaction comparables, on the Company's LTM Feb'26 Run-Rate Adj. EBITDA of \$19.7 million, and Feb'26 cash balance of \$2.8 million plus an addback of \$3.3 million of cash spent on capex for units in development that are not yet open and debt balance of \$60.5 million. For the discounted cash flow analysis, we used projections based on historical and expected performance to estimate the present value of the Company's future free cash flows.

⁵⁰ Excluding seller CNC.

Accident Care Alliance⁵¹

(USD in millions)

	Initial Investment Date	Ownership ⁵²	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁵³
	December 2023	66%	\$65.0	\$107.4	1.7x / 34%	1.5x / 23%	22%

Please see "Notes & Methodologies" for additional information. Past performance is not indicative of future results.

Company Description:

Accident Care Alliance ("ACA" or the "Company") was formed in 2023 as a holding company for best-in-class medical clinics across the United States that provide care to patients injured in automobile accidents. Modalities of service include chiropractic, rehab therapy, non-opioid interventional pain management, imaging, neurology, surgery, and other treatments, with auto insurers serving as the ultimate payor. ACA specializes in acquiring, operating, and scaling leading providers with strong brand recognition in their respective core markets.

Currently, ACA includes three brands: ProCare (acquired in December 2023, based in Central Texas), RejuvenX (acquired in March 2025, based in West Florida), and Relevium (acquired in March 2025, based in Las Vegas, Nevada).

Company Highlights⁵⁴:

ACA saw sustained momentum through Q1 2026. For the quarter, the Company generated Revenue of ~\$21.4 million, Facility-Level EBITDA of ~\$14.4 million (67% margin), and Adjusted EBITDA of ~\$8.6 million (40% margin), each up ~25% YoY from ~\$17.4 million, ~\$11.6 million (67% margin), and ~\$7.0 million (40% margin), respectively, in the prior-year period. The growth is inclusive of ~\$1.5 million of incremental brand-level G&A investment in the quarter as we continue to invest in the underlying infrastructure of each brand to support continued growth. In Q1 2026, ACA beat budgeted EBITDA by \$2.0 million, or 30%.

In Q1, ACA delivered +19% same-store-sales ("SSS") and +11% same-store-traffic ("SST") growth. Performance was led by continued strong growth at RejuvenX, with +48% SSS and +30% SST, driven by the brand-wide rollout of non-opioid pain management offering and slightly offset by softer performance at Relevium due to weaker tourism and immigration headwinds in Las Vegas which have impacted driving and accident patterns in the market. As of March 2026, the ACA platform operates 32 clinics across three states and is generating approximately ~\$33 million of Adjusted EBITDA on a run-rate basis (including ~\$6.0 million of run-rate ACA TopCo G&A).

During Q1 2026, ACA continued to upgrade its platform infrastructure to improve operations. At the corporate level, ACA made significant progress on its functional Centers of Excellence, including brand-level

⁵¹ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP's full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. ⁵² Represents blended ownership percentage on a common basis, excluding dilution for \$3.5 million Class C equity earnout for RejuvenX.

⁵³ Please refer to Endnote 30 in the "Notes and Methodologies" located at the end of the presentation.

⁵⁴ Adj. EBITDA represents pre-ACA TopCo G&A financials.

reporting standardization and the continued rollout of its NetSuite/Ramp ERP and EMR professionalization strategy across the platform.

In April 2026, ProCare opened its 13th unit (Manor). The seven ProCare new units opened during GSP's ownership have outperformed budgeted figures and are expected to generate +\$1 million of incremental run-rate EBITDA per box. ProCare is now focused on preparing for its entry into the Dallas market with several near-term LOIs being negotiated. RejuvenX and Relevium continued to advance their near-term pipeline with de novo locations expected in Brandon and Clearwater, Florida and Las Vegas respectively.

Each brand has made meaningful progress on service-line expansion, which we expect to continue to compound in the coming quarters. ProCare's Pain Management and Neurology programs continue to scale (~25% and ~95% YoY growth respectively) and RejuvenX's Pain Management rollout (~190% YoY growth) drove strong brand-level organic growth during the quarter.⁵⁵ Relevium launched its pharmacy service line in April through a strategic partner in Reno, and also expanded its mental health platform with a new licensed provider serving both Las Vegas and Reno via telehealth.

ACA's M&A pipeline remains active, with the team currently diligencing several new brand add-on opportunities that would further expand the platform's geographic reach and scale.

As of Q1 2026, ACA has approximately \$8 million of cash on the balance sheet and \$73 million of third-party debt (2.0x net leverage)⁵⁶, with \$32 million of remaining revolver and DDTL capacity to fund organic and inorganic growth initiatives.

Valuation:

GSP's Q1 2026 valuation of ACA is marked at 1.7x Gross MOIC / 1.5x Net MOIC. The valuation is based on a 9.0x EBITDA multiple applied to the Company's total LTM February 2026 run-rate⁵⁷ Adjusted EBITDA of \$31.6 million. The applied multiple reflects a +25% discount to recent precedent transactions and public market comparables.

⁵⁵ Represents modality YoY net revenue growth.

⁵⁶ Excludes ~\$30 million Relevium bridge loan outstanding.

⁵⁷ Run Rate only includes open units as of 3/31/2026 (i.e. excludes units in pipeline and development).

FirstRidge Service Partners⁵⁸

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁵⁹
	October 2023	53%	\$59.3	\$90.7	1.5x / 28%	1.3x / 17%	16%

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in 2023, FirstRidge Service Partners (“FirstRidge” or the “Company”) is a buy-and-build consolidation platform in the roofing replacement, restoration and repair industry. FirstRidge was formed in partnership with Abe Hidary, who previously spent nine years at Carlyle investing in buy-and-builds in the consumer and services sectors. The U.S. roofing industry is large (\$50+ billion), organically growing, and highly fragmented with over 80,000 independent contractors (top 5 are <5% of sales) with proven platforms and industrial logic for consolidation.

FirstRidge focuses on the ~\$16 billion storm segment of the roofing industry, which is insulated from economic cycles, as storm activity occurs independent of macroeconomic conditions, and expenditures are covered by insurance and considered nondiscretionary by customers. The Company unites leading brands across geographies with steady, uncorrelated weather exposure and shares best practices across the portfolio to drive growth regardless of the economic cycle.

As of Q1 2026, FirstRidge has partnered with seven brands across three states, including Ashton McGee Restoration Group (“AMRG”) and NexGen Exteriors (“NexGen”) in Minnesota, Qualis Roofing (“Qualis”), Andrus Brothers Roofing Amarillo (“ABR-A”), Andrus Brothers Roofing Lubbock (“ABR-L”), and Birdcreek Roofing (“Birdcreek”) in Texas, and Randall and Son Roofing (“RNS”) in Illinois.

Company Highlights:

In Q1 2026, FirstRidge generated \$17.0 million in revenue, \$5.1 million in gross profit (30% gross margin) and (\$1.3 million) in brand-level EBITDA as compared to \$18.9 million in revenue, \$5.0 million in gross profit (27% gross margin) and (\$1.1 million) in brand-level EBITDA in the prior year period. Excluding the Birdcreek transaction (closed September 2025) that we underwrote to decline due to a strong 1H 2025 from elevated storm activity in 2024, brand-level EBITDA is +8% YoY for the quarter. Q1 is also a seasonally low period given the timing of storm activity in our markets (usually beginning in April). On an LTM basis, FirstRidge generated \$153.3 million in revenue, \$18.6 million in brand-level EBITDA (12% margin), and \$14.8 million in Adj. EBITDA (10% margin) compared to ~\$92 million in revenue and ~\$13 million in Adj. EBITDA for the prior year LTM period. Growth was driven by a combination of organic momentum and accretive M&A, while the Company simultaneously added over \$2 million in corporate infrastructure to support continued scaling of the platform.

The first quarter serves as a strategic period to invest in sales force training and recruitment, finalize budgeting and capacity planning for the upcoming storm season in light of carryover backlog from the prior

⁵⁹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

year, and strengthen market presence through participation in industry trade shows and other marketing initiatives. Through the Company's salesforce development initiatives, 22 new sales representatives were hired in Q1.

FirstRidge continued to build out and invest in its corporate leadership team during the quarter. We hired Mark DuRei as full-time CFO in April 2026 following a 6+ month trial period as interim CFO. Mark brings over 30 years of finance leadership experience, including CFO roles at multiple PE-backed businesses spanning logistics, agriculture, and consumer goods, as well as earlier roles at Johnson & Johnson and International Paper. Mark will be focused on continuing to drive financial accountability, building a scalable finance function, and supporting our value creation plan and exit readiness initiatives.

At the brand level, Mike McComas was appointed CEO of NexGen in March. Mike brings over a decade of executive leadership in the residential roofing space, most recently serving as Group President at Legacy Restoration. Prior to Legacy, he spent nearly 12 years as VP of Finance at Harmon, a publicly traded construction firm. In his new role, Mike will oversee NexGen's day-to-day operations and drive continued growth as the brand scales within the FirstRidge platform.

FirstRidge was active in M&A during Q1, signing ~\$10 million of brand-level EBITDA under LOI across three founder-owned businesses. All three deals fit our target acquisition scorecard: quality founder-owned businesses with long operating histories in attractive markets where the platform does not operate today.

As of Q1 2026, FirstRidge had \$30 million of term loan debt, \$15 million of cash, and \$2.5 million of owned real estate value on the balance sheet and is ~1.5x net levered.⁶⁰ In April 2026, FirstRidge made a \$5 million tax distribution.

Valuation:

GSP's Q1 2026 valuation of FirstRidge is at a mark of 1.5x Gross MOIC / 1.3x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 11.0x multiple on Adjusted EBITDA of ~\$17 million (based on a multi-year average given weather dependency of our businesses). Our multiple represents a ~20% discount to recent market and precedent transaction comparables. The DCF analysis forecasts the Company through 2031 and discounts cash flows at ~15% WACC.

⁶⁰ Balances are prior to the \$5 million tax distribution made in April 2026. Net leverage calculation is consistent with what is outlined in the credit agreement.

Company Description:

Based in Florence, KY, Kona Ice (“Kona” or the “Company”) is the largest and fastest growing mobile food & beverage concept in the United States. Kona is 100% franchised with ~700 franchisees operating 3,000+ proprietary Kona vehicles that serve Hawaiian-style shaved ice in 50 states and 2 countries. Kona grows primarily through (i) new franchisees/new territory sales, (ii) ancillary vehicles and other new products & services to existing territories and (iii) introduction of additional business lines into the “Kona Network.” The Company launched Travelin’ Tom’s (“Tom’s”), its mobile coffee franchise concept, in 2021 and Beverly Ann’s, a mobile cookies and ice cream concept, in 2024.

Company Highlights:

In Q1 2026, Kona generated \$25.0 million of Revenue and \$5.7 million of Adj. EBITDA (23% margin), compared to \$19.8 million of Revenue and \$4.8 million of Adj. EBITDA (24% margin) in Q1 2025. Strong performance in vehicle sales (+27 vs. Budget, with Tom’s +9 vs. Budget) drove the YoY increases in Revenue and Adj. EBITDA.

Kona sold 54 full-size Kona trucks in Q1 (+16 vs Budget), as the January Konvention helped drive enthusiasm among franchisees. Kona also completed 40 full upfits in the quarter, including 31 existing Kona trucks that were upfitted with Blended, Kona’s smoothie add-on product for existing Kona trucks. Blended’s menu expansion into nutritional add-ons (energy & wellness boosts) is driving increased sales for franchisees as well as incremental royalty and consumables revenues for Kona.

Travelin’ Tom’s continues to show strong momentum. Tom’s delivered 15 full-size vehicles in Q1 (+9 vs. Budget), expanding the fleet to 350 full-size and 12 ancillary units in service nationwide. Tom’s cup volume was up +25% and consumables volume was up +29% YoY. The menu expansion into savory (bacon) and sweet & salty offerings (waffles) is helping to drive increased sales per unit and driving additional consumable sales for the Company. Development of the Tom’s Trailer ancillary vehicle is nearly complete (expected to launch in the next 1-2 quarters), which will provide a lower-cost expansion option for Tom’s franchisees. In the coming months, Entrepreneur magazine will release their rankings of the top New and Emerging

⁶¹ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. ⁶² Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

⁶³ On 7/11/24 the GSP 2.0 Fund closed the sale and exited its investment in Kona Ice. Additionally, on 7/11/24 the GSP 4.0 Fund made its initial investment in Kona Ice.

⁶⁴ Ownership shown on a common equity basis.

Franchises, where 'Travelin' Tom's will be ranked #1, which should provide a strong tailwind for franchisee demand. Kona Ice received the same #1 ranking by Entrepreneur magazine in 2013.

Kona continues to refine the Beverly Ann's concept after launching the franchising program in July 2025 with existing franchisees. There are currently 9 full-size and 3 ancillary units in service, and management is actively working to drive down launch costs and improve franchisee unit economics before a full rollout.

In the next few weeks, Kona is expected to complete a dividend recapitalization, closing a \$70 million credit facility (consisting of a \$55 million term loan and a \$15 million undrawn revolving credit facility) with Fifth Third and TD Bank. The proceeds, along with excess balance sheet cash, will fund a \$60 million shareholder distribution, representing ~28% of invested equity capital. Pro forma for the recapitalization, Kona will have ~\$20 million of liquidity (~\$5 million of cash and ~\$15 million of undrawn revolver availability) and net leverage of ~2x.

Valuation:

GSP's Q1 2026 valuation of Kona is at a mark of 1.2x Gross MOIC / 1.1x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 10.0x multiple on the Company's Run-Rate LTM P3 2026A Adjusted EBITDA of \$24.1 million. Our multiple represents a discount to recent precedent transaction comparables and public market comparables. The DCF analysis forecasts the Company through 2030 and discounts cash flows at ~24% WACC.

Pet Supplies Plus (FKA Bechtun Credit Partners)⁶⁵

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁶⁶
	November 2023 ⁶⁷	16% ⁶⁸	\$45.9	\$68.9 ⁶⁹	1.5x / 39%	1.3x / 23%	9%

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in 1988, Pet Supplies Plus (“PSP” or the “Company”) is the leading U.S. pet supplies franchisor with +725 locations including ~500 franchise stores. The Company generates revenue through three business segments – corporate owned and operated stores, a growing franchise business and an owned distribution network.

We acquired our ownership position in PSP through a “loan to own” transaction. We began investing in the debt of Franchise Group (“FRG”), the former parent company of PSP, in November 2023 with the plan to take the Company through bankruptcy and sell off the non-PSP assets that had gotten FRG into financial distress. PSP emerged from bankruptcy in June 2025, and we are now among the largest shareholders in the Company. GSP Senior Advisor David Barr is the Chairman of the Board.

Financial Update and Company Highlights:

PSP performed well in Q1 2026 with same-store sales +3.4%, driven by Franchise same-store sales growth of 3.9% and same-store traffic of +1.1%. In Q1 2026, the Company generated approximately \$361 million in revenue, +5.7% versus prior year, and approximately \$31 million of Adjusted EBITDA, +21.4% versus prior year, with Adjusted EBITDA margins increasing ~100 basis points despite an increase of ~\$3 million in SG&A.

The year-over-year improvement was driven by same-store sales growth in the mature units, continued ramp of new franchise units and higher gross margins across the Store and Distribution segments. The year over year growth in gross margins was driven by favorable vendor rebate timing and freight cost recognition, as well as greater efficiencies from increased volume through the Company's distribution centers.

In Q1 2026, the FRG holding company issued a \$10 million dividend from proceeds received in conjunction with the previously completed sale of Buddy's, which was the last remaining operating company owned by FRG.

Additionally, in late April 2026, PSP completed a share tender offering that GSP was active in designing. The Company acquired ~1.1 million shares (~11% of total stock) at \$34.82/sh., bringing GSP's current ownership to ~16% (from ~14%) and providing additional upside on the equity without investing incremental capital.

⁶⁵ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP's full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁶⁶ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

⁶⁷ First trade settled January 2024 with capital called December 2024.

⁶⁸ Represents Bechtun Credit Partners' ownership stake of PSP pro forma for tender offer completed April 2026.

⁶⁹ Inclusive of all trades (settled and unsettled trades).

Valuation:

GSP's Q1 2026 valuation is at a mark of 1.5x Gross MOIC / 1.3x Net MOIC. Having received a dividend from the sale of Buddy's in Q1 2026, our valuation now represents PSP and no other legacy assets from the FRG investment. To value PSP, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 9.0x multiple, ~10% discount to public company comparables and recent precedent transactions, on PSP's LTM February 2026 Run-Rate Adj. EBITDA of \$126 million. The DCF assumes a 9.0x terminal multiple and a weighted average cost of capital of 15%.

Redwood Environmental⁷⁰

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁷¹
	August 2024	70% ⁷²	\$54.8	\$54.8	1.0x / 0%	0.9x / -8%	-8%

⁷⁰ Reflects transaction close date, returns reflect date capital was called

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in 2024, Redwood Environmental (“Redwood” or the “Company”) is a buy-and-build platform of leading environmental remediation providers servicing commercial end-markets across the U.S. Bristol Environmental (“Bristol”) joined Redwood as the platform’s first investment in late 2024. In 2025, the platform expanded with the additions of Orion Environmental (“Orion”), Buckeye Elm Contracting (“Buckeye”), and Forrester Environmental (“Forrester”). Redwood offers a broad range of indoor and outdoor hazardous material services, including asbestos abatement, lead and mold abatement, selective demolition, soil and water remediation, vapor intrusion management, amongst other environmental services. The environmental services industry is well aligned with our “start small, scale fast” buy-and-build strategy, supported by (i) a large addressable market (~\$35+ billion TAM), (ii) steady organic growth (~4% CAGR) driven by regulatory enforcement and health and safety awareness, (iii) market fragmentation (top 10 providers capture only ~15–25% market share), (iv) strong industrial logic for consolidation through regional expansion and cross-selling, and (v) a track record of successful private equity-backed platforms in the space.

Company Highlights:

Organizational build-out remains a key focus for the team. On May 1, Mike Knigin joined as CEO of Redwood, bringing extensive relevant experience, including his tenure as CEO of Apache Industrial Services, where he helped grow revenue from \$20 million to ~\$1 billion over 10 years. In parallel, we’ve brought on a COO at the Redwood level to partner with Mike on our ambitious value creation initiatives. We also welcomed Tia Gamler as Corporate Controller in March, and plan to add a VP of Financial Systems and an FP&A Manager alongside the tech-stack rollout. On the organic growth front, we recently recruited a seasoned remediation professional with decades of industry experience to support new customer development and project execution in key expansion markets such as Denver and Houston.

On a pro forma basis, Redwood generated \$103.6 million in revenue and \$9.7 million in Adjusted EBITDA⁷³ for the LTM February 2026 period. Year-over-year, revenue and Adj. EBITDA declined \$1.5 million and \$4.6 million, respectively, driven primarily by investments in G&A and project delays. Market conditions throughout the year remained soft across key end markets, contributing to delays, increased competitive pressure, and more conservative bidding. Performance was challenged as several large-ticket projects across Buckeye were deferred from anticipated Q4 2025 start dates to later in 2026 (we view these delays as

⁷⁰ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁷¹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

⁷² Ownership shown on a common equity basis.

⁷³ Pro forma financials as of LTM February 2026 include Forrester, which closed in December 2025. Includes adjustment for select project delays at Buckeye and G&A allocated to growth investments.

temporary in nature), while Bristol and Orion navigated volume and mix headwinds that we expect to normalize as the year progresses. Despite market headwinds experienced in the LTM period, bid activity has accelerated, and consolidated backlog stood at ~\$63 million as of February 2026 (vs. ~\$58 million prior year⁷⁴), supporting strong momentum through 2026.

Redwood has established a strong foundation across Bristol, Orion, Buckeye, and Forrester, with an increasing focus on platform-level integration to unlock the benefits of scale. The team is executing a comprehensive Office of the CFO roadmap, including upgrading and standardizing financial processes across OpCos, selecting the end-state enterprise technology stack, and streamlining consolidated reporting platform-wide. In parallel, we are developing a repeatable greenfield expansion playbook, systematizing an AI-enabled lead-generation engine, and evaluating expansion into high-growth verticals to broaden Redwood's suite of services. We believe these initiatives will accelerate organic growth, drive cross-selling, professionalize the platform, and support value creation.

In terms of M&A, we continue to source and evaluate a strong pipeline of attractive acquisition targets aimed at diversifying our service offering and geographic footprint. Currently, Redwood has an environmental dredging acquisition under LOI as of mid-April, with a number of other actionable targets that we are working to convert in the coming weeks and months. The dredging acquisition would establish a dedicated division within Buckeye, expanding Redwood's outdoor remediation capabilities.

As of Q1 2026, Redwood has ~\$17.7 million of liquidity (~\$11.0 million of cash and ~\$6.7 million available on lines of credit). We plan to refinance with a platform credit facility in the coming months.

Valuation:

GSP's Q1 2026 valuation of Redwood is at a mark of 1.0x Gross MOIC / 0.9x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies an 11.0x multiple on Adjusted EBITDA of ~\$10 million (based on LTM Feb'26 Pro Forma Adj. EBITDA). Our multiple represents a ~20% discount to recent market and precedent transaction comparables. The DCF analysis forecasts the Company through 2031 and discounts cash flows at ~13% WACC.

⁷⁴ Reflects Bristol, Orion, and Buckeye backlog figures as of February 2025 and Forrester as of March 2025.

StayTerra⁷⁵

(USD in millions)

 STAYTERRA	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁷⁶
	September 2024	46% ⁷⁷	\$50.0	\$50.0	1.0x / 0%	0.9x / -7%	-7%

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

StayTerra (or the “Company”) is a buy-and-build consolidation platform in the vacation rental property management (“VRM”) space. The vacation rental management industry possesses many of the compelling characteristics we look for when executing a roll-up strategy: (i) a large and growing market, (ii) a highly fragmented landscape, (iii) strong unit economics, (iv) clear strategic logic for consolidation, and (v) prior private equity sponsor activity in the space.

Established in September 2024, StayTerra is a collection of premier vacation rental property management brands that manages approximately 1,700 homes across nine independent brands in multiple states, including Florida, Colorado, and South Carolina.

Company Highlights:

In Q1 2026, StayTerra generated ~\$22.5 million of revenue and ~\$6.5 million of brand-level EBITDA, compared to Budgeted ~\$23.5 million of revenue and ~\$7.5 million of brand-level EBITDA (the more relevant comparable due to the prior-year hurricane impact). Q1 2026 performance was driven by the continued inventory decline in the Florida market where nights available for rent, a proxy that management uses for unit count, has decreased ~25%+ versus 2024. The Company also saw weaker demand in its Colorado business during the quarter driven by a historically weak snow season. In the Steamboat market, for example, snowfall was ~50% below historical averages and the resort closed two weeks earlier this year, on April 5th compared to April 20th in the prior two years. We view the impacts in both markets as temporary in nature and are actively working to capture market share as these DMAs recover.

Notably, StayTerra’s non-Hurricane impacted markets continue to perform in-line with expectations, with gross rent pacing +4% for the remainder of FY26 vs. FY25 due to strong YoY occupancy trends and average daily rate growth across the portfolio. On a same-store-property view, the Florida impacted markets are pacing down low single digits compared to FY24 (normalized view due to hurricane impact in 1Q25). However, on a consolidated basis, gross rent at Prime (our main Florida brand) is pacing down ~15% vs. FY24 driven by a ~25%+ decline in nights available from units leaving the platform. The StayTerra team is focused on revitalizing business development capabilities and local marketing efforts to reaccelerate growth and capture market share.

⁷⁵ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁷⁶ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

⁷⁷ On a common ownership basis; GSP remains the largest shareholder with majority control of StayTerra.

In Q1 2026, StayTerra CEO ML Clark moved into an advisory capacity as we look to transition leadership at the Company. To that end, we have identified a permanent CEO, whom we expect to announce in the coming weeks. This executive has meaningful experience in sponsor-backed buy-and-build platforms, and we believe will be a strong leader of the platform going forward. Throughout the quarter, the StayTerra leadership team remained focused on completing the build-out of the platform's core systems and refining its operating model. All brands have been successfully migrated to StayTerra's Sage ERP and the rollout of HubSpot CRM is in progress, which we expect will streamline and automate owner- and guest-facing processes while enabling more data-driven decision-making.

The Company has a strong M&A pipeline with ongoing conversations with several sizable acquisition targets (\$2-\$5 million of EBITDA) that would add leading brands in attractive and complementary markets to the StayTerra platform.

Valuation:

GSP's Q1 2026 valuation of StayTerra is at a mark of 1.0x Gross MOIC / 0.9x Net MOIC. To value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis⁷⁸. The EBITDA Multiple analysis applies a ~12.5x multiple on the Company's Adj. EBITDA of ~\$9 million. Our multiple represents a modest discount to recent precedent transaction comparables. The DCF analysis forecasts the Company through 2030 and discounts cash flows at ~19% WACC.

⁷⁸ DCF based on GSP projection model. Terminal value assumes 12.5x multiple off ~\$20 million 2030E projected EBITDA. Weighted average cost of capital of ~19% reflects blended cost of debt and GSP target IRR.

GSP 3.0 Complex (including GSP 3.0 Fund, L.P., GSP 3 FT AC, L.P., GSP 3 CC AC, L.P., GSP 3 PJW AC, L.P., GSP 3 WC AC, L.P., GSP 3.0 Fund WGB AIV-1 L.P., GSP 3 WGB AC L.P. and GSP 3 WGB AC-PF 1, L.P.)

Investment Valuation⁷⁹

In accordance with GSP's valuation policy, GSP reports all investments at fair value and utilizes several valuation methodologies including discounted cash flow, comparable transactions, public company comparables, recent investments and capitalization at entry multiple analyses to assist in such fair value determination.

Please see "Notes & Methodologies" for additional information. Past performance is not indicative of future results.

Company Description:

Authentic Restaurant Brands ("ARB") is a consolidator of strong regional food & beverage brands. The ARB platform is comprised of 5 core regional fortress brands that each have track records of strong and stable financial performance with potential to grow within their core markets: ~230 restaurants across 5 brands with ~40+ year operating histories. The current portfolio includes: (i) P.J. Whelihan's ("PJW"), (ii) Mambo Seafood ("Mambo"), (iii) Primanti Bros. ("Primanti" or "PMAN"), (iv) Pollo Tropical ("Pollo"), and (v) Tavern in the Square ("Tavern").

Company Highlights:

The ARB family of brands continued to perform well in Q1 2026. For the quarter, the ARB platform generated Revenue, Store-Level EBITDA, and Consolidated EBITDA of \$246.2 million, \$62.3 million (25% margin), and \$45.2 million (18% margin), respectively, compared to \$226.9 million, \$54.6 million (24% margin), and \$35.6 million (16% margin), respectively, in the comparable prior year period. Store-Level EBITDA and Consolidated EBITDA exceeded budget by \$1.9 million (+70 bps) and \$3.6 million (+140 bps), respectively.

For the quarter, the ARB platform generated +5% same-store sales (+345bps better than the industry) and +5% same-store-traffic (+510bps better than the industry). The outperformance was driven by continued momentum in the Pollo and Tavern businesses. Pollo generated same-store-traffic of +7% (+770bps better than the industry), while Tavern generated same-store-traffic of +4% (+690bps better than the industry). Primanti and Mambo each posted roughly flat SSS for the quarter while PJW declined slightly due to unfavorable sports calendar and weather. As a result of this strong performance, ARB on a run-rate basis generates +\$150 million of Adj. EBITDA (burdened for ARB-level G&A expenses).

ARB continues to execute its new unit development strategy across the platform. In Q1, Tavern in the Square opened its 23rd location in Bellingham, MA, which has averaged ~\$147K in weekly sales (implying an AUV of ~\$7.7 million). More broadly, Tavern's four most recent openings are averaging ~\$195K in weekly sales (implied AUVs of ~\$10.3 million, 21% above system average, and ~\$2.5 million+ of EBITDA per box). Tavern's pipeline includes two additional units for 2026 and three to four for 2027, building on the momentum from 2025. During the quarter, Pollo Tropical finalized the build out of new unit development infrastructure to support enhanced unit growth, having already signed LOIs on two high-volume sites with several additional locations under review. P.J. Whelihan's is expected to open two new units in 2026, including a recently acquired Iron Hill Brewery site that the Company has rebranded and opened the first

⁸¹ Please refer to Endnote 30 in the "Notes and Methodologies" located at the end of the presentation.

⁸² Inclusive of the ARB co-investments, the ARB 3.0 complex has \$167.9 million of invested capital including the January 2025 capital raise.

week of May, and an additional two sites in the pipeline for 2027. At Mambo, management identified a location for a conversion in Humble, TX, expanding Mambo's footprint in Houston's growing Northeast market (expected to open in Q4'26).

In May, after three years operating in the market, ARB and Mambo management made the decision to fully exit the San Antonio market. Exiting San Antonio will allow the Company to re-allocate resources and unit growth focus in its core Houston market. The brand was unable to achieve the top quartile unit economics it enjoys in Houston and was challenged by broader consumer headwinds seen across the Hispanic-focused restaurant category in Texas, where heightened federal immigration enforcement activity has measurably softened traffic segment-wide. While the outcome fell well short of our expectations, the experience surfaced meaningful lessons about the brand-building investment and site-selection discipline required to enter a new market successfully - learnings we will carry into future expansion decisions.

In April 2026, we closed a HoldCo-level financing in which a U.K.-based institutional investor invested \$250 million into Authentic Restaurant Brands. The new capital was used to provide a dividend to existing shareholders for the return of effectively **~100% of GSP 3.0's invested capital and ~70% of GSP 4.0s invested capital in ARB.** We continue to own ~85% of ARB post-transaction. We structured the transaction at the HoldCo-level (preferred with a convertible feature at our Q4 2025 NAV) and the operating company remains conservatively levered at ~2.5x Net Debt/EBITDA with an additional ~\$300-\$500 million of incremental capacity for M&A without additional equity.

As of Q1 2026, ARB had +\$150 million of total liquidity across the platform and net sr. leverage remained modest at ~2.5x (includes ~\$7 million of cash at the ARB TopCo level).

Valuation

GSP's Q1 2026 valuation of ARB is at a mark of 3.1x Gross MOIC / 2.6x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. For the EBITDA Multiple analysis, we applied a 9.0x multiple, which is in-line with public company comparables and a discount to recent precedent transaction comparables⁸³ on the Company's Run-Rate Adj. EBITDA of ~\$150.7⁸⁴ million, and P2 cash balance of \$59.8 million and debt balance of \$451.4 million (inclusive of cash at ARB TopCo level). For the discounted cash flow analysis, we used projections based on historical and expected performance to estimate the present value of the Company's future free cash flows.

⁸³ Median 3/31/26 LTM EV/ EBITDA multiple of Darden Restaurants, Cracker Barrel, Texas Roadhouse, The Cheesecake Factory, BJ's Restaurants, and Portillo's.

⁸⁴ Valuation Run-Rate Adj. EBITDA includes ARB-level G&A expenses.

Woof Gang Bakery & Grooming⁸⁵

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁸⁶
	May 2022	90%	\$48.5	\$199.2	4.1x / 45%	3.5x / 36%	36%

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in Orlando, FL in 2007, Woof Gang Bakery & Grooming (“Woof Gang” or the “Company”) is a leading pet services and specialty retail franchisor (100% franchised) with 450+ locations open or under development across the U.S. Grooming, bathing and related services account for 80%+ of system revenue.

Company Highlights:

Woof Gang’s Q1 2026 same-store-sales (“SSS”) grew +8.6% vs. the prior year, driven by continued strength in grooming services (+14.9%), which more than offset retail headwinds during the quarter.

The Company opened 14 new stores in Q1 with no closures, ending the quarter with 310 stores across 34 states. Since GSP’s acquisition of Woof Gang, the Company has launched in 17 new states and nearly doubled its unit count over the past three years, further validating the portability of the brand and strength of service offering. Importantly, new stores continue to outperform historical averages, ramping faster and reaching higher productivity levels than prior cohorts. Stores opened in 2024-2026 are running at ~121% of the legacy new unit revenue ramp on a total Openings Quality Index (“OQI”) basis, reinforcing our confidence in the development pipeline and long-term growth trajectory of the business. The Company also signed 16 new franchise deals in Q1, maintaining its ~5 deals/month pace and supporting the 2026 plan to open ~75 stores.

Woof Gang continues to scale its proprietary product portfolio and warehouse operations. Private Label sales penetration across Woof Gang retail sales has grown from 12% pre-GSP to ~27% as of March 2026, with the newest store vintages running at ~50% of retail sales. The Company launched 95 SKUs in Q1, supporting Average Revenue per Customer (“ARPC”) growth of +37% year-over-year. As a result, the warehouse business is now contributing meaningfully to consolidated EBITDA, ahead of plan, and is expected to be a continued source of earnings growth going forward. Separately, the Company launched its first digital advertising pilot for groomer recruitment in late March, another operational lever aimed at expanding store-level capacity.

Valuation:

GSP’s Q1 2026 valuation of Woof Gang is at a mark of 4.1x Gross MOIC / 3.5x Net MOIC. In order to support the value of our investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow (“DCF”) analysis. The EBITDA Multiple analysis applies a ~25x multiple on the

Please see "Notes & Methodologies" for additional information. Past performance is not indicative of future results.

Company Description:

WOW Carwash ("WOW" or the "Company") is a Las Vegas, Nevada-based car wash platform founded in 2015 by Todd Bender and Scott Wainwright. WOW currently operates 19 express car washes, with several additional new units in various stages of development. WOW's car washes generate attractive unit economics (+\$3.0 million AUVs, +\$1.5 million of Facility-Level EBITDA) that are driven by high membership revenue contribution and an efficient labor model.

Company Highlights:

In Q1 2026, WOW generated \$11.5 million of Revenue, \$4.3 million of Adj. Facility-Level EBITDA (37% margin), and \$2.3 million of Adj. EBITDA (20% margin), compared to \$8.4 million of Revenue, \$2.9 million of Adj. Facility-Level EBITDA (34% margin), and \$1.2 million of Adj. EBITDA (14% margin) in the comparable prior year period. Despite Q1 2026 financials including the impact of several recently opened locations that are in their initial ramping stages, as well as conscious cannibalization from several strong new unit openings, the Company generated same-store sales ("SSS") of +2% for the quarter versus prior year. Excluding the two comparable locations impacted by conscious cannibalization, Q1 SSS would have been up +11%. On a run-rate basis, the Company generated ~\$18 million of LTM March 2026 EBITDA after accounting for ramping units.

The Company continues to see success in driving strong, sustainable membership growth, ending Q1 2026 with 103.2K members, up +50% on a year-over-year basis and up +11% from the prior quarter. Net member adds for the quarter were up +85% versus budget. We expect to see a continued compounding effect and uplift from member growth throughout the balance of 2026. During Q1, WOW completed the installation of the AMP POS system at all sites and soft launched the WOW Carwash app where guests can earn "Bubbles" (i.e., loyalty points). Early indications are positive, with conversion rates trending up in April. The Company continues to be very involved in the Vegas community – providing over 26,000 car washes on Community Appreciation Day in March (a new record) and 10,000 free wash cards to the teachers of the Clark County School District in April.

WOW's December 2025 acquisition is ramping ahead of expectations – the site officially converted to a WOW in early February and is approaching 3,000 members as of April. The remainder of the 2024/2025 new builds continue to ramp in line with our underwrite and are expected to reach a +\$2.5 million run-rate AUV. WOW's second site from the December acquisition is set to open in June, and two additional greenfields are

⁸⁷ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP's full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁸⁸ Please refer to Endnote 30 in the "Notes and Methodologies" located at the end of the presentation.

expected to open in Q3 and Q4 2026, respectively. Several additional sites remain under investigation as the Company continues to build out its pipeline in the greater Las Vegas market.

As of Q1 2026, WOW had ~\$21 million of pro forma liquidity (~\$17 million of cash, revolver, and DDTL availability and ~\$4 million of value from owned sites) and net senior leverage of ~4.1x (excludes any credit for owned real estate).

Valuation:

GSP's Q1 2026 valuation of WOW Carwash is at a mark of 2.2x Gross MOIC / 1.8x Net MOIC. To value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 12.0x multiple to LTM February 2026 PF Adj. EBITDA of \$18.1 million, representing a discount to recent platform transaction comps. The DCF analysis forecasts the Company through 2031 and discounts cash flows at a WACC of ~15%⁸⁹. The valuation also incorporates the February 2026 balance sheet, including ending cash balance of ~\$4 million, ~\$4 million of owned real estate, and ~\$65 million of debt.

⁸⁹ DCF based on GSP projection model including terminal value at 12.0x of \$36 million of 2031E run rate adjusted EBITDA. Weighted average cost of capital reflects WOW capital structure, blended cost of debt, and GSP target IRR.

Flagstop Carwash⁹⁰

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁹¹
	December 2022*	78%	\$27.0	\$32.7	1.2x / 7%	1.0x / 1%	1%

*Reflects transaction close date, returns reflect date capital was called

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Flagstop Carwash (“Flagstop” or the “Company”) is a Richmond, Virginia-based car wash platform founded in 1981 and led by a management team with over 25 years of car wash experience. Flagstop has 30 operating locations and is the leading express car wash brand in the Richmond DMA. Flagstop’s car washes generate attractive unit economics (+\$1.5 million AUVs, +\$0.5 million of Facility Level EBITDA) with compelling creation multiples driven by high membership revenue contribution (+80% of revenue in Q1).

Company Highlights:

In Q1 2026, Flagstop generated \$9.7 million of Revenue, \$3.4 million of Facility Level EBITDA (35%) and \$1.6 million of Adj. EBITDA (16% margin) compared to \$8.4 million of Revenue, \$3.6 million of Facility Level EBITDA (43%) and \$2.3 million of Adj. EBITDA (27% margin) in the comparable prior year period. The decline in EBITDA was largely due to a shift in peak pollen season (earlier-than-usual pollen season) in 2025 that drove high retail traffic in Q1 as well as the temporary closure of Midlothian in February for a remodel which re-opened in April. As of Q1 Flagstop operated 30 units representing ~\$11 million of run-rate EBITDA compared to ~\$8 million in the comparable prior year trailing twelve month period.

The Company ended Q1 2026 with 123.8K members, up +48% on a year-over-year basis and +14% from the prior quarter. Recurring membership revenue represented +80% of Flagstop’s revenue in the quarter (industry leading), and Q1 saw the highest member conversion rate (+19%) for any quarter in company history with continued positive momentum through April. Through April 2026, the Company’s customer and employee-facing app has grown to ~298K users (+44K in the past 3 months). Same-store sales were -3% for the quarter; SSS were flat excluding the impact of Midlothian. Normalizing for pollen season, April SSS were +9% and +1% YTD (or +3% YTD excluding Midlothian). We are also proud to announce that Flagstop has been named a Top Workplace by the Richmond-Times Dispatch for the second year in a row, earning 12 badges across culture, leadership, and workplace excellence including a Top 5% ranking in Innovation.

The Company’s 2025 sites continue to show strong ramps, with an average of ~3,500 members for those that opened as an express site in 2025. Flagstop completed the express conversion of Brandermill in late March, with the site surpassing 1,000 members in less than one month since its re-opening. Charlottesville and Mechanicsville are expected to re-open in May and July, respectively. Due to the considerable number of sites in earlier ramping stages and the investment in corporate structure to support 40+ sites, we expect LTM EBITDA to see significant growth in the back-half of the year as the new sites surpass breakeven points.

⁹⁰ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assured that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁹¹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

Flagstop plans to continue its multi-pronged growth and densification strategy – the Company is under contract with two M&A express sites, expected to open in Summer 2026, and has a committed greenfield pipeline of six additional locations expected to open in H2 '26 and H1 '27. All sites are within Virginia but outside Greater Richmond. The Company has 10+ additional M&A and greenfield sites under investigation and expects to finish 2026 with more than 35 sites and 2027 with more than 40 sites.

Valuation:

GSP's Q1 2026 valuation of Flagstop is at a mark of 1.2x Gross MOIC / 1.0x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. For the EBITDA Multiple analysis, we applied a 10.0x multiple, which is in-line with public company comparables and recent precedent transaction comparables, on the Company's Run-Rate LTM February 2026 Adj. EBITDA of \$11.1 million, and pro forma February 2026 cash and debt balances of \$1.2 million and \$66.7 million (including ~\$22.1 million of sub-debt). For the discounted cash flow analysis, we used projections based on historical and expected performance to estimate the present value of the Company's future free cash flows.

Fat Tuesday⁹²

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁹³
	April 2021	98%	\$57.5	\$28.8	0.5x / -45%	0.3x / NA	NA

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in Louisiana in 1983, Fat Tuesday (“FT” or the “Company”) is the largest Frozen Specialty Drink (“FSD”) retailer in the U.S. FT is a franchisor and operator of its FSD concept that grows through (i) organic same-store-sales, (ii) franchise sales and (iii) company-owned unit growth (both new builds and acquisitions).

Company Highlights:

Fat Tuesday same-store-sales (“SSS”) declined -5% in Q1 2026. While the Company is still facing headwinds from a continued decline in spending among its younger, lower-income customer demographic, SSS declines have decelerated in YTD 2026 (SSS of -5% in Q1 vs. -10% in FY 2025).

The Company has seen continued success with several licensing / wholesale opportunities that provide potential upside. In April 2026, the Company hired Julie Thiele as VP of Sales (most recently oversaw sales for the West Coast division at Kelvin Slush, a wholesale frozen competitor) to spearhead the Wholesale vertical. In Q1, Fat Tuesday launched a 3-store pilot with Red Lobster which saw strong initial results and is now expanding to 21 locations by June, which is the final stage to assess a nationwide rollout. The Company has also locked in a pilot with two Live Nation amphitheaters for the 2026 season. Additionally, the Company is in the final stages of launching its ready-to-drink frozen pouch product in Q2, with a can concept expected to follow later in the year.

The Company continues to explore additional low-cost, high ROI opportunities to drive sales growth for the brand, including strategic partnerships with celebrities with alcohol brands. The Company executed a successful 818 tequila collaboration for Coachella, reaching ~2,000 influencers at the 818 Outpost and generating 1.55M+ impressions. Additionally, the Company recently launched a collaboration with Snoop Dogg and Dr. Dre’s gin product (Still Gin), along with the ability to feature their name and likeness on Fat Tuesday’s machine labels.

As of Q1 2026, the Company operated or franchised 109 locations (85 domestic corporate stores, 20 franchise / license stores and 4 corporate stores in Mexico) compared to 71 total locations when GSP first invested in April 2021. In addition to ordinary course unit openings and closures, the Company executed deals in Q1 to exit 4 underperforming locations (3 closed and 1 to be closed in August) that were losing a combined ~\$0.3 million of SLEBITDA, resulting in a ~90% ROI, and is in negotiations for several other locations that have a combined SLEBITDA loss of ~\$0.5 million.

⁹² Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. There can be no assurance that GSP will achieve its investment objectives or execute on its investment strategy. It should not be assured that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁹³ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

Fat Tuesday generated YTD Feb 2026 store level sales of \$9.8 million and SLEBITDA of \$1.2 million (12% margin) compared to YTD Feb 2025 store level sales of \$8.7 million and SLEBITDA of \$1.3 million (15% margin). The decline in SLEBITDA margin is mainly attributed to sales deleveraging at existing units. While total store level sales increased +12% YoY (driven by new unit openings and ramping stores), SSS for the period declined -5%.

As of Q1 2026, Fat Tuesday had ~\$4 million in liquidity and ~\$120 million of net senior debt (~10.7x senior net leverage and ~12.6x if we include ~\$22 million of fixed 5%, no covenant PIK seller notes). As a reminder, the Company has been in breach of its leverage covenants since Q1 2024. We are actively and constructively working with our senior lenders on a longer-term solution.

Valuation:

GSP's Q1 2026 valuation of Fat Tuesday is at a mark of 0.5x Gross MOIC / 0.3x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA multiple analysis applies a 7.0x multiple on the Company's run-rate Q1 2026 Adjusted EBITDA of ~\$11 million, which includes pro forma full year contribution for new units, acquired units and other customary adjustments. The DCF analysis forecasts the Company through 2030 and discounts cash flows at ~13% WACC.

Afterburn Holdings⁹⁴

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ⁹⁵
	November 2021	20%	\$32.5	\$11.1	0.3x / -27%	0.2x / NA	NA

Company Description:

Founded in 2013 and headquartered in Houston, Texas, Afterburn Holdings (“Afterburn”, “AB”, or the “Company”) is one of the largest franchisees and area representatives of Orangetheory Fitness (“OTF”) with studios in Texas, Florida, and Washington. Orangetheory is the largest boutique fitness concept and offers a heart-rate-based total-body group workout that combines science, coaching and technology. Afterburn was acquired by Brentwood Associates (“Brentwood”) in December 2018. GSP 3.0 provided OTF with a structured security in November 2021 to finance the acquisition of the Company’s Washington locations.

Financial Update and Company Highlights:

For YTD FY26 (as of February), Afterburn’s same-store sales (“SSS”) were down ~2%. Revenue is at ~60% of pre-COVID levels. Since our investment in November 2021, Afterburn’s recovery has been in line with the Orangetheory system and materially below our expectations. At this point, given the underperformance of the overall Orangetheory platform, the majority of sponsor-backed Orangetheory franchisees have faced covenant defaults and/or have been taken over by their lenders.

That said, current declines in member counts at Afterburn have shown signs of stabilization this past quarter, with recurring member SSS performance beginning to flatten out or even show modest growth on a week-to-week basis.

Afterburn continues to focus on managing the business for cashflow. The Company continues its planned reductions in corporate G&A, and on an LTM basis (as of February 2026), Afterburn’s corporate G&A load is ~15%+ lower than the prior year.

For the LTM period, Afterburn generated total revenue and SLEBITDA of ~\$44 million and ~\$4.1 million, respectively.

Valuation:

GSP’s Q1 2026 valuation is marked at 0.3x Gross MOIC / 0.2x Net MOIC. In order to value our Afterburn investment, we performed a Discounted Cash Flow (“DCF”)⁹⁶ analysis that forecasts the business through 2030 and discounted the cash flows at a ~12% WACC.

⁹⁴ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Notes:

Please see tab titled "Notes & Methodologies" for footnotes referenced in this sheet, as well as the methodology behind the classification of investments as "Private Equity" or "Credit" within GSP 2.0. Past performance is not indicative of future results. Investors may lose invested capital. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment. GSP 2.0 refers to GSP 2.0 Fund (including GSP 2.0, L.P. and GSP 2.0A, L.P.).

* Effective Q4 2025, GSP has reconstituted the internal classification of investments within GSP 2.0 as between "Private Equity" and "Credit" to further align such internal fund composites with the classification of private equity and credit investments for GSP 3.0, GSP 4.0 and GSP 5.0. Consequently, effective Q4 2025 "Total GSP 2.0 Credit Performance" includes performance metrics associated with performing credit investments, whereas "Total GSP 2.0 Private Equity Performance" includes performance metrics from both private equity and loan-to-own credit investments made by the Fund. The inclusion of loan-to-own credit investments in the "Private Equity" rather than "Credit" performance composite results in a higher performance figure for "Total GSP 2.0 Private Equity" than if such investments were included in the "Total GSP 2.0 Credit" composite.

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

Company Description:

Founded in 2000, Leading Real Estate Services Business (the “Company”) offers multiple service lines including (i) investment sales (buy & sell representation for single-tenant, net-lease transactions), (ii) lease advisory (comprehensive real estate consulting services), (iii) development services (start to finish oversight of new net-lease projects), (iv) mortgage services (arrangement/placement of commercial real estate financing) and (v) principal real estate investing.

Company Highlights:

In Q1 2026, the Company generated \$14.4 million of revenue and \$0.4 million of Adj. EBITDA (3% margin), compared to \$12.2 million of revenue and \$0.6 million of Adj. EBITDA (5% margin) in Q1 2025. Q1 2026 Adj. EBITDA outperformed the Company’s Q1 2026 Budget by ~\$0.9 million. The increase in YoY revenue was largely related to higher commission revenue (up \$2.0 million or 35%) driven by continued momentum of the brokerage business, while margins were slightly down driven by higher commission expense (due to 1099 brokers contributing a higher share of revenue).

The Company’s brokerage business, which is highly correlated with the overall real estate and lending markets, finished the Q1 2026 period closing 138 transactions and generated \$8.1 million of revenue, above Q1 2025 revenue of \$5.9 million (146 transactions). The Company is finalizing a strategic acqui-hire of an 8-person team in a key Southern market to join the brokerage division, expected to onboard in Q2 2026.

The Capital Markets division, which launched last year, generated ~\$0.4 million of revenue in Q1 2026 and is on track to generate close to ~\$4-5 million for the full year of 2026.

The Company’s principal investing arm invested ~\$3.5 million in various principal deals and strategic PE/fund investments in Q1 2026 and received ~\$1 million of proceeds from dispositions and loan repayments during the period. As of 3/31/2026, the Company has made +\$145 million in net strategic investments since we partnered together in September 2020. At 3/31/2026, the Company had ~\$55 million in net investments (marked at FMV) across its various investment strategies.

The Company continues to monetize a portion of the real estate assets on its balance sheet to provide partial liquidity to GSP (GSP has preference on the first ~\$55 million of distributions and ~90% of the following

⁹⁷ As you may recall, the fund’s Advisory Board previously consented to a fund (the “NNN Fund”) controlled by NNN Pro, a New York based full service real estate advisory and brokerage firm, in which Matt Perelman and Alex Sloane, GSP’s co-founders, have minority, non-control investments, being permitted to lease real estate owned by the NNN Fund to WOW Car Wash (“WOW”), one of the fund’s portfolio companies. The NNN Fund is now selling all or certain of its real estate, including that leased by WOW, to a third party (i.e., non-GSP controlled) fund in which one or both of Matt Perelman and Alex Sloane expect to make minority, non-controlled investments. Although we just wanted to let you know about the above out of an abundance of transparency, there is no further action required on your part. We are available to answer any questions you may have.

⁹⁸ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP’s full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

⁹⁹ Please refer to Endnote 30 in the “Notes and Methodologies” located at the end of the presentation.

~\$65 million of additional distributions). GSP received ~\$10 million in distributions in Q1 2026, bringing the total distributions received to ~\$47 million (~85% of our equity basis). We expect to continue receiving more distributions in the upcoming months.

Valuation:

GSP's Q1 2026 valuation of the Company is at a mark of 2.1x Gross MOIC / 1.8x Net MOIC. In order to value the investment, we used a combination of an EBITDA Multiple analysis and a Discounted Cash Flow ("DCF") analysis. The EBITDA Multiple analysis applies a 7.6x multiple (our investment multiple), representing a ~18% discount to public company comparables¹⁰⁰, on the Company's LTM Q1 2026 Adj. EBITDA of \$10.2 million. The DCF analysis forecasts the Company through 2030 and discounts cash flows at ~20% WACC. To date, the Company has returned ~\$47 million to GSP (including tax distributions and ~\$10 million received in Q1 2026).

¹⁰⁰ 3/31/26 LTM EV / EBITDA median for public company comparables including CBRE, Colliers, JLL, Cushman & Wakefield, Savills, and Newmark Group.

Cerca Trova¹⁰¹

(USD in millions)

	Initial Investment Date	Ownership	Investment Amount	Q1-26 Valuation	Gross MOIC/IRR	Net MOIC/IRR	Regulatory Net IRR ¹⁰²
	July 2019	N/A	\$10.9	\$9.6	0.9x / -3%	0.8x / -5%	-5%

Please see "Notes & Methodologies" for additional information. Past performance is not indicative of future results.

Company Description:

Cerca Trova Restaurant Concepts Inc., ("Cerca Trova", the "Company" or "CT") is the largest franchisee of Outback Steakhouse with ~75 units in California, Arizona, Colorado, Nevada, and New Mexico. Cerca Trova has a 25-year history of operating Outback restaurants and holds the exclusive rights to build and operate in California (through 2031). Cerca Trova operates ~60% of all Outback franchised restaurants in the U.S.

H.I.G. Capital acquired Cerca Trova in 2015 with financing from Goldman Sachs Specialty Lending, Comvest Partners and Capital Spring. GSP acquired Capital Spring's \$20 million debt position in July 2019 for 54 cents on the dollar. We have been an active member of the lender group since our acquisition and have helped steer the Company through COVID and towards a monetization event.

Financial Update and Company Highlights:

Cerca Trova generated \$85.1 million of sales and \$2.7 million of Adjusted EBITDA 3% margin in Q1 2026 compared to \$87.2 million of sales and \$4.2 million of Adjusted EBITDA 5% margin in the comparable period in 2025. The decrease in EBITDA margin is primarily due to an increase in restaurant-level labor expenses. Same Store Sales ("SSS") for the quarter were down 2.0% with Same Store Traffic ("SST") down 5.1%. Inflation and economic uncertainty which have impacted consumers' discretionary spending has been a headwind for the Company in 2026 in addition to labor inflation which has pressured profitability.

In Q1 2026, Cerca Trova paid no cash interest payments to lenders due to the lower sales and earnings and required capital investments. GSP has cumulatively distributed \$6.1 million of total proceeds back to investors, representing ~56% of the initial basis. Inclusive of all interest and principal payments GSP has received through 3/31/2026, our net basis remaining in Cerca Trova is ~22 cents.

Valuation:

GSP's Q1 2026 valuation of Cerca Trova is at a mark of 0.9x Gross MOIC / 0.8x Net MOIC. We performed a Discounted Cash Flow ("DCF"¹⁰³) analysis that forecasts the business through 2026 and discounted the cash flows at a 19% WACC. The valuation methodology takes into account the cash interest and amortization we have already received from the investment as well as the waterfall agreement with Bloomin' to project future cash interest and proceeds to lenders at exit. This valuation reflects a recovery of ~17% of the restructured loan balance per the Waterfall negotiations with Bloomin versus GSP's purchase price of 54%

¹⁰¹ Transaction summaries are presented for informational purposes only and do not include all investments made by GSP. References to such investments should not be construed as a recommendation of any particular investment or security. GSP's full track record is available upon request. Please see the Disclaimer and Other Important Disclosures for additional important information on transaction summaries contained herein. It should not be assumed that investments made in the future by any Fund will be comparable in type, quality, terms or performance to the investments described herein.

¹⁰² Please refer to Endnote 30 in the "Notes and Methodologies" located at the end of the presentation.

¹⁰³ DCF case reflects: estimate for 2026 financials (~\$10 million of EBITDA) based on GSP projections. Terminal value assumes 3.5x multiple on \$10 million of 2026E Adj. EBITDA (reflects ~35% discount to the average multiples for franchisee and distressed casual dining comparable transactions). Valuation assumes GSP and other lenders receive ~\$3 million of interest payments in 2026 and \$7 million of cash on the balance sheet. Weighted average cost of capital of 19%.

(excluding principal and interest received to date) and current basis of ~22% which takes into account the Q1 2020, August 2021, December 2021, Q4 2022, August 2023 and January 2025 distributions.

Please see “Notes & Methodologies” for additional information. Past performance is not indicative of future results.

The Checkers equity position is the only remaining security in Bechtun 2.0.

In YTD P3 2026, Checkers generated \$59.1 million of Total Revenue and \$5.7 million of Adj. EBITDA (9.6% margin), compared to \$65.6 million of Total Revenue and \$5.4 million of Adj. EBITDA (8.3% margin) in the prior year. Topline was down due to continued industry-wide traffic pressure, specifically related to lower income consumers, as well as adverse winter weather in P1 and P2. These headwinds were partially offset by increased average check driven by pricing actions and menu mix. Despite the topline pressure, Adj. EBITDA improved YoY due to prime cost improvement and G&A discipline. As of P3 2026, Checkers generated ~\$22 million of TTM Adj. EBITDA.

The Board and management team remain focused on restoring sustainable same-store sales growth while improving unit economics. During the quarter, the Company completed its second full remodel in Daytona Beach, which delivered a +9% sales uplift versus its DMA, building on the Apopka remodel which continues to sustain +20% lift versus its DMA. Refranchising efforts are also progressing, with Cincinnati and Toledo closing in March, LOIs executed for Mobile and Biloxi/Gulfport, and Miami/West Palm Beach packages actively in market.

Checkers ended the period with ~\$29 million of total liquidity, including ~\$14 million of cash and \$15 million of delayed draw term loan capacity. Subsequent to period end, the Company drew \$8.5 million on the DDTL to support its remodel program. Net leverage remains modest at ~4.5x.

Notes:

Note: Please see tab titled “Notes & Methodologies” for footnotes referenced in this sheet. Past performance is not indicative of future results. Investors may lose invested capital. Net returns for individual investments cannot be calculated without making assumptions regarding allocation of fees, expenses and carried interest attributable to each investment. GSP 1.0 refers to Single Purpose Vehicles.

Notes and Methodologies

- Reflects a full list of realized and unrealized investments made by the Funds. In addition, depending on the types of Funds that invested in the investments, the investments can also be generally grouped into six categories. First, certain investments were made and are held through investment-specific Funds. Such investments (each, a "Single-Vehicle Investment") include: (i) Cambridge Franchise Holdings (made through Cambridge Franchise Partners, LLC), (ii) Maaco (made through Cambridge Automotive Group, LLC), (iii) Fridababy (made through GSP Baby Fund, L.P.), (iv) Heritage Funeral Homes (made through Cardinal Memorial Ultimate Holdings, LLC), (v) Massage Envy (made through CSG Investments, LLC), (vi) Ojos Locos (made through GSP OL Fund, LP), and (vii) Twin Peaks (made through GSP TP Fund, LP). Second, Credit Fund refers to Bechtun Credit Partners, LLC, which is a pooling vehicle for certain Funds and invests into certain underlying credit investments. Third, certain investments (each, a "GSP 2.0/2.0 A Investment"), including NPC, Cerca Trova, Leading Real Estate Services Business and Kona Ice, were made and are held by both GSP 2.0 A, L.P. and GSP 2.0, L.P., which are commingled investment funds that invest on a parallel basis into the same investments, provided that (a) a separate third party co-investment vehicle, GSP CRE Co-Invest, L.P. also invests into Leading Real Estate Services Business alongside GSP 2.0 A, L.P. and GSP 2.0, L.P., (b) as described in more details below, the investment in Cerca Trova was initially made by GSP Steak Fund, L.P. and subsequently sold to GSP 2.0 A, L.P. and GSP 2.0, L.P., and (c) as described in more details below, the investment in Kona Ice was initially made by GSP Ice Fund A, L.P. and GSP Ice Fund, L.P., which later changed names and converted to GSP 2.0 A, L.P. and GSP 2.0, L.P., Fourth, certain investments (each, a "GSP 3.0 Investment"), including Fat Tuesday, VIVE Collision, Mambo Seafood, P.J. Whelihan's, Primanti Bros, WOW Carwash, Afterburn Holdings, Woof Gang Bakery and Grooming and Flagstop Carwash were made and are held by both GSP 3.0 Fund, L.P. and the related GSP additional capacity funds, GSP 3 FT AC, L.P., GSP 3 CC AC, L.P., GSP 3 PJW AC, L.P., GSP 3 WC AC, L.P., GSP 3.0 Fund WGB AIV-1 LP, GSP 3 WGB AC LP and GSP 3 WGB AC-PF 1, LP (each, an "AC Fund"), together with the GSP 3.0 Fund, LP, the "GSP 3.0 Complex"). Fifth, GSP 4.0 Fund-A, LP together with GSP 4.0 Fund-B, LP (the "GSP 4.0 Complex") which are investment funds that invest on a parallel basis into the same investments. Sixth, GSP 5.0 Fund-A, LP together with GSP 5.0 Fund-B, LP (the "GSP 5.0 Complex") which are investment funds that invest on a parallel basis into the same investments. Cambridge Automotive Group, LLC and CSG Investments, LLC were managed by Matthew Perelman and Alexander Sloane.
- Date refers to the year in which the portfolio investment was first acquired or the date on which capital was called for such investment. For the sake of clarity, for several of the investments, add-on acquisition(s) were consummated or additional capital was otherwise invested, and the "Date" corresponds with the year in which the first investment in the business was made, but does not indicate the date of any such add-on acquisition or additional investment.
- Invested Capital refers to the aggregate cost of equity and other instruments purchased for cash on or after the Date by the applicable Fund, and includes any additional cash contributions made by such Fund related to the portfolio investment. The Invested Capital amount for Authentic Restaurant Brands excludes subsequently raised co-investment vehicle and excludes GSP 3.0 bridge loans for PJW and Primanti Bros.
- An investment is deemed (i) "unrealized" if the total capital invested has not been returned, and (ii) "realized" if the total capital invested has been returned even if there is remaining unrealized value. For purposes of the other notes below, references to "unrealized investments" include the unrealized portion of any realized investment or any aggregate data that has any unrealized investment component.
- Realized or "Realized Value" refers to the aggregate pre-tax proceeds received by the applicable Fund, if any, in connection with the sale of all or a portion of the corresponding portfolio investment or in connection with dividend or other current income received from or in respect of such corresponding portfolio company, and may include proceeds from interest income and tax distributions. Realized Value includes certain investments that are in the process of a realization event such as an accepted purchase offer or signed purchase agreement. Note that with respect to such investments, the Realized Value presented herein assumes the successful closing of the relevant realization event. Although GSP anticipates the closing of such transactions, each closing is subject to certain conditions and there can be no assurance that the pending transaction will be consummated or consummated on the terms anticipated.
- Unrealized (FMV), "Unrealized Value" or "Unrealized (FMV) Value" refers to the "fair market value" of an investment that has not been fully realized as determined in accordance with GSP's internal valuation policies, and does not include any Realized (Value) of such investment. Investments held for less than 1 year (determined as of March 31, 2026) that have not had a significant valuation event are marked at equity basis (i.e., equal to the Capital Invested). The "fair market value" of an investment is an estimate of the price that would be received upon the sale of such investment in an orderly transaction carried at accreted cost. The actual realized proceeds from or in respect of, and actual returns on, any unrealized investment that would be derived in the future will depend on, among other factors, future operating results, the value of the assets and market conditions at the time of disposition, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions on which the valuations herein are based. GSP believes that the Unrealized (FMV) Values presented herein are reasonable and appropriate, however, there can be no assurance that proceeds will actually be realized on these investments, or that, if and when realized, will be equal to the numbers presented. The actual realized proceeds, if any, to be received from or in respect of these investments may differ materially from the numbers indicated herein. Note that with respect to an unrealized investment, the information presented herein is generally as of March 31, 2026, or consistent with GSP's established practice (i) with respect to investments with publicly traded securities, the most recent quarter-end prior to the date of this presentation (i.e.: March 31, 2026) (ii) with respect to the Credit Fund, the most recently available month-end prior to the date of this presentation subject to information not being fully available until after month end and (iii) in the event of a past liquidity event such as a recapitalization (i.e., Cambridge Franchise Holdings) where investors had the option to fully realize their investments (even if they chose to hold their investments instead), the date of such liquidity event.
- Total or "Total Value" of any investment or portfolio of investments represents the sum of "Realized Value" and "Unrealized (FMV) Value" thereof.
- Gross MOIC (commonly referred to as "gross multiple on invested capital", i.e., the "Total Value" divided by "Capital Invested") represents the multiple of "Capital Invested", on a gross basis, and does not reflect the deduction of management fees, investment-level expenses, Fund-level expenses, carried interest or other incentive-based compensation and other fees and expenses borne by investors, which will reduce returns may be significant. See "Unrealized (FMV) Value" for important considerations related to this definition.
- Gross IRR refers to the aggregate, annual, compound, gross internal rate of return on an investment based on (i) the actual capital inflows (including initial investments and any add-on acquisitions or other additional investment) on the date each such inflow occurred and (ii) with respect to outflows, the Realized Value on each date the relevant realization occurred and, with respect to any realized investment, also Unrealized Value as a terminal value on March 31, 2026, unless otherwise indicated. "Gross IRR" does not reflect the deduction of management fees, investment-level expenses, Fund-level expenses, carried interest or other incentive-based compensation and other fees and expenses borne by investors, which will reduce returns and may be significant. An individual investor's Gross IRR is based on the actual timing of the capital inflows and thus may vary based on the timing of capital contributions. "Gross IRR" for any unrealized investment is not based on the actual timing of the capital outflows but takes into account the Unrealized Value as explained above. See "Unrealized (FMV) Value" for important considerations related to this definition.
- The "Total - GSP 1.0" row reflects the "blended" return information calculated on an aggregate "composite" basis to show the performance of Fridababy, Heritage Funeral Homes, Maaco, Massage Envy, Twin Peaks, Cambridge Franchise Holdings, Ojos Locos and does not reflect the return that would be received by any single investor. Such aggregate performance is calculated as if a single investor had invested in such investments from the inception of each entity and participated in each investment (either initial investment or subsequent investment) proportionately to the aggregate invested capital by the applicable Fund (or if multiple Funds are invested in such investment, the blended average among such Funds in terms of all relevant considerations including invested capital and fees and expenses) through March 31, 2026 (or such other date as indicated otherwise herein) or the realization date, as applicable. However, such assumption would not hold true with respect to any single investor as, among other reasons, different investors invest in different Funds in different commitment sizes and/or percentages. The "Total - GSP 2.0" row reflects the "blended" return information calculated on an aggregate "composite" basis to show the performance of NPC, Leading Real Estate Services Business, Kona Ice, Bechtun Credit Fund and Cerca Trova. The 2.0 Fund is an

uncommitted fund and allows investors to elect whether (and if so, how much) to invest in each GSP 2.0/2.0A Investment, and for certain investments, subsequent investments were made after the initial investments with different group of participating investors or by different participation percentages among participating investors compared to the initial investment. The “Total - GSP 3.0” row reflects the “blended” return information calculated on an aggregate “composite” basis to show the performance of Fat Tuesday, VIVE Collision, Authentic Restaurant Brands (3.0 Complex), WOW Car Wash, Afterburn Holdings, Woof Gang Bakery & Grooming and Flagstop Carwash. The GSP 3.0 Fund, LP provides that investments will be split 50%/50% (unless otherwise required for regulatory or certain other purposes) between the GSP 3.0 Fund, LP and an AC Fund and that investors in the GSP 3.0 Fund, LP may elect to invest their pro-rata share in each AC Fund. The “Total - GSP 4.0” row reflects the “blended” return information calculated on an aggregate “composite” basis to show the performance of GoodTurn Tire & Auto, Firebirds Wood Fired Grill, Encore Platform, FirstRidge Service Partners, Authentic Restaurant Brands (4.0 Complex), Accident Care Alliance, Kona Ice, Bechtun 4.0, Redwood Environmental, Mountainside Fitness, and StayTerra. The “Total - GSP 5.0” row reflects the “blended” return information calculated on an aggregate “composite” basis to show the performance of Grizzly MEP and Skybound Service Partners. In addition, these investments were made across multiple Funds during different economic cycles, and the stated performance reflects neither a specific investment fund nor a group of investments managed as a single portfolio. References to aggregate or composite returns reflect cash flows and performance across multiple funds and investments, and may not reflect the experience of any investor. Such returns are provided for illustrative purposes only and no individual investor has received the investment performance indicated by such composite performance data as no investor participated in all investments or participated in each investment in the same proportion on an absolute basis or relative to an individual Fund commitment, and disproportionate participation in an investment that was more or less successful than the average investment would substantially affect an individual investor’s composite performance.

11. The information in this row corresponding to “Fridababy” refers to GSP Baby Fund, L.P.’s (“GSP Baby”)’s investment in Fridababy and the return information thereof reflects GSP Baby’s portion of equity contribution and takes into account realized returns attributable to GSP Baby’s majority ownership period and GSP’s equity ownership post sale to a third-party private equity fund. The Realized Value, Total Value and (Gross and Net) IRR and MOIC numbers for Fridababy are as of December 16, 2020 (not March 31, 2026), which take into account the purchase price (inclusive of transaction related holdbacks and escrows) with respect to the completed sale of GSP Baby’s interest in Fridababy closed on such date.
12. The information corresponding to “Heritage Funeral Homes” refers to Cardinal Memorial Ultimate Holdings, LLC’s (“CMU”) investment in Heritage Funeral Homes. The Realized Value, Total Value and (Gross) IRR and MOIC numbers for Heritage Funeral Homes are as of December 23, 2020 for the realized portion of proceeds and March 31, 2026 for the rollover amount discussed below. These figures take into account the purchase price with respect to the completed sale of CMU’s interest in Heritage Funeral Homes which closed on December 23, 2020 as well as the rollover amount. As a condition of such sale, certain GSP employees and investors were required to retain a small rollover position in CMU, the value of such rollover amount is included in the Realized column as of the latest available valuation date (March 31, 2026). The Realized Value, Unrealized Value, and The Capital Invested of \$5.6 million reflects the amount the original investor group contributed the capital in respect of the initial investment and continued to hold the investment past the subsequent investment, and certain different subsequent investors contributed capital in respect of, and participated solely in, the subsequent investments. The IRR and MOIC numbers reflect the performance of the investment by the original investor group, and do not take into account the subsequent investment by subsequent investors, which was made at a different time and on different terms than the initial investment, resulting in different and in certain cases material, performance metrics than the initial investment. Information regarding the performance of the subsequent investment is available upon request.
13. The information in this row corresponding to “Massage Envy” refers to CSG Investments, LLC’s (“CSG”) investment in Massage Envy. The investors in CSG that participated in such investment included third-party investors and certain GSP employees. On March 1, 2019, CSG sold ~77% of this investment in a stock transaction and all third-party investors participated. As a condition of such sale, the participating GSP employees were required to retain a rollover position in CSG to remain invested in Massage Envy. Such rollover position was subsequently sold by CSG on January 1, 2020 (and only GSP employees participated). Although the Invested Capital, Realized Value, Unrealized Value and Total Value reflect 100% of those attributable to CSG (i.e., including the portion thereof attributable to the rollover position), the (Gross and Net) MOIC and IRR numbers take into account the sales price received by CSG solely in respect of the initial sale on March 1, 2019 (but not the rollover position valuation and the subsequent sale on January 1, 2020, in which no third-party investor participated).
14. Twin Peaks refers to GSP’s investment in GSP TP Fund L.P. On October 1, 2021, Twin Peaks was sold to Fat Brands (NASDAQ: FAT). The transaction was structured as a mix of upfront cash and preferred stock. As of March 31, 2026, \$178 million representing 2.6x net return had been returned to investors of GSP TP Fund L.P. with no remaining value.
15. The information corresponding to “Cambridge Franchise Holdings” refers to the investment by Cambridge Franchise Partners, LLC (“CFP”) in Carrols Restaurant Group (Burger King / Popeyes) (NASDAQ: TAST) (“TAST”). Cambridge Franchise Holdings consists of three investment rounds and not all rounds have been realized. CFP’s first investment period (including the initial investment round and the second investment round) started from April 1, 2015 and ended April 16, 2018 when CFP was recapitalized on April 16, 2018 (round three). “Capital Invested” reflects the aggregate capital invested for each of rounds one through three. The Realized Value reflects the aggregate realized proceeds from rounds one and two. On April 30, 2019, CFP contributed its assets to TAST in exchange an approximate 24% equity interest in TAST. Realized value as of transaction close at share price of \$9.55 per share.
16. The Realized Value, Total Value and IRR and MOIC numbers for NPC are as of April 2021, December 2021, December 2022, August 2023, January 2025, June 2025 and November 2025, which takes into account the initial distribution (\$50 million), the second distribution (\$1.5 million), the third distribution (\$2.5 million), the fourth distribution (\$0.4 million), the fifth distribution (\$0.4 million), the sixth distribution (\$0.4 million) and the seventh distribution (\$0.4 million).
17. These investments were made and are held both by GSP 2.0 A, L.P. and GSP 2.0, L.P. (and with respect to Leading Real Estate Services Business, also GSP CRE Co-Invest, L.P.) and the information presented corresponding to each such investment reflects that attributable to all such funds’ investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein.
18. The investments in Cerca Trova were initially made by GSP Steak Fund, L.P. (the “Steak Fund”), which was a commingled single-investment fund, on July 15, 2019. 100% of such investment was subsequently sold to GSP 2.0 A, L.P. and GSP 2.0, L.P., and all investors in the Steak Fund are also limited partners in GSP 2.0 A, L.P. and/or GSP 2.0, L.P. and continued to participate in such investment in Cerca Trova after such acquisition by GSP 2.0 A, L.P. and GSP 2.0, L.P. That said, certain other limited partners in GSP 2.0 A, L.P. or GSP 2.0, L.P. were not investors in the Steak Fund and do not participate in the investment by GSP 2.0 A, L.P. and GSP 2.0, L.P. in Cerca Trova.
19. The investments in Kona Ice were initially made by GSP Ice Fund A, L.P. and GSP Ice Fund, L.P. (the “Ice Funds”), which later changed names and converted to GSP 2.0 A, L.P. and GSP 2.0, L.P., respectively. All investors in the Ice Funds continued to be limited partners in GSP 2.0 A, L.P. and GSP 2.0, L.P., as applicable, and continued to participate in such investment in Kona Ice after such conversion to GSP 2.0 A, L.P. and GSP 2.0, L.P. That said, certain other limited partners in GSP 2.0 A, L.P. or GSP 2.0, L.P. were not investors in the Ice Funds and do not participate in the investment by GSP 2.0 A, L.P. and GSP 2.0, L.P. in Kona Ice.
20. Credit Fund refers to Bechtun Credit Partners, LLC, which is currently invested by three Funds including (i) GSP 2.0 A, L.P. and GSP 2.0, L.P. and (ii) GSP Debt Co-Invest, L.P. (a third-party co-investment vehicle sponsored by GSP). The Credit Fund invests in multiple credit investments, which are available upon request. The information presented corresponding to “Credit Fund” refers to that on the Credit Fund level and may not reflect the return that would be received by any underlying Fund or any investor therein. The Realized Value, Unrealized Value, Total Value and IRR and MOIC with respect to the Credit Fund are as of March 31, 2026, which reflect the most recent month-end valuation for the Credit Fund per GSP’s practices for credit investments.

21. GSP 2.0 A, L.P. and GSP 2.0, L.P. invest in the same investments but GSP 2.0 A, L.P. is a fully committed fund where fund investors must participate on a pro rata basis in accordance with their fund commitments in every investment held by the fund. In comparison, GSP 2.0, L.P. allows investors to elect whether to participate in each investment. The information presented corresponding to the "Total - GSP 2.0" row reflects the values and returns with respect to the investments by GSP 2.0, L.P., GSP 2.0 A, L.P., GSP CRE Co-Invest, L.P. and Bechtun Credit Partners, LLC in these investments which is reflective of the ownership of all Funds. Such aggregate performance is calculated as if a single investor had invested in such investments from the inception of each entity and participated in each investment (either initial investment or subsequent investment) proportionately to the aggregate invested capital by the applicable Fund (or if multiple Funds are invested in such investment, the blended average among such Funds in terms of all relevant considerations including invested capital and fees and expenses) through March 31, 2026 (or such other date as indicated otherwise herein) or the realization date, as applicable. However, such assumption would not hold true with respect to any single investor as, among other reasons, different investors invest in different Funds in different commitment sizes and/or percentages.
22. This investment was made and is held both by GSP 3.0 Fund, LP and GSP 3 FT AC, LP. and the information presented corresponding to such investment reflects that attributable to all such funds' investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein.
23. This investment was made and is held both by GSP 3.0 Fund, LP and GSP 3 CC AC, LP and the information presented corresponding to such investment reflects that attributable to all such funds' investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein. On November 10, 2023, GSP closed on the sale of VIVE Collision. All figures herein are represented as of the transaction close, including realized and unrealized proceeds. Unrealized proceeds include the current value of GSP's rolled equity and GSP's share of the estimated net present value of \$20 million deferred consideration at transaction close (collectively valued at \$15.3 million).
24. All of the restaurant brands held for the Authentic Restaurant Brands (ARB) platform were made and are held by GSP 3.0 Fund, LP, GSP 3 PJW AC, LP, and the GSP 4.0 Complex and the information presented corresponding to such investment reflects that attributable to all such funds' investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein. The Investment Amount noted for Authentic Restaurant Brands does not include the subsequently raised co-investment vehicle.
25. This investment was made and is held both by GSP 3.0 Fund, LP and GSP 3 WC AC, LP and the information presented corresponding to such investment reflects that attributable to all such funds' investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein.
26. This investment was made and is held by GSP 3.0 Fund, LP, GSP 3.0 Fund WGB AIV-1 LP, GSP 3 WGB AC LP and GSP 3 WGB AC-PF 1, LP and the information presented corresponding to such investment reflects that attributable to all such funds' investments and ownerships on an aggregate basis, and may not reflect the returns that would be received by any such fund or any investor therein.
27. "Net MOIC" and "Net IRR" take into consideration the impact of all Fund-level expenses, management fees and carried interest. Net IRR is calculated on a blended basis, taking into account each investor's net cash inflows and outflows which may vary based upon differentiated fee arrangements. The cash flow date is the date in which the limited partners contributed capital to a Fund. Distributions are included net of carried interest (where appropriate) where the distribution date is the date which GSP makes the distribution to the limited partners. These returns do not represent the actual returns of any particular investor. Net IRR will in certain circumstances be higher as a result of a Fund's use of the subscription line of credit and/or bridge financing, where GSP is able to hold investments and expenses on the subscription facility for up to 365 days. GSP 1.0 and GSP 2.0 did not deploy the use of subscription lines. Net MOIC refers to the net multiple of contributed capital (i.e., (x) the total distributions received by investors plus the investors' ending capital account balance as of the measurement date, which includes deductions for management fees, carried interest and other fees and expenses, divided by (y) total contributed capital).
28. Where applicable, the foregoing MOIC, IRR and DPI (gross and net) metrics for the GSP OL Fund, are calculated using the closing date (August 2022) and after the payment of debt and incentive compensation to the operating team.
29. DPI is the amount of since-inception distributions made to investors in respect of a particular investment or Fund, divided by since-inception capital invested. DPI is a component of an investment's or Fund's performance but does not provide a complete picture of performance and should not be regarded as performance. Additional information regarding DPI and other components of performance is available promptly upon request.
30. Regulatory Net IRR is a hypothetical performance metric that is designed to show net returns if GSP had not used a subscription line of credit or any bridge financing in respect of an investment, and is provided for illustrative purposes only. No such investors in a Fund experienced such hypothetical performance. Regulatory Net IRR relies on certain assumptions, including that capital was uniformly called from limited partners at the time all such investments in a Fund were made instead of the time capital was actually contributed from investors. Regulatory Net IRR reflects the deduction of management fees, carried interest, and other fees and expenses, but does not reflect the deduction of any interest expense or other borrowing costs since it assumes no subscription line of credit or bridge financing was used for any of a Fund's investments. An individual investor's actual Net IRR will vary based on the timing of capital contributions and distributions and will be affected by the Fund's use of a subscription line of credit or bridge financing. Net Performance figures for "extracted performance," e.g., individual investments or investments representing subsets of an individual fund's performance, are estimated and do not represent actual performance experienced by limited partners. These figures have been calculated on a model basis for the Fund by applying the gross and net performance spread of the relevant fund using the relevant metrics to the investment(s) shown. These figures illustrate the potentially substantial impact of fees, carried interest, and expenses on the gross returns of extracted performance, even though these amounts are charged or allocated at the Fund level. Please see endnotes for "Gross IRR" and "Net IRR" for further information on the Fund-level calculation methodology for each such metric.
31. On February 23, 2024, GSP 3.0 completed a follow-on investment in Flagstop Car Wash with a \$5 million 11% PIK note to effectuate Flagstop's acquisition of Green Clean Car Wash. The note matures on June 5, 2028. Subsequently, GSP 3.0 made additional investments on the same terms of \$1 million on April 22, 2025, \$1 million on June 27, 2025, \$1 million on July 9, 2025, \$500,000 on July 30, 2025, \$1,000,000 on August 26, 2025, \$1,558,000 on September 30, 2025, \$2,000,000 on December 29, 2025, and \$1,000,000 on March 31, 2026. \$9.1 million of the funding was completed via the GSP 3.0 subscription line.
32. Total performance metrics for GSP 4.0 include amounts attributable to a terminated investment in Encore Platform, a proposed consolidation of a Medspa roll-up (Well Labs+) and pet boarding roll up (Better Than Home). In Q1 2024, prior to initiating operational activity on acquired investments at the Encore Platform, GSP determined to end our partnership with the Encore Management team and receive a reimbursement for the initial invested capital amounts (\$13.3 million) invested by GSP 4.0 into the Encore Platform. The fund's initial invested capital amounts have been reimbursed by the Encore Management team in the entirety (\$8 million in June 2024 and \$5.3 million in August 2024). Invested capital, realized value, and total value for GSP 4.0 do not include Encore Platform of \$13.3 million each. Inclusive of these values, total amounts for GSP 4.0 would be \$679.4 million of invested capital, \$57.4 million of realized value, and \$1,069.6 million of total value.
